The University of Kentucky is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (1866 Southern Lane, Decatur, Georgia 30033-4097: Telephone number 404-679-4501) to award undergraduate, graduate and professional degrees.

COMPLIANCE WITH REGULATIONS

The University of Kentucky is committed to a policy of providing educational opportunities to all qualified students regardless of economic or social status, and will not discriminate on the basis of race, color, religion, sex, marital status, beliefs, age, national origin, sexual orientation, or physical or mental disability.

Compliance with Title IX of the Educational Amendments of 1972, which prohibits sex discrimination, and with Title VI of the Civil Rights Act of 1964 is coordinated by Mr. Terry Allen, Affirmative Action Office, 8 Administration Building, (859) 257-8927.

Efforts to comply with the laws and regulations applicable to people with disabilities are also coordinated by the Affirmative Action Office, as required by Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990.

Questions concerning compliance with regulations may be directed to UK’s Affirmative Action Office, or to the Director of the Office for Civil Rights, U.S. Department of Education, Washington, D.C.

The University is in compliance with the Drug-Free Workplace Act of 1988 and the Drug-Free Schools and Communities Act Amendment of 1989. Questions may be directed to the Vice President for Student Affairs or the Office of the Director of Human Resources Services.

Questions about admission to the University should be directed to the appropriate admissions office.
Students should check the Schedule of Classes each semester for any calendar changes which may have been approved after publication of this Bulletin.

2005 Spring Semester

June 15, 2004—Tuesday—Deadline for international applications to be submitted to the Graduate School for the 2005 Spring Semester

September 15, 2004—Wednesday—Deadline for applying with college deans for reinstatement after a second academic suspension for the Spring Semester

December 1-8, 2004—Wednesday through Wednesday—Add/Drop for registered students for the 2005 Spring Semester

December 6, 2004—Monday—Deadline for applying for admission to a program in the Graduate School for the 2005 Spring Semester. Applications for readmission, post-baccalaureate status, and visiting student status will be accepted after the deadline.

December 8, 2004—Wednesday—Last day for students in the Employee Educational Program registered through December 10 to submit EEP form to Human Resource Services to confirm 2005 Spring Semester registration and tuition defrayal

December 15, 2004—Wednesday—Deadline for applying to the Graduate School for readmission, post-baccalaureate status, and visiting student status for the 2005 Spring Semester in order to register before the beginning of classes and avoid late fee

December 16, 2004—Thursday—Payment deadline for registration fees and/or housing and dining fees

January 5-10—Wednesday through Monday—Registration for new program graduate students

January 6-10—Thursday through Monday—Registration for new post-baccalaureate students

January 7-8—Friday and Saturday—Registration for Evening/Weekend and new graduate students

January 10—Monday—Registration for new students who have been cleared for admission but did not priority register

January 10-11—Monday and Tuesday—Opening-of-term add/drop for registered students

January 10-14—Monday through Friday—Approved time period for students to change academic majors (note: please check with college for admission deadline)

January 11—Tuesday—Last day a student may officially drop a course or cancel registration with the University Registrar for a full refund of fees

January 12—Wednesday—First day of classes

January 12-19—Wednesday through Wednesday—Late registration for returning students who did not priority register and new applicants cleared late for admission. A late fee is assessed students who register during this time period.

January 17—Monday—Martin Luther King Birthday—Academic Holiday

January 19—Wednesday—Last day to add a class for the 2005 Spring Semester

January 19—Wednesday—Last day to officially withdraw from the University or reduce course load and receive an 80 percent refund

January 19—Wednesday—Last day for students in the Employee Educational Program who registered and/or changed schedules after December 10 to submit EEP form to Human Resource Services to confirm 2005 Spring Semester registration and tuition defrayal

February 1—Tuesday—Deadline for international applications to be submitted to the Graduate School for the 2005 Fall Semester

February 2—Wednesday—Last day to drop a course without it appearing on the student’s transcript

February 2—Wednesday—Last day to change grading option (pass/fail to letter grade or letter grade to pass/fail; credit to audit or audit to credit)

February 4*—Friday—Last day for reinstatement of students cancelled for nonpayment of registration fees and/or housing and dining fees. Requires payment of fees and may require payment of a reinstatement fee.

February 9—Wednesday—Last day to officially withdraw from the University or reduce course load and receive a 50 percent refund

February 10—Thursday—Last day for filing an application for a May degree in college dean’s office

February 10—Thursday—Deadline for submission of application and all required documents to the Office of the Registrar for change of residency status for 2005 Spring Semester

February 24—Thursday—Last day for doctoral candidates for a May degree to submit a Notification of Intent to schedule a final examination in the Graduate School

March 7—Monday—Midterm of 2005 Spring Semester

March 8-28—Tuesday through Monday—Approved time period for students to change academic majors (note: please check with college for admission deadline)

March 11—Friday—Last day to withdraw from the University or reduce course load and receive any refund. Students can withdraw or reduce course load after this date only for “urgent non-academic reasons.”

March 14-19—Monday through Saturday—Spring Vacation—Academic Holidays

March 28-April 20—Monday through Friday—Priority registration for the 2005 Fall Semester and both 2005 Summer Sessions

April 7—Thursday—Last day for candidates for a May degree to schedule a final examination in the Graduate School

April 8—Friday—Deadline for applying for admission to a
program in the Graduate School for the 2005 Summer Sessions. Applications for readmission, post-baccalaureate status, and visiting student status will be accepted after the deadline.

April 21—Thursday—Last day for candidates for a May graduate degree to sit for a final examination

April 27—Wednesday—Deadline for applying to the Graduate School for readmission, post-baccalaureate status, and visiting student status for the 2005 First Summer Session in order to register May 10 and avoid late fee

April 29 —Friday—Last day of classes

May 2-6—Monday through Friday—Final Examinations

May 3-9—Tuesday through Friday—Final Examinations and add/drop continue for students enrolled in the 2005 Spring Semester

May 3-June 8 —Tuesday through Wednesday—Second Summer Session registration and add/drop continue for students enrolled in the 2005 Spring Semester

May 3-June 18—Tuesday through Saturday—Add/Drop for priority registered students for the 2005 Fall Semester

May 6 —Friday—Last day for candidates for a May degree to submit a thesis/dissertation to the Graduate School

May 6 —Friday—End of 2005 Spring Semester

May 8 —Sunday—Commencement

May 9 —Monday—Final deadline for submission of grades to the Registrar’s Office by 4 p.m.

*These dates are subject to change.

2005 First Summer Session

April 9—Saturday—Deadline for applying for admission to a program in the Graduate School for the 2005 Summer Sessions. Applications for readmission, post-baccalaureate status, and visiting student status will be accepted after the deadline.

April 27—Wednesday—Deadline for applying to the Graduate School for readmission, post-baccalaureate status, and visiting student status for the 2005 First Summer Session in order to register May 6 and avoid late fee

May 3-9—Tuesday through Monday—First Summer Session registration and add/drop continue for students enrolled in the 2005 Spring Semester

May 9 —Monday—Registration for new students

May 9 —Monday—Payment deadline for payment of registration fees and/or housing and dining

May 10—Tuesday—Last day a student may officially drop a course or cancel registration with the University Registrar for a full refund of fees

May 10—Tuesday—First day of classes

May 10-11—Tuesday through Friday—Late registration for returning students not already registered and new applicants cleared late for admission. A late fee is assessed students who register late.

May 11—Wednesday—Last day to enter an organized class for the 2005 First Summer Session

May 11—Wednesday—Last day to officially withdraw from the University or reduce course load and receive an 80 percent refund

May 11—Wednesday—Last day for students in the Employee Educational Program to submit EEP form to Human Resources Services for tuition defrayal for the 2005 First Summer Session

May 16—Monday—Last day to drop a course without it appearing on the student's transcript

May 16—Monday—Last day to change grading option (pass/fail to letter grade or letter grade to pass/fail; credit to audit or audit to credit) in college dean’s office

May 17—Tuesday—Last day to officially withdraw from the University or reduce course load and receive a 50 percent refund

May 18—June 8—Wednesday through Wednesday—Second Summer Session registration and add/drop for students who entered the University in the 2005 First Summer Session

May 23—Wednesday—Midterm of 2005 First Summer Session

May 25—Wednesday—Last day to withdraw from the University or reduce course load and receive any refund. Students can withdraw or reduce course load after this date only for “urgent non-academic reasons.”

May 25—Wednesday—Deadline for applying to the Graduate School for readmission, post-baccalaureate status, and visiting student status for the 2005 Second Summer Session in order to register before the beginning of classes and avoid late fee

May 30—Monday—Memorial Day - Academic Holiday

June 1—Wednesday—Last day for doctoral candidates for an August degree to submit a Notification of Intent to schedule a final examination in the Graduate School

June 2*—Thursday—Last day for reinstatement of students cancelled for nonpayment of registration fees and/or housing and dining fees. Requires payment of fees and may require payment of a reinstatement fee.

June 7—Tuesday—Final Examinations

June 7—Tuesday—End of the 2005 First Summer Session

June 10—Friday—Final deadline for submission of grades to the Registrar’s Office by 12 noon

*These dates are subject to change.

2005 Second Summer Session

April 8—Friday—Deadline for applying for admission to a program in the Graduate School for the 2005 Summer Sessions. Applications for readmission, post-baccalaureate status, and visiting student status will be accepted after the deadline.

May 3—June 8—Tuesday through Wednesday—Second Summer Session registration and add/drop continue for students enrolled in the 2005 Spring Semester

May 18—June 8—Wednesday through Wednesday—Second Summer Session registration and add/drop for students who entered the University in the 2005 First Summer Session

May 25—Wednesday—Deadline for applying to the Graduate School for readmission, post-baccalaureate status, and visiting student status for the 2005 Second Summer Session in order to register May 6 and avoid late fee

May 30—Monday—Memorial Day - Academic Holiday
order to register before the beginning of classes and avoid late fee.
June 1—Wednesday—Last day for doctoral candidates for an August degree to submit a Notification of Intent to schedule a final examination in the Graduate School.
June 7—Tuesday—Registration for Evening/Weekend and new graduate students.
June 8—Wednesday—Registration for new students.
June 8—Wednesday—Payment deadline for registration fees and/or housing and dining fees.
June 9—Thursday—Last day a student may officially drop a course or cancel registration with the University Registrar for a full refund of fees.
June 9—Thursday—First day of classes.
June 9-10—Thursday through Friday—Late registration for returning students not already registered and new applicants cleared late for admission. A late fee is assessed students who register late.
June 10—Monday—Last day to enter an organized class for the 2005 Second Summer Session.
June 10—Monday—Last day to officially withdraw from the University or reduce course load and receive an 80 percent refund.
June 11—Friday—Last day for students in the Employee Educational Program to submit EEP form to Human Resource Services for tuition waiver for the 2005 Second Summer Session.
June 15—Wednesday—Deadline for international applications to be submitted to the Graduate School for the 2005 Fall Semester.
June 20—Monday—Last day to drop a course without it appearing on the student's transcript.
June 20—Monday—Last day to change grading option (pass/fail to letter grade or letter grade to pass/fail; credit to audit or audit to credit).
June 23—Thursday—Last day to officially withdraw from the University or reduce course load and receive a 50 percent refund.
June 24—Friday—Last day for filing an application for an August degree in college dean's office.
June 30”—Thursday—Last day for reinstatement of students cancelled for nonpayment of registration fees and/or housing and dining fees. Requires payment of fees and may require payment of a reinstatement fee.
July 4—Monday—Independence Day—Academic Holiday.
July 7—Thursday—Midterm of 2005 Second Summer Session.
July 13—Wednesday—Last day to withdraw from the University or reduce course load and receive any refund. Students can withdraw or reduce course load after this date only for "urgent non-academic reasons."
July 13—Wednesday—Last day for candidates for an August degree to schedule a final examination in the Graduate School.
July 22—Friday—Deadline for applying for admission to a program in the Graduate School for the 2005 Fall Semester. Applications for readmission, post-baccalaureate status, and visiting student status will be accepted after the deadline.
July 27—Wednesday—Last day for candidates for an August graduate degree to sit for a final examination.
August 3—Wednesday—Last day for registered students in the Employee Educational Program who registered through August 4 to submit EEP form to Human Resource Services to confirm 2005 Fall Semester registration and tuition waiver.
August 4—Thursday—End of the 2005 Second Summer Session.
August 4—Thursday—Last day for candidates for an August degree to submit a thesis/dissertation to the Graduate School.
August 4—Thursday—Final Examinations.
August 8—Monday—Final deadline for submission of grades to the Registrar's Office by 12 noon.
*These dates are subject to change.

2005 Fall Semester

February 1—Tuesday—Deadline for international applications to be submitted to the Graduate School for the 2005 Fall Semester.

April 15—Friday—Deadline for applying with college deans for reinstatement after a second academic suspension for the 2005 Fall Semester.

June 15—Wednesday—Deadline for international applications to be submitted to the Graduate School for the 2006 Spring Semester.

July 22—Friday—Deadline for applying for admission to a program in the Graduate School for the 2005 Fall Semester. Applications for readmission, post-baccalaureate status, and visiting student status will be accepted after the deadline.

July 23-August 19—Friday through Thursday—Add/Drop for registered students.

August 3—Wednesday—Last day for students in the Employee Educational Program registered through August 3 to submit EEP form to Human Resource Services to confirm 2005 Fall Semester registration and tuition waiver.

August 4—Thursday—Payment deadline for payment of registration fees and/or housing and dining fees.

August 10—Wednesday—Deadline for applying to the Graduate School for readmission, post-baccalaureate status, and visiting student status for the 2005 Fall Semester in order to register before the beginning of classes and avoid late fee.

August 16-22—Tuesday through Monday—Fall registration for students who entered the University in either the 2005 First Summer Session or Second Summer Session.

August 16-22—Tuesday through Monday—Registration for new program graduate students.

August 22—Monday—Registration for new graduate students.

August 19—Friday—Registration for new international students who have been cleared for admission but did not advance register.

August 19-20—Friday and Saturday—Registration for Evening/Weekend students.

August 22—Monday—Registration for new students who have been cleared for admission but did not priority register.
August 22-23—Monday and Tuesday—Opening-of-term add/drop for registered students

August 22-26—Monday through Friday—Approved time period for students to change academic majors (note: please check with college for admission deadline)

August 23—Tuesday—Last day a student may officially drop a course or cancel registration with the University Registrar for a full refund of fees

August 24—Wednesday—First day of classes

August 24-30—Wednesday through Tuesday—Late registration for returning students who did not priority register and new applicants cleared late for admission. A late fee is assessed students who register during this time period.

August 30—Tuesday—Last day to officially withdraw from the University or reduce course load and receive an 80 percent refund

August 30—Tuesday—Last day to add a class for the 2005 Fall Semester

August 30—Tuesday—Last day for students in the Employee Educational Program who registered and/or changed schedules after August 3 to submit EEP form to Human Resource Services to confirm 2005 Fall Semester registration and tuition waiver

September 5—Monday—Labor Day—Academic Holiday

September 14—Wednesday—Last day to change grading option (pass/fail to letter grade or letter grade to pass/fail; credit to audit or audit to credit)

September 14—Wednesday—Last day to drop a course without it appearing on the student's transcript

September 16—Friday—Last day for reinstatement of students cancelled for nonpayment of registration fees and/or housing and dining fees. Requires payment of fees and may require payment of reinstatement fee.

September 21—Wednesday—Last day to officially withdraw from the University or reduce course load and receive a 50 percent refund

September 21—Thursday—Last day for filing an application for a December degree in college dean's office

September 22—Thursday—Deadline for submission of application and all required documents to the Office of the Registrar for change of residency status for 2005 Fall Semester

October 6—Thursday—Last day for doctoral candidates for a December degree to submit a Notification of Intent to schedule a final examination in the Graduate School

October 7—Friday—Fall Break—Academic Holiday

October 17—Monday—Midterm of 2005 Fall Semester

October 18-October 31—Tuesday through Monday—Approved time period for students to change academic majors (note: please check with college for admission deadline)

October 21—Friday—Last day to withdraw from the University or reduce course load and receive any refund. Students can withdraw or reduce course load after this date only for "urgent non-academic reasons."

October 31-November 23—Monday through Wednesday—Priority Registration for the 2006 Spring Semester

November 17—Thursday—Last day for candidates for a December degree to schedule a final examination in the Graduate School

November 24-26—Thursday through Saturday—Thanksgiving—Academic Holidays

December 7-January 7—Wednesday through Saturday—Add/Drop for registered students for the 2006 Spring Semester

December 1—Thursday—Last day for candidates for a December graduate degree to sit for a final examination

December 5—Monday—Deadline for applying for admission to a program in the Graduate School for the 2006 Spring Semester. Applications for readmission, post-baccalaureate status, and visiting student status will be accepted after the deadline.

December 7—Wednesday—Last day for students in the Employee Educational Program registered through December 7 to submit EEP form to Human Resource Services to confirm 2006 Spring Semester registration and tuition waiver

December 9—Friday—Last day of classes

December 12-16—Monday through Friday—Final Examinations

December 14—Wednesday—Deadline for applying to the Graduate School for readmission, post-baccalaureate status, and visiting student status for the 2006 Spring Semester in order to register before the beginning of classes and avoid late fee

December 16—Friday—End of 2005 Fall Semester

December 16—Friday—Last day for candidates for a December degree to submit a thesis/dissertation to the Graduate School

December 19—Monday—Final deadline for submission of grades to the Registrar's Office by 4 p.m.

The University of Kentucky began offering graduate work in 1870 and awarded its first graduate degrees in 1876. The Graduate School became a distinct unit in the University organization in 1912.

The mission of the Graduate School is to promote advanced study, graduate instruction, and research by the faculty and students of all colleges and departments. The total graduate resources of the University are merged under the Graduate School for the purpose of promoting the acquisition of knowledge in an atmosphere of free and lively inquiry.

Graduate work is offered in most colleges in the University. A general description and tabulation of courses for each of the various programs is given in the Graduate Degree Programs section of this bulletin.

The Graduate Faculty

The Graduate Faculty consists of the Dean of the Graduate School, Associate Deans of the Graduate School, and Full and Associate Graduate Faculty Members. As the chief University agency for the promotion of the ideals of graduate study, it determines the policies of the Graduate School and makes recommendations to the University Senate and to the President, or to other administrative officials as appropriate. All rules affecting graduate work and the inauguration of new graduate programs must be approved by the Graduate Faculty.

Any proposed change in the rules of the Graduate Faculty must be included in the agenda of its meeting and circulated to the Graduate Faculty at least 10 days prior to the meeting at which it is to be considered.

New Graduate Faculty members may be proposed to the Dean of the Graduate School at any time by the college deans and department chairs concerned, or in the case of persons not attached to a college faculty, by the Provost. Eligibility qualifications are as follows:

1. The doctor’s degree or its equivalent in scholarly reputation.
2. The rank of assistant professor (or equivalent), or higher.
3. Scholarly maturity and professional productivity as demonstrated by publications, editorial services, research surveys, creative work or patents, and research in progress at the time of appointment.
4. Demonstrated participation in graduate teaching and research in the program.

Any faculty member, regardless of specific title series of appointment, is eligible for consideration for membership on the Graduate Faculty. Appointment is based on academic credentials, degree of involvement in the graduate degree programs, and departmental recommendation.

Once Full Graduate Faculty status is attained, membership is continuous unless a change in status is recommended by a graduate program to the Dean of the Graduate School, who will present the recommendation to the Graduate Council. Associate membership is limited to a term of six years with reappointment possible after departmental review.

Appointment to Full Graduate Faculty membership is made by the Provost and/or the Dean of the Graduate School after consultation with the Graduate Council when appropriate.

Full members of the Graduate Faculty are particularly responsible for:

1. Guidance of graduate student research and study to its completion. The finished work should meet or exceed accepted standards for publication, dissemination or performance within the particular discipline.
2. Participation in the formulation of graduate curricula and policy.

The Dean of the Graduate School is responsible for appointing and monitoring the progress of Associate Members of the Graduate Faculty. Associate members are authorized to teach graduate courses, direct master’s theses, and serve on and co-chair doctoral committees. Membership in the Graduate Faculty is restricted to persons who satisfy the membership criteria and are able to assume the responsibilities in a particular program as set forth above. There is no category for at-large graduate faculty membership.

On recommendation of the Director of Graduate Studies and with the approval of the Dean of the Graduate School, persons who normally do not hold academic appointment in the University, but who have demonstrated an interest in collaborative participation in its graduate programs, may be appointed as Auxiliary Graduate Faculty Members. They should hold the terminal academic degree in the field and possess a record of research or creative experience that would warrant their inclusion on advisory committees to assist graduate students in conducting research. Auxiliary Graduate Faculty may serve only as nonvoting members of the advisory committee.

Administrative officers assigning teaching and other duties to members of the Graduate Faculty who are taking an active part...
in the graduate program (i.e., are heavily engaged in directing theses and dissertations, carrying on productive research, etc.) should make appropriate reduction in the duties required of such faculty members.

**Teaching at the Graduate Level**

Courses intended for graduate studies at the University must be taught by faculty members who have the terminal degree in the discipline or a closely related discipline. These courses are designated by the numbers 400G – 799. The terminal degree in most cases is the doctorate. Ideally, these courses should be taught by Graduate Faculty members. If a program needs to assign a person without a terminal degree to teach a graduate level course, they must first petition the Dean of the Graduate School, explaining the unique circumstances and qualifications supporting this assignment.

A copy of the diploma or transcript of each faculty member must be kept in the personnel file.

Courses that have both undergraduate and graduates in the courses are usually designated as 400G or 500 level courses. In all courses with a mixed student population, there must be a clear differentiation in the syllabus of differing course requirements and grading criteria for graduate students and undergraduates. Copies of these syllabi must be retained by the College.

**The Dean of the Graduate School**

The Dean of the Graduate School is charged with administering the policies adopted by the Graduate Faculty and the University Senate relating to graduate studies. The dean presides over all meetings of the Graduate Faculty and calls meetings of this faculty whenever it is advisable or whenever requested to do so by one-fourth of the membership. Recommendations are made by the dean to the Graduate Faculty regarding the requirements for advanced degrees, the regulations necessary to insure a high standard of graduate work and all other aspects of the graduate program. The graduate programs are administered in the interest of efficient instruction and the highest attainment possible on the part of each graduate student. The dean is responsible for determining and certifying to the Registrar candidates who have fulfilled requirements for advanced degrees.

The President, the Executive Vice President for Research, the Provost, and the Dean of the Graduate School shall be *ex officio* members of all committees of the Graduate School.

**The Graduate Council**

The Graduate Council is composed of 18 members and the Dean of the Graduate School, who serves as chair. There are 16 faculty representatives and two student representatives. Associate deans serve in a nonvoting, *ex officio* capacity.

The composition of the Graduate Council is as follows: two members from the College of Agriculture; three members from the College of Arts and Sciences; one member from the College of Business and Economics; two members from the College of Education; one member from the College of Engineering; one member from the Colleges of Communications and Information Studies and of Fine Arts; two members from the Colleges of Medicine and Pharmacy; one member from the Colleges of Dentistry, Health Sciences, Nursing, and the Graduate Centers; one member from the Colleges of Human Environmental Sciences, Social Work and the Graduate Centers; two members appointed by the Dean of the Graduate School; and two student members selected by the Graduate Council.

