

## INTRODUCTION

There is a need to describe what the University Senate and the broader University community expects from members of Senate's committees and academic councils. Through the Senate's committees and academic councils, the Senate conducts its statutory responsibilities and provides outstanding academic and curricular content and guidance to those the Senate is responsible to.

This handbook is an amalgamation of requirements from the Senate Rules and best practices for proposal reviews. Senate's committees and academic councils are asked to review a wide variety of proposals and these proposals follow different paths; some committees review things that academic councils never see and vice versa. Therefore, some aspects of this handbook may be less applicable to the specific body YOU are serving on.

The Senate Rules require proposals to follow the rules within the local unit and college, although the Senate's approval process officially begins when a proposal has left the college. Generally speaking, proposals related to courses and programs take the path described below. (See the flow charts for courses and programs in the appendices for more detail about approval paths.<sup>1</sup>)

1. *Begins with the unit (department) faculty*
2. *Progresses to the college-level representative body for faculty*
3. *Reviewed by one or more academic councils*
4. *Submitted to the Senate Council office, which routes proposals*
  - a. *If the proposal is significant enough, it warrants review by a Senate committee, then presentation at a Senate Council, then a formal recommendation during a Senate meeting*
  - b. *If the proposal is more routine, it receives final approval via a ten-day web posting where the item will be posted online for senators to review and will be considered approved by lack of objection after the 10 days have lapsed.*

Governing Regulations VII ("University Organization") describes the responsibilities of department faculty as the following: "The department faculty has primary responsibility for the development of policies on such matters as academic requirements, courses of study, course offerings, graduate and research programs, and service functions." Therefore, unless faculty at the department level approve, a proposal will move no further. Approvals within Curriculog indicate approval that has been granted by the unit being represented, not approval by the individual clicking "Approve."

The following pages describe how committees and the academic councils are generally expected to function, as well as provide guidance about how the body should be reviewing curricular proposals. With few exceptions, when an item is sent to a committee, the general expectation is that the committee will review the item. Upon request, the committee or academic council can also

offer an opinion about viability, scope, resources, etc. This applies to any topic that any committee or academic council is asked to review.

Committees and academic councils conduct their work in accordance with Robert's Rules of Order, Newly Revised. This is to help ensure an efficient process as well as plenty of room for deliberation and discussion.

If questions arise during the proposal review process, contact [Sheila Brothers](#) in the Senate Council office.

## Responsibilities of Committee and Academic Council Members

Members of committees and academic councils are expected to review agenda items, be able to discuss them, and attend committee meetings. Senate's committees have a number of responsibilities and if a committee does not conduct its work effectively, the Senate is less able to provide academic and curricular guidance to those the Senate is responsible to.

At any time, if something is unclear, members are encouraged to SPEAK UP! Ask any and all pertinent questions, such as details about the proposal itself, who was involved in its development, the wording of the motion, what happens to an item if the committee approves/disapproves it, or anything else needed to make an informed decision about an agenda item.

Specifically, members have the responsibilities listed below.

- *Attend regularly and be on time.*
- *Contact the committee chair in advance if you cannot attend.*
  - *If attendance is not possible, send comments about an agenda item to the committee or academic council chair, a day in advance if possible.*
- *Read and respond to emails in a timely manner.*
- *Review agenda items prior to the meeting and come prepared to discuss the details.*
- *Assist the chair in ensuring all members have equal opportunity to participate in discussion.*
- *Have access to a quality headset with a mic if attending via video conference.*
- *Help the committee chair manage time wisely by following to the agenda and staying on topic.*
- *Remember that debate is about expressing an opinion, not about changing someone's mind.*

Members are expected to arrive at a meeting having already done the assigned reading, thought about it even if ever so briefly, and are prepared to ask questions and discuss pros/cons.

## Responsibilities of Committee Chairs

Chairs of committees and academic councils are expected to communicate about, organize, and hold regular committee meetings. Depending on workload, the chair's time may be spent on interacting with the Senate Council office and setting agendas, rather than actively reviewing proposals.

At the most practical level, chairs have the responsibilities listed below.

- *Conduct meetings according to Robert's Rules of Order, Newly Revised and ensure all members have equal opportunity to participate in discussion.*
- *Set the agenda and send it to members about two or three business days in advance.*
- *Ensure the person responsible for taking minutes is present, or find volunteer to take minutes.*
- *Address all agenda items and end meeting on time.*
- *Cancel meeting if there are no pending agenda items and nothing needs to be discussed.*
- *Submit "Transmission of Proposal to Senate" report within one business day of the committee's decision. (see appendix)*
- *Fill out and submit Activity reports on the first of the month (see appendix). These are received by staff in the Senate Council office, who will compile all such reports into a single file for review by the Senate at its next meeting.*

Be generous with your options for availability— scheduling a recurring meeting for busy academics is tough!

The Senate Rules require committees to prepare and submit a written report to the Senate Council at the end of the academic year, although the committee's meeting minutes may be used as a substitute for this requirement.

As representatives of the Senate's authority, chairs have a higher standard of responsibility. If the chair is involved in a discussion and it is not clear if the chair is expressing a personal opinion or speaking on behalf of the body, it can be confusing for others. Be aware of this higher level of interest and ensure others know if a chair is speaking individually, or as a representative of a group.

## Meetings

The committee chair will reach out to members as soon as the membership is confirmed (late August), to begin finding a time for recurring time for bi-weekly or monthly meetings.

### Meeting in Person

Identify the location ahead of time, preferably at the time when the meeting schedule is announced. Try to hold all meetings in the same location, if possible.

### Meeting Via Video Conference

The committee chair must establish that the official in-person location from which the committee chair is attending is the official location for the meeting. Those attending via video conference are expected to connect to the meeting with a good pair of headphones and a microphone.

## Hybrid Meeting

A hybrid meeting is where some members attend via video conference and others attend in person.

Find a meeting room with sufficient acoustics to allow those online and those in person to hear each other well. This usually includes a teleconference or conference call device and at least one microphone in the room. If there are not many attendees and those in-person are in a small room, microphones and good quality headsets are not as critical.

The larger the room or the more attendees there are, the harder it will be for those online to hear if the room does not have individual mics.

## Agenda Items for the First Meeting

At the first meeting, the committee or academic council chair should include agenda items that address the items listed below.

- Meeting Schedule*
  - *Describe the meeting schedule, including the, modality and physical location (if any) and then share that information with the Senate Council office.*
- Charge and Expectations*
  - *Provide the committee's charge and ensure members know what is expected of them.*
- Senate Structure*
  - *Describe how the committee fits within the larger Senate structure.*
- Overview of Rules and Policies*
  - *Review the rules, describe the checklists, etc. that govern the committee.*
- Pending Items*
  - *Review the agenda items left from last year, if any, and describe the status of each proposal (waiting on proposer, not reviewed yet, etc.).*
- Taking Minutes*
  - *Identify the person (or rotating persons) who will take minutes at every meeting.*
  - *Decide if it is necessary to record the meeting for note-taking purposes (if meeting in hybrid format or via video conference alone).*
- Agenda Deadlines*
  - *Establish standard regarding when items have to be received by in order to be placed on the next upcoming agenda.*
- Minority Report*

- *Identify the number of members required for a minority report.*
- *Reviewer Model*
  - *Determine if one member serves as primary reviewer of an item, which is useful for busier committees, or if all members will be expected to review all items (for committees with lighter workloads).*

Finally, at the first meeting the chair should remind members that members are presumed to be accessing proposals on their own, i.e. using electronic device or printing their own hard copies.

The number of items on an agenda should be limited to the what the committee can reasonably get to within the time allotted.

