Curriculum & Instruction

College of Education

The Department of Curriculum and Instruction offers a wide range of graduate programs leading to the Master of Arts in Education, Master of Science in Education (Plan A or Plan B available), and Doctor of Education degrees. These programs are designed to prepare specialists for a variety of roles in curriculum and instruction including teaching, supervising, and coordinating subject matter areas at the elementary, middle school, senior high, and community college levels. The doctoral programs prepare leaders for public schools, universities, and other educational agencies. Specialization is available in several graduate areas.

Doctor of Education

In cooperation with the Department of Administration and Supervision, the department offers a program leading to the Doctor of Education (Ed.D.) degree in Instruction and Administration. Coursework for the Ed.D. in Instruction and Administration, Curriculum and Instruction option, will consist of a minimum of 42 graduate credits beyond the master's degree planned by the major professor and advisory committee based on the student's background, needs and goals. All course work plans will include work in the following:
1. Curriculum and Instruction,
2. Support work in education,
3. Research tool courses (minimum of 9 semester hours required), and
4. Support work outside of education.

Admission Requirements

In addition to the admission requirements set by the Graduate School, departmental requirements include a statement of professional goals, an autobiographical sketch, professional writing samples, and four letters of professional reference. Interviews are frequently requested. All materials may be submitted through The Graduate School's online application process.

Master of Arts in Education (Initial Certification Option - Secondary Education)

This program is designed for students with a completed bachelor's degree in a content field. If it is a University of Kentucky degree, the degree must be in one of the following areas: English, history, mathematics, a science, a social science, or in secondary education. Science and mathematics candidates will also work with faculty in the STEM Education Department. Students having a bachelor's degree listed above from another institution are also eligible. Students not having a degree in one of the above areas may be required to complete additional course work. A departmental requirement is recommendation to a Teacher Education Program. That process involves compliance with admission requirements of the Kentucky Education Professional Standards Board.

Students meet state initial certification requirements while completing degree requirements. Dependent upon the student's background, one may need to complete undergraduate deficiencies to meet degree and certification requirements. Consult the Director of Graduate Studies for specific information regarding degree requirements and the dual application process.
Master of Science in Education (Instructional Systems Design Option)
The Instructional Systems Design area offers a 36-hour program designed for individuals who wish to
develop their knowledge and skills in planning and designing instruction. Persons choosing this area are
frequently preparing for instructional systems design responsibilities in business and industry, government,
education, and various training organizations.

This program does not require or lead to initial teacher certification. However, previously certified
teachers can use the program to advance the rank of their teaching certificates. Both a thesis option
(Plan A, requiring 30 hours of course work and 6 hours of thesis credit) and a non-thesis option (Plan B,
requiring 36 hours of course work) are offered. All students are required to complete an 18-hour common
core including nine semester hours in the Department of Curriculum and Instruction. At least 6 hours
must be taken outside the College of Education. An additional 12 credit hours of electives are required for
the non-thesis option. The thesis option includes 6 credit hours of electives and 6 credit hours of thesis
credit. Specific programs are planned with a faculty advisor subject to the approval of the Director of
Graduate Studies.

Admission Requirements
For applicants who are not seeking advanced rank teaching certifications, in addition to the admission
requirements set by the Graduate School, there is a departmental requirement of three references. For
applicants who will pursue advanced teaching certificates, departmental requirements include initial
teacher certification and three letters of professional reference. All materials may be submitted through
The Graduate School's online application process.

Master of Arts in Education (Literacy)
Candidates for a Master of Arts in Education with Literacy as an area of concentration must meet the
specifications for a Master of Arts in Education, Plan B. The curriculum includes a minimum of 33 credit
hours according to the following distribution: a) a minimum of 30 credit hours in specified literacy related
courses, b) nine credit hours in other professional educational course work, and c) three credit hours in
course work either inside or outside the College of Education.

Completion of the Master of Arts in Education with Literacy as an area of concentration will fulfill the
academic requirements for certification as a literacy specialist.

Admissions Requirements
In addition to the admission requirements set by the Graduate School, departmental requirements for
admission to the Literacy program include initial teacher certification. Applicants without teaching
experience or initial teacher certification are considered for this program. However, those without initial
teacher certification will not receive a literacy specialist certificate.