Members representing a college or a combination of colleges are elected by the Graduate Faculty in the respective colleges.

The term of office of the elected members is three years and that of the graduate students is one year. Members may not succeed themselves until three years have elapsed following the completion of their last term.

The Graduate Council approves or disapproves proposals concerning courses offered for graduate credit, and advises and lends assistance to the Dean in executing the policies and regulations determined by the Graduate Faculty. Specifically, the Council:

1. Evaluates department requests relating to proposed graduate programs.
2. Reviews existing programs and curricula.
3. In cooperation with the Dean, initiates recommendations to the Graduate Faculty. (This procedure is not intended to prevent a faculty member from bringing any recommendation or request directly before the Graduate Faculty.)

The Graduate Council has such authority as is herein granted, or such as the Dean or the Graduate Faculty may delegate to it. A majority of the Graduate Council constitutes a quorum for the transaction of business.

**Directors of Graduate Studies**

The Dean of the Graduate School, with the advice of the college dean(s) and the approval of the President, may recommend to the Graduate Faculty the areas of graduate study and research into which the University may be divided. (The logical unit for an area is a department or center. By common consent, however, certain departments may be grouped into a single area to offer a graduate program and in exceptional cases a department may be divided into two or more areas to offer programs in the respective areas.) Directors of Graduate Studies (DGSs) are the local representatives of each graduate program. They provide for the program's administration and act as the official liaison with the Graduate School. Directors of Graduate Studies are responsible to the Graduate Faculty of their program and to the Dean of the Graduate School for the recruitment, admission, advising, and examination of students in their program. In addition to Directors of Graduate Studies for specific programs, some colleges have designated individual faculty members as Associate Deans for Graduate Studies to serve as the local extension of the Graduate School at the college level.

Directors of Graduate Studies are appointed by the Dean of the Graduate School after consultation with the respective Graduate Faculty and administration in a program. The DGS is normally a tenured faculty member, holding the rank of Associate Professor or above, and is a full member of the Graduate Faculty.

Upon the appointment of each Director of Graduate Studies, the Dean of the Graduate School shall draw the attention of the appointee to the existence and location of the official University policies and guidelines that affect graduate faculty, graduate students, and student applicants.

The Director of Graduate Studies reports directly to the Dean of the Graduate School or to the Dean's designee on all matters relating to graduate education in the program. The DGS is responsible to the Dean of the Graduate School for the administration of the specific graduate program, including maintenance of records, administration of graduate program funds, admission of graduate students, any affiliated University Scholars Program, fellowships, program requirement changes and new programs, advising and registration, appointment of advisory and examination committees, and other degree requirements related to the graduate program. Additionally, the DGS serves as the focal point for dissemination of information from the Graduate School.

Directors of Graduate Studies serve as program advisors to each student until the student has a thesis or dissertation director. The DGS then recommends that the thesis or dissertation director be appointed the student’s advisor or committee chair. In areas where theses are not required, the DGS is the advisor of all students not writing theses. All student schedules should be endorsed by the student’s advisor. If it is desirable, a DGS may recommend that additional advisors in the program be appointed. A DGS who is to be absent from the University for as long as a semester must inform the Dean so that a substitute may be appointed.

A more detailed description of the role and responsibilities of the Director of Graduate Studies is available in the Graduate School office.

**Establishment and Modification of Graduate Programs**

An area that wishes to establish a new graduate program or modify an existing one must submit its proposal to the Graduate Council, which will make a recommendation concerning it to the Graduate Faculty.

Graduate degree programs to be delivered at distance learning locations (either on site or via technology) shall be reviewed by the Graduate Council prior to their submission for appropriate review at higher levels. Distance learning graduate degree programs shall be reviewed periodically and their effectiveness assessed during regular institutional unit reviews, or, when circumstances warrant, by a special review process initiated by the Dean of the Graduate School.

**Distance Learning Graduate Programs**

A number of departments offer selected courses or entire graduate degree programs off campus or via the Internet. Instruction is provided by various distance-learning technologies and/or on-site meetings of students with faculty. Through its Office of Distance Learning Graduate Programs, the Graduate School provides coordination and support for the off-campus sites and assures a high standard of graduate work. This office assists with: student recruitment; administration of the distance learning graduate program sites; liaison among students, programs, and UK support units; and liaison with the cooperating regional universities. All distance learning graduate programs function within the policies and rules of the Graduate School. See <www.rgs.uky.edu/gs/extcampuspgms.html>.
Kentucky Residency

According to law, the University of Kentucky and all other state-supported institutions of higher education assess tuition on the basis of Kentucky or non-Kentucky residency. The policy for determining residency is established by the Commonwealth of Kentucky Council on Postsecondary Education (see Residency Policy section of this Bulletin). Students who are unsure of their residency status should check with the Registrar’s Office before applying for admission.

Admission Procedures

The University of Kentucky is committed to a policy of providing educational opportunities to all qualified students regardless of economic or social status, and will not discriminate on the basis of race, color, religion, sex, marital status, beliefs, age, national origin, sexual orientation, or physical or mental disability.

Applicants for admission to the University of Kentucky Graduate School must pay an application fee. The fee is $40 for domestic applicants and $55 for international applicants. A check or money order made payable to THE UNIVERSITY OF KENTUCKY should accompany the completed application. NO CASH, PLEASE. Students applying via the Web can also pay the application fee by credit card on the Web. Go to <www.rgs.uky.edu/gs/gsapplication.html> and click on “Pay Application Fee.”

Students seeking admission to the University of Kentucky Graduate School must hold a baccalaureate degree from a fully accredited institution of higher learning. An overall undergraduate grade point average of 2.75 and 3.0 on all graduate work is required by the Graduate School. Individual departments may require higher grade point averages.

All applicants must submit scores on the verbal, quantitative and analytical writing portions of the aptitude section of the Graduate Record Examination (GRE), unless their chosen program is listed in the gray box on this page. The advanced portion of the GRE may be required by individual programs. The Graduate School will continue to require GRE scores for all Graduate School fellowship applications.

New students applying for admission must have two official transcripts sent by each institution of higher learning previously attended. All transcripts must be sent directly to the Graduate School, or transcripts in sealed envelopes obtained from the Registrar of each institution may accompany the application. To be official, records must bear the Registrar’s signature and/or official seal of the issuing institution. A summary of credits transferred and recorded on the transcript issued by the institution granting the degree will not suffice.

Application forms can be obtained by writing:

The Graduate School
351 Patterson Office Tower
University of Kentucky
Lexington, Kentucky 40506-0027
or on the Web at:
www.rgs.uky.edu/gs/gsapplication.html

Domestic applications (a domestic applicant is one who is a U.S. citizen or resident alien) must be submitted no later than one month before the beginning of the term the applicant intends to begin graduate work (see Calendar section of this Bulletin); all application materials (including all transcripts and official scores) must be received by this deadline.

Graduate students may not be able to enter a full graduate program leading directly to the degree they desire; it may be necessary for them to satisfy certain prerequisites that they did not complete in their undergraduate curriculum. Deficiencies are determined by the program in which the major work is to be done. Ordinarily, students are considered for direct admission in any field in which they have an appropriate undergraduate major or its equivalent.

Admission to the Graduate School entitles students to take such courses as they desire, provided they have the necessary prerequisites and departmental approval.

Attendance in the Graduate School at the University of Kentucky is not a right, it is a privilege which may be withdrawn by the University or by any area of graduate study if it is deemed necessary by the Dean of the Graduate School in order to safeguard the University’s standards.

Graduate Record Examination (GRE)

All applicants must submit scores on the verbal, quantitative and analytical writing portions of the aptitude section of the Graduate Record Examination (GRE), unless their chosen program is listed below. This rule may be waived in individual cases upon recommendation of the Director of Graduate Studies in the individual department or program. However, in cases where waivers are granted, the GRE scores must be submitted before the end of the first semester of graduate study. The advanced portion of the GRE may be required by individual programs. The Graduate School will continue to require GRE scores for all Graduate School fellowship applications.

Approved substitutions:
Accounting (M.S.): GMAT required
Business Administration (M.B.A. or Ph.D.): GMAT required
Economics (Ph.D.): GMAT or GRE
Health Administration (M.H.A.): GMAT or GRE
Public Administration (M.P.A. or Ph.D.): GMAT or GRE
Public Health (M.P.H.): GMAT or GRE

Students who have earned an academic doctorate are exempt from the GRE/GMAT requirement.

See <www.gre.org/> for more information.
English Proficiency Requirement

The University of Kentucky requires a minimum score of 550 on the Test of English as a Foreign Language (TOEFL) for all applicants whose native language is not English. (The equivalent score on the computer version of the TOEFL is 213.) Permanent residents who graduate from US institutions or schools outside the US in English-speaking countries such as Australia, Great Britain, and English-speaking Canadian provinces, are not required to take the TOEFL. Permanent residents who graduate from other institutions outside the US must provide TOEFL scores.

Students who cannot obtain a TOEFL Bulletin and registration form locally should write, well in advance, to: Test of English as a Foreign Language, Box 6154, Princeton, NJ 08541-6154 or see <www.toefl.org> on the Web.

To register for these tests, go to <www.ets.org/>, or write to the Educational Testing Service (ETS), Box 6000, Princeton, NJ 08541, for information concerning the appropriate examination. The tests are administered throughout the year and test scores generally require six weeks for delivery. It is important, therefore, that the applicant take the appropriate test well in advance of the application deadline in order to allow ample time for scores to be received in the Graduate School.

Test scores must be sent directly to the University of Kentucky Graduate School from ETS.

GRE/GMAT Requirement. All applicants for admission to degree programs in the Graduate School must submit scores on the verbal, quantitative, and analytical writing portions of the Graduate Record Examination (GRE) or other approved substitution (see approved list below). Applications will not be considered without complete official scores. The Graduate School will continue to require GRE scores for all Graduate School fellowship applications.

Approved substitutions:
Accounting (M.S.): GMAT required
Business Administration (M.B.A. or Ph.D.): GMAT required
Economics (Ph.D.): GMAT or GRE
Health Administration (M.H.A.): GMAT or GRE
Public Administration (M.P.A. or Ph.D.): GMAT or GRE
Public Health (M.P.H.): GMAT or GRE

Financial Resources Requirement.

Applicants must have adequate financial resources to cover the cost of tuition, fees, books, and supplies, room and meals, health insurance (explained below) and incidentals. If applying for a single person, the cost must be $6,000* per year for their spouse and $4,000* per year for each additional dependent. An I-20 (or IAP-66) is issued to applicants who have been academically accepted only upon receipt of acceptable financial information.

All students need to arrive with a minimum of $15,000, or $20,000 if bringing dependent(s). Self-supported students must have on hand at the beginning of each registration $8,793 to pay for tuition and fees, room and board, and health insurance.

*Subject to change without notice.

Health History Form. All international students must obtain a tuberculosis screening test and, complete a health history form from the Student Health Service before registration will be allowed. This should be done as soon as possible following arrival on the University campus. (See also Health Services in this Bulletin.)

Application Deadlines for International Student Admission

Applications for admission by international students must be received by the Graduate School by February 1 for the fall semester and June 15 for the following spring semester. No application will be considered until all supporting documents have been received and the application file is complete. The Graduate School cannot guarantee full consideration of application files that remain incomplete (i.e., missing transcripts or official scores) after April 15 for fall admission or September 15 for spring admission.

Special Admission Categories

Post-Baccalaureate Graduate Students

Students who hold a baccalaureate degree from a fully accredited institution of higher learning and who wish to pursue graduate study without a degree objective may apply for admission as post-baccalaureate graduate students.

Post-baccalaureate status is not a form of probationary admission to a degree-granting graduate program.

An application for admission to the Graduate School as a post-baccalaureate graduate student should be filed in the
Admissions Office at least two weeks in advance of the registration date for the term in which the student plans to enroll. An original or a photocopy of a transcript showing an awarded bachelors degree must accompany the application. An overall undergraduate grade point average of 2.5 or better and a 3.0 on all previous graduate work (both on a 4-point scale) are required by the Graduate School for admission.

Post-baccalaureate students may take graduate courses for graduate credit. Permission to enter any graduate class as a post-baccalaureate student will be granted only if the student meets the prerequisites for that course and if space is available.

A post-baccalaureate student who later wishes to apply to enter a degree-granting graduate program must have a 3.0 or better grade point average on all course work, graduate or undergraduate, attempted as a post-baccalaureate. A standard application form or written notice requesting consideration for admission to a specific program and stating the term for which enrollment is desired must be presented to the Graduate School. Calendar deadlines for application noted in the front of this Bulletin should be observed.

A maximum of 9 credits or 25 percent of the credits required for the degree concerned (exclusive of residence or thesis credit, research and independent study), whichever is greater, may later be transferred from post-baccalaureate status to a master’s or specialist degree program at the University of Kentucky. All such transfers of credit hours into a graduate program must be approved by that program’s Director of Graduate Studies and by the Dean of the Graduate School. A grade of A or B must have been earned in the course or courses to be transferred (see Transfer of Credits in this Bulletin).

Non-Degree Certification Students

The University of Kentucky offers admission to students pursuing course work applicable toward non-degree certification. These include, for example, Rank I Certification and Fifth Year Certification through the College of Education. This is a separate type of admission, which differs from post-baccalaureate status. Minimally, the Graduate School requires applicants for certification to meet the same admission requirements as for post-baccalaureate status, but the unit often imposes additional and more rigorous requirements for admission. It is best to consult with the Director of Graduate Studies in the specific area for which certification is sought prior to applying.

Certification students who later wish to transfer credits into a master’s or specialist program at the University of Kentucky may do so. The requirements and limitations are the same as for any transfer of credits into such a program.

Provisional Admission

Students wishing to pursue an advanced degree who are temporarily ineligible for regular graduate admission status may be recommended by the Director of Graduate Studies for provisional admission status in the following cases:

1. Missing transcripts or other requirements for admission such as letters of recommendation;
2. Temporary waiver of the Graduate Record Examination (not to exceed one semester);
3. Deficiencies determined by the program;
4. Temporary ineligibility for regular admission status because program only reviews applications once a year;

Support Services for the International Student

International Student Services. International Students and Scholars Services division, part of the Office of International Affairs, is the focal point for international student services. It orient students to a new educational system and to American culture, and provides a continuing source of information, counsel, and friendship through their stay. The Office is charged with the responsibility of interpreting immigration regulations which affect international students and scholars. It also sponsors cross-cultural programs on campus and in the community designed to encourage communication and understanding between Americans and internationals. Among the programs offered are the Cosmopolitan Club, Welcome and Orientation Week, and the International Hospitality Program. The Office of International Affairs is located in Bradley Hall.

Health Services. The University has an excellent health care clinic for outpatient care that is of special importance to international students (see section on Health Services). All international students on F-1, F-2, J-1, and J-2 visas are automatically enrolled in the University of Kentucky student insurance plan. Students who have purchased health insurance in their home country may be eligible for a waiver. Because of the extremely high cost of medical care, it is imperative that a student have insurance for himself or herself, spouse, and children. Health insurance application forms can be obtained in Bradley Hall.

Program in English for International Students. The English Department sponsors the Center for English as a Second Language. The Center offers eight-week terms of study; students may join in June, August, October, January, or March. Students receive 160 hours of intensive English instruction in an eight-week period. No college credit is given for the course of study, but students are given certificates of completion for the Center’s program. Sometimes students are admitted to the Graduate School contingent upon successful completion of the program. The Center is authorized under federal law to enroll nonimmigrant alien students. The fee is $1,480* for instruction; room, board, and textbooks are not included in the fee. For further information go to <www.uky.edu/AS/English/cest/> or write to the Center for English as a Second Language, 1235 Patterson Office Tower, University of Kentucky, Lexington, KY 40506.

*Subject to change without notice.

Sponsored International Graduate Students. International graduate students financed and monitored by sponsoring agencies can be provided with special placement, advising, and management services. Literature describing these services is available from the Office of International Affairs. The sponsoring agency is assessed a fee of $300 per semester per student for these special services.
5. Graduating University of Kentucky seniors lacking no more than six hours for graduation; the consent of the college dean and the Dean of the Graduate School and approval of the Director of Graduate Studies are necessary. Students may take no more than 12 credit hours and must complete the undergraduate degree during the semester in which they enroll in the provisional status (see Graduating Seniors as Part-Time Graduate Students below).

Provisional status is permitted for a maximum of one full-time semester or up to 12 hours, after which the student's record will be reviewed. Within 30 days into the following semester, and on recommendation of the Director of Graduate Studies, the student will be changed from provisional to regular program status, or dropped from the graduate program entirely.

Graduating Seniors as Part-Time Graduate Students

Seniors at the University of Kentucky lacking no more than 6 credit hours for graduation and having an undergraduate average of at least 2.75 on all work attempted may register in the Graduate School in provisional status with the consent of the undergraduate college dean, the appropriate Director of Graduate Studies, and the Dean of the Graduate School. The total load of such students may not exceed 12 credit hours. Graduate credit will be allowed for each credit hour of graduate work beyond the six or fewer credit hours needed to complete undergraduate requirements. Requirements for the undergraduate degree must be completed during the semester in which the student is allowed to register for part-time graduate work. Students applying for admission to the Graduate School under these conditions must fill out a petition form listing the course or courses to be taken to complete the undergraduate requirements. Petition forms are available in the Graduate School.

University Scholars Program (Combined Bachelor’s/Master’s Degree Program)

The University Scholars Program offers particularly gifted and highly motivated students the opportunity of integrating their undergraduate and graduate courses of study in a single continuous program culminating in both a baccalaureate and a master’s degree. The total number of hours for the combined program may be as many as 12 fewer than the total required for both the bachelor’s and the master’s degrees separately. The requirements for the bachelor’s degree are unaffected.

Application to the program should be submitted at the end of the student’s junior year. Applicants should have completed at least 90 credit hours of work toward the bachelor’s degree, or be eligible for senior standing in the semester they are admitted to the program. The master’s program should be in the field of the undergraduate major, and the undergraduate grade point average must be at least 3.5 in the applicant’s major field and 3.2 overall.

Applicants to a University Scholars program must fill out and have signed a University Scholars application form, which is available in the Graduate School. This form should be returned along with the standard Graduate School application form.

The Dean of the Graduate School will make admission decisions. Students must register in the Graduate School for all work taken following admission to the University Scholars Program and pay graduate tuition and fees. Enrollment in the University Scholars Program can have a significant impact on financial aid arrangements for undergraduates receiving federal financial aid and/or university scholarships. Students receiving undergraduate financial aid should consult with the Graduate School Fellowship Office prior to enrolling in the University Scholars Program in order to determine how enrollment will affect their aid. Also, University Scholars are eligible to participate in graduate student fellowship competitions.

University Scholars may take no more than 16 credit hours per semester, except by recommendation of their Director of Graduate Studies and by approval of the Dean of the Graduate School. Students must have an undergraduate advisor and a graduate advisor. A jointly planned program must be prepared for each student.

The following graduate programs participate in University Scholars:

- Agricultural Economics
- Anthropology
- Biosystems and Agricultural Engineering
- Chemical Engineering
- Chemistry
- Civil Engineering
- Classics
- Communication
- Computer Science
- Diplomacy and International Commerce
- Electrical Engineering
- English
- Family Studies
- Forestry
- French
- Geography
- History
- Materials Science and Engineering
- Mechanical Engineering
- Music
- Physics
- Public Administration
- Sociology
- Spanish
- Statistics

University of Kentucky/Lexington Theological Seminary Double Competency Program

The Lexington Theological Seminary and the University of Kentucky have established a double-competency program to educate qualified students whose career interests are social work and the ministry. Interested students should contact the Director of Graduate Studies in Social Work.

University of Kentucky/Asbury Theological Seminary Double Competency Program

Asbury Theological Seminary and the University of Kentucky have established a double-competency program for students who wish to pursue both a graduate degree in theology and a degree in a social work-related discipline. Interested students should contact the Director of Graduate Studies in Social Work for more information.
whose interests are social work and the ministry. Interested students should contact the Director of Graduate Studies in Social Work.

Collaborative Curriculum Leading to the Master of Music in Sacred Music

The UK School of Music offers the Master of Music with an emphasis in Sacred Music; this degree involves the completion of core course work at the University of Kentucky, as well as 6-9 credits of course work at an accredited seminary or other appropriate institution. One option available to the student involves a collaborative curriculum between the University of Kentucky and Lexington Theological Seminary leading to the award of the Master of Music from UK, and the Master of Arts in Church Music from Lexington Theological Seminary. Interested students should contact the Director of Graduate Studies at the University of Kentucky School of Music.

Dual Degree Programs

B.S. in Engineering/M.B.A.

The College of Business and Economics and the College of Engineering offer the opportunity to obtain the Bachelor of Science in Engineering (B.S.) and Master of Business Administration (M.B.A.) degrees in a five-year dual degree program. In addition to regular engineering courses, prerequisite undergraduate courses in accounting, economics, and statistics are taken during the first three years of study to prepare students for management, economics, business, and finance M.B.A. courses. The students’ senior year marks the beginning of the graduate M.B.A. courses and interaction with non-engineering M.B.A. students. During the summer prior to the fifth year, the students participate in study abroad designed expressly for the program, thereby enhancing and broadening their cross-cultural experience.

B.S. in Engineering/M.P.A.

The Martin School of Public Policy and Administration and the College of Engineering offer the opportunity to obtain the Bachelor of Science in Engineering (B.S.) and Master of Public Administration (M.P.A.) degrees in a five-year dual degree program. Typically, students will enroll in the College of Engineering as freshmen and take courses required for the B.S. degree through the junior year. During the senior or fourth year, students will begin to take M.P.A. courses. In the fifth year, students will take M.P.A. classes exclusively. Students must complete an internship in the summer following the fifth year of course work.

J.D./M.A. Diplomacy

The University of Kentucky offers a year and half, 30-hour Master of Arts (M.A.) degree in Diplomacy through the Graduate School. The College of Law offers a three-year, 90-hour Juris Doctorate (J.D.). The J.D./M.A. dual degree is the only one of its type offered in the Commonwealth. It permits students to gain both degrees in a total time period of one year less than if the degrees were earned independently. For information, contact the Director of Graduate Studies in the Patterson School of Diplomacy and International Commerce or the College of Law.

J.D./M.B.A.

The College of Business and Economics and the College of Law offer the opportunity to obtain the Master of Business Administration (M.B.A.) and Juris Doctor (J.D.) degrees in a dual degree program. Because both schools recognize that some aspects of business and law are compatible and interrelated, students can usually obtain both degrees in less time than if the degrees were pursued separately. As a result, students gain marketable skills and specialized employment opportunities in less time than might otherwise be required. Students interested in the J.D./M.B.A. program must apply to both the College of Law and the Graduate School.

J.D./M.P.A.