## Proposals

There are many types of items that are sent to Senate committees. Some Senate committees are asked to review suggestions and provide feedback, some are asked to review and recommend course or program proposals, and others are asked to review and recommend proposals that change UK's academic organizational structure. In general, the expectation is that the committee or academic council recommend that the Senate take a particular action. (Very few committees have final approval authority.)

The academic councils and the majority of committees spend their time reviewing specific proposals but are sometimes asked to investigate ideas or suggestions. Below are the types of items that Senate's committees and/or academic councils regularly review and recommend action on.

- *Individual program proposals (degree programs, certificates, progression requirements, etc.)*
- *Individual course proposals (major change, UK Core, Graduation Composition and Communication (GCCCR), etc.)*
- *University-wide academic policies and rules*
- *Academic organization structure proposals (departments, unit names, program closure, etc.)*
- *Current or proposed initiatives related to the academic mission of the University*

All proposals that require review by a Senate committee are submitted to the Senate Council office for processing prior to being sent to a committee. The majority of proposals reviewed by the Senate are processed via Curriculog, UK's curriculum management software. Access proposals

Items for potential consideration by University Senate committees, which are suggested by other than the Senate or Senate Council, reach the respective committees through the Senate Council office. Contact the Senate Council office for guidance if something arrives for a committee without having gone through Senate's normal channels.

at the URL <https://uky.curriculog.com/>. If you have problems navigating Curriculog, check with the associate dean or staff member in your college dean's office for assistance.

### Timeliness of Proposal Reviews

The academic councils often are reviewing many proposals at any given time. Because of their heavy workload, it is not reasonable to expect them to review proposals within the same timeframe as committees. However, the Senate expects its academic councils continue to work as expeditiously and efficiently as possible.

Regardless of how often a committee meets, within two weeks of receipt of a proposal from the Senate Council office the committee should have reviewed the proposal and provided comments to the proposer. Committees with heavier workloads may not be able to meet this standard, particularly towards the end of the spring semester. Committees should manage their workloads such that items requiring Senate approval are moved out of the committee prior to mid-April (if at all possible).

### Collaborating on Proposal Reviews

The level of collaboration needed among committee members and academic council members varies from group to group. Some bodies may need to have shared documents to facilitate efficient work, while other bodies may have lower workloads and do not see shared files as critically important. Over the years, committees and academic councils have used a variety of electronic resources to manage their workloads, such as Microsoft Teams and Office 365 shared files.

Contact the Senate Council office if your committee needs help establishing online collaborative spaces.

### Course and Program Proposal Checklists

The Senate Council office provides two separate curricular proposal checklists – one for courses and one for programs (see appendices). Other types of proposals are commonly reviewed by the Senate, but courses and programs make up the bulk of it. Committees and academic councils reviewing programs and courses are expected to always use these checklists.

Basic information, such as the contact person and their organizational affiliation, the name and general subject matter of the item, and its scope (i.e. who/what is affected and how much is changing) is included in the email to the committee from the Senate Council office.

At a minimum, committees are expected to address the issues/deficiencies described by the Senate Council office in the email that transmits a proposal to a committee. The committee may identify additional areas of concern that it expects a proposer to address.

## Deeper Dive into the Proposal

Committees and academic councils are encouraged to ask questions via email prior to a committee meeting, which can facilitate timely reviews. If a primary reviewer has been identified, that person can gather questions/comments from other committee members and share them with the proposer for feedback. Otherwise, the committee chair is often responsible for interacting with proposers. If there are a lot of questions, concerns, or requests for edits, that is often a sign that an item needs more work before the committee will feel comfortable voting on it.

When evaluating a proposal, the reviewer (e.g. member of an academic council or committee) must: review the proposal against a Senate-established checklist (available for courses and programs, only); know if the proposal involves a change to the Senate Rules; and seem reasonable from the standpoint of a regular human being. In other words, a reviewer does not need in-depth knowledge of the field from which a proposal stemmed.

- *If there is a checklist, use it for every proposal.*
- *If the proposal involves a Senate Rule (either explicitly or the reviewer knows that there is an existing rule about the subject), ensure that the proposal includes the specific rule changes in track changes.*
- *Any member of an academic council or committee should know if the assignments mesh with the level of the course, or if the description is not clear, or if there are contradictions within the proposal itself.*

The Senate Council office conducts a preliminary review of all items that are sent to a Senate committee. The results of that review are then communicated via email to the committee, so the committee should start with that information as they review the proposal. The committee may identify additional issues, but it is possible that the clerical review will catch all the issues.

## Contact Person for Proposal (“Proposers”)

The terms “contact person” and “proposer” are usually interchangeable. The terms refer to the person responsible for interacting with the committee or academic council during deliberations and responding to requests for more information, edits, etc. Every proposal or idea that a committee or academic council is asked to consider has a contact person. If no contact person is named within a proposal, contact the Senate Council office for guidance.

Regardless of who communicates with a proposer (committee chair, interested committee member, primary reviewer, etc.), it is reasonable to expect a response from the proposer within two weeks (10 business days). The member communicating with the proposer should keep a record of communications with the proposer, particularly if the proposer is unresponsive. This record can be a typed list, post-it note, or flagged emails sent via Outlook – the best method to track interactions with a proposer is the method that works best for an individual committee member.

When a proposer is unresponsive and someone else is expressing concern about how long it is taking for Senate to complete its review, being able to document the delays on the proposer’s part is quite helpful. If the proposal is in Curriculog, use features in that program to comment on a proposal.

The committee member who is communicating with the proposer should send an email reminder to the proposer after two weeks if the proposer has not responded. If another two weeks go by (total of four weeks), email the proposer again and include the original request, note the amount of time that has passed, but include the department chair as a CC. (This tends to get proposals moving forward.) If there is still no response, contact the Senate Council office for assistance.

Committee and academic council chairs are permitted to invite interested parties and proposers to attend.

## Meeting Agendas

When a committee or academic council chair places a *proposal* on an agenda, it is because it has been categorized as: not needing further discussion and can be placed on a consent agenda; ready to be voted on and there may be a little discussion; or not ready to be voted on and members should only expect to discuss it.

When a committee or academic council chair places an *idea for investigation* on an agenda, it indicates that the committee should be prepared to discuss it. The committee chair will help determine if a vote is necessary or if the committee's work is fulfilled with a sufficient description of the committee's thoughts.

If possible, the committee or academic council chair should determine prior to a meeting if an agenda item can go on a consent agenda (meaning no further discussion and ready to approve) or if discussion is needed prior to any vote.

The Senate Council typically passes a committee's recommendation to the Senate intact, but the Senate Council is permitted to make its own determination regarding a recommendation to the Senate to approve or disapprove, or regarding presenting the matter without recommendation.

If there is business on an agenda that is not addressed during the meeting, it returns as an initial item of business at the committee's next meeting.

When an item receives final approval, a committee chair must submit a Transmission of Proposal to Senate report. Upon receipt of this report, Senate Council staff will know to schedule the chair to attend the next possible Senate Council and Senate meetings, to present the committee's recommendation(s).

## Consent Agendas (Part of Larger Meeting Agenda)

One way to address multiple items quickly is via a consent agenda. A consent agenda is one agenda item on a regular agenda and is comprised of items that the committee or academic council feel can be easily addressed with a minimum of (or no further) discussion. Unless a proposal is exceedingly simple, limited in scope, etc., a proposal should be discussed by the committee prior to it being placed on a consent agenda.

To learn more about how consent agendas can work for you, contact the Senate Council office.

If the committee or academic council intends to use consent agendas, the body should also establish parameters to guide the committee or academic council chair in identifying items that should be placed on a consent agenda. The committee or academic council chair sets the agenda for committee and academic council meetings, so the chair is responsible for the content of the consent agenda. However, the body should have already provided guidance to the chair about what is appropriate to place on a consent agenda.