The University of Kentucky offers a two-year, 45-hour professional Master of Public Administration degree through the Graduate School. The College of Law offers a three-year, 90-hour Juris Doctorate. The M.P.A. program has been professionally reviewed and recognized by the National Association of Schools of Public Affairs and Administration. The College of Law is accredited by the American Bar Association and is a member of the Association of American Law Schools. The J.D./M.P.A. dual degree is the only one of its type offered in the Commonwealth. It permits students to gain both degrees in a total time period of one year less than if the degrees were earned independently. For information, contact the Director of Graduate Studies in Public Administration or the College of Law.

M.D./M.B.A.

The University of Kentucky M.D./M.B.A. program is designed to provide students with the necessary educational foundation so that they not only are prepared to begin practice as doctors, but also to assume managerial responsibility in a variety of health care settings. The integrated, sequenced program of study culminates in M.B.A. courses. The program may normally be completed in five years. Students interested in the program must apply to both the College of Medicine and the Graduate School.

M.D./M.P.H.

The University of Kentucky M.D./M.P.H. combined degree provides well-trained physicians with additional skills and knowledge in public health policies and procedures, enabling them to provide service to individuals within the context of a healthy community and its unique population characteristics. With careful planning, the M.D. and M.P.H. tracks can be completed in five years. Students interested in the program must apply to both the College of Medicine and the Graduate School.

Pharm.D./M.B.A.

The College of Business and Economics and the College of Pharmacy offer the opportunity to obtain the Master of Business Administration (M.B.A.) and Doctor of Pharmacy (Pharm.D.) degrees in a dual degree program. Students can usually obtain both degrees in four years plus three summers instead of the
five and one-half years required if the degrees were pursued separately. The dual degree program is designed to provide students with the necessary educational foundation so that they not only are prepared to begin practice as a pharmacist, but to assume managerial responsibility in a variety of health care settings. A student desiring admission into the dual degree program will be required to apply formally and independently to both programs.

Pharm.D./M.P.A.

The University of Kentucky offers a two-year, 45-hour professional Master of Public Administration degree through the Graduate School. The College of Pharmacy offers a four-year, 158-hour Doctor of Pharmacy. The Pharm.D./M.P.A. dual degree is the only one of its type offered in the Commonwealth. The dual degree program permits a student to gain both degrees in a total time period less than if the degrees were earned independently. The dual degree program is highly desirable for persons seeking careers in state and federal regulatory and administrative agencies, the pharmaceutical industry, managed care organizations, and academia. For information, contact the Director of Graduate Studies in Public Administration or the College of Pharmacy.

Pharm.D./M.S. in Economics

The College of Business and Economics and the College of Pharmacy offer the opportunity to obtain the Master of Science (M.S.) in Economics and Doctor of Pharmacy (Pharm.D.) degrees in a dual degree program. The dual degree program permits a student to gain both degrees in a total time period less than if the degrees were earned independently.

Individuals grounded in both economic analysis and clinical skills provide an increasingly important and unique interface between practitioners and managers to balance clinical decision making with financial realities. The dual degree is highly desirable for persons seeking careers in government, the pharmaceutical industry, institutional settings, managed care organizations, pharmacy benefit management organizations, and academia. A student desiring admission into the dual degree program will be required to apply formally and independently to both programs.

M.D./Ph.D. Combined Studies

Students combining studies toward a Ph.D. degree and an M.D. degree in one of the established programs of the Graduate School must be admitted to both programs. Before applying for admission to the Graduate School, applicants should consult with the Director of Graduate Studies of the graduate area of interest.

Copies of the guidelines for students wishing to pursue the combined M.D./Ph.D. degrees may be obtained in the office of the Associate Dean for Academic Administration in the Graduate School.

Visiting Students

Students who are enrolled in a graduate program at another institution and plan to attend the University of Kentucky as Visiting Students need not submit transcripts. Students must, however, request a Visiting Student form from the Graduate School office when filing an application. Visiting Student admission is for one semester only and credit earned in that status is not applicable to a University of Kentucky degree.

Readmission

Former University of Kentucky graduate students in good standing are eligible for readmission within one academic year. Otherwise, readmission is contingent upon the approval of the student’s program. Students must file an application for readmission by the stated deadlines (see Calendar section of this Bulletin). No application fee is assessed for students seeking readmission. Readmission information and forms can be found on the Web at <www.rgs.uky.edu/gs/domapp/readmdm.html>.
Registration and Classification

All students expecting graduate credit must be enrolled in the Graduate School. Graduate students will conform to the general registration schedule of the University and may not enter later than the last allowable date set by the Registrar.

Before registering, graduate students should obtain approval of their proposed schedule from their advisor(s).

Changes in the Graduate School Requirements

When Graduate School or degree program requirements are changed after a course of study has begun, the students shall have the option of fulfilling either the old or the new requirements.

If students elect to fulfill the old requirements but find that necessary resources (e.g., courses, instruction in particular skills) are no longer available, they may make reasonable substitutes with the approval of the Dean of the Graduate School upon recommendation of the Director of Graduate Studies.

In the event that students interrupt their work on a graduate degree (i.e., are not enrolled) for one calendar year or more, the Dean of the Graduate School shall determine, upon recommendation of the Director of Graduate Studies, whether the old requirements or the new requirements shall apply. In the event students have not completed the requirements for the graduate degree five years after the effective date of a change in degree requirements, the new requirements shall apply unless determined otherwise by the Dean of the Graduate School.

Advanced Degrees for Faculty Members

Members of the faculty having a rank higher than that of Instructor may not be considered as candidates for degrees in the discipline in which they are employed and hold academic rank.

Student Responsibility

It is the student’s responsibility to be informed concerning all regulations and procedures required by the course of study being pursued. In no case will a regulation be waived or an exception granted because a student pleads ignorance of the regulation or asserts that information was not presented by advisors or other authorities. Therefore, the student should become familiar with the Graduate School Bulletin, including 1) the section presenting the requirements for degrees and 2) the specific program offerings and requirements.

The Director of Graduate Studies in the student’s major program should be consulted concerning course requirements, any deficiencies, the planning of a program, and special regulations. Programs may have degree requirements that are not listed in the Bulletin.

Confidentiality of Student Records

In accordance with the Family Education Rights and Privacy Act (FERPA) of 1974, University of Kentucky students have the right to review, inspect, and challenge the accuracy of information kept in a cumulative file by the institution unless the student waives this right in writing. Records cannot be released in other than emergency situations without the written consent of the student, except in the following situations:

1. to other school officials, including faculty within the educational institution or local educational agency, who have legitimate educational interests;
2. to officials of other schools or school systems in which the student intends to enroll, upon condition that the student be notified of the transfer, receive a copy of the record if desired, and have an opportunity for a hearing to challenge the content of the record;
3. to authorized representatives of 1) the Comptroller General of the United States, 2) the Secretary of Education of the United States, 3) an administrative head of an education agency or 4) state educational authorities;
4. in connection with a student’s application for, and receipt of, financial aid;
5. where the information is classified as “directory information.” The following categories of information have been designated by the University as directory information: name, address, telephone listing, e-mail address, photographs, date and place of birth, major field of study, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, degrees and awards received, enrolled hours, and the most recent previous educational institution attended by the student. If you do not wish such information released without your consent, you should notify the Student Records Office in writing.

Questions concerning this law and the University’s policy concerning release of academic information may be directed to the Student Records Office of the Graduate School.

Graduate Courses

All courses numbered 500 through 799 may be counted for credit toward a graduate degree provided they are approved as an appropriate part of the student’s graduate program by the student’s graduate advisor or committee. Courses numbered 400G to 499G carry graduate credit for non-majors only.

Courses numbered at the 800 or 900 level are normally not accepted for credit toward a graduate degree. Exceptions can be made if permission is granted by the Graduate Council to a program to offer specific professional courses as part of its...
academic program. Prior approval to take a course must be obtained from the Director of Graduate Studies, the Dean of the Graduate School and the dean of the professional college. Without such approval, professional courses may not be counted toward satisfying degree requirements. Courses numbered at the 600 or 700 level should be taught by members of the Graduate Faculty or by such other instructors as are approved by the Dean of the Graduate School.

Add/Drop-Withdrawal

The Graduate School follows the rules of the University Senate as administered by the Registrar's Office.

Academic Load

The total semester or term academic load of a student is the sum of all credits and credit equivalents (e.g., graduate language courses, undergraduate courses, courses audited, etc.) being carried. The normal academic load of a graduate student during any semester is nine credit hours or equivalent. Under no circumstances may it exceed 15 credit hours or equivalent. During the summer term, the maximum academic load for the second summer term is nine credit hours, and for the first summer term is four credit hours. The maximum academic load for any combination of the first and second summer terms is 12 credit hours.

Students satisfactorily completing nine course credits, or equivalent, of graduate level work during a semester, are classified as full-time students by the University. Students satisfactorily completing five course credits, or equivalent, during a summer term are classified as full-time. Those completing less than these amounts are classified as part-time. For the student who is a full-time teaching assistant or whose service to the University requires approximately 20 hours per week, the academic load shall not exceed 10 hours. This maximum may be increased to 12 hours for students with lighter service loads and/or utilizing University resources while working on the thesis and/or dissertation. All I grades must be resolved to a regular letter grade before a final grade can be assigned.

Grades and Grade Point Averages

The official grades of graduate students are recorded in the Office of the Registrar. The grading in graduate courses is done according to the following scale:

- A-High achievement 4 grade points per credit
- B-Satisfactory achievement 3 grade points per credit
- C-Minimum passing achievement 2 grade points per credit
- D-Fail 0 grade points per credit
- E-Failure 0 grade points per credit

Instructors who assign an I grade must file with the student's Director of Graduate Studies information which includes 1) the name of the student, 2) the course number and hours of credit, 3) the semester and year of enrollment, 4) specific information on the work to be completed before a final grade can be assigned, and 5) the time frame in which the specific requirements are to be met (not to exceed 12 months). Graduate students should consult with their Director of Graduate Studies concerning procedures relative to the awarding of I grades and the conditions under which they may be removed.

An overall average of B (3.0) on all graduate work in the program must be attained before an advanced degree may be awarded. Graduate-level courses (numbers 400G-799) are computed in the graduate grade-point average, with the exception of 400G courses in the student's program.

Once a grade other than I, S, or U has been reported to the Registrar's Office, it may not be changed unless an error was made at the time the grade was given and recorded, and then
only upon the written unanimous approval of the instructor, the Registrar, and the Dean of the Graduate School.

Repeat Option

A student may repeat a graduate course and count only the second grade as part of the graduate grade point average. This action will be initiated by petition of the Director of Graduate Studies to the Dean of the Graduate School, and may be used only once in a particular degree program or in post-baccalaureate status.

Credit Equivalence

Certain research courses carry no credit hours or grades but do contribute to the residence requirements of graduate degrees. For these courses the credit equivalent is stated in the course descriptions.

Scholastic Probation

When students have completed 12 or more semester hours of graduate course work with a cumulative GPA of less than 3.0, they will be placed on scholastic probation. Students will have one full-time semester or the equivalent (9 hours) to remove the scholastic probation by attaining a 3.0 cumulative GPA. If probation is not removed, students will be dismissed from the Graduate School.

Students who have been dismissed from the Graduate School for this reason may apply for readmission to the Graduate School after two semesters or one semester and the eight-week summer term. If they are accepted by the program, readmitted students will have one full-time semester or the equivalent (9 hours) to remove the scholastic probation by attaining a 3.0 cumulative GPA.

Exceptions to this policy can be made only by the Dean of the Graduate School.

Students placed on scholastic probation are not eligible for fellowships or tuition scholarships and may not sit for doctoral qualifying examinations, or master's or doctoral final examinations.

Termination

The Dean of the Graduate School may terminate enrollment in a particular program for the following reasons:

1. Scholastic probation for three enrolled semesters.
2. Having failed twice the final examination for the master's degree or the qualifying examination.
3. In cases where the student's Advisory Committee recommends termination after the qualifying examination has been passed, the Graduate Faculty in that program will meet to vote on the recommendation. When the Graduate Faculty of that program concurs and the student dissents, the student will have an opportunity to meet with the Graduate Faculty of the program, after which a second vote will be taken and a final recommendation will be made to the Dean of the Graduate School.

Each program sets specific requirements and standards of performance, evaluative procedures and criteria, and procedures for terminations. The student should be informed of these criteria at the time of enrollment by the Director of Graduate Studies of the program.

Examinations for Graduate Credit

A special examination for graduate credit in a student's program requires the approval of the Dean of the Graduate School. Students must complete the Special Examination form (available in the Registrar's Office) and have it approved and signed by the Director of Graduate Studies and the Dean of the Graduate School. Students must be enrolled in the Graduate School during the semester they wish to sit for a special examination.

Students Changing Programs

Students who plan to change programs must have the consent of the Director of Graduate Studies in the new program. A letter of acceptance from the DGS must be sent to the Graduate School. Also, students must request in writing that this change be made official by the Graduate School.

Off-Campus and Short Courses

Short courses are defined as courses of less than a term in length. A short course may not carry more credits than the number of weeks during which it is offered. Two short courses of four weeks or less may not be taken simultaneously.

Instructional standards for off-campus and short courses should be the same as those established for on-campus and regular courses. A comprehensive final examination will normally be required to assess the student's capability for scholarly thinking in the subject matter area. Practicum or laboratory short courses should require other experiences of comparable rigor.

UK Students as Visitors

University of Kentucky graduate students who attend another graduate school as a Visiting Student must have the permission of their University of Kentucky advisor and the Graduate School before the courses are taken in order to transfer credits earned (see Transfer of Credits in this Bulletin).

Visiting Student status may be granted only to a student who is in good standing in a degree program.

Time Limit for Degrees

Master's/Specialist Degrees. Activities used to satisfy degree requirements must be completed within eight years preceding the proposed date of graduation. Extensions of time will be considered by the Graduate Council only upon written recommendation by the appropriate Director of Graduate Studies. No activity completed more than 12 calendar years preceding the proposed graduation date will be considered for graduation.

Doctoral Degree. All degree requirements for the doctorate must be completed within five years following the semester or summer session in which the candidate successfully completes the qualifying examination. In the event that all degree requirements are not met during the five-year period, degree candidates who provide evidence of the likelihood of completing the degree during an extension of time may be granted such an extension by the Graduate Council. Requests will be considered only upon written recommendation of the appropriate Director of Graduate Studies after the candidate has again
successfully completed the qualifying examination process as currently administered by the program. (Note: Failure to pass the re-examination will result in the termination of degree candidacy; a second re-examination is not permitted.) An extension of no more than five years may be granted.

Electronic Theses and Dissertations (ETDs)

The Graduate School, in conjunction with the University Libraries, permits graduate students the option of submitting their master's theses and doctoral dissertations in wholly electronic format, instead of the traditional paper copy. These scholarly works are then displayed on the Web for the international community of scholars to view. ETDs have many advantages and are the latest advance in scholarly communication. They provide for a much broader and faster showcase for the research and creative accomplishments of graduate students and their programs, as well as providing students the valuable experience of preparing a large wholly electronic document and gaining a working familiarity with several software types. A properly constructed ETD has enhanced full-text searchability; searches are not limited to just keywords and indexing data. Their electronic nature can provide much richer content: multimedia components such as high-resolution color images, video and audio clips, as well as some databases and programs can be imbedded in an ETD. Further information is available at <www.rgs.uky.edu/gs/thesdissprep.html>.

Thesis and Dissertation Fees

Thesis and dissertation fees cover the cost of binding the thesis or dissertation, microfilming, and copyright (see Copyright in this Bulletin). The Thesis fee for a Plan A master's degree is $14; the Dissertation fee is $69, which includes the cost of submission to UMI Dissertation Publishing. Fees can change without notice. Authorization forms used for paying dissertation fees are issued in Room 351, Patterson Office Tower. Diplomas will not be released from the Registrar's Office until the fees have been paid.

Graduation (Commencement)

Graduate degrees may be conferred at the close of either semester or the second summer session, but Commencement exercises are held only in May. Students who are eligible to receive degrees at the end of the summer session or the fall semester may participate in the spring Commencement exercises. Appropriate academic regalia must be worn.

To be eligible for a degree, a student must file Application for Degree Cards in the Graduate School within 30 days after the beginning of the semester (15 days in the summer session) in which they expect to graduate.

Diplomas

Diplomas for graduate students are ordered after certification of the degrees has been completed. If a letter of certification is needed, the Graduate School will provide one upon written request or by coming in person to Room 351 Patterson Office Tower.

Outstanding Accounts

All outstanding accounts due to the University must be cleared before a degree is awarded.
GENERAL REQUIREMENTS FOR ALL MASTER'S DEGREES (See also General Regulations)

On-Campus Residence

There is no Graduate School-wide sustained residence requirement for master's degrees at the University of Kentucky. However, students are advised to review the requirements for the programs in which they are interested and consider carefully the spirit of resident graduate work as discussed in the section on doctoral residency. Students who contemplate continuing in a doctoral program should take into account at the outset the residence requirements for the doctoral degree.

Foreign Language Requirement

Many programs require a reading knowledge of a foreign language for the master's degree. Accepted languages for fulfillment of this requirement are those currently taught at the University of Kentucky, subject to approval by the Director of Graduate Studies. Other languages may be recommended by the major advisor and approved by the Dean of the Graduate School on the recommendation of the Director of Graduate Studies. The Director sends this recommendation to the Dean. The language requirement may be satisfied by:

1. completing one of the accelerated graduate level language courses (011 courses) with a grade of B or better.
2. completing the fourth semester of a foreign language with a grade of B or better at an accredited college or university.
3. completing a more advanced foreign language course (beyond the fourth semester level, with all coursework and readings in the target language) with a grade of B or better at an accredited college or university.
4. completing an accelerated graduate level language course for reading knowledge with a grade of B or better, at another accredited university.
5. transferring a language taken to satisfy the requirements for a master's degree at another accredited university.
6. completing, with a grade of B or better, special examinations given for the graduate reading courses. Forms may be obtained from the Registrar's Office, Funkhouser Building. Other types of special examinations are scheduled in the Graduate School.
7. For students with significant life experience in the foreign language culture: completing a placement test administered by the foreign language programs of the University, and testing to a level beyond the fourth semester of foreign language study, which is the equivalent of a grade of B or better. This method requires the approval and recommendation of the Director of Graduate Studies.

Note: With the approval of their program, students who are non-native speakers of English may satisfy the foreign language requirement by presenting a TOEFL score of 550 or above. (The equivalent score on the computer version of the TOEFL is 213.) Candidates for degrees must be proficient in English.

Transfer of Credits

The Director of Graduate Studies and the Dean of the Graduate School may approve the transfer of regular graduate course credits, completed at an accredited university and earned prior to admission to a given graduate degree program. These credits must meet the following criteria:

1. A maximum of a maximum of 9 credit hours can be transferred.
2. The credit hours can be credited toward the minimum requirements of the Master's or Specialist degrees only.
3. The grades earned must be A or B.
4. In no case will independent work, research, thesis, or dissertation credit completed as part of the degree requirements for one program be considered to satisfy requirements of a subsequent master's or specialist program.
5. Such credits must be earned as a student in another graduate program at the University of Kentucky, or as a graduate student at another accredited graduate school.

In the event a student offers credits in more than one of these categories, the total to be credited toward the degree still may not exceed 9 hours or twenty-five percent of the semester hours required for the degree concerned (exclusive of residence or thesis credit), whichever is greater. In no case will independent work, research, thesis, or dissertation credit completed as part of the degree requirements for one program be considered to satisfy requirements of a subsequent master's or specialist program.

Courses and Curricula

Graduate students are eligible to take regular courses which meet as organized classes and independent-study or research courses in which each student carries on investigations independent of class meetings. Independent study or research courses must not duplicate thesis work; thesis work must be done in addition to the minimum course requirements. At least two-thirds of the minimum requirements for the master's or specialist degree must be in regular courses, and at least half of the minimum course requirements (excluding thesis, practicum, or internship credit) must be in 600- or 700-level courses. Exceptions to this rule may be made only with the approval of the Graduate Council.

Concurrent Degree Programs

Concurrent enrollment for degree purposes in more than one graduate program is permitted only with the approval of the
## Degrees Conferred

### Doctor of Philosophy
- Agricultural Economics
- Anatomy and Neurobiology
- Animal Sciences
- Anthropology
- Biology
- Biomedical Engineering
- Biosystems and Agricultural Engineering
- Business Administration
- Chemical Engineering
- Chemistry
- Civil Engineering
- Communication
- Computer Science
- Crop Science

### Economics
- Educational and Counseling Psychology
- Educational Policy Studies and Evaluation (Higher Education)
- Electrical Engineering
- English
- Entomology
- Exercise Science
- Family Studies
- Geography
- Geology
- Gerontology
- Hispanic Studies
- History

### Materials Science and Engineering
- Mathematics
- Mechanical Engineering
- Microbiology
- Mining Engineering
- Molecular and Biomedical Pharmacology
- Molecular and Cellular Biochemistry
- Music
- Nursing
- Nutritional Sciences
- Pharmaceutical Sciences
- Philosophy

### Physics and Astronomy
- Physiology
- Plant Pathology
- Plant Physiology
- Political Science
- Psychology
- Public Administration
- Rehabilitation Sciences
- Social Work
- Sociology
- Soil Science
- Statistics
- Toxicology
- Veterinary Science

### Master of Arts
- Anthropology
- Art
- Classics
- Communication
- Diplomacy

### English
- French
- Geography
- German
- Hispanic Studies

### History
- Library Science
- Mathematics
- Music
- Philosophy

### Political Science
- Psychology
- Sociology
- Theatre Arts

### Master of Science
- Agricultural Economics
- Animal Sciences
- Applied Mathematics
- Biology
- Chemistry
- Clinical Sciences
- Computer Science

### Crop Science
- Dentistry
- Economics
- Entomology
- Geology
- Hospitality and Dietetic Administration

### Kinesiology and Health Promotion
- Mathematics
- Medical Sciences
- Pharmaceutical Sciences
- Physics
- Plant and Soil Science
- Plant Pathology

### Psychology
- Statistics
- Toxicology
- Veterinary Science

### Other Degrees
- Doctor of Education
- Doctor of Musical Arts
- Doctor of Science
- Master of Arts in Education
- Master of Arts in Interior Design, Merchandising and Textiles
- Master of Business Administration
- Master of Civil Engineering
- Master of Education
- Master of Engineering
- Master of Fine Arts
- Master of Health Administration
- Master of Historic Preservation
- Master of Mining Engineering
- Master of Music
- Master of Public Administration
- Master of Public Policy
- Master of Public Health

### Master of Rehabilitation Counseling
- Master of Social Work
- Master of Science in Accounting
- Master of Science in Agriculture
- Master of Science in Biomedical Engineering
- Master of Science in Biosystems and Agricultural Engineering
- Master of Science in Chemical Engineering
- Master of Science in Communication Disorders
- Master of Science in Education
- Master of Science in Electrical Engineering
- Master of Science in Family Studies
- Master of Science in Forestry
- Master of Science in Health Physics
- Master of Science in Interior Design, Merchandising, and Textiles
- Master of Science in Library Science

### Master of Science in Manufacturing Systems Engineering
- Master of Science in Materials Science and Engineering
- Master of Science in Mechanical Engineering
- Master of Science in Mining Engineering
- Master of Science in Nursing
- Master of Science in Nutritional Sciences
- Master of Science in Physical Therapy
- Master of Science in Physician Assistant Studies
- Master of Science in Radiological Medical Physics
- Master of Science in Vocational Education Specialist in Education
student’s Graduate Advisor(s), Directors of Graduate Studies in the programs, and the Dean of the Graduate School. No more than nine hours of course work may be common to concurrent degree programs.