## Voting

Common parlance in motions is “move to approve” but in actuality, the committee or academic council is sending forward a recommendation that the Senate approve the item. (There are very few activities for which a committee or academic council is the final authority.)

A committee or academic council is never obligated to hold a vote until members are ready to do so.

### Rules for Voting

A majority of the voting membership constitutes a quorum for the transaction of business. If there is pending business but in advance it is known that quorum will not be met, those available to attend are permitted to meet and discuss agenda items, although no votes may be conducted without quorum. (The Senate Rules describe who the ex officio voting and nonvoting members are.) Contact the Senate Council office for assistance with who in the group has voting rights and who are non-voting members.

Generally speaking, prior to a committee or academic council holding a vote, the following must be true:

- ✓ *Members had time to review the item and did so (minimum two to three business days).*
- ✓ *Members had opportunities to ask questions and raise concerns.*
- ✓ *Proposer had an opportunity to respond to members' questions and concerns.*
- ✓ *Voting members are comfortable voting on the item.*

When it is time for a vote, a committee or academic council may believe that a proposal is ready to move to the next steps, but the proposal is missing something that is easily fixable. Committee members may opt to approve a proposal pending revisions. This is known as “approved pending.” Upon receipt of the information, file, etc. that the proposer needed to address, the committee chair or academic council coordinator can update the proposal and move the proposal to the next steps. A proposal requiring considerable revisions should be re-reviewed during a committee meeting, after which it can be voted upon.

A committee or academic council should only use “approved pending” in cases where a deficiency can be easily AND quickly addressed.

For formal approval, one member must **move to approve** <proposal name>. A different member must **second the motion**. Then if there are no more questions AND members are comfortable

with holding a vote, the committee chair can indicate **it is time to vote**. At that time, the committee chair will call for members to vote in favor or in opposition. It is not always necessary to record abstentions, but it is often the easiest way to ensure that meeting minutes reflect that a quorum was present.

## E-Voting

Senate committees and academic councils are permitted to vote via electronic means (email, survey, form, etc.). When conducting an electronic vote (“e-vote”), committees and academic councils must adhere to the guidelines below.

- 1. Items presented for an e-vote should have either been discussed previously or be the designated type of proposal that the committee puts on a consent agenda.*
- 2. One member serves the role of moving to approve the items scheduled for an e-vote.*
- 3. One member serves as the seconder of the motion to approve.*
- 4. Members are given at least three business days in which to review the items scheduled for an e-vote and make a vote.*
- 5. Members must be permitted to remove an item from an e-vote and have it discussed at the next possible meeting.*
- 6. One person is designated as the individual to track the votes and ensure a majority have voted. For Senate committees, this is usually the committee chair. For academic councils, this is usually the staff coordinator.*

## Committee Procedures

Committees and academic councils are expected to conduct business in a timely manner; a good rule of thumb is that it takes no longer than one month to review a proposal and alert the proposer to any issues, etc. It may take beyond that initial month if substantial edits are needed or there are other issues. Another way to look at it is that after a couple weeks to get started, committees and academic councils should be sending forward recommendations on proposals as often as they are receiving proposals. If committees and academic councils create some standards for review early on, it helps establish expectations of the members and those of proposers.

## Timing of Proposal Receipt and Placement on an Agenda

At its first or second meeting, committee and academic councils are expected to establish a standard regarding when items sent to the committee will be placed on an agenda. The body’s meeting schedule should inform this decision. For example, if a committee has a standing meeting once a month, the committee might decide that proposals must have been received by the committee at least two days before the meeting in order to be placed on the agenda. However,

if a committee meets twice a month, the committee might decide that proposals must have been received by the committee at least a week prior to the meeting.

If the body meets twice a month, it is reasonable to have a longer deadline for placing items on an agenda because another meeting is just around the corner. If the committee meets once a month or less frequently, it is reasonable to have a shorter deadline for placing items on an agenda because the next meeting is (at least) a month away.

## Reviewer Model

At its first or second meeting, the committee or academic council will determine if it plans to follow a reviewing model where all members review every proposal, or if a primary reviewer will be assigned, who will be responsible for the proposal, work with the proposer, and be able to present the item when it is on an agenda. The committee or academic council chair can modify the preferred model based on the committee's current workload.

Model where All Review: Suggested primarily for committees whose chairs have been told that the committee can expect to receive 10 or fewer items during the academic year. All committee members review every agenda item in detail, prior to the committee meeting where it is discussed.

Model with Primary Reviewer: Suggested primarily for committees whose chairs have been told that the committee can expect to receive more than 10 items during the academic year. The committee will need to articulate how the primary reviewer is assigned (volunteer, rotating basis, etc.). Committees can opt to use secondary and tertiary reviewers if they so choose. Other members should, at the very minimum, be familiar with the gist of every item on an agenda.

## Minority Reports

Senate's committees and academic councils, per their charge, are expected to make clear recommendations to the Senate. In rare cases a committee or academic council may not be able to come to a decision that is amenable to all members. In those situations, those voting in the minority may opt to send forward a report on the issue from the minority opposing the action recommended by the majority of members.

At its first or second meeting, the committee should decide the number of members required for a formal minority report. For example, perhaps a minority report will only be utilized if the vote was close, or if more than a certain number of members are in the minority.

To be useful to the Senate Council and/or Senate, every minority report must be in writing and submitted by the chair of the committee or academic council. Minority reports must include the name of the spokesperson of those in the minority, as well as a clear and concise description of their concerns.

## **Handouts**

At its first or second meeting, committees and academic councils can affirm that members are presumed to be accessing proposals on a portable device or PC. Members are expected to print their own hard copies if they do not plan to use an electronic device.

# How To Schedule a Meeting

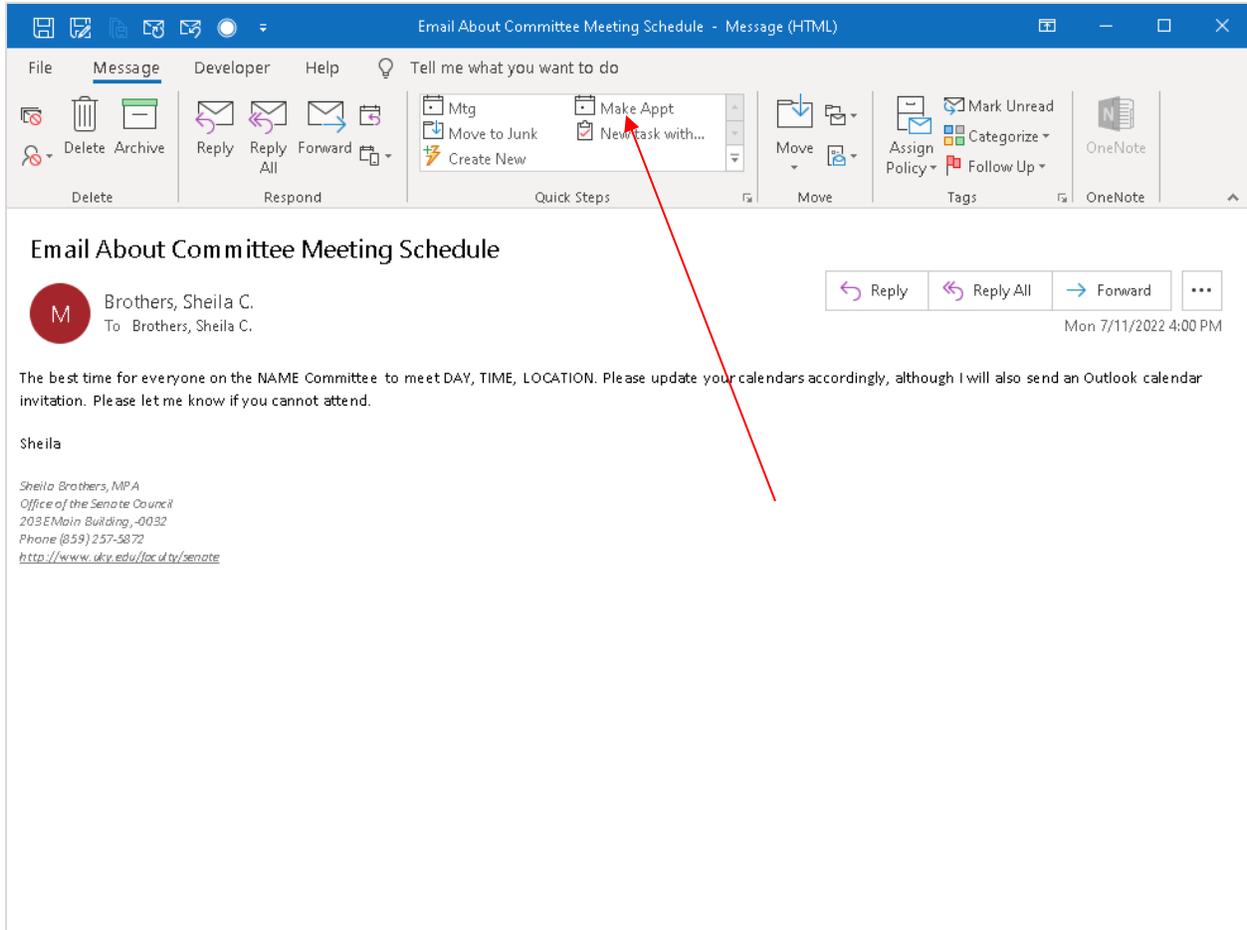

Make a note of your available times and use those as the basis for asking committee members to share the times when they are available to meet.

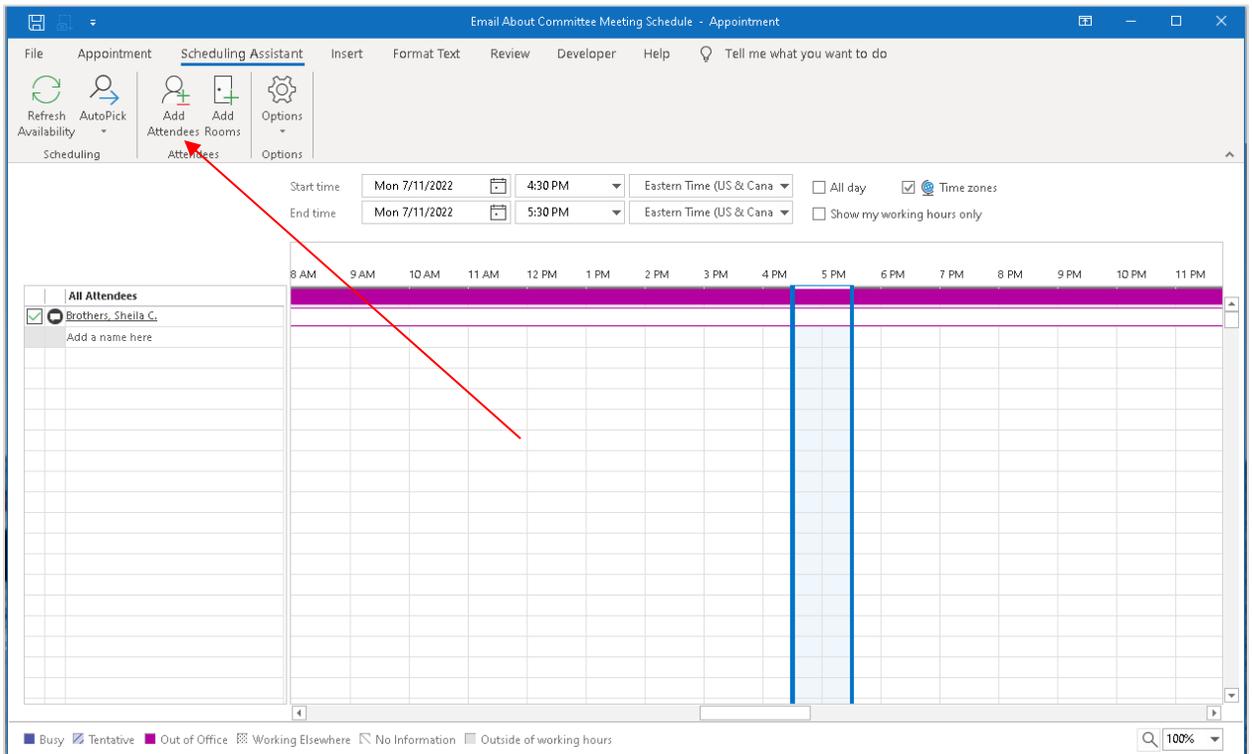

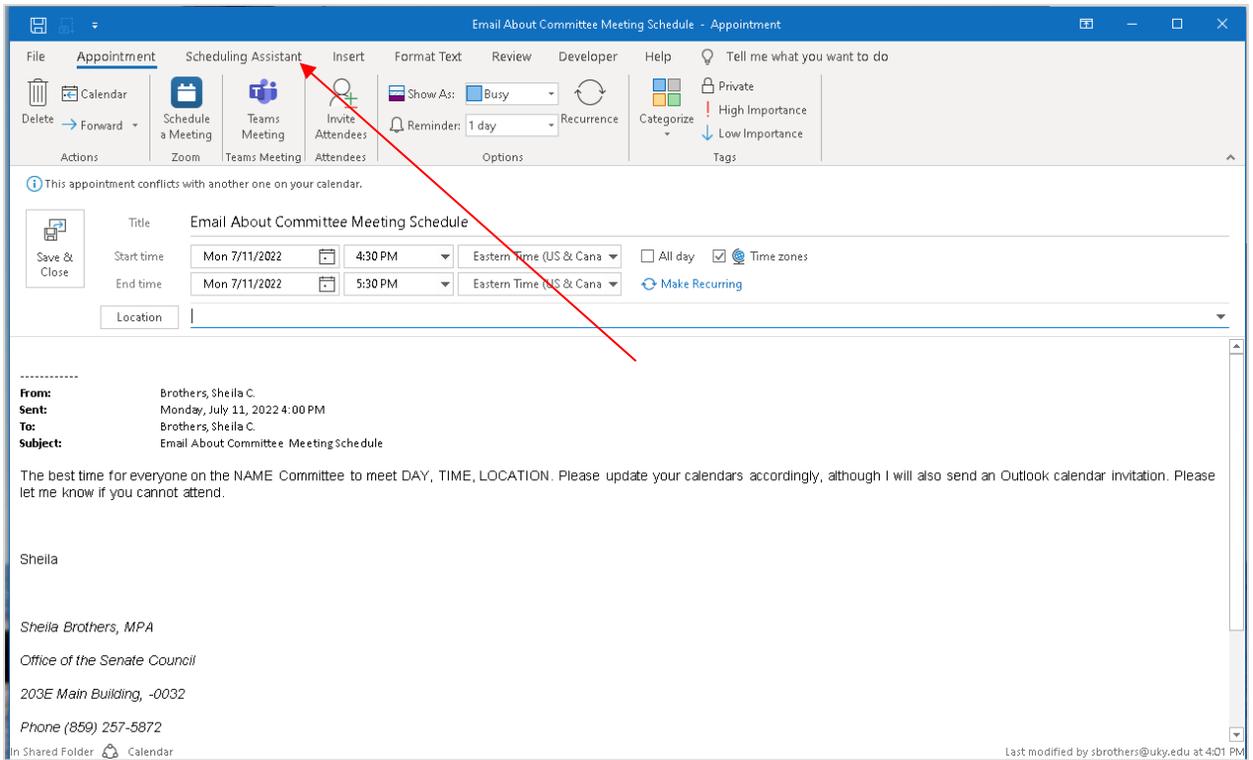

Many tools are available to help with scheduling (including Outlook) but perhaps the simplest is Doodle (<https://doodle.com/en/>). It is not necessary to create an account, but some features (like adding “if need be” to the options) require signing up for a free account.