Subsequent to the receipt of a doctoral degree, a student is not eligible to receive a master’s degree based on the work which led to the doctorate.

**Independent Study Programs (Correspondence Courses)**

No graduate credit is given for courses taken by correspondence.

**Final Examination**

A Final Examination (oral and/or written) is given to all candidates for master’s degrees not later than eight days before the last day of classes of the semester in which the degree is to be awarded. The examination is scheduled by the Dean of the Graduate School and the report is returned to the Dean upon completion of the examination, which in no case may be later than two weeks after the start of the examination. The examining committee consists of at least three qualified faculty recommended by the Director of Graduate Studies and appointed by the Dean of the Graduate School. At least two committee members (including the chair or co-chair) must be members of the Graduate Faculty, and at least one of the two must be a Full member of the Graduate Faculty.

The recommendation for a final examination must be filed with the Graduate School at least two weeks prior to the date of the examination. (Students writing theses should see the section on Thesis/Non-Thesis Options below and Electronic Theses and Dissertations [ETDs] in this Bulletin.)

Students on scholastic probation are not eligible to sit for the final examination. If the candidate fails the final examination, the committee may recommend to the Dean of the Graduate School the conditions under which a second examination may be administered. Insofar as it is practicable, the same examining committee gives this examination. In all decisions the majority opinion of the committee prevails. If the committee is evenly divided, the candidate fails. A third examination is not allowed.

**Thesis/Non-Thesis Options**

The Graduate Faculty authorizes all graduate programs to satisfy the master’s requirements by either of two options, thesis (Plan A) or non-thesis, (Plan B). Candidates for the master’s degree must have a major area (defined usually as an academic department) and must take at least two-thirds of the course work in this area. The other one-third may be taken in this area or in related graduate areas. In Agriculture and Education, only one-half of the work must be in the major area. When the establishment of major topics seems to require it, the Graduate Council may, on recommendation of the appropriate Director of Graduate Studies, authorize courses taught outside the major to count toward the major requirement.

In addition, the Council on Postsecondary Education (CPE) requires that at least one-half of the minimum course requirements (excluding thesis, practicum, or internship credit) be in the major or core area, with three-fourths of these at the 600- to 700-level. This is in addition to the requirements stated above.

The thesis option (Plan A) requires a thesis to be developed under the direction of a member or associate member of the Graduate Faculty. Collaborative effort by two or more graduate students is not forbidden. However, there must be enough independent effort to enable each student to make a separate contribution and to prepare an individual thesis.

Theses must be prepared in conformity with the instructions published by the Graduate School. For specific instructions regarding the format of theses, the student should obtain a copy of *Instructions for the Preparation of a Master’s Thesis* from the Graduate School or on the Web at <www.rgs.uky.edu/gs/ thesdisprep.html>.

Before the final examination, the thesis director and the appropriate Director of Graduate Studies must indicate to the Graduate School that the student’s thesis satisfies all requirements of the Graduate School and is complete in content and format with the exception of pagination, and that the student is ready to be examined. Any modification in the thesis which the final examination committee specifies must be made before the degree is conferred.

The final two copies are submitted to the Graduate School after the Director of Graduate Studies and the Thesis Director have signed that they are complete. The thesis in its final form must be received in the Graduate School within 60 days of the Final Examination.

Theses must be presented to and accepted in the Graduate School by the last day of the semester if a student plans to graduate that semester.

Each student must pay a $14 fee for the binding of the thesis. Payment will be made at the Billings and Collection Office.

Theses submitted by candidates become the property of the University of Kentucky. The University protects the authors’ rights by placing certain restrictions upon the use of theses.

The Graduate School, in conjunction with the University Libraries, offers graduate students the option of submitting their master’s thesis in wholly electronic format. For more information, see *Electronic Theses and Dissertations (ETDs)* in this Bulletin.

The non-thesis option (Plan B) requires that six or more graduate credit hours of course work be submitted in lieu of a thesis. A student may follow this option with approval of the program concerned.

Students should consult their advisor for any additional requirements established for Plan B in their area of study.

**GENERAL REQUIREMENTS FOR ALL DOCTORAL DEGREES**

**Doctor of Philosophy (Ph.D.) Degree**

The Ph.D. degree is intended to represent the demonstration of independent and comprehensive scholarship in a specific field. Such scholarship must be manifested by both the student’s mastery of subject matter and capacity to do research.

The degree of Doctor of Philosophy is conferred upon a candidate who, after completing graduate work devoted to study of a special field of knowledge, 1) passes comprehensive examinations in the chosen field and the dissertation subject,
2) presents a satisfactory dissertation, and 3) shows evidence of scholarly attainment.

Students should note that some doctoral programs have degree requirements that may exceed the minimum requirements of the Graduate Faculty.

**The Major Professor and the Advisory Committee**

Each student’s program is guided by their major professor and an advisory committee throughout the graduate career. The purpose of the committee is to give continuity of direction and counsel and to provide intellectual stimulation from the earliest days of residency through the completion of the doctorate.

The Director of Graduate Studies, or designee, serves as advisor to beginning graduate students until the advisory committee is appointed, normally not later than upon completion of 18 credit hours of graduate work. The advisory committee must be appointed at least one year prior to the qualifying examinations. The major professor and advisory committee are appointed by the Graduate Dean after consultation with the appropriate Director of Graduate Studies. The dissertation director, when selected, serves as the major professor. The advisory committee also provides advice to the student and specifically sets requirements (within applicable program, Graduate School, and University regulations) which the student must meet in pursuit of the doctorate.

The advisory committee has a core of four members. This core consists of the major professor as chair, two other members from the major area, and at least one representative from any minor area(s). At least one representative must be from outside the academic program (department). All members of the core must be members of the Graduate Faculty of the University of Kentucky and three (including the major professor) must possess full Graduate Faculty status. Additional faculty members may serve as members of the advisory committee. The core of the advisory committee must be kept at its full complement throughout the graduate career of the individual student. Thus, in the event of a vacancy on the committee (occasioned by resignation, faculty leave, or inability to serve), an appropriate replacement must be made prior to any subsequent committee decisions.

All decisions of the advisory committee are by majority vote of its Graduate Faculty members. Advisory committee decisions must be reported promptly to the appropriate Director of Graduate Studies who will be responsible for transmitting them to the Dean of the Graduate School.

In addition to advising and program planning, the advisory committee is also involved in the administration of the qualifying examination, the supervision of the preparation of the dissertation, and the administration of the final examination.

**Major and Minor Subjects**

Every applicant for the Ph.D. degree must select a major area of study. The major area is one in which the student’s efforts are concentrated. Some programs also require one or more minor areas. Minor(s) must be approved by the student’s advisory committee.

**Residency Requirements**

The purpose of a residency requirement is to encourage doctoral students to experience contact with the academic community: colleagues, libraries, laboratories, on-going programs of research and inquiry, and the intellectual environment that characterizes a university. Such experience is generally as important as formal class work in the process of intellectual development. While the residency requirement is, by necessity, given in terms of full or part-time enrollment, the intent of the requirement is to ensure that the student becomes fully involved in an essential part of scholarly life.

Requirements for the doctorate may be completed in three years of full-time graduate work or the equivalent in combined full-time and part-time study; however, more time may be required (see Academic Load in this Bulletin). In unusual cases, approval of a program of study involving less time may be secured from the Dean of the Graduate School. The ultimate goal of these requirements is to lead students to scholarly accomplishment, not solely to amass semester hours or time spent. On the recommendation of the Director of Graduate Studies, and with the concurrence of the Dean of the Graduate School, successful completion of a master’s degree may be considered the equivalent of the first year of the three years of work toward the doctorate.

Subject to approval by the individual doctoral program (see the chart of Degree Requirements), students may fulfill the three-year doctoral residence requirement utilizing one of the three models listed below.

**Model I**

a) master’s degree or 18 graduate hours at the University of Kentucky, or transfer of residence credit from an awarded master’s at another accredited school; **plus,**

b) two consecutive semesters enrolled full-time, i.e., nine or more credits per semester (may include combined first and second summer sessions); **plus,**

c) completion with a grade of “S” of two consecutive full-time* semesters (9 credits each) or three consecutive part-time** semesters (6 credits each) of course 769 after successfully passing the qualifying examination.

**Model II**

a) master’s degree or 18 graduate hours at the University of Kentucky, or transfer of residence credit from an awarded master’s at another accredited school; **plus,**

b) enrollment part-time (at least 6 graduate credits per semester) during three consecutive semesters; **plus,**

c) completion with a grade of “S” of two consecutive full-time* semesters (9 credits each) or three consecutive part-time** semesters (6 credits each) of course 769 after successfully passing the qualifying examination.

**Model III**

a) master’s degree or 18 graduate hours at the University of Kentucky, or transfer of residence credit from an awarded master’s at another accredited school; **plus,**

b) accumulation of 24 graduate credits at the University of Kentucky (exclusive of short courses; no more than nine of these 24 credits may be earned in summer sessions) during three consecutive academic or calendar years;
plus,
c) completion with a grade of "S" of two consecutive full-time* semesters (9 credits each) or three consecutive part-time** semesters (6 credits each) of course 769 after successfully passing the qualifying examination.

*Students electing the full-time option may substitute a summer term for one of the semesters by enrolling in 3 credits of 769 in the first summer session and 6 credits of 769 in the second summer session.

**Students electing the part-time option may substitute a summer term for one of the semesters by enrolling in 6 credits of 769 in the second summer session only.

With the written recommendation of a candidate’s advisory committee and with the approval of the appropriate Director of Graduate Studies and the Graduate Dean, specified graduate course work may be taken in lieu of all or part of the residence credit (course 769) requirement. The student need not be physically present on campus while enrolled for credit after the qualifying examination. While there is generally no formal class work attached to these credits, and in some cases the student may not be on the campus, full tuition costs are assessed in that students who are preparing their dissertations are utilizing University resources such as libraries, Computing Center, and major professors’ and committee members’ time and energy.

Note: The semester during which the student takes the qualifying examination may be counted for residence credit only if the date of successful passage is within six weeks (three weeks for the second summer session) of the first day of classes.

Candidates who have fulfilled the above requirements, but who have not yet defended the dissertation, are required to remain continuously enrolled in course 749 or 769 (0 credit hours) each semester until the dissertation is completed and defended. Such registration enables the University to keep accurate records of degree candidates and facilitates rapid and accurate information processing. Some programs have additional residence requirements which must also be met.

It should be understood that the above represents the minimum requirements of the Graduate School. Some programs have additional requirements.

Exceptions to this normal pattern may be made with the approval of the Dean of the Graduate School upon the written recommendations of the student’s advisory committee and the Director of Graduate Studies, which clearly demonstrate that the principle of residence is preserved.

Foreign Language Requirement

Some doctoral degree programs require a reading knowledge of one or more modern foreign languages for the doctorate. Accepted languages for fulfillment of this requirement are those currently taught at the University of Kentucky, subject to approval by the Director of Graduate Studies. Other languages may be recommended by the major advisor and approved by the Dean of the Graduate School on the recommendation of the Director of Graduate Studies. The Director sends this recommendation to the Dean. For more information, see the Master’s Degree Foreign Language Requirement in this Bulletin.

Any language requirement(s) must be satisfied before the applicant may sit for the qualifying examination.

The Qualifying Examination

A qualifying examination consisting of both written and oral components is required of all doctoral students. Its purpose is to verify that students have sufficient understanding of, and competence in, their fields to become candidates for the degree. In most programs, the advisory committee prepares and administers an individual qualifying examination; typically, that committee also judges the results of the examination. A majority vote of the core of the advisory committee is required for successful completion of the qualifying examination. Programs that give uniform, written qualifying examinations to all of their candidates shall have rules (filed with the Dean of the Graduate School) governing the role of the advisory committee in the preparation, administration, and evaluation of the qualifying examination. The examination is usually given after four semesters of graduate work or the equivalent, and after fulfillment of prequalifying residency.

The qualifying examination must be scheduled through the Director of Graduate Studies and approved a minimum of two weeks in advance by the Graduate School. Students should check with the Director of Graduate Studies to make sure that the qualifying examination has been properly scheduled.

The results of the examination must be reported by the Director of Graduate Studies to the Graduate School within 10 days of its conclusion. If the result is failure, the advisory committee determines the conditions to be met before another examination may be given. The minimum time between examinations is four months. A second examination must be taken within one year after the first examination. A third examination is not permitted.

The Dissertation

Each student must present a dissertation which represents the culmination of a major research project. The dissertation must be a well-reasoned, original contribution to knowledge in the field of study and should provide evidence of high scholarly achievement. The major professor is the primary source of guidance in the planning and preparation of the dissertation. However, other members of the advisory committee may be involved in the process as well. All core members of the advisory committee must read the dissertation prior to signing the dissertation approval form. It is the responsibility of the advisory committee to make suggestions for revisions before the final examination. A majority of the advisory committee core members must indicate that the form and substance of the dissertation are adequate to justify the scheduling of the final examination. The final examination may not be scheduled without the approval of a majority of the advisory committee members.

The style and form of the dissertation must conform with the instructions published by the Graduate School. For specific instructions regarding the format of the dissertation, the student should obtain a copy of the Instructions for the Preparation of Dissertations and Doctor of Musical Arts Projects from the Graduate School Office or on the Web at <www.rgs.uky.edu/gs/thesdissprep.html>.

Copyright and Fees

Each graduating doctoral student must pay dissertation fees. Payment can be made at the University Billings and Collections Office. Authorization forms for paying dissertation fees are issued in room 351, Patterson Office Tower.
Graduate School at least two weeks prior to the actual specific time and date of the examination must be designated Examiner as a core member of the advisory committee. The to examine. At this time the Graduate Dean appoints an Outside Graduate Studies will advise the Graduate School of the intent are ex officio members of all final examination committees. The examination is a public event and its scheduling is published and announced beforehand. Any member of the University community may attend.

At least 8 weeks prior to the final examination, the Director of Graduate Studies will advise the Graduate School of the intent to examine. At this time the Graduate Dean appoints an Outside Examiner as a core member of the advisory committee. The specific time and date of the examination must be designated by the Graduate School at least two weeks prior to the actual examination. All members of the committee except the outside examiner must have an opportunity to suggest revisions prior to signing the Dissertation Approval Form. Thus, most revisions should have been completed at an earlier time. The final examination must take place no later than eight days prior to the last day of classes of the semester in which the student expects to graduate. Final examinations are public events and must take place while the University is officially in session. They may not be scheduled during the periods between semesters or between the end of the second summer session and the beginning of the fall semester.

The Dissertation Approval Form, along with an acceptable copy of the dissertation, must be presented to the Graduate School at the time the Final Examination is scheduled. The draft of the dissertation submitted must be complete in content, including all footnotes, tables, figures, and appendices. A full bibliography or set of references must be included as must all preliminary pages including a table of contents.

In all decisions, the majority opinion of the Graduate Faculty members of the advisory committee prevails. If the advisory committee is evenly divided, the candidate fails.

In the event of failure, the advisory committee recommends to the Dean of the Graduate School conditions under which the candidate may be re-examined, if re-examination is deemed appropriate. When conditions set by the Dean of the Graduate School have been met, the candidate may be re-examined.

Should any vacancies on the Committee occur between the two examinations, the Dean of the Graduate School shall appoint replacements. A third examination is not permitted.

After the final examination is passed, the final copy of the dissertation is prepared. Final copies are then submitted to the Graduate School along with the signatures of the Major Professor and the Director of Graduate Studies. The dissertation in its final form must be received in the Graduate School within 60 days of the final examination. If this deadline is not met, the candidate must undergo a second examination.

**Doctor of Education**

(See Doctor of Education under Graduate Work in the College of Education in this Bulletin.)

**Doctor of Musical Arts**

(See Doctor of Musical Arts Degree in the Music program description in this Bulletin.)

**Doctor of Science**

(See Doctor of Science in the Clinical Sciences program description in this Bulletin.)

**DOCTORAL PROGRAMS WITH OTHER UNIVERSITIES**

Cooperative doctoral programs in education are offered between the University of Kentucky and other state universities: Eastern Kentucky University (EKU), Morehead State University (MoSU), Murray State University (MuSU), the University of Louisville (UofL), and Western Kentucky University (WKU). These programs permit qualified candidates to complete up to one year of graduate work above the master’s degree at the cooperating university. A minimum of 18 credit hours of course work, the qualifying examination, and the dissertation must be completed at the University of Kentucky, and a minimum of one academic year must be spent in full-time residence on the Lexington campus. The work of each candidate is directed by an advisory committee composed of faculty from both institutions.

Persons interested in these programs should confer with the Dean of the Graduate School at the cooperating university, or with the appropriate Director of Graduate Studies in the College of Education at the University of Kentucky. Admission will depend upon academic standing, scores on standardized examinations, personal references, and other relevant factors.

There are additional Cooperative doctoral programs in the following areas:

- Geology UK/EKU
- Higher Education UK/UofL
- History UK/WKU
- Musicology UK/UofL
- Physics UK/UofL
- Rehabilitation Sciences UK/EKU/MuSU/WKU

There is a Joint doctoral program in Social Work between the University of Kentucky and the University of Louisville (UofL). Inquiries should be directed to the appropriate Director of Graduate Studies, University of Kentucky.

**GRADUATE WORK IN THE COLLEGE OF EDUCATION**

The College of Education offers the following degrees: Master of Arts in Education, Master of Science in Education, Master of Science (in the Kinesiology and Health Promotion graduate program), Specialist in Education, Doctor of Education, and
Doctor of Philosophy. Graduate work is also provided for persons seeking Rank I or II classification.

Rank II classification may be achieved by the completion of a master’s degree or the “Planned Fifth Year Program.” The “Fifth Year” is a non-degree program of 32 semester hours for persons who hold bachelor’s degrees and teaching certificates. A minimum of 18 hours must be completed at the University of Kentucky. Of the 32 hours, at least 12 must be in professional education, and at least 12 must be in fields outside education.

Specific requirements depend upon the type of certificate desired. Information about specific certification requirements can be obtained from the appropriate Director of Graduate Studies.

Rank I classification requires the completion of: 1) 30 hours of approved graduate-level credit in addition to the requirements for a Rank II classification, or 2) 60 hours of approved graduate-level credit including the master’s degree.

Each student’s graduate curriculum must be a well-rounded program of courses related to the student’s major interest and approved by the advisor. In cases of deficient preparation, the advisor, with the approval of the Director of Graduate Studies in the respective department, determines prerequisite undergraduate courses to be taken. Specific questions regarding programs should be referred to the appropriate Director of Graduate Studies.

**Master of Arts in Education**

**Advanced Certification Option**

The Master of Arts in Education is the program selected by candidates seeking advanced certification for work in school settings.

A Master of Arts in Education degree will usually lead to Rank II for pay purposes.

The plan which leads to the degree of Master of Arts in Education for persons holding an initial certificate is outlined below:

1. All candidates for the Master of Arts in Education degree must meet the requirements for a valid teaching certificate. These requirements are outlined in the general catalog of the University. If deficiencies are found, they should be overcome before proceeding with graduate work. The work required to overcome these deficiencies is in addition to the minimum graduate requirements for the degree.
2. a. A minimum of 24 semester hours of graduate work, with at least 12 semester hours in courses numbered 600 or higher, must be completed and a thesis presented, or
   b. A minimum of 30 semester hours of graduate work, with at least 15 semester hours in courses numbered 600 or 700, must be completed.
3. At least 12 semester hours of graduate work must be in Education.
4. The total number of credits presented in Education, undergraduate and graduate, must be at least 30 semester hours.
5. At least 12 semester hours must be outside the College of Education for both elementary and secondary teachers except for teachers of vocational education who take six hours outside Education, and Reading Specialists who take six to nine hours outside Education.
6. Specific requirements depend upon the type of certificate desired. Information about specific certification requirements can be obtained from the appropriate Director of Graduate Studies.

**Master of Science in Education**

**Initial Certification Option**

The College of Education also offers a Masters of Arts in Education for individuals seeking initial secondary education certification in the following subject areas: business/marketing, English, foreign languages, mathematics, science, and social studies.

1. All candidates for this program who are graduates of the University of Kentucky should possess appropriate content-area degrees or the University of Kentucky’s undergraduate secondary education degree. These requirements are outlined in the general catalog of the University. Those individuals who hold baccalaureate degrees from other institutions must have a major in the area of teacher certification and should meet with subject area faculty to identify any deficiencies. The work required to overcome any deficiencies must be completed before admission to the program and is in addition to the minimum graduate requirements for the degree.
2. A minimum of 33 credit hours of graduate work is required, including 27 hours in Education.
3. At least 18 semester hours of graduate work must be in courses numbered 600 or 700.
4. At least 6 hours must be outside the College of Education and related to the teaching major.
5. Specific requirements depend upon the type of certificate required. Information about teaching majors and certification requirements should be obtained from the subject area faculty. Other information may be obtained from the Director of Graduate Studies.

The Master of Science in Education degree is designed for both non-certification and certification students. However, if a student already holds a valid teaching certificate, the Master of Science in Education degree may give Rank II for pay purposes and may, under some circumstances, renew the certificate.

The plan that leads to the degree of Master of Science in Education is outlined below:

1. a. A minimum of 24 semester hours of graduate work, with at least 12 semester hours in courses numbered 600 or 700, must be completed and a thesis presented, or
   b. A minimum of 30 semester hours of graduate work, with at least 15 semester hours in courses numbered 600 or 700, must be completed.
2. A minimum of 12 semester hours of graduate work in the College of Education is required.
3. A minimum of six hours outside the College of Education is required, but individual programs may require additional work outside the College.
4. Specific requirements depend upon the type of certificate desired. Information about specific certification requirements can be obtained from the appropriate Director of Graduate Studies.
Master of Education

The Master of Education (M.Ed.) in School Administration is the degree program selected by those seeking preparation for certification as a school principal in Kentucky public schools. The preparation curriculum includes 36 hours of course work and leads to a letter of eligibility for the Instructional Leader School Principalship, All Grades professional certificate. If this is a student's initial master's degree, a 30-hour Rank I program can be included within the curriculum.

The curriculum that leads to eligibility for certification as a principal contains two levels. For those students pursuing the M.Ed. as their initial master's degree, both levels of the preparation program must be completed before one is eligible for participation in the Kentucky Principal Internship Program (KPIP).