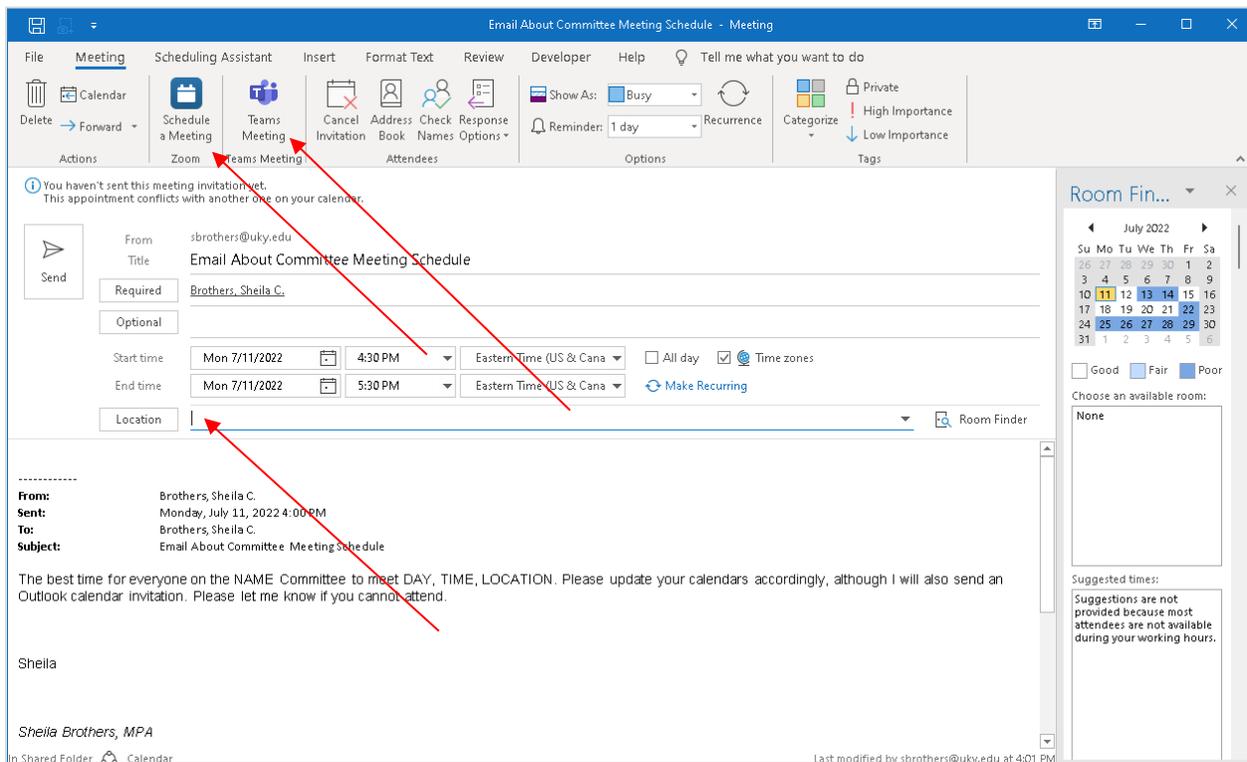

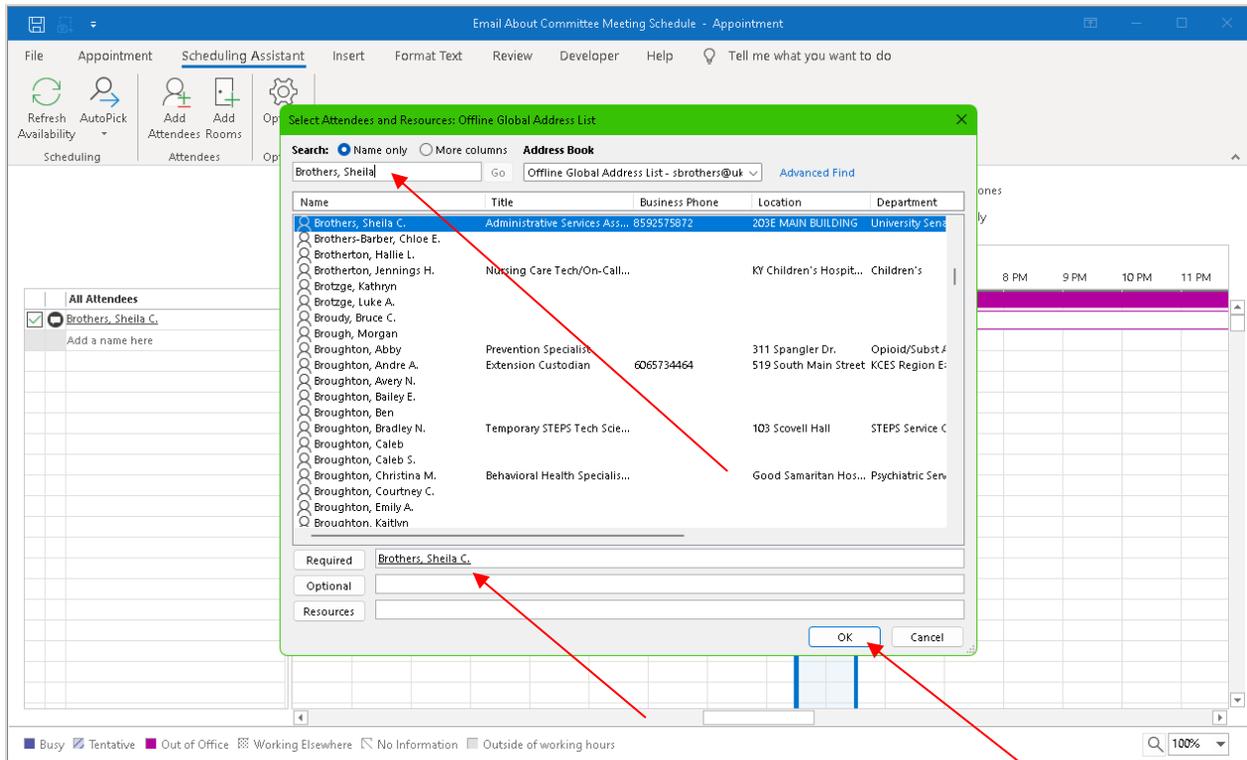

After entering the times and dates for the poll, Doodle will create a URL for the poll, which should be emailed to committee members with a request that they fill out their availabilities within the following two or three days. Depending on the poll’s settings, Doodle may send an email every time someone fills out the poll.

After everyone has responded, use Doodle’s functionality to find the time that best suits everyone. Identify a location for the meeting and send an email to committee members (and include the Senate Council office) with the details about recurring meetings. Use Outlook’s functionality of “Make Appt” to turn the email you sent into a recurring appointment. Include the location (video conference link and/or physical space) and set the meeting to the correct recurring pattern.

**6. Items from the Floor**

*[This is an opportunity for committee members to raise issues, concerns, etc., or to ask questions that do not fit anywhere else in the meeting. While motions can be made on issues that arise during "Items from the Floor," committees are not encouraged to hear new business and vote on it in the same meeting unless it is an exceedingly simple topic.]*

# Parliamentary Cheat Sheet

Motion	Requires a second?	Is it amendable?	Is it debatable?	What vote is required?
<b>Adjourn</b>	Yes	No	No	Majority
<b>Amend</b>	Yes	Yes	Yes	Majority
<b>Amend something previously adopted</b>	Yes	Yes	Yes	Majority with notice or 2/3 without notice
<b>Call for question</b>	Yes	No	No	2/3 of assembly
<b>Main Motion</b>	Yes	Yes	Yes	Majority
<b>Objection to the Question</b>	No	No	No	2/3 Majority in the negative
<b>Point of Information</b>	No	No	No	Chair responds or requests answer
<b>Point of Order</b>	No	No	No	Chair resolves

- **Adjourn** – A motion to close the meeting.
- **Amend** – A motion to alter or modify the wording of a main motion. A primary amendment changes the motion. A secondary amendment changes the first amendment. Voting order is secondary, primary and then main motion.
- **Amend something previously adopted** – A motion to modify a previously adopted motion.
- **Call for question** – A motion to close debate and bring the pending motion up for vote. This requires a 2/3 vote in favor and is done without debate.
- **Main Motion** – A motion which is not applied to another motion, requires a second, is debatable and amendable, usually majority vote required for adoption.
- **Objection to the question** – A member objects to a motion. This must be done when the motion is on the floor, but before discussion. This requires a 2/3 vote in the negative for passage.
- **Point of Information** – A request for facts affecting the pending business. The request is made to the chair, although the chair may ask someone else to respond.
- **Point of Order** – A motion that brings any violation of rule to the chair’s attention. It must be done as soon as the violation occurs. The chair rules on this.

# University Senate Flow Chart: Programs\*

NOTE: The final step for each type of proposal/process is in green.