Doctor of Education

The requirements for the Ed.D. correspond to those of the Ph.D. with the following differences:

1. In addition to other credentials, admission requirements include:
   a. a master's degree, or
   b. 30 graduate credit hours applicable to an appropriate master's degree.
2. Some program areas require successful teaching, clinical, or administrative experience for admission.
3. The program requires completion of a major body of course work of at least 42 graduate credits beyond the minimum hours required for admission.
4. Course work for the Ed.D. will be planned by the advisory committee to complement and extend previous graduate work. Therefore, the student's total doctoral and predoctoral graduate work will reflect competencies in the following areas:
   a. Area of Concentration: A significant concentration of course work designed to develop an in-depth knowledge in a specific area of Education.
   b. Support Areas: Course work to support the Area of Concentration shall include the following two components:
      1) Disciplinary support work from outside the Area of Concentration. Some or all of this work will be done outside the College of Education.
      2) Course work relevant to the development of competencies in the foundational studies in Education. Such course work is to be taken in departments of the College of Education other than the Area of Concentration.
   c. Research Methodology: At least nine credits of recent course work selected to develop competencies in conceptualizing research, developing rigorous designs, selecting appropriate methodology, processing and analyzing data, interpreting results, and arriving at conclusions.
5. Although some students' programs may require competency in a foreign language as a research tool, there is no general language requirement.
6. The core membership of the advisory committee for each Ed.D. student consists of four members, consistent with Graduate School Rules.
7. In Cooperative programs with the regional universities, three advisory committee members must be from the University of Kentucky and must be full members of the Graduate Faculty.

Cooperative Doctoral Programs in Education

Cooperative doctoral (Ed.D.) programs in education are offered between the University of Kentucky and the following state universities: Eastern Kentucky University, Morehead State University, Murray State University, and Western Kentucky University (see Doctoral Programs with Other Universities in this Bulletin).

Students are encouraged to apply to a Cooperative Doctoral Program early in their master's degree program to facilitate transition into the doctoral program.

Persons interested in a Cooperative doctoral program should confer with the Dean of the Graduate School at the cooperating university, or with the appropriate Director of Graduate Studies in Education at the University of Kentucky. Currently, the participating University of Kentucky academic departments are those of Administration & Supervision, Curriculum & Instruction, Educational Policy Studies & Evaluation, Kinesiology & Health Promotion, and Special Education.

Doctor of Philosophy (Education)

The Doctor of Philosophy degree in the field of Education is offered in Educational and Counseling Psychology and in Educational Policy Studies and Evaluation (Higher Education) (see General Requirements for All Doctoral Degrees in this Bulletin).

Specialist in Education

The Specialist in Education degree is offered in Administration and Supervision, Educational and Counseling Psychology, and Special Education. It is conferred upon a candidate who satisfactorily completes a post-master's program in education under the general requirements of the Graduate School and the following special requirements:

Admission

The student, prior to admission to the program must 1) have a master's degree, 2) have a standing of 3.4 or higher on all graduate work, 3) meet the requirements for a teaching certificate or have credentials appropriate to the field of specialization, and 4) have at least 30 credit hours in courses in education (undergraduate and graduate).

The student should file an application with the Graduate School and the Director of Graduate Studies in the appropriate department and must be recommended by the major program and the department.

Program

The student must earn a minimum of 30 credit hours of graduate work beyond the master's degree, of which at least 15 must be in courses numbered 600 or above.

A departmental committee is responsible for helping students plan individual programs. The program should contribute to specialization in a field but should not neglect the broader development of the individual.

The student must complete an independent research project...
(equal to three but not to exceed 6 credit hours) and submit a written report, a copy of which is to be filed with the department directing the research.

With the approval of the Director of Graduate Studies and the Dean of the Graduate School, the student may transfer a maximum of 9 credit hours earned beyond the master’s degree from an accredited institution that is approved to offer work above the master’s level.

**Final Examination**

The final examination required of all candidates is administered by an examining committee consisting of at least three qualified members recommended by the advisor and the Director of Graduate Studies and appointed by the Dean of the Graduate School.
Postdoctoral Fellowships

Postdoctoral fellowships are available in many research programs. Information concerning the terms of these fellowships is available in the individual departments. Postdoctoral fellows are required to register with the Graduate School through their departments.

Research and Teaching Assistantships

Most departments have support for teaching and research assistants. The stipends vary by department. Information concerning assistantships may be obtained from the various departments. (See Fellowships and Assistantships in this Bulletin.)

Preparing Future Faculty

The University of Kentucky has several dynamic professional development programs for graduate students seeking academic careers. The Teaching and Academic Support Center assists faculty and graduate students in enhancing their teaching and other professional skills through a variety of innovative program offerings, as well as individual consultations and technological assistance.

The University of Kentucky was one of the original 17 cluster groups and was awarded an additional three-year grant under Phase II of the Preparing Future Faculty Initiative. The national Preparing Future Faculty program is a career development program targeted to graduate students planning to enter the professoriate. Contact the Coordinator of Graduate Student Activities for information.

Visiting Scholars and Advanced Study

When appropriate resources are available, the appropriate Chancellor or the Vice President for Research, upon the recommendation of the Dean of the Graduate School and the department affected, welcomes visiting scholars as guests of the University, and grants the privilege of auditing seminars and research courses and of conducting research. Normally there will be no charge except for laboratory expenses. Negotiations for such arrangements should be made in advance through the Office of the Dean of the Graduate School.

University of Kentucky Libraries

University of Kentucky Libraries, a member of the Association of Research Libraries, is a system that includes a main library, 11 branch and associate libraries and two information centers.
MULTIDISCIPLINARY GRADUATE PROGRAMS

Graduate Center for Biomedical Engineering

The Graduate Center for Biomedical Engineering provides multidisciplinary programs of education, research, and service in the application of engineering principles to the areas of medicine and biology. The Center brings together engineers, life scientists, and physicians to conduct original research on a variety of medical-related problems. Areas of research include cardiopulmonary mechanics and controls, neuromuscular function, musculoskeletal mechanics, rehabilitation engineering, computational neuroscience, motor control, orthopedic biomaterials, orthopedic biomechanics and electromagnetic tissue stimulation. Master of Science and Doctor of Philosophy degrees in Biomedical Engineering are offered. The Center is located in the Wenner-Gren Research Laboratory, which provides the framework for multidisciplinary research. Faculty and staff of the Center collaborate with investigators from other units of the University including the Departments of Physiology, Anatomy and Neurobiology, Cardiology, Medicine, Surgery, Physical Medicine and Rehabilitation, Orthopedics, Sports Medicine, and Kinesiology and Health Promotion, as well as the Departments of Agricultural, Chemical and Materials, Electrical, and Mechanical Engineering, the College of Pharmacy, and the Center for Robotics and Manufacturing Systems. Center faculty and staff provide opportunities and support for graduate students, medical residents, and selected undergraduates. Graduates of the program enter careers in research institutes, academia, hospitals and industry.

The Patterson School of Diplomacy and International Commerce

The Patterson School of Diplomacy and International Commerce offers an interdisciplinary master's degree which can be tailored to meet the career needs of individual students. The program is especially useful for students desiring careers in any of the non-academic fields in foreign affairs such as international banking, commerce and journalism, or service with governmental agencies or international organizations. To assure the interdisciplinary character of the degree, students may concentrate their work in a specific geographical area or focus on certain aspects of international affairs.

In addition, the Patterson School serves in an advisory capacity to Ph.D. programs in departments offering internationally-oriented doctoral degrees in various colleges on campus.

Graduate Program in Gerontology

The Ph.D. program in Gerontology provides opportunities for the advanced multidisciplinary study of aging and the aged with particular emphasis on issues of health and well-being. This doctoral program is the recipient of a multi-year NIH training grant (1998-2003), coordinated through the Sanders-Brown Center on Aging, a Commonwealth Center of Excellence. The Center is a nationally designated Alzheimer's Disease Research Center, a Center of Excellence in Stroke, and the site of a Geriatric Education Center. The graduate faculty includes representation from Anatomy and Neurobiology, Anthropology, Behavioral Science, Civil Engineering, Dentistry, Family Studies, Geography, Internal Medicine, Management, Neurology, Nursing, Nutrition and Food Science, Philosophy, Physiology, Preventive Medicine and Environmental Health, Psychology, Social Work, and Sociology. Areas of particular expertise and emphasis include rural aging, long-term care, cognitive and sensory change, public policy, ethical issues, and the etiology and treatment of Alzheimer's disease, stroke, and other diseases prevalent among the elderly. Center facilities include 34 biomedical research laboratories, a library, conference rooms, and research and office space. Affiliated facilities for training and research include the University of Kentucky Hospital, Christian Health Center (a University-affiliated nursing home), The Breckinridge (an Alzheimer's assisted living facility), the Center for Rural Health, the Helping Hand Alzheimer's Day Care Program, University of Kentucky Geriatric Support Services, Cardinal Hill Hospital, Northeast Area Health Education Center, and the Veteran's Affairs Medical Center.

Graduate Center for Nutritional Sciences

The M.S. and Ph.D. programs in Nutritional Sciences provide opportunity for advanced multidisciplinary study in Nutritional Sciences. Educational opportunities exist in agricultural, biological, clinical, community, medical, social, biochemical, and molecular nutritional sciences. The graduate faculty consists of a core faculty and more than 30 jointly-appointed faculty members representing various academic units of the University including Agronomy, Animal Sciences, Anthropology, Behavioral Science, Biochemistry, Clinical Sciences, Horticulture, Internal Medicine, Neurology, Nutrition and Food Science, Oral Health Science, Pharmacy, Psychology, Surgery, and Toxicology. Faculty have modern research laboratory facilities for conducting cell culture, human, and animal studies using state of the art equipment. These include trace mineral, vitamin, lipid, amino acid, enzyme, hormone, cytokine, stable and radioactive isotope, microcirculatory, and energy assessment analyses. Clinical facilities for training and research include the University of Kentucky Hospital, the Veteran's Administration Hospital, Sanders-Brown Center on Aging, University of Kentucky Medical Center Outpatient Clinics, and the Markey Cancer Center. Opportunities for community-based research exist locally, throughout the state, and in international settings.

Martin School of Public Policy and Administration

The Martin School offers three multidisciplinary degree programs—the Master of Public Administration, the Master of Health Administration, and the Ph.D. in Public Administration—and engages in research and public service activities. The disciplines represented by the School's faculty are management, finance, economics, industrial engineering, political science, and health administration. The research and public service components of the Martin School offer the School's
faculty, staff, and graduate students the opportunity to engage in interdisciplinary research on public policy issues.

**Graduate Center for Toxicology**

The Graduate Center for Toxicology (GCT) educates scientists at the M.S., Ph.D. and postdoctoral levels to deal with toxic substances and their effects on humans and the environment. The GCT has a core faculty based in the Health Sciences Research Building and an interdisciplinary faculty of about fifty jointly-appointed faculty members, all of whom are active in teaching and research in toxicology, drawn from the major departments and colleges on campus. The GCT has over 100 graduates among whom are numerous faculty members and government and corporate toxicologists.

Student support comes from Graduate School fellowships, minority fellowships, special fellowships, research assistantships, and NIEHS pre- and postdoctoral fellowships for Research Training in Environmental Toxicology.

Areas of research strength include environmental toxicology, immunotoxicology, molecular mechanisms of chemical carcinogenesis, molecular biology, toxicology, and neurotoxicology. Students in the GCT are organized through the Toxicology Student Forum, which is represented on all GCT committees and functions as the students’ voice and representative during their time at the University of Kentucky.
The University of Kentucky honors the following:

Resolution Regarding Graduate Scholars, Fellows, Trainees and Assistants

Adopted by the Council of Graduate Schools in the United States

"Acceptance of an offer of financial support (such as a graduate scholarship, fellowship, traineeship, or assistantship) for the next academic year by a prospective or enrolled graduate student completes an agreement that both student and graduate school expect to honor. In that context, the conditions affecting such offers and their acceptance must be defined carefully and understood by all parties."

"Students are under no obligation to respond to offers of financial support prior to April 15; earlier deadlines for acceptance of such offers violate the intent of this Resolution. In those instances in which a student accepts an offer before April 15, and subsequently desires to withdraw that acceptance, the student may submit in writing a resignation of the appointment at any time through April 15. However, an acceptance given or left in force after April 15 commits the student not to accept another offer without first obtaining a written release from the institution to which the commitment has been made. Similarly, an offer made by an institution after April 15 is conditional on presentation by the student of a written release from any previously accepted offer. It is further agreed by the institutions and organizations subscribing to the above Resolution that a copy of this Resolution should accompany every scholarship, fellowship, traineeship, and assistantship offer."
on fellowship type. While fellowships are formally awarded by the Graduate School, nominations for most fellowships are made by the department in which a student is enrolled or seeks to enroll.

Almost all fellowships are awarded beginning with the fall semester. There are virtually no fellowships that begin with the spring semester. Departments make fellowship nominations by February for the next academic year, so students interested in a fellowship should submit applications and all supporting documents before that time. Later applicants have a reduced chance of obtaining a fellowship. Notification regarding awarding of fellowships comes from the Graduate School by early May.

**Assistantships**

Approximately 1500 teaching or research assistantships are available from departments and other units of the University. In addition to an assistantship stipend, full or partial tuition scholarships and student health insurance are available for most assistantship holders.

The majority of assistantships are awarded beginning with the fall semester. Students interested in an assistantship should submit applications by February 1 for the next academic year; late applicants have a reduced chance of obtaining an assistantship. Most assistantship decisions are made by April for the coming academic year.

Notification of an assistantship comes from the department. Questions about the availability of positions and the status of assistantship applications should be addressed to the Director of Graduate Studies in the department a student seeks to enter.

**Tuition Scholarships**

All new non-resident students enrolled in a University of Kentucky graduate degree program are eligible for tuition scholarships based on their prior academic performance. These scholarships will allow the candidate to attend the University of Kentucky at the in-state tuition rate.

In cases where graduate programs charge a differential tuition rate, the Graduate School will pay the standard graduate tuition rate only.

In order to be eligible for the scholarship, the applicant must have achieved:

- an earned bachelor’s degree, with an undergraduate grade point average of 3.25 or higher on a 4.00 scale.
- a cumulative grade point average of at least 3.25 on any prior graduate work.

For more information, go to <www.rgs.uky.edu/gs/KGS.html>.

**Student Support**

Funds are available to students enrolled in graduate programs for assistance with expenses relating to dissertation or thesis research as well as for travel to present research at professional meetings. Students should check with the Graduate School Fellowship Office regarding application materials for student support or go to the Web at <www.rgs.uky.edu/gs/fellowship/supportfunding.html>.

Students should consult with the Director of Graduate Studies in the department they seek to enter for information regarding nomination for other research support funds that may be available from the Graduate School.

---

**Health Services**

**University Health Service**

The convenience of an on-campus health care facility, a low-cost prepaid plan for outpatient services, and a student group health insurance plan are designed to make UK’s total health plan attractive and economical for graduate and professional students, both full-time and part-time.

All full-time students must pay the student health fee in fall and spring semesters which entitles them to medical and mental health care at the University Health Service. For students who attend either of the summer sessions the health fee is optional.

Part-time students may prepay the student health fee or may use the health service on a fee-for-service basis; the health fee may be paid at the Student Billing Office.

The University Health Service is located in the Kentucky Clinic across Rose Street from the University Hospital. All visits are made by appointment [(859) 323-2778]. The clinic is staffed by physicians, nurse practitioners, psychiatrists, and other health professionals.

Spouses of eligible students are eligible to receive their primary care at University Health Service. They are charged for all services rendered. Children and other family members are not eligible.

Services covered by the health fee include: unlimited visits to clinicians for illness or injury, routine laboratory services and x-rays ordered by the health service clinician as part of evaluation for an illness or injury, some medications, allergy shots and immunizations, and visits to the professionals in the Mental Health Service. For additional information, contact the University Health Service at (859) 323-5823.

**Health Insurance**

Services related to hospitalization, surgical procedures, accident care, and any other health care provided outside the University Health Service, are not covered by the health fee. The University of Kentucky strongly endorses the belief that students should have health insurance, either provided by their parents’ policy or by an independent insurance company. The University, including the University Hospital, assumes no responsibility for a student’s medical expenses.

**Health Insurance Requirement for International Students**

The University of Kentucky has a mandatory health insurance program for all international students. International students who are in F-1 and J-1 visa status will be charged for the health insurance plan along with their tuition and fees. Students who have purchased health insurance in their home countries or who are covered as a dependent on a U.S. plan may be eligible for a waiver. J-2 dependents who enroll in classes will be charged for the health insurance along with their tuition and fees. International students on a J-1 or F-1 visa are required to purchase health insurance for all of their dependents. International students with questions about health insurance should contact the health insurance coordinator in the Office of International Affairs at (859) 257-4067 ext. 238.

**Health Insurance Requirement for International Students**

The University of Kentucky has a mandatory health insurance program for all international students. International students who are in F-1 and J-1 visa status will be charged for the health insurance plan along with their tuition and fees. Students who have purchased health insurance in their home countries or who are covered as a dependent on a U.S. plan may be eligible for a waiver. J-2 dependents who enroll in classes will be charged for the health insurance along with their tuition and fees. International students on a J-1 or F-1 visa are required to purchase health insurance for all of their dependents. International students with questions about health insurance should contact the health insurance coordinator in the Office of International Affairs at (859) 257-4067 ext. 238.
Health Insurance Coverage for Graduate TAs, RAs, GAs, and Institutional Fellowship Recipients

All full-time teaching, research, or graduate assistants, or full institutional fellowship recipients, are eligible for student insurance and are eligible and are automatically enrolled in the program. Students must also be degree-seeking and enrolled in the Graduate School to be eligible for funded student insurance. Coverage is provided at no cost to eligible graduate students. For more information, call the Graduate School Fellowship Office at (859) 257-3261 and ask for the insurance coordinator.

Student Group Insurance Plan

The annual policy provides year-round coverage. Students may also purchase coverage for their spouse and/or children.

The premium may be paid annually, semi-annually, or quarterly by check, Visa, or MasterCard. Student enrollment may be continued from one year to the next by re-enrolling within 14 days from the enrollment date. Although students are encouraged to enroll at the beginning of the school year, enrollment is available throughout the policy year.

The student insurance plan is a preferred provider organization (PPO), and UK Hospital and UK College of Medicine physicians are the preferred providers. When receiving treatment away from UK, you can expect significantly higher out-of-pocket costs. Additionally, the plan is an illness and injury plan only; it does not provide for preventive care or coverage of treatment in the absence of illness or injury, except as specifically provided in the policy.

Health insurance information packets for the upcoming school year are available in mid-July at the University Health Service. For further information and enrollment dates, call (859) 323-5823, ext. 230.

The current insurance plan is underwritten by the MEGA Life and Health Insurance Company.

Student ID Card (UKID)

All students admitted to the University (both full-time and part-time) are expected to obtain a student ID card (UKID). This is a permanent card, which becomes valid each semester when fees are paid. The first ID card is provided without cost.

Students who lose their UKID should report the loss immediately to the UKID Office (257-1378), the Diner/Plus Account Office (257-6159), or any Food Service location. The UKID is the property of the University of Kentucky and is to be returned to the Dean of Students upon termination of student status.

Counseling and Testing Center

The University Counseling and Testing Center has a staff of licensed psychologists whose primary function is to address the emotional/psychological issues of both undergraduate and graduate students. Some typical concerns of graduate students include feelings of depression, anxiety, stress due to the demands of graduate school, quality of interpersonal relationships, loneliness and isolation, grief, time management, refinement of critical thinking skills, career and life planning, and other issues of a personal nature.

All counseling sessions are free, voluntary, and confidential. The services are available by appointment to fee-paying students enrolled for at least six semester hours. Graduate students enrolled for thesis or dissertation hours also are eligible.

In addition to counseling with individual students, the Center offers couples (significant others) and group counseling. General counseling groups are ongoing and reconstituted each semester. Participants work on a variety of issues. There are also special focus groups such as Bridges (a support group for graduate African-American women), an eating disorders group, and a discussion group for LD/ADHD.

Appointments and further information may be obtained by calling (859) 257-8701 or by coming to the Center, 301 Frazee Hall.

Disability Services

Students with disabilities should call or stop by the Disability Resource Center, 2 Alumni Gym, or call (859) 257-2754. The staff will assist students with information about accessible parking, bus services, and/or special needs.

Housing

The UK Apartment Housing Office operates apartments for single graduate students and student families. The apartments are rented on a 12-month lease agreement basis. For more information, contact UK Graduate and Family Housing, 700 Woodland Ave., Lexington, KY 40508; (859) 257-3721; e-mail apthousing@uky.edu; or see <www.uky.edu/auxserv/housing.htm>. 
## DEGREE REQUIREMENTS

This chart outlines minimum requirements for all graduate degree programs.

GS 610 College Teaching (1)
This one-credit-hour seminar addresses teaching and learning issues in the college classroom. It is intended for graduate students who want to prepare for future academic careers and enhance current teaching activities. The seminar will examine pedagogical issues in a general format with opportunity for discipline-specific applications. This course can serve to augment any department- based programs.

GS 650 Preparing Future Faculty (1)
Preparing Future Faculty is designed to introduce graduate students to the roles and responsibilities of the college teacher and to assist them in understanding the variety of institutions in which effective teaching takes place. Students will focus on the academic expectations, institutional identities, and particular policies and procedures which characterize different types of institutions of higher learning. Skills to help students apply for positions and achieve success in their appointments will also be addressed. Lecture, two hours per week.

GS 660 Multidisciplinary Sensing Technology Seminar (1)
A multi-disciplinary seminar in Sensors and Sensing Architectures. May be repeated to a maximum of four credits. Prereq: Graduate status.

**Accounting**

*Master of Science*

The Master of Science in Accounting (MSACC) degree at the University of Kentucky offers students a program of advanced study in accounting. The program provides preparation for professional positions in public accounting, industry, and other organizations. When coupled with a bachelor's degree from an accredited college or university and satisfactory completion of prerequisites of undergraduate courses in accounting and business, the MSACC offers students the ability to pursue an interdisciplinary study of accounting and business while obtaining the 150 semester hours necessary to sit for the CPA Examination in Kentucky. Specifically, the program's objectives are to:

- Help students develop communication and technology skills expected in the accounting profession;
- Enhance the accounting knowledge of students entering the accounting profession;
- Enable students to develop both leadership skills and teamwork in researching accounting issues;
- Enhance students' creative problem-solving skills and ability to think logically and analytically;
- Provide an opportunity to concentrate in the specialized fields of auditing or taxation consulting.