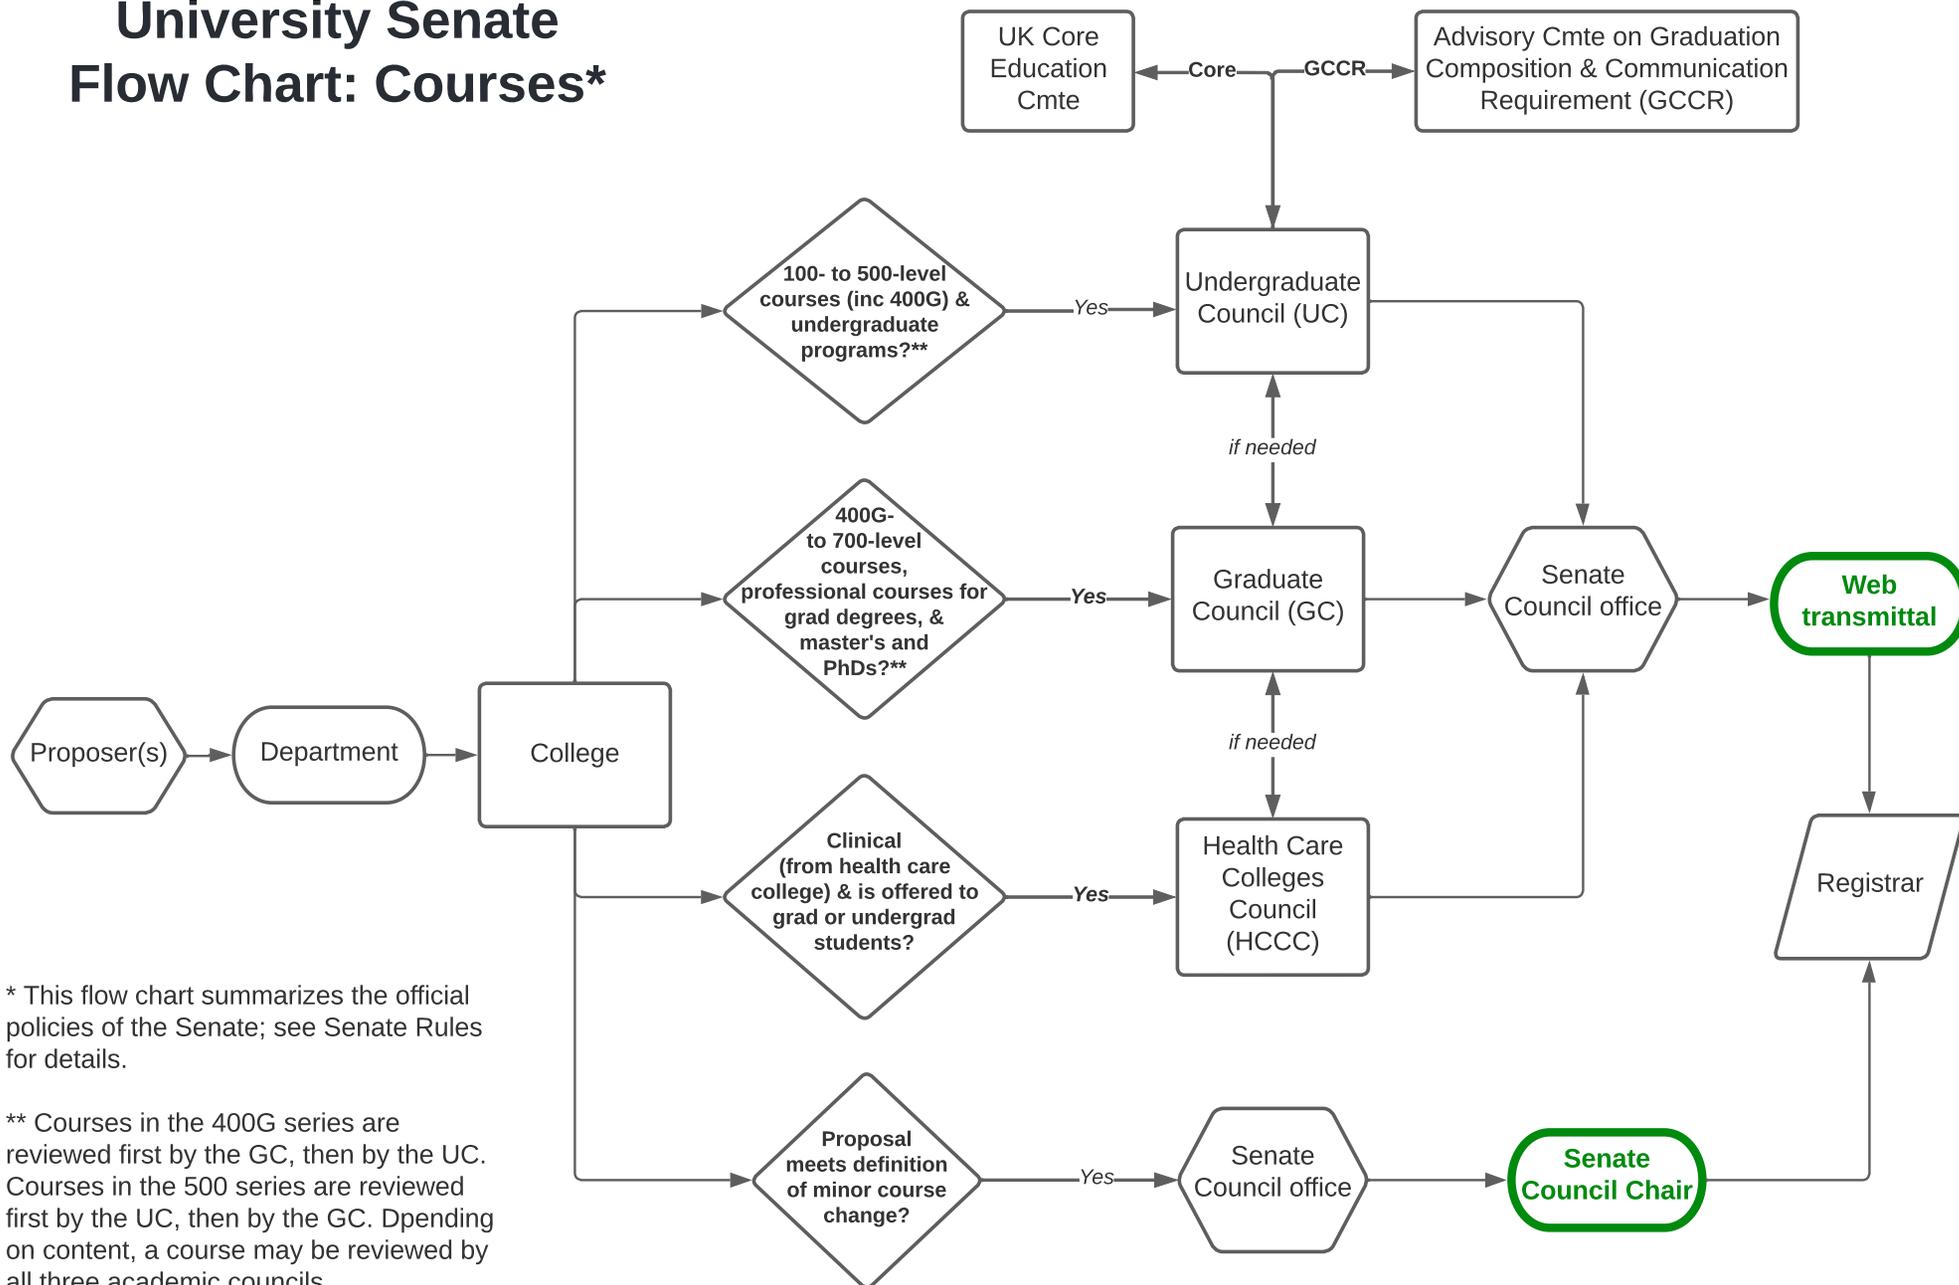

\* This flow chart summarizes the official policies of the Senate; see Senate Rules for details.

\*\* Significant changes involve one or more of the following: new degree; new certificate; admissions requirements; progression requirements; graduation requirements; new track, concentration, or specialization; offering a program online; creating/changing an academic unit; suspending admissions; and closing a program.

\*\*\* Board of Trustees approval is required for new degrees and closing degrees, as well as changes to UK's academic organizational structure, including unit name changes.

# University Senate Flow Chart: Courses\*

\* This flow chart summarizes the official policies of the Senate; see Senate Rules for details.

\*\* Courses in the 400G series are reviewed first by the GC, then by the UC. Courses in the 500 series are reviewed first by the UC, then by the GC. Depending on content, a course may be reviewed by all three academic councils.

7. Course description in Curriculog and syllabus match <sup>4</sup>		<input type="checkbox"/> Yes	<input type="checkbox"/> No
8. Number of credit hours in Curriculog (whole numbers) and contact hours <sup>5</sup> match		<input type="checkbox"/> Yes	<input type="checkbox"/> No
9. Meeting pattern in Curriculog and syllabus match (see SR 10.6)		<input type="checkbox"/> Yes	<input type="checkbox"/> No
10. Repeatability, multiple registrations within a semester, and variable credit are correctly requested <sup>6</sup>		<input type="checkbox"/> Yes	<input type="checkbox"/> No
11. <i>[For course changes, only]</i> Course descriptions in Curriculog and syllabus match description in Bulletin		<input type="checkbox"/> Yes	<input type="checkbox"/> No
12. <i>[For undergraduate graduation composition and communication requirement (GCCR) courses, only]</i> Includes draft/feedback/revision process for GCCR assignments for 4,500 word minimum plus 10-minute oral or significant visual/electronic artifact plus demonstration of information literacy		<input type="checkbox"/> Yes	<input type="checkbox"/> No <input type="checkbox"/> N/A
Syllabus Review <sup>7</sup>			
<i>Senate Rules 6.1.1 describes minimum information that must be included in a syllabus. Use the boxes below to note if the attached syllabus includes a particular component ("Yes"), or if the proposer must revise the syllabus and add it ("No")</i>			
13. <i>[For course changes, only]</i> Full and accurate title of course corresponding to the title in the Bulletin		<input type="checkbox"/> Yes	<input type="checkbox"/> No
14. Course prefix, course number, and course section number		<input type="checkbox"/> Yes	<input type="checkbox"/> No
15. Instructor's contact information <sup>8</sup>			
a. Instructor office location		<input type="checkbox"/> Yes	<input type="checkbox"/> No
b. Instructor office phone number including area code		<input type="checkbox"/> Yes	<input type="checkbox"/> No
c. Instructor official UK email address		<input type="checkbox"/> Yes	<input type="checkbox"/> No

<sup>1</sup> This is to the best of your knowledge; advice from the council/committee can be sought.

<sup>2</sup> Enforceable prerequisites are those that are: based on a score from a recognized exam or test (ACT, etc.); based on a student having taken a UK course while enrolled at UK; or based on enrollment in a specific program. Requests to add prerequisites that are based on course section or hours of previous coursework are not enforceable and must be revised.

<sup>3</sup> Syllabus does not have to list the prerequisites, but if they are listed, they must match.

<sup>4</sup> Syllabus description can be longer and/or more detailed.

<sup>5</sup> Contact hours per credit hour vary by type. For lecture and seminars, it is a 1:1 ratio (1 hour of lecture=1 credit hour). For lab, it is 2:1 (2 hours of lab = 1 credit hour). For practicum and research, it is 3:1 (3 contact hours per week = 1 credit hour). Other types can be checked in Senate Rules 10.6.

<sup>6</sup> Proposers who request repeatability also often want the course to allow multiple registrations within the same semester and may also need to have included a request for variable credit. Proposers often select variable credit and repeatability, but forget to also ask for multiple registrations within the same semester. A careful reading of the syllabus can help a reviewer realize that a proposer neglected to select all necessary options in Curriculog.

<sup>7</sup> The syllabus template is available on the Senate's [Syllabus Template](#) page.

<sup>8</sup> If an instructor has not yet been identified, it is reasonable to have "TBA" in these fields.

<sup>10</sup> Students with an excused absence have at least one week after they return to class to produce an excuse; the instructor MUST work with the student to allow the student to complete the missed work, ideally within the same semester.

<sup>11</sup> An attendance policy is not required, but if one is present, it cannot conflict with the Senate Rules. If a syllabus does not have an attendance policy, then one does not exist (i.e., a student cannot be penalized for absences if there is no attendance policy in the syllabus).

## **PROGRAM CHECKLIST**

The University Senate has three academic councils: Undergraduate Council, Graduate Council, and Health Care Colleges Council. The academic councils are the first step in the Senate’s approval process and are responsible for conducting a thorough review of program proposals. When an academic council member is reviewing a program proposal, the Senate expects the member to use this checklist. (Senate committee members who review program proposals should also use this checklist, however the academic councils have the greater responsibility for proposal-related quality control.)

When a reviewer has completed their review, if edits are necessary the reviewer should contact the proposer to ask them to make the required changes.

Different types of program proposals have different components, so this checklist is separated into different sections. Except for proposals for USPs and suspension of admissions/closure<sup>1</sup>, program proposals require a curriculum workbook; the majority of proposals also include communications from other units that are affected by the program. The first section below (“A”) should be completed for every program proposal. Other types of proposals have additional requirements, which are split off into their own sections, to be used as applicable.