**Admission Requirements**

1. A bachelor's degree from an accredited college or university.
2. Graduate study in accounting presumes a minimum preparation of 24 hours in business and economics, including the completion of the following basic courses (examples of acceptable courses at the University of Kentucky are given in parentheses):
   - Principles of Economics (ECO 201, ECO 202)
   - Statistical Methods (STA 291, ECO 391)
   - Business Management (MGT 301)
   - Corporation Finance (FIN 300)
   - Marketing Management (MKT 300)
   - Strategic Management (MGT 499) or an equivalent capstone course

   In addition, prerequisites to the MSACC program include a minimum of 24* semester hours in accounting and approval of these courses by the Director of the MSACC program. Following are recommended accounting prerequisites (examples of acceptable courses at the University of Kentucky are given in parentheses):
   - Financial Accounting I (ACC 201)
   - Managerial Accounting (ACC 202)
   - Financial Accounting Lab (ACC 211)
   - Intermediate Accounting I (ACC 301)**
   - Intermediate Accounting II (ACC 302)**
   - Accounting Information Systems (ACC 324)
   - Cost Management (ACC 418)
   - Concepts of Income Taxation (ACC 407)**
   - Auditing (ACC 403)

   *For students selecting a concentration in tax, an advanced course in taxation (ACC 507)*** is also required, resulting in a minimum prerequisite of 27 semester hours in accounting.

   **The content of the Intermediate Accounting courses must have been based upon United States generally accepted accounting principles (GAAP).

   ***The content of the Income Tax course(s) must have been based upon the United States Tax Code.

3. The Graduate Management Admission Test (GMAT) must be taken prior to being admitted.
4. International applicants from non-English speaking countries are required to submit test scores from the Test of English as a Foreign Language (TOEFL) with a minimum score of 550 (213 computer version). In addition, each international student, who is not a permanent U.S. resident, must submit a Test of Written English (TWE) with a minimum score of 4.5.
5. Students are strongly encouraged to complete either a one semester accounting internship or have equivalent work experience prior to entering the MSACC program.
6. Completion of the prerequisites, the GMAT, the TOEFL and TWE (if required), and the application do not guarantee admission into the MSACC program. Applicants will be evaluated for admission based upon their undergraduate

---

**Admission Requirements**

1. A bachelor's degree from an accredited college or university.

   ***The content of the Income Tax course(s) must have been based upon the United States Tax Code.

3. The Graduate Management Admission Test (GMAT) must be taken prior to being admitted.
4. International applicants from non-English speaking countries are required to submit test scores from the Test of English as a Foreign Language (TOEFL) with a minimum score of 550 (213 computer version). In addition, each international student, who is not a permanent U.S. resident, must submit a Test of Written English (TWE) with a minimum score of 4.5.
5. Students are strongly encouraged to complete either a one semester accounting internship or have equivalent work experience prior to entering the MSACC program.
6. Completion of the prerequisites, the GMAT, the TOEFL and TWE (if required), and the application do not guarantee admission into the MSACC program. Applicants will be evaluated for admission based upon their undergraduate...
grade point averages (GPA), both overall and in accounting, their GMAT scores, and their TOEFL and TWE scores (if applicable).

Degree Requirements

Students must complete at least thirty semester hours in courses carrying graduate credit, with a minimum of fifteen hours in graduate-level accounting courses. The MSACC degree requirements are:

1. Minimum of fifteen hours of graduate-level accounting courses, of which at least twelve hours must be in courses numbered at the "600" level.
2. A minimum of 21 semester hours must be in courses reserved exclusively for graduate students (i.e., 600-level courses).
3. At least nine semester hours must be outside of Accounting.
4. All graduate-level elective courses require approval in advance by the Director of the Master of Science in Accounting program.
5. A minimum average GPA of 3.0 in all courses attempted for graduate credit after being admitted to The Graduate School.
6. Successful completion of a comprehensive final examination.

Students have a choice of two tracks in the MSACC program. (1) Financial Accounting/Systems, and (2) Taxation. (Note that completion of a track is not shown on a student's transcript or on their diploma.) The two tracks are as follows:

All students must complete the following courses:

ACC 600: Inquiry, Communication, and Leadership in Accounting;
ACC 601: Research in Accounting Theory;

Students who select the Financial Accounting/Systems track must also complete the following courses:

ACC 516: Advanced Topics in Financial Reporting;
ACC 603: Attest Function;
ACC 621: Understanding Financial Statements;
ACC 624: Enterprise Information and Control Systems;
DIS 622: Business Data System Analysis & Design; and
Three graduate-level elective courses (at least one at the 600 level). One of these graduate-level electives may be in accounting.

Students who select the Taxation track must also complete the following courses:

ACC 617: Selected Topics in Taxation;
ACC 627: Corporate Taxation;
ACC 637: Taxation of Flow-through Entities;
ACC 647: Multijurisdictional Taxation;
ACC 621: Understanding Financial Statements or ACC 624: Enterprise Information and Control Systems; and
Three graduate-level elective courses outside of the accounting area.

Doctor of Philosophy

The Business Administration program offers a Ph.D. degree with a concentration in Accounting. For more information, see the Business Administration program description in this Bulletin.

Administration and Supervision

The Department of Administration and Supervision offers programs leading to the Master of Education (M.Ed.) in School Administration and the Specialist in Education (Ed.S) degree. In cooperation with the Department of Curriculum and Instruction, it offers a program in Instruction and Administration leading to the Doctor of Education (Ed.D.) degree. These advanced degree programs are designed to prepare candidates for leadership positions in public schools and other educational agencies or for the professorship in educational administration. The department participates in a Cooperative Doctoral Program with four regional comprehensive universities.

Master of Education

The Master of Education (M. Ed.) in School Administration is a degree program through which one may prepare for certification as a school principal in Kentucky public schools. This preparation program includes 33 hours of course work and leads to a letter of eligibility for the Instructional Leader, School Principalship, All Grades professional certificate. If this is a student's initial master's degree, it will lead to Rank II. For those who already have one master's degree, a 30-hour Rank I program can be completed.

Admission Requirements

Admission to the M.Ed. program includes the following criteria:

1. Bachelor's degree from an accredited institution;
2. On a 4.0 scale, a GPA of 2.75 for all undergraduate work and 3.0 GPA on all graduate work;
3. Official scores on all three sections of the Graduate Record Examination (GRE);
4. One year of professional experience in an educational or other organizational setting;
5. Complete program application with supporting materials;
6. Professional and scholarly references; and
7. Positive recommendation for admission from the UK Department of Administration and Supervision.

With the M.Ed. tied to principal certification, the state of Kentucky establishes the following additional requirements for a letter of eligibility for Kentucky principalship certification:
1. Master’s degree in education from an accredited institution;
2. GPA of 2.5 on a 4.0 scale for all collegiate work;
3. Eligibility for a Kentucky classroom teaching certificate;
4. Completion of the Kentucky Teacher Internship Program (KTIP) or two years out-of-state full-time teaching experience;
5. Three years full-time teaching experience completed;
6. Passing score on the National Teacher Examination (as required of KY teachers);
7. Passing of national and state tests as specified by the Kentucky Education Professional Standards Board,
8. Completion of a preparation program approved by the Kentucky Education Professional Standards Board.

Specialist in Education

The Department of Administration and Supervision in the College of Education at the University of Kentucky offers a practice-oriented, academic program leading to the awarding of the Specialist in Education degree (Ed.S.). This program is intended to serve two interrelated and complementary purposes:

- to provide professional educators with an opportunity to develop specialized expertise in the area of educational leadership with a focus on school administration and instructional supervision; and
- to provide those professional educators who desire it, a bridge from their master’s-level academic work to doctoral-level study in the specialized area of educational administration and supervision.

The content of the Ed.S. program is divided into two segments. The classroom-based segment of the program consists usually of 39 hours of formal course work that can be structured to meet the course-based subject matter requirements for Kentucky certification as a building-level principal, as an instructional supervisor, or as a school district superintendent. The second segment of the EdS program consists of the design, implementation, and formal written description of a field-based inquiry project.

Admission Requirements

Admission to the Ed.S. program follows the basic requirements of The Graduate School at the University of Kentucky and any additional requirements imposed by the Kentucky Educational Professional Standards Board for the particular certificate sought in conjunction with the Ed.S., plus professional references, a complete program application to the Department of Administration and Supervision, and a positive recommendation by the Department’s admissions committee.

Doctor of Education

The Department of Administration and Supervision offers the Ed.D. (Doctor of Education degree) in Instruction and Administration with a program emphasis in Educational Leadership. Four important themes are embedded in the Department’s Ed.D. program emphasis and are reflected throughout the content of course work:

- Valuing Research and the Use of Data
- Fostering Educational Improvement
- Focusing on Leadership Development
- Addressing Concerns for Social Justice

Every student’s program of study for this Ed.D. has three essential elements: (1) the core curriculum; (2) a program major emphasis; and (3) a research sequence.

Admission Requirements

Admission to the doctoral program in EDA requires completion of the Graduate School’s application requirements plus a complete application and references to the Department of Administration and Supervision with the following attachments to the EDA application:

- Autobiographical Statement: A short (2 - 3 typed pages) autobiographical statement explaining how you came to be where you are at this point in your life.
- Professional Goals Statement: A short (2 - 3 typed pages) explanation of your professional goals highlighting future plans and aspirations.
- Professional Perspectives Essay: A short (3-5 typed pages) essay responding to one of the topics below. This essay will be reviewed on the basis of the content of your ideas, the clarity and logic used in developing, organizing, and presenting those ideas, and on the use of correct grammar, spelling, punctuation, etc., as well.

- Essay Topic For Ed.D. Degree Program Applicants: Contemporary educational leaders must provide leadership relative to many complex and sometimes controversial issues. Pick ONE set of issues from the list below (i.e., #1, #2, or #3). In your essay, explain briefly your understanding of the issue set you selected and discuss briefly your own current thinking about what it means to provide responsible educational leadership in reference to it.

1. Culture, gender, ethnicity, and social class;
2. Teaching, learning, and professional ethics;
3. New organizational structures for schools, political demands, and fiscal limitations.

The Ed.D. Curriculum

Course work for the Ed.D. in Instruction and Administration within the department will consist of a minimum of 45 hours of graduate course work beyond the master’s in addition to the required 18 hours of dissertation research. All course work plans include work in the following:

a. Instruction and Administration,
b. Support work in education,
c. Research methodology course sequence, and,
d. Support work outside of education.

Internships for graduate students can be arranged with public school systems and other educational agencies.

A limited number of graduate assistantships are available through the department. These involve up to 20 hours per week of service to the department or some other unit of the University, designed in such a way that the work contributes to the educational development of the student. A modest stipend is paid for this service. The University also provides some financial aid in the form of loans and fellowships.

For further information, write to the Director of Graduate Studies in the Department of Administration and Supervision, 111 Dickey Hall, College of Education, University of Kentucky, Lexington, Kentucky 40506, requesting materials for the specific program of interest.

**Agricultural Economics**

The Department of Agricultural Economics provides programs leading to the degrees of Master of Science and the Doctor of Philosophy. Graduate Faculty in the department provide areas of emphasis in agricultural policy, price analysis, agricultural marketing, farm management, domestic and international economic development, and resource and production economics. Students must complete a core of courses in agricultural economics, economics and statistics.

Students holding degrees in agricultural economics are employed by academic institutions, local, state, and federal agencies that deal with agriculture, natural resources and economic development; private firms in the agricultural and business sectors; and agencies and governments of foreign countries. These agricultural economists conduct research, develop extension services, teach classes, and serve as managers and administrators in various types of firms and agencies.

**Admission Requirements**

Students entering the M.S. program are expected to have at least one course in each of the following areas: intermediate microeconomics, intermediate macroeconomics, calculus, and statistics. An undergraduate degree in agricultural economics or economics is advantageous. There are no minimum GPA or GRE requirements beyond those of the Graduate School, but such information, along with letters of recommendation, is used qualitatively in the admission decision.

Students entering the Ph.D. program are expected to have the following courses: a two-course calculus sequence, M.S. level microeconomic theory, M.S. level macroeconomic theory, and statistics theory. Some of these courses may be taken during the student’s first semester. A Master’s degree in a relevant discipline is required for entry into the Ph.D. program. There are no minimum GPA or GRE requirements beyond the Graduate School’s, but such information, along with letters of recommendation is used qualitatively in the admission decision.

**Degree Requirements**

The master’s program is offered in either Plan A or Plan B. The thesis option (Plan A) requires a minimum of 24 hours of graduate credit, a research thesis and an oral final exam. Plan B requires a minimum of 36 hours of graduate credit and an oral final exam.

In addition to the course work requirements, students in the Ph.D. program are required to take a comprehensive examination in microeconomics and macroeconomics administered by the Department of Economics. Students also must complete a qualifying examination on the application of economic analysis to agriculture and related fields within the Department of Agricultural Economics. The ability to conduct original research in agricultural economics, documented through the completion of a dissertation, is required.

Graduate students have considerable flexibility to structure their program with respect to course work and research topics consistent with individual interests. Each student has a major professor and an advisory committee to assist in course work selection and in the thesis and dissertation research.

A graduate handbook is available that provides information regarding program content, degree options and available financial assistance. Send request to:

**Anatomy and Neurobiology**

Graduate study in anatomy and neurobiology is designed to prepare candidates for research careers in academics, industry, and government laboratories. Admission to the graduate program is competitive and is based upon academic background, professional recommendations, performance on the Graduate Record Examination (GRE), experience, and when possible, personal interviews. Students should have completed an undergraduate degree in biology, biochemistry, chemistry, engineering, mathematics, neurosciences, physics, pharmacy, or psychology. Some students who have already completed an M.D. or D.M.D. degree may be interested in obtaining specific training in anatomy and neurobiology in order to complete their professional education. For traditional students with only an undergraduate degree, undergraduate courses in organic chemistry, physical chemistry, calculus, physics, and the biological sciences are highly recommended.

Students will have the opportunity to join faculty research programs across a spectrum of topics including: neuroendocrinology and reproductive biology, development and aging in the nervous system, neurodegeneration and regenration, and neurochemistry. The program of study is tailored to the individual background and career goals of the student and stresses an interdepartmental approach both in the selection of courses and in the pursuit of research. Students are expected to participate in graduate seminars, journal clubs, research seminars; to interact with visiting scholars; and to present the results of their research at local and national meetings. Financial aid is available for highly qualified students.

**Admission Requirements**

Admission to the Ph.D. program in Anatomy and Neurobiology is through the Integrated Biomedical Sciences (IBS) Curriculum. Inquiries regarding admission should be directed to the Director, Integrated Biomedical Sciences Curriculum, University of Kentucky College of Medicine. For information about the Ph.D. program in Anatomy and Neurobiology, please contact the Director of Graduate Studies, Department of Anatomy and Neurobiology. Information may also be obtained from the department Web site: <www.mc.uky.edu/neurobiology/>.

**Animal Sciences**

The degrees of Master of Science (Plan A and Plan B) and Doctor of Philosophy are available in Animal Sciences.

**Admission Requirements**

The minimum requirements for admission to the graduate program in Animal Sciences conform to the admission standards of the Graduate School. Applicants to the Master’s program must have completed a four-year degree at an accredited institution of higher education, must have achieved at least a 2.75 GPA for all undergraduate courses, and must submit scores from the verbal, quantitative, and analytical portions of the Graduate Record Exam (GRE). Applicants to the Ph.D. program, in addition to the above requirements, must have completed or be completing a Master’s Degree or equivalent and must have achieved a 3.0 GPA for all graduate courses. In addition, all applicants must submit to the Director of Graduate Studies in Animal Sciences three letters of recommendation and a completed Personal Data Record form (obtained from the Director of Graduate Studies).

**Degree Requirements**

Programs in Animal Sciences are divided into the disciplinary areas of animal nutrition, nutritional and anaerobic microbiology, physiology of reproduction and lactation, and genetics and animal breeding. Special interests in beef cattle, dairy cattle, horses, poultry, sheep or swine may be pursued within many of these areas. Programs in food science offer specialization in dairy technology, food chemistry, food microbiology, food safety, meat biochemistry, and meat processing.

Candidates for the Ph.D. degree are required to declare a minor outside the department. On approval of the student’s advisory committee, a minimum of 12 credits in not more than two departments may be substituted for the minor.

The Department of Anthropology offers graduate programs leading to the Master of Arts (Plan A and Plan B) and the Doctor of Philosophy degrees. The degree programs, which share a core curriculum, include education leading to the general understanding of anthropological theory and knowledge, research methods, and a specialized area of concentration. Following the completion of the core courses, students are allowed opportunity for specialization. Areas of potential specialization include applied development anthropology, medical anthropology, and archaeology.

Generally, graduate students are admitted into the M.A. program with the potential to enter the Ph.D. program upon completion of the M.A. or with a faculty approved by-pass of the M.A. Students entering with master’s degrees in anthropology or other fields may enter the Ph.D. program directly, following a review of their previous experiences. Students entering with master’s degrees may be required to take the Core and Methods courses designated under the Master’s Program. In lieu of the core curriculum and thesis, these students may present evidence of alternative course work and the design and completion of a research project similar in scale to a thesis or practicum.

Requirements in the Ph.D. program consist of 1) a core course in Research Design (ANT 662), 2) an area of concentration consisting of 12 credit hours (applied anthropology students must take ANT 735), 3) a regional focus consisting of 6 credit hours at the 400G-700 level, 4) three 700-level seminars outside the area of concentration (does not include independent study courses), 5) successful completion of the doctoral qualifying examination, 6) a dissertation based on original research carried out by the student, and 7) a final oral defense of the dissertation.

Reading knowledge of one foreign language is required for the Ph.D. Because language skill is an important component of research in anthropology, a student’s advisory committee may require additional training, experience, and evaluation of a Ph.D. student’s language ability as part of the academic program. It is assumed that this will apply to any student who is working in an area where English is not the language.

Requirements for the M.A. program consist of 1) core seminars (ANT 601, 602, and 603); 2) a research methods sequence (ANT 660 and 661 or ANT 650 and 651); and 3) an area of concentration (applied anthropology students must take ANT 529). There is no foreign language requirement for the M.A. unless required by the student’s advisory committee. Plan A students must complete a thesis. Plan B students complete a practicum or additional course work. (Plan B option is not available for archaeology.) An oral final examination is required for both Plan A and Plan B.

Anthropology faculty members have research experience in the following areas: South and Southeast Asia, Africa, Europe, Latin America, and North America, particularly in the rural U.S. and Appalachia. Members of the department participate in interdisciplinary research in the University’s Center for Rural Health, the Sanders-Brown Center on Aging, the Gerontology Program, the College of Agriculture, the College of Medicine, and the College of Education. The Department of Behavioral Science, College of Medicine, includes anthropologists on its faculty, and students with interests in medical anthropology are encouraged to take behavioral science courses.

**Admission Requirements**

Department standards for admission to graduate work in anthropology include an undergraduate grade point average of B or better, satisfactory Graduate Record Examination scores, completion of a separate departmental application form, and three letters of recommendation. Write the Director of Graduate Studies, Department of Anthropology, for additional information on departmental requirements and opportunities for financial assistance.

Architecture

The Master of Architecture is a first-professional graduate degree, accredited by the National Architecture Accrediting Board (NAAB). This two-year degree comprises the second part of a sequential “4+2” curriculum, in which a student obtains a four-year (non-professional) Bachelor of Arts in architecture and concludes with the two-year, first-professional Masters of Architecture degree. Students who receive this degree are eligible to seek professional registration as an architect.

Degree Requirements

To obtain the Master of Architecture degree, students must complete 57 credit hours of graduate work as described in the curriculum below. Every student must complete a Masters’ Project in his or her area of concentration. Requirements for this degree are governed by and satisfy the accreditation requirements of the National Architecture Accrediting Board.

Master of Architecture (2-year program) Curriculum

ARC 533 Structures II 3 credit hours
ARC 641 Professional Practice 3 credit hours
ARC 658 Design Studio VIII 6 credit hours
ARC 511-515 Advanced History and Theory Seminar 3 credit hours
ARC 631 Building Systems Integration 3 credit hours
ARC 659 Design Studio IX 6 credit hours
ARC 750 Design Studio X: Comprehensive Project 6 credit hours
ARC 709, 719, 729, 759, 769, etc. Master’s Project in Chosen Concentration 9 credit hours
Electives in Chosen Concentration 18 credit hours
TOTAL 57 credit hours

Areas of Concentration in the Master of Architecture degree program include but are not limited to: Building Design and Technology, Town Planning, Digital Visualization, Historic Preservation, History, Theory, and Criticism.

Admission Requirements

Applicants for admission to the Master of Architecture degree program must hold a Bachelor of Arts in Architecture or a Bachelor of Architecture degree from a NAAB-accredited institution. Admission to the program is contingent on acceptance by the Graduate School at the University of Kentucky. Applicants are required to submit a portfolio, a personal essay on graduate expectations, transcripts, and GRE scores. Students who do not hold a Bachelor of Arts in Architecture or Bachelor of Architecture degree from the University of Kentucky must submit three letters of recommendation as well. Admission to the program is based on a review of the submitted materials.

Advanced Standing

Students with a Bachelor of Architecture from a NAAB-accredited architecture program may be admitted to the graduate program with advanced standing. In the case of transfer credit, the School of Architecture Admissions Committee reserves the right to require supplemental course work in areas it deems appropriate given the student’s background and previous development.

A student who is admitted with advanced standing is required to complete at least 30 credit hours of graduate work to receive the Masters of Architecture degree. The minimum curriculum for a student admitted with advanced standing is as follows:

Advanced Design Studio 6 credit hours
Research and Methods Seminar 3 credit hours
Seminar in Chosen Concentration 3 credit hours
Electives in Chosen Concentration 9 credit hours
Master’s Project 9 credit hours

Students admitted to the Masters of Architecture degree program with advanced standing will engage primarily in scholarship and research related to specific areas of professional concentration. Graduate students will work with faculty advisors to create a course of study within these concentrations appropriate for the student’s particular academic objectives.

The School of Architecture offers courses in the following areas of concentration:

Building Design and Technology
Town Design
Digital Visualization
Historic Preservation
These concentrations will develop and evolve according to faculty and student interest, research, and contemporary theory and practice. Course work will consist of a combination of required courses and seminars within the School of Architecture and electives chosen by the student from a variety of cross-disciplinary offerings. Working closely with faculty advisors the student will develop an appropriate plan of graduate study.

---

**Art**

The Department of Art offers graduate course work in three areas: Art Studio, Art History and Art Education. Both the Art History area and the Art Education area confer the Master of Arts degree with an area of specialization in each. Studio degree recipients are awarded the Master of Fine Arts.

**Master of Arts**

**Art History**

The Master of Arts in Art History prepares students with the course work, language skills, and research experience needed for further graduate study or professional placements in a museum or educational setting. The curriculum is structured to provide both breadth and depth of inquiry through a variety of approaches to art history. We recommend that courses be broadly selected to take full advantage of the multiple approaches, expertise, and insights of the art history faculty.

**Admission Requirements**

Experience suggests that applicants from a wide variety of educational backgrounds may earn a MA degree in Art History. It is recommended that those without an undergraduate art history major consult with the art history graduate advisor before applying. Depending on their prior preparation, some students may be required to take undergraduate work without graduate credit.

**Application Procedures and Deadlines**

Applicants must submit materials to both the Graduate School and the Art History graduate program. Application for admission to the Graduate School requires:

- completed form for the Graduate School (form available electronically, by online request, or by written request);
- two official transcripts sent by each institution of study previously attended;
- official GRE scores;
- application fee.

Application to the Art History Graduate Program (Graduate Advisor, Art Department, 207 Fine Arts Bldg., University of Kentucky, Lexington, Kentucky 40506-0022. Tel: 859/257-1716) requires:

- letter of intent which explains your interest in art history graduate study, experience, and plans;
- sample of research (such as an undergraduate research paper) or professional writing;
- two letters of recommendation.

The application deadline for those wishing to be considered for a teaching assistantship in Art History is February 1. Please include an additional letter indicating your interest and credentials for an assistantship with your other program application materials to the Graduate Advisor at the address given above. All other application dossiers must be complete no later than May 1. Applications are reviewed in the spring semester for fall admission.

**Degree Requirements**

**Plan A – Thesis Option**

The thesis option emphasizes art historical research, problem solving, and communication skills. Candidates who plan to continue study at the doctoral level should select Plan A.

**Requirements**

1. minimum of 24 credit hours of graduate course work*
2. foreign language reading competency in German and one other language (French often recommended). **
3. satisfactory completion and oral defense of a thesis

* Six of the minimum 24 required credit hours may be taken in related areas such as anthropology, historic preservation, history, literature, philosophy, studio art, or women's studies.

** The foreign language competency requirement may be satisfied by any of the means established by the Graduate School.

**Plan B – Non-thesis Option**

The non-thesis option emphasizes course work to deepen the candidate’s foundation in the knowledge, theory, and methods of art history. Candidates who plan careers in visual arts fields that do not require a Ph.D. – professional placements in galleries, museums, art organizations, arts administration, etc. – may want to select this option.
Requirements

1) minimum of 30 credit hours of graduate course work*

2) foreign language reading competency in German and one other language**

3) satisfactory completion of final comprehensive exam

* Nine of the minimum 30 required credit hours may be taken in related areas such as anthropology, historic preservation, history, literature, philosophy, studio art, or women's studies.

** The foreign language competency requirement may be satisfied by any of the means established by the Graduate School.

Art Education

Admission Requirements

Students admitted to the graduate program in art education are expected to have completed course work equivalent to an undergraduate major in Art Education (in no case less than 18 hours in Art Education and Education, 12 hours in Art History, and 18 hours in Art Studio). Prospective students who do not meet these requirements should seek the counsel of the Program Faculty Committee to make up deficits prior to acceptance into the program. In addition, candidates must submit for review by the Program Faculty Committee, a portfolio of recent studio work (slides) and professional writing and other evidence of professional attainment, along with a 300-500 word statement of interest and objectives.

Work toward the master's degree is pursued under Plan A or Plan B. Successful candidates for the Master of Arts (Plan A) with an area of specialization in art education are to satisfactorily complete: 1) thesis preparation demonstrating substantial research or theoretical inquiry in Art Education; 2) a finished thesis and an oral/written examination; 3) 30 credit hours of graduate course work to be divided as follows: 1) 9 to 12 graduate credit hours in an area of specialization in art education; 2) 9 to 12 graduate credit hours in Art History or Art Studio; 3) the remaining 9 graduate credit hours may be taken in related course work in the College of Fine Arts, the College of Education, or elsewhere in the University, as well as in the Department of Art.

Under Plan B, successful candidates are to satisfactorily complete 36 credit hours of graduate course work. At least 24 of the credit hours should be taken in the Department of Art and are to be divided as follows: 12 to 15 graduate credit hours in Art Education and 9 to 12 graduate credit hours in Art History or Art Studio. The remaining 12 graduate credit hours may be taken in related course work in the College of Fine Arts, the College of Education, or elsewhere in the University, as well as in the Department of Art.

In accordance with Graduate Faculty rules, a final comprehensive examination is required in both Plan A and Plan B.

Master of Fine Arts

Admission Requirements

Applicants who seek admission to the Master of Fine Arts (M.F.A.) degree program should submit a portfolio of recent studio work in the form of at least 20 35-mm slides, a slide key, a letter of intent and three letters of recommendation directly to the Department of Art. Application forms for admission, GRE scores, and transcripts should be sent directly to the Graduate School. The deadline for all materials is February 1. In no case will this requirement be waived. Undergraduate art work must be substantially equal in quality, scope, and number of hours to the undergraduate major at the University of Kentucky.

The M.F.A. degree will be awarded on the completion of 60 hours of graduate course work. Of these, thirty hours must be at or above the 600 level and forty must be in regular courses (not independent study). In addition, the 60 credit hours will include 30 to 36 credit hours in Art Studio courses (including Graduate Studio Seminar and Studio Thesis Project), 6 to 12 credit hours in Art History and/or Art Education (a total of 24 credit hours of undergraduate and graduate Art History study is required), and up to 18 credit hours in related graduate courses which may be taken outside the Department of Art in the College of Fine Arts or elsewhere in the University.

Students must also complete successfully a final one-person M.F.A. exhibition of studio work and a visual documentation of that work together with an explanatory essay which is to be filed with the department prior to the exhibition. A total of 6 credits of A-S 767 (Studio Thesis Project) is required for the preparation of the exhibition and essay. Work toward the one-person exhibition will begin at a time determined by the department.

The student will designate a major area with the advice of the director of graduate studies at the outset of graduate work and will carry at least 12 hours in that area under the guidance of one faculty member selected as an advisor. A foreign language is not required, and the M.F.A. degree is offered only according to Plan B.

Candidates for the M.F.A. degree who hold an M.A. degree in studio work from another school will be required to complete a year's residence and 18 credit hours of graduate work at the University of Kentucky, including two semesters of Graduate Studio Seminar and all other requirements for the degree. Total hours toward the M.F.A. degree must equal 60 credit hours of graduate work.

The Department of Behavioral Science offers a Graduate Certificate in Medical Behavioral Science designed for students who are enrolled in a doctoral program in a basic academic field. This program typically will admit doctoral students from programs in Anthropology, Communications, Educational and Counseling Psychology, Geography, Gerontology, Health and Physical Education, Nursing, Nutritional Science, Psychology, and Sociology. These students often come to the University of Kentucky to work with our faculty and to obtain training in Medical Anthropology, Medical Sociology, Health Psychology, and Health Communications which are subspecialty fields within each of these disciplines.

The certificate has three objectives:

1. Provide students with a multi-disciplinary approach incorporating their basic discipline with other social and behavioral sciences with identification of areas of convergence and interrelation in content, theories and methods.

2. Orient students to health and medical settings, including an enculturation to the attitudes, values, professional interrelationships and educational objectives of health personnel and organizations and the nature of behavioral science research in these areas.

3. Train students in research to equip them with basic skills and approaches to research design, data acquisition, and data analysis, as well as manuscript and research grant preparation in medical behavioral science through collaboration with ongoing research projects.

Students interested in pursuing the certificate should consult with the Director of Graduate Studies for requirements.

The certificate is partially supported by a training grant from the National Institute of Mental Health, which provides pre- and postdoctoral trainee stipends. A limited number of departmental assistantships are also available to qualified students.

**Behavioral Science**

*Behavioral Science is not a Degree Program.*

The Biology Graduate Program provides training in three areas of contemporary biological research: Environmental and Evolutionary Biology; Molecular and Cellular Biology; and Organismal and Integrative Biology. These areas correspond to three areas within Biology around which faculty research programs are clustered:

**Environmental and Evolutionary Biology** -- Evolution of life histories, growth strategies, mating, social and predator-prey behavior; effects of these traits on population and community ecology. Organisms studied include: birds, amphibians, fish, invertebrates, woody and herbaceous vascular plants as well as non-vascular plants such as bryophytes.

**Molecular and Cellular Biology** -- Biological sciences have been revolutionized in recent years by studies and applications at the cellular and molecular levels. The Molecular and Cellular Biology (MCB) area provides graduate training in fields at the forefront of this discipline such as gene expression, cell division, and developmental regulation. Emphasis is placed on the application of molecular genetic and biochemical tools to genetically tractable systems including...
viruses, fungi, cultured cells, and insects. The graduate course work and laboratory experiences prepare MCB students for scientific careers in high demand areas of basic and applied research.

**Organismal and Integrative Biology** -- Behavioral, anatomical, physiological and molecular techniques are applied to questions of animal development and function. Students entering this area receive training and select a dissertation topic in one or more of the following areas: neurobiology, environmental physiology, neurophysiology, endocrinology, and metabolism.

The primary emphasis of our Graduate Program is on doctoral training, however, we also provide training towards the Master’s degree (both Plan A and Plan B).

**Admission Requirements**

All students admitted to one of the graduate degree programs in Biology must meet the minimum admission requirements of the Graduate School.

Although (or are nearing completion of) a Master's degree, Master's training is not a prerequisite for admission to our doctoral program.

As preparation for graduate work in Biology, students generally have completed one year of physics, two years of chemistry, one semester of calculus, one year of general biology, and upper-level courses providing a working knowledge of contemporary biology.

Currently, all students admitted to the program are financially supported through teaching assistantships, research assistantships, or fellowships. Course work and research projects in the program are tailored to the background and interests of each student, under the guidance of the student’s committee.

Requests for application forms and inquiries about the Biology Graduate Program should be directed to:

**Biomedical Engineering**

The Graduate Center for Biomedical Engineering offers master's and doctoral degrees in Biomedical Engineering. This graduate program emphasizes the application of engineering principles to the areas of medicine and biology and covers the broad aspects of mechanics, materials, fluids, signal processing, systems analysis, instrumentation, physiology, cellular processes, and laboratory experimentation. Students in the program are provided with educational and research opportunities through the facilities and faculty of the Center and its ideal geographic location and close ties with other units of the University, ranging from engineering to basic science to clinical departments.

Areas of research include cardiac arrhythmia, cardiopulmonary mechanics and controls, electromagnetic stimulation of tissue magnetic resonance imaging, orthopedic biomaterials and bone tissue engineering, orthopedic biomechanics, and respiratory dynamics. The Center is located in the Wenner-Gren Research Laboratory that provides the framework for multidisciplinary research. Faculty and staff of the Center collaborate with investigators from other units of the University, including Anatomy & Neurobiology, Biochemistry, Biology, Cardiology, Cardiothoracic Surgery, Center for Applied Energy Research, Chemical Engineering, Chemistry, Electrical Engineering, Mathematics, Mechanical Engineering, Neonatology, Nephrology, Neurosurgery, Oral Surgery, Orthopaedic Surgery, Otalaryngology, Pediatric Cardiology, Periodontics, Pharmacy, Physiology, and Plastic Surgery. Center faculty and staff provide opportunities and support for graduate students, medical residents, and selected undergraduates. Graduates of the program enter careers in research institutes, academia, hospitals, and the biomedical industry.

**Admission Requirements**

Entering students are expected to have a baccalaureate degree in engineering. Some course work in the biological sciences is desirable but not required. Applicants with degrees purely in the physical or biological sciences may be required to complete course work in the undergraduate engineering curriculum before being admitted to the graduate program. Admission to the biomedical engineering graduate programs normally requires a GPA of at least 3.0/4.0 or 70% for all graduate and undergraduate work and Graduate Record Examination scores of at least 1200 (Quantitative + Verbal) and 3.5 (Analytical). Additional application materials to be submitted to the Center include a statement describing your reasons for wanting to pursue graduate education in Biomedical Engineering and letters of recommendations from three faculty members who are familiar with your academic record. Satisfying the above requirements does not guarantee admission to the biomedical engineering graduate program.

**Master of Science**

The Master of Science degree provides students with a combination of experiences in basic research, design, development,
Doctor of Philosophy

The Doctor of Philosophy is a research degree granted on the basis of broad knowledge of engineering applications in biology and medicine and an in-depth study in a specific area leading to a dissertation reflecting original and independent work by the candidate. Applicants to the Ph.D. program are generally expected to have a master's degree. Under special circumstances, exceptional students may bypass the M.S. or be admitted directly to the Ph.D. program upon approval of the biomedical engineering faculty. Courses for advanced study are determined in consultation with an advisory committee and will be selected from the areas of engineering, mathematics, life sciences, and chemistry. To earn a Ph.D. degree, students must:

1. Meet the general requirements of the Graduate School.
2. Successfully complete PGY 502.
3. Pass the Qualifying Examination. This exam, consisting of written and oral components, is designed and administered by the student's Doctoral Advisory Committee.
4. Present and satisfactorily defend a dissertation documenting independent and comprehensive scholarship.

Further information may be obtained by writing to the Director of Graduate Studies, Center for Biomedical Engineering, Wenner-Gren Research Laboratory, University of Kentucky, Lexington, KY 40506-0070, by e-mail at cbmedgs@uky.edu, or by visiting our Web site at <www.uky.edu/RGS/CBME>.

Biosystems and Agricultural Engineering

The Biosystems and Agricultural Engineering Department offers programs leading to the M.S. in Biosystems and Agricultural Engineering (Plan A and Plan B available) and the Ph.D. degree.

Admission Requirements

Admission into the M.S. graduate program of the Biosystems and Agricultural Engineering Department requires the concurrence of the Department Graduate Committee, and the Director of Graduate Studies, and the Department Chair and the availability of an advisor for the student. The Biosystems and Agricultural Engineering Graduate Committee reviews the applicant’s three letters of recommendation, resume, statement of professional objective and transcripts with special emphasis given to the science and mathematics area. The department requires a minimum grade point average of 2.8 and a GRE score of at least 1500. An engineering B.S. degree from an ABET-accredited engineering program (or international equivalent) is generally required, however, non-engineering students may be admitted by agreeing to take additional undergraduate courses specified by the graduate committee. An advisor for a student is required prior to admittance into the program. Exceptions to these requirements are considered on a case-by-case basis and require approval of the Department Chair.

Admission into the Ph.D. graduate program of the Biosystems and Agricultural Engineering Department requires the concurrence of the Department Graduate Committee, the Director of Graduate Studies, and the Department Chair, and the availability of an advisor for the student. The Biosystems and Agricultural Engineering Graduate Committee reviews the applicant’s previous graduate record, three letters of recommendation, resume, statement of professional objective, and transcripts with special emphasis given to the science and mathematics area. The department requires a minimum grade point average of 3.2 on all previous graduate work and a GRE score of at least 1500. An advisor for a student is required prior to admittance into the program. Exceptions to these requirements are considered on a case-by-case basis and require approval of the Department Chair. Ph.D. students are admitted into Candidacy after they have successfully completed the Qualifying Exam.

Degree Requirements

The biosystems and agricultural engineering graduate program has as its objectives the development of:

1. The ability to plan and conduct research and design involving the application of engineering science to biological and agricultural systems.
2. The understanding of the mathematical, physical, and biological sciences to permit the reading and understanding of the present and future literature in these and related fields.
3. The skills required to use precision instruments, techniques, and computers in research and design.
4. The ability to make sound engineering and management decisions.
5. The ability to teach college level courses in biosystems and agricultural engineering, particularly at the doctoral level.

In the attainment of the above objectives the graduate student will combine courses in biosystems engineering, the physical sciences, other engineering fields, and the biological sciences in developing a program of study. The advanced degrees, however, are primarily research degrees awarded for significant creative research accomplishment, not for the completion of a specified number of courses. Therefore, the program concentrates on a strong thesis or dissertation problem completed under the supervision of the graduate faculty of the department. Strong course support is essential if the thesis or dissertation problem is to be properly undertaken and completed.

The design-oriented, non-thesis option is also available for the master’s degree.

**Business Administration**

**Business Administration Graduate Programs**

The College of Business and Economics offers the Master of Business Administration and the Doctor of Philosophy degrees. Faculty participating in the M.B.A. and Ph.D. programs are members of the School of Accountancy, the School of Management (Decision Science and Information Systems, Finance, Management, Marketing) and the Department of Economics. A description of the graduate programs and graduate faculty in Accounting and in Economics can be found in those sections of this Bulletin.

**Master of Business Administration**

The M.B.A. program is designed to provide students with the necessary educational foundation so that they are prepared to assume managerial responsibility in a variety of organizational settings. The integrated sequenced program of study consists of two distinct tracks, based on one’s background. One track is for students who hold an undergraduate degree in business and are seeking a course of study that will provide them an opportunity to develop more specialized skills in a functional area of business. The other track is for students who do not have an undergraduate degree in business but often have technical training, (e.g., engineering, computer science, etc.) and are seeking a course of study that will provide them an opportunity to seek broad-based management training. Both programs of study are 36 hours after completion of all prerequisites (see description) and have a common core of six courses. Core courses are designed to provide an understanding of business enterprise; an understanding of functional problems; the ability to solve complicated and realistic business problems; and an understanding of managing a business enterprise in a global environment.

For business undergraduates, the remaining six courses are electives which will permit students to develop skills in a particular functional area.

For nonbusiness undergraduates, the remaining six courses will provide students an understanding of functional problems encountered in business enterprise as related to organizational behavior, production, marketing, finance and two elective courses.

**Admission Requirements**

1. Required course prerequisites for the M.B.A. Program are two Principles of Accounting courses (one in financial accounting and one in managerial accounting), two Principles of Economics courses (one in micro economics and one in macro economics), a Statistics and Probability course, and an Elementary Calculus course. All courses should be equivalent to at least 3 semester hours. The prerequisites may be satisfied by:
   a) passing the required prerequisite courses (ACC 201 and ACC 202, ECO 201 and ECO 202, STA 291, and MA 123) at the University of Kentucky,
   b) passing similar courses at another accredited university,
   c) passing college-level proficiency (CLEP) examinations, or
   d) successfully completing correspondence courses.

56 / GRADUATE DEGREE PROGRAMS
2. In addition to satisfying required course prerequisites, applicants should possess a four-year undergraduate degree (or its equivalent) with a minimum cumulative grade point average (GPA) of 2.75/4.0.

3. The Graduate Management Admission Test (GMAT) is a requirement, and international students (with the exception of those who hold a degree from a U.S. institution of higher education) must present a Test of English as a Foreign Language (TOEFL) with an overall minimum score of 550 written or 213 computer.

4. All international students who are not permanent residents of the U.S. must present a Test of Written English (TWE) with a score of 4.5 or higher.

5. No student will be admitted to the M.B.A. Program before completion of all prerequisites and the GMAT.

Degree Requirements

1. The M.B.A. program of study requires 36 semester credit hours of M.B.A. course work.

   **Business Undergraduate**
   - ACC 628 Financial/Managerial Accounting 3
   - ECO 610 Managerial Economics 3
   - DIS 651 Quantitative Analysis for Decisions 3
   - BA 610 Global Business Management 3
   - DIS 620 Management Information Systems in Decision Making 3
   - MGT 699 Business Policy and Strategy II 3
   - Electives 18
   **Total 36**

   **Non-business Undergraduate**
   - ACC 628 Financial/Managerial Accounting 3
   - ECO 610 Managerial Economics 3
   - DIS 651 Quantitative Analysis for Decisions 3
   - MGT 611 Organizational Behaviour 3
   - DIS 620 Management Information Systems in Decision Making 3
   - FIN 600 Corporate Financial Policy 3
   - MKT 600 Marketing Management 3
   - MGT 699 Business Policy and Strategy II 3
   - DIS 600 Production Management 3
   - BA 610 Global Business Management 3
   - Elective 6
   **Total 36**

2. Minimum average of grade B in all courses attempted for graduate credit after being admitted to the Graduate School. Students receiving two grades of C below a B average or one grade of E will be subject to dismissal from the M.B.A. program.

3. Successful completion of a comprehensive final examination.

   **B.S. in Engineering/M.B.A.**

   An opportunity to study for an M.B.A. degree while pursuing a Bachelor of Science in Engineering degree is offered to eligible students admitted to the College of Engineering. Students must meet all prerequisites for the M.B.A. degree before being considered for the program.

   **J.D./M.B.A. Option**

   The College of Business and Economics and the College of Law offer the opportunity to obtain the Master of Business Administration (M.B.A.) and Juris Doctor (J.D.) degrees in a dual degree program. Because both schools recognize that some aspects of business and law are compatible and interrelated, students can usually obtain both degrees in less time than if the degrees were pursued separately. As a result, students gain marketable skills and specialized employment opportunities in less time than might otherwise be required. Students interested in the J.D./M.B.A. program must apply to both the College of Law and the Graduate School.

   **M.D./M.B.A. and Pharm.D./M.B.A.**

   Through agreements with the College of Medicine and the College of Pharmacy, the Gatton College admits eligible students to pursue the M.B.A. degree jointly with the M.D. or Pharm.D. degrees. Students interested in these programs must apply to the College of Medicine or the College of Pharmacy as appropriate and also to the Graduate School and the Gatton College M.B.A. program.

Application for Admission

Students who wish to apply for admission to the M.B.A. program in the Gatton College of Business and Economics should a) write to The Graduate School, University of Kentucky, Lexington, KY 40506-0027, and request application forms for admission and financial aid together with the Graduate Bulletin, and b) write to The Graduate Center, Gatton College of Business and Economics, University of Kentucky, Lexington, KY 40506-0034 and request program applications and information.

Doctor of Philosophy

The mission of the doctoral program is to prepare students for successful academic careers. To accomplish this mission, the program prepares graduates to comprehend and evaluate research, to perform research which advances knowledge and to provide effective instruction, all within a business-related discipline. Specifically, the program is designed to provide:

   a) An understanding of the philosophies and basic methodological issues of academic inquiry.
   b) An understanding of the theoretical foundations and state-of-the-art research methods in a specific discipline.
   c) The ability to design and execute substantive research projects.

Admission Requirements

1. Background Training in Business and Business Related Areas. The Ph.D. is designed to provide specialization beyond the master’s level. The educational background of each candidate will be reviewed by the faculty in the student’s major area to identify any deficiencies. In most cases, an M.B.A. (M.S. in Accounting) from an AACSB accredited institution provides the necessary background.

2. Applicants with previous graduate credits are evaluated generally according to the following rules, but each case is individually examined by the faculty of the appropriate business department. A minimal grade point average of 3.2/4.0 is required on all previous graduate credits. Also, students without GMAT scores must take the exam before admission, reporting no less than a minimal score of 500.

**Degree Requirements**

1. Core Requirements (18-19 credit hours):*
   a) BA 762 Research Methodology (3)
   b) Theoretical Foundations—Six hours selected by the student from among:

   "GRADUATE DEGREE PROGRAMS"
2. Major Field Requirements:
   The major field will consist of at least 21 hours of graduate credit course work including at least 12 credit hours of 700 level courses exclusive of the core. Currently available major fields include:
   - Accounting
   - Decision Science and Management Information Systems
   - Finance
   - Marketing
   - Organizational Behavior and Human Resource Management
   - Strategic Management

   All course work must be approved by the Director of Graduate Studies.

3. Written and oral comprehensive examinations are required in the major field.

4. The dissertation will be based on original research on a significant topic. The dissertation will be defended in an oral examination.

5. Minimum average of grade of B for graduate credit and in all courses attempted after being admitted to The Graduate School. Students obtaining two grades of C below a B average will be subject to dismissal from the program.