**A. All proposals<sup>2</sup>**

- A1: Curriculog
- A2: Curriculum workbook
- A3: Other uploads (including permission for borrowed courses)

**B. Online delivery requests**

- B1: Online Delivery Form
- B2: Distance learning workbook
- B3: SAP program structure
- B4: Dean’s letter regarding online feasibility
- B5: Approvals for use of distance learning courses from outside the unit

**C. New degree and certificate program proposals**

- C1: Faculty of record
- C2: Assessment plan
- C3: Approvals for use of courses from outside the unit (“borrowed courses”)
- C4: Dean’s letter of administrative feasibility
- C5: Graduation Composition and Communication Requirement (GCCR)
- C6: Faculty of record

**D. University Scholars Program proposals**

**E. Suspension of Admissions and/or Closure**

<sup>7</sup> Guided electives apply to all students in the program and are organized as groups of specific courses, from which a student chooses one (or two, or three, etc.) from each grouping. For example, a student might be required to take “one course from this list of three courses, and two courses from this other list of five courses, and either XYZ 250 or XYZ 260.”

<sup>8</sup> Free electives apply to all students in the program and are restricted by a prefix series and/or a number series. The choice of exactly which courses to take is left up to the student but the student must choose within the parameters spelled out in the program's free electives requirement. For example, a student might be required to take “any two (or four, or six, etc.) courses in the XYZ prefix at the 300-level or above.”

<sup>9</sup> Applies to new undergraduate degree programs, only.

<sup>10</sup> Applies to new undergraduate degree programs, only.

<sup>11</sup> Kentucky's Council on Postsecondary Education (CPE) has official terms that describe focused areas of study, specifically "track" (at the undergraduate level), "concentration" (at the master's level) and "specialization" (at the doctoral level). In SAP, these are all referred to as "options."

<sup>12</sup> For example, most undergraduate degrees are 120 credit hours, master's degrees are often 30 credit hours, etc.

<sup>13</sup> Borrowed courses are those that are offered by a unit other than the unit offering the program.

<sup>15</sup> This is a description of the broader academic structure of an existing program, provided by the Office of Strategic Planning and Institutional Effectiveness (OSPIE). The intent is to help proposers understand how proposed changes affect the program as a whole.

<sup>16</sup> UK's accreditor, the Southern Association of Colleges and Schools - Commission on Colleges (SACSCOC), expects that a sufficient number of regular full-time faculty will be assigned to a program: 1) to ensure its ongoing program viability; and 2) ensure that learning experiences for online students are comparable to those of students in a residential program. In addition to the myriad other administrative considerations related to a online program, the Dean's letter must specifically address these two considerations.

<sup>17</sup> Borrowed courses are those that are offered by a unit other than the unit offering the program

# Transmission of **PROPOSAL** to Senate Report

Use this form to submit a report for Senate Council deliberation about a specific item that the Senate Council office sent to your committee. You'll be contacted by office staff with the intent of scheduling you to attend the next possible Senate Council (and University Senate) meetings to present this report.

\* Required

## ***Proposal Information***

Describe the basics of the proposal

1. Name of proposal (included in email from Senate Council office): \*

2. The proposal is about: \*

- A specific program
- Academic organization and structure
- Unit policies
- Campuswide policies (including SR changes)
- Other

3. Generally speaking, does the proposal create something new, change something that exists, or gets rid of something? \*

- New
- Change
- Remove
- Other

4. What is the rationale for the proposal? (If the proposal has not changed much, feel free to copy and paste a well written, succinct rationale from the proposal. For program-specific proposals, see Q2a in Curriculog.) \*

5. Proposer's name:

6. Proposer's affiliation (dept and college, or administrative unit, included in email from Senate Council office): \*

7. Does the proposal involve a change to the Senate Rules? \*

- No
- Yes

8. What section of the Senate Rules?

- Section 1 - The University Senate
- Section 2 - University Calendar
- Section 3 - Programs, Courses, & Curriculum Procedures
- Section 4 - Admission to the University

# **Activity** Report (Senate Cmtes & Academic Councils)

Use this form to submit your committee's monthly activity report.

\* Required

1. What is the name of the committee/council you chair? (If it is an ad hoc committee, choose "Other" at the bottom of the list and type the ad hoc committee's name.) \*

Academic Advising: Responsible for regularly reviewing the effectiveness and accountability of academic advising throughout the University, setting standards for the quality of academic advising, making recommendations to the Senate Council regarding academic advising, and advising the Senate Council about all recommendations or proposals to the Senate regarding academic advising.

Academic Facilities: Charged with the responsibility of providing information and recommendations to the Senate about the alteration, construction, and allocation of all property and physical facilities that may affect the educational objectives of the University.

Academic Organization and Structure: Charged to review and recommend to the University Senate priorities on all proposals regarding educational units, make appropriate recommendation to the University Senate regarding educational units, and study and report to the University Senate on matters pertaining to faculty size and strength, and student enrollment.

Academic Planning and Priorities: Charged with concern over major, broad, long-range plans and priorities. The SAPPC is responsible for recommending to the University Senate plausible academic goals for the institution, identifying major academic problems likely to be faced by the University, and developing procedures and criteria for recommending academic priorities.

Academic Programs: Charged with recommending action to the Senate on all new academic programs and significant program changes approved by prescribed lower

levels of review.

- Admissions and Academic Standards: Charged to examine and recommend to the University Senate changes in the following areas: admission requirements and grading rules, standards for granting academic credit, probation and suspension procedures, and degree and graduation requirements.
- Admissions Advisory: Responsible for recommending admissions policy and within general guidelines established by the University Senate. The SAAC establishes the University's admissions management system, automatic admission criteria, and establishes parameters for the decisions on admissions exceptions.
- Disability Accommodation and Compliance: Recommends educational policies and implementation practices/standards relating to disability accommodation and regulatory compliance.
- Distance Learning and e-Learning: Responsible for identifying and monitoring issues related to distance learning (DL) and e-learning (e-L); responding to Senate concerning external regulations regarding DL and e-L; recommending strategies regarding DL and e-L; and collaborating on issues relating to DL & e-L.
- Diversity and Inclusion: Charged to increase diversity among senators, in particular representation of URM; work with senior leadership to disseminate best practices for recruiting & retaining faculty of color and other underrepresented groups; and addressing other related issues.
- Libraries: Charged with the responsibility for recommending to the University Senate policies to promote the educational interests of the University with respect to the Libraries, the faculty body of which is equivalent to the faculty of a college.
- Research and Graduate Education: Responsible for reviewing University research policies and graduation education policies and their implementation. The SRGEC is responsible for making recommendations to the University Senate regarding those policies and the priorities for them.
- Retroactive Withdrawal: Decides all student requests for retroactive withdrawals as provided by Senate Rules 5.1.7.5.
- Rules and Elections: Responsible for codifying and interpreting the Rules of the University Senate and can initiate changes. The SREC is also responsible for certifying faculty member eligibility in the elections of Faculty Trustees, and in elections of University Faculty representatives to the Senate, to the Senate Council, and to a Presidential Search Committee.
- Technology: Responsible broadly for educationally related IT issues, including review of IT-related proposals and recommendations on technology issues affecting educational objectives.
- Undergraduate Council: It shall consider all proposed new courses and changes in courses which may be used for credit toward an undergraduate degree and also consider all proposed new undergraduate programs, changes in undergraduate programs, including degree titles, from all colleges offering an undergraduate degree. Further, it shall consider all changes in the University requirements. The Undergraduate Council shall recommend on all of the above to the Senate Council. In addition, it shall review all undergraduate programs

undergraduate programs.

Graduate Council: It shall consider all proposed new courses and changes in courses