For application forms and information, visit the Gatton College Web site – gatton.uky.edu/prospectivestudent.html, call (859) 257-3592 or write to:

The Office of the Associate Dean of Administration and Academic Affairs
Gatton College of Business and Economics

Chemical Engineering

The Department of Chemical and Materials Engineering offers programs leading to the M.S. and Ph.D. degrees in Chemical Engineering, with research specialization in the following areas:
Aerosol Chemistry and Physics
Biocellular Engineering
Catalysis
Environmental Engineering
Finite Element Analysis
Fuel Science and Fuel Cells
Materials Synthesis and Nanotubes
Membrane Science and Technology
Polymer Processing
Polymer Science and Engineering
Supercritical Fluids Processing
Thermodynamics
Transport Phenomena

Admission Requirements

Admission to the M.S. and Ph.D. degree programs is on a competitive basis, and financial assistance is available through teaching and research assistantships, as well as a limited number of fellowships. Applicants should have a minimum grade point average of 3.0/4.0 on all undergraduate work, and should hold a Bachelor of Science degree in Chemical Engineering or its equivalent. Meeting the minimum requirements does not guarantee admission, as acceptance is on a competitive and space-available basis. Students with undergraduate majors not in chemical engineering (for example, chemistry or physics) will be expected to complete a program of undergraduate remedial courses prior to admission into the graduate program.

Master of Science

The M.S. degree in Chemical Engineering requires 24 hours of course work, plus completion of an acceptable thesis (Plan A). This course work includes the chemical engineering graduate core, which is comprised of CME 505, CME 620, CME 630, CME 650, and a graduate-level mathematics elective. In certain exceptional cases (as determined by the faculty), a non-thesis M.S. may be undertaken (Plan B). The non-thesis option requires 30 hours of course work which includes the chemical engineering core, as well as 3 hours of CME 780 (Special Problems in Chemical Engineering). The non-thesis option is only available to those students with prior research or industrial experience. For both Plan A and Plan B, at least half of all graduate course work must be at the 600 level or above.

Doctor of Philosophy

The Ph.D. degree is a research degree granted on the basis of broad knowledge of chemical engineering and specialized study in a specific area of interest. The student must conduct original and significant research and must submit and defend a dissertation based on that research. Course work requirements include the chemical engineering graduate core, and additional courses so as to fulfill the pre-candidacy residency requirements set forth by the Graduate School; the plan of study is developed by the student in consultation with the research advisor. Advancement to doctoral candidacy is contingent upon successful completion of both the written and oral portions of the Qualifying Examination. The written portion addresses four areas of the chemical engineering discipline: Kinetics and Reactor Design, Mathematics (as applied to chemical engineering problems), Thermodynamics, and Transport. The oral portion consists of a presentation and defense of the student’s proposed dissertation research; a prospectus prepared by the student must be submitted to the doctoral advisory committee prior to the examination. There is no language requirement for the M.S. or Ph.D. degrees in Chemical Engineering.

A wide selection of research topics is available under the direction of the Chemical Engineering faculty. CME 580 and CME 599 topics include aerosols, membrane technology, bioseparations, and finite element analysis. For more information on degree requirements, financial aid, and facilities contact the Director of Graduate Studies.

EGR 621 FINITE ELEMENT ANALYSIS IN ENGINEERING ................. (3)

Chemistry

The Department of Chemistry offers the Master of Science and the Doctor of Philosophy degrees. Plan A or B may be used to satisfy the requirements for the M.S. degree. Areas of specialization in chemistry are analytical, biological, inorganic, organic, physical, and radio-nuclear. All candidates for the Ph.D. degree are required to serve as a teaching assistant for one semester.

Admission Requirements

The only specific departmental requirement for admission to the Graduate Program in Chemistry is an undergraduate degree in chemistry or its equivalent. The Chemistry Department asks applicants to submit three letters of recommendation and considerable weight in each admission decision is given to these written evaluations from the applicant’s instructors and mentors. Otherwise the criteria for admission are those set by the Graduate School. For persons applying for admission to the
Graduate Program in Chemistry, Teaching Assistantships are only offered to Ph.D. aspirants. While enrolled students may choose or be required to obtain a Master’s Degree, this is not a normal or necessary intermediate stage on the path to a Ph.D. Entering applicants targeting a Master’s Degree are generally not offered financial support. An effort is made to match applicant interests with available research programs. Applicants for whom exceptions to the above-stated policies seem warranted are subject to special consideration by the Graduate Recruitment Committee.

A satisfactory reading knowledge of a modern foreign language is recommended for the M.S. and the Ph.D. degrees, but not required.

As part of the course requirements for both the M.S. and the Ph.D. degrees, all students must normally take four “core” courses. The student selects one course which best meets career objectives in each of four of the five areas of chemistry (analytical, biological, inorganic, organic, and physical) from a pair of such courses: CHE 524 or 626, CHE 550 or 552, CHE 510 or 514, CHE 535 or 538, CHE 547 or 548, respectively.

All new graduate students must take proficiency examinations in in analytical, biological, inorganic, organic, and physical chemistry. The results of these examinations are used as a guide in establishing the student’s program of courses. Students who do very well on any particular examination may bypass the core course in that area. Students are required to take a core course in each of the two areas where their proficiency exam scores were lowest.

**Master of Science**  
**Plan A (Thesis)**

All Graduate School requirements must be met. In addition to four “core” courses, advanced or specialty courses relevant to a student’s career objectives are taken to total a minimum of 24 credits. Successful defense of a thesis describing original research of a caliber that could result in publication in refereed scientific journals is required of all M.S. Plan A students.

**Master of Science**  
**Plan B (Non-Thesis)**

Students in the Department of Chemistry may satisfy the requirements for an M.S. degree by using Plan B, a course work M.S. Students wishing to follow this plan shall present for the approval of the Graduate Program Committee a program of courses that satisfies the Committee and meets all Graduate School requirements. This program of courses must meet distribution requirements within four of the five areas of chemistry, and include 6 or more credits of courses outside of Chemistry that are relevant to the student’s career goals.

**Doctor of Philosophy**

Doctoral degrees are earned in the Department of Chemistry after a student has carried out productive and independent research on a problem that is of significant chemical interest. It is expected that the results of the dissertation work will be published in refereed scientific journals. All Graduate School requirements must be met. Subject to approval of the student’s Advisory Committee, course work for the Ph.D. degree shall normally include four “core” courses and 8 credits of advanced or specialty courses. At least 3 credit hours must be in courses outside of the student’s main area of interest.

The Qualifying Examination consists of a written and an oral part. The written component of the Qualifying Examination consists of a series of cumulative examinations designed to test the application of fundamental principles and reasoning to literature or research problems. Scores of 3, 2, 1, or 0 can be obtained on each examination. Eight examinations per year in the areas of Analytical, Inorganic, Biological, Organic, and Physical Chemistry and four examinations per year in Radio-nuclear Chemistry are given. A Ph.D. student normally must attain a minimum of eight points within two years in order to take the oral part of the Qualifying Examination.

For further information on any degree program in Chemistry, contact the Director of Graduate Studies.

**Civil Engineering**

The Department of Civil Engineering offers the Master of Science in Civil Engineering (Plan A and Plan B available), Master of Civil Engineering (Plan B), and Ph.D. with specialization in the following areas:
Civil Engineering Materials  
Construction Engineering and Management  
Environmental Engineering  
Geotechnical Engineering  
Hydraulics Engineering  
Structural Engineering  
Transportation Engineering  
Water Resources Engineering

These areas utilize courses from other departments and such inter-departmental programs are encouraged. Mechanical Engineering, Chemical Engineering, Agricultural Engineering, Mining Engineering, Mathematics, Computer Science, Geology, Biology, and Chemistry are some of the departments whose offerings contribute to the programs in Civil Engineering.

For the Master of Science in Civil Engineering (M.S.C.E.) degree Plan A, 24 credit hours of course work and a thesis are required to fulfill degree requirements.

For the Master of Science in Civil Engineering (M.S.C.E.) degree Plan B, a minimum of 30 credit hours of graduate work are required, including at least 3 credit hours of independent work. The requirement for independent work may be satisfied by either taking an approved curriculum of courses which contain integral independent study components totalling a minimum of 3 credit hours, or by completing at least three credit hours of CE 790 and/or CE 791.

Students who wish to complete the independent work requirement by choosing from an approved curriculum of courses containing integral independent study components, shall present a plan of study which satisfies this requirement, and all other Graduate School requirements, to the Director of Graduate Studies for approval before the completion of 12 credit hours of graduate course work. Preferably this should occur no later than the end of the first semester of graduate residence.

The requirement for all independent work must be satisfied under the direction of one faculty member (for students choosing a CE790 and/or CE791), or several faculty members (for students following an approved curriculum of courses), who will assign, monitor, and evaluate the student’s work as part of the specific course. Written reports will usually represent the work product to be evaluated.

All students must pass a Final Examination as specified by the rules of the Graduate School. The contents and style of the examination, and the evaluation of the student’s performance, are the responsibility of a Graduate Faculty committee appointed by the Dean of the Graduate School.

The Ph.D. degree has no formal course requirement, but students must pass the Qualifying Examination before entering candidacy.

There is no language requirement for the M.C.E., M.S.C.E. and Ph.D. degrees in Civil Engineering.

Admission Requirements

In addition to satisfying general Graduate School and College of Engineering admissions requirements (a GPA of 2.8/4.0 on all undergraduate work is normally required), applicants for admission to the M.C.E., M.S.C.E., and Ph.D. degree programs in Civil Engineering must have been awarded a Bachelor of Science degree from an engineering program accredited by the Accrediting Board for Engineering and Technology (ABET).

This requirement may be waived for applicants who have been awarded bachelor’s degrees other than in engineering or from unaccredited engineering programs (including those offered by foreign institutions) if the applicant has received an acceptable score on the Advanced Engineering Test of the Graduate Record Examination (GRE).

Students with undergraduate majors not in engineering must also take a certain number of undergraduate remedial courses.

Neither the M.C.E., the M.S.C.E. degree nor the Ph.D. degree in Civil Engineering will be conferred unless the candidates have successfully completed, during their undergraduate and/or graduate careers, at least one basic course in at least four of the following seven areas: civil engineering materials, fluid mechanics, geotechnical engineering, surveying, structural or solid mechanics, transportation engineering, and water quality engineering.

It is also required that a minimum GRE score of 1000 and 1100 (combination of verbal and quantitative sections) be obtained by Master’s and Ph.D. degree applicants respectively.

Scores on the analytical portion are also considered. Foreign applicants whose native language is other than English must take the Test of English as a Foreign Language (TOEFL) and score at least 550 on the written version or the equivalent on the computer version it before they can be admitted.

The Department of Civil Engineering has many well-equipped laboratories with active research programs in most areas. The research programs provide financial assistance for graduate students. In addition, financial assistance is available through teaching assistantships and a limited number of traineeships, fellowships and scholarships.

Information about the graduate program in Civil Engineering can be obtained by writing the Director of Graduate Studies, Department of Civil Engineering.

Classics
The Department of Modern and Classical Languages, Literatures and Cultures offers the M.A. degree in Classics under both Plan A (thesis) and Plan B (non-thesis) options. Each student will normally elect either Latin literature, Greek literature, or a combination of the two as an area of concentration. A program of courses will be selected from the list below with the advice of the Director of Graduate Studies. Appropriate courses in other areas of graduate study outside of the Department may be added with the approval of the Director of Graduate Studies. Individualized course programs are arranged for students who are preparing for secondary school teaching or who have additional interests in fields other than Classics. Normally the M.A. program is completed in two years of full-time study.

For additional information and details about graduate study in the Department, contact the Director of Graduate Studies.

Admission Requirements
The requirements for admission to the program in Classics are (a) a combined score of 1000 on any two of the three parts of the Graduate Record Examination and (b) an undergraduate grade point average of 3.0 or above on a 4.0 scale. The Director of Graduate Studies may admit students with lower GRE scores or an undergraduate grade point average below 3.0 if, on the basis of a student’s last two years of work, classics grades, or general academic competence, he or she believes the student capable of successful graduate work.

The Department also requires from each applicant a two- or three-paragraph statement describing his or her reasons for seeking a master’s degree, and three letters of reference from former professors or teachers. There is no special form to be filled out for letters of reference. All of these materials should be sent via e-mail by Feb. 1 to the Director of Graduate Studies, classics@lsv.uky.edu, or by regular mail to:

Director of Graduate Studies
Department of Modern and Classical Languages, Literatures and Cultures
1055 Patterson Office Tower
University of Kentucky
Lexington, KY 40506-0027

Graduate Courses

Graduate study in the clinical sciences is designed to prepare candidates for advanced study and research careers in academic, industry and pharmaceutical laboratories. Initial focus in the program will concentrate on reproductive laboratory sciences and hematology with special emphasis in transplantation immunology.

Admission Requirements

Admission to the graduate program is competitive and is based upon academic background, professional recommendations, performance on the Graduate Record Examination (GRE), experience and, when possible, personal interviews. Students should have completed an undergraduate degree in clinical laboratory sciences; however students will be considered who have degrees in biology, biochemistry, biomedical science, or chemistry. It is recommended that students have completed undergraduate courses in biological sciences, chemistry, and clinical laboratory sciences.

Students will have the opportunity to learn and study with a faculty assembled to deliver this program. Subject areas include fertility, reproductive immunology, andrology, signal transduction, disease mechanisms such as cancer with an emphasis in the leukemias and lymphomas, drug development and
experimental therapeutics, hemato poiesis, stem cell biology, and quality assurance and control. The program of study stresses an interdepartmental approach both in the selection of courses and in the pursuit of research. Students are expected to participate in graduate seminars, journal clubs, and research seminars; to interact with visiting scholars, both domestic and international; and to present the results of their research at local, national and international conferences.

**Master of Science**

The Master of Science degree in Clinical Sciences consists of a track in reproductive laboratory science (RLS) and a track in hematology/transplantation science. A minimum of 30 credit hours is required for the RLS track and includes 11-16 credit hours in math and science followed by 19-21 hours in RLS courses specific for the discipline. All students must complete a research course and clinical practica in andrology and assisted reproductive technology (ART). A total of 37-38 credit hours are required for the hematology/transplantation science track, including a 19-credit hour core and 18-19 hours of courses specific for the discipline. The RLS track is non-thesis, requiring research and both an oral and written research presentation. Both thesis and non-thesis options are offered for the hematology/transplantation track. Selected courses for both tracks are offered via distributive learning.

**Degree Requirements for Reproductive Laboratory Science Track**

Math and Science Courses (11-16 credit hours)
- Statistics (3-4)
- Physiology or Pathophysiology (3-4)
- Science courses (3-6) depending on background
- CSC 528 Laboratory Techniques (2); required for students not having clinical laboratory experience
- CSC 615 Reproductive Laboratory Science (1)
- CSC 616 Andrology (1)
- CSC 617 Reproductive Microbiology and Immunology (1)
- CSC 618 Laboratories in Andrology, Reproductive Microbiology and Immunology (1)
- CSC 621 Embryology and ART (3)
- CSC 624 Gamete & Embryo Cryopreservation (2)
- CSC 625 Management, Policy, Ethical & Legal Issues in ART (2)
- CSC 625 Andrology Clinical Practicum (2)
- CSC 627 ART Clinical Practicum (3)
- CSC 628 RLS Seminar (1)
- CSC 630 RLS Research (3-5)

Total credits for the Master of Clinical Sciences, RLS track is 30-35.

**Degree Requirements for Hematology/Transplantation Science Track**

Core Courses (19 credit hours)
- CSC 600 Human Pathophysiology (4)
- CSC 601 Health Care Policy and Ethics (3)
- CSC 602 Clinical Sciences Seminar (taken twice for credit) (1)
- CSC 603 Quality Assurance and Laboratory Regulations (4)
- CSC 604 Research Methods for the Clinical Sciences (3)
- CSC 605 Epidemiology and Biostatistics or
- CSC 606 Advanced Laboratory Statistics & Administrative Analysis (3)

Hematology/Transplant Science (18 credit hours)
- CSC 670 Histocompatibility & Immunogenetics (3)
- CSC 671 Molecular Immunopathogenesis (3)
- CSC 672 Transplantation Science (3)
- CSC 673 Flow Cytometry (3)
- CSC 674 Hemopoiesis (3)
- CSC 675 Myeloproliferative Disorders (3)
- CSC 676 Advanced Hemostasis (3)
- CSC 690 Clinical Sciences Thesis Research (0-6)

Total credits for the Master of Clinical Sciences, Hematology/Transplant Science is track 37 or 38.

**Doctor of Science**

The Clinical Sciences doctoral program is designed to produce both academic leaders and researchers in the area of hematology with an emphasis in transplantation science for those individuals with a background in the biological and clinical sciences. The core curriculum is the framework upon which the student builds a foundation for scholarship in the selected area of study. An in-depth course in the biosynthesis, structure and function of macromolecules lays the groundwork for genetic therapy applications and intensive study in hematology and transplantation science.

The program brings together the educational and research expertise of our University faculties in the College of Health Sciences and the College of Medicine. This collaboration will enable graduates to promote academic and clinical leadership in addressing health-related basic research and clinical issues that will increase in importance during the coming decade.

Integral to the scholarship of discovery is a thorough understanding of the analysis and interpretation of data. Course work in the principles, applications and implementation of research theory is an essential component of the doctoral program and requisite to the preparation of scholars as consumers of and contributors to intellectual investigation. These courses in conjunction with the research apprenticeship will prepare students for independent scholarship.

**Degree Requirements**

(Hematology/Transplantation Science only)
- Core Courses (35-40 credit hours)
- STA 570 Statistics (4)
- STA 672 Design and Analysis of Experiments (2-6)
- CSC 602 Clinical Sciences Seminar (taken twice for credit) (1)
- CSC 772 Gene Therapy (3)
- CSC 774 Biosynthesis, Structure and Function of Macromolecules (4)
- CSC 787 Teaching Apprenticeship (2)
- CSC 788 Research Apprenticeship (2)
- CSC 790 Clinical Sciences Dissertation Research (taken two successive semesters) (9)

Individualized Course of Study (9 credit hours)

(Hematology/Transplantation Science only)
- CSC 776 Molecular Genetics and Chromosome Analysis of Hematopoietic Disorders (3)
- CSC 777 Hematopoietic Stem Cell and Bone Marrow Transplantation: Nontraditional Applications (3) CSC 778 Clinical Molecular Cytometry (3)
- Additional Requirements: Oral and/or Written Comprehensive Examination/Qualifying Exam Post Qualifying Exam Residency (two semesters)

Dissertation
Communication

Communication offers programs leading to the Master of Arts (either Plan A or Plan B) and Doctor of Philosophy degrees. The primary areas of emphasis include communication processes, effects and functions within mass, mediated and interpersonal contexts. Applied areas include health communication, and communication and information systems.

The program offers special opportunities for students to apply communication theory and research in health contexts. Students pursuing work in health communication are encouraged to develop interdisciplinary programs involving the Department of Behavioral Science, the College of Medicine, as well as the Colleges of Dentistry, Health Sciences, Pharmacy, and Nursing. Communication also participates in interdisciplinary research programs with the Center for Prevention Research, the Sanders-Brown Center for Aging, and a variety of other health-related departments and institutes.

The program is designed to serve the needs of students whose goals may include teaching and academic research, professional research, or communication careers in the media or other organizations. Students with no previous course work in a communication area may be required to take undergraduate work without graduate credit.

Admission Requirements

The following are the admission requirements for individuals applying for admission to the either the Master's program or the Doctoral program in Communication. Students with an undergraduate degree from a fully accredited institution of higher learning and a grade point average of 3.0 on a 4.0 scale are admissible to the graduate program. Students with degrees in areas not directly related to communication are encouraged to apply. They may be required to take 3 to 12 hours of undergraduate course work. In some cases, successful professional experience in a communication field will be considered in admitting students to the program.

All student applicants must submit scores on the Graduate Record Examination. Students whose native language is not English must also submit a score of at least 550 (or 213 on the computer version) of the Test of English as a Foreign Language (TOEFL). Applicants must also submit (1) two official copies of transcripts of all work taken at the college level, (2) at least three letters of recommendation focusing on their academic abilities, (3) a Graduate School application and the application fee, and (4) a two- to three- page biographical sketch indicating why they want to pursue a graduate degree and their reasons for applying to the program.

The Admissions and Financial Aid Committee will review only COMPLETED admission files on February 1 of each year. Applicants must have their completed file on record with the Associate Dean for Graduate Studies in the College of Communication and Information Studies prior to the date on which they wish it to be reviewed. Results of the admissions committee's action will normally be available within 30 days from the date of review.

While applicants are admitted two times each year, new graduate students may enroll only during the fall semester or the summer term prior to the fall semester.

Master of Arts

All students are required to complete 30 credit hours to complete the Master of Arts degree. Students will be required to take 12 core credit hours consisting of Proseminar in Communication (CJT 601), Communication Theory (CJT 651), and Communication Research Methods (CJT 665), plus Statistics 570 (or its equivalent as determined by the Associate Dean for Graduate Studies). In addition, all students will be required to take either CJT 631 or CJT 645.

Students may choose from either the Plan A or Plan B options to complete their Masters degree requirements.

Plan A

Students choosing Plan A (Thesis option) will take a minimum of 24 credit hours of actual course work, plus write a thesis (Note: the six thesis credits must be taken under CJT 768 - Residence
Credit for the Master's degree). All students will also complete an oral examination in defense of the thesis.

**Plan B**

Students choosing Plan B (non-thesis) option, will take a minimum of 30 hours of course work, followed by a written and oral examination over the student's program.

At least 21 credit hours of the minimum requirements for the master's degree must be from offerings within the College of Communications and Information studies (both Plan A and Plan B). Plan A students may include six hours of CJT 768 in the 21 hours, since the thesis involves work in an area of communication. Also, at least 21 credit hours of the minimum requirements must be in courses at the 600 and 700 levels (both Plan A and Plan B). Plan A students may include six hours of CJT 768 in the 21 hours. No more than three credit hours in Plan A and 6 credit hours in Plan B (of the minimum requirements) may be earned in directed study, directed reading, or internship courses (e.g., CJT 696, CJT 700, CJT 781, and CJT 790).

Students without previous course work in communication may be required to take undergraduate work that does not count toward graduate credit. The applicant is expected to have had at least twelve hours of appropriate undergraduate work in communication. Should the graduate faculty believe that there is a deficiency in the applicant's undergraduate work, it may require the deficiency to be removed by enrollment in specific undergraduate courses. Courses taken to remove a deficiency can not be counted towards the master's degree.

Individuals without significant practical experience are strongly encouraged to take CJT 696 - Internship in Communication, which could include opportunities to work with external agencies and funded projects, both within and outside the university.

Emphasizes within the program include communication and information systems, health communication, interpersonal communication, and mass communication.

**Doctor of Philosophy**

The Ph.D. program emphasizes communication as a social science. Graduates are prepared for university positions and careers in government, the media and other organizations as researchers, consultants and policy makers. Students must demonstrate general knowledge of communication, as well as competence in a core area of specialization. Current core areas include communication and information systems, health communication, interpersonal communication, and mass communication.

Students must demonstrate a thorough grasp of communication theory and research methods and must take course work in a cognate area outside of Communication. Proficiency in a foreign language is not required for successful completion of the Ph.D. in Communication. A student’s advisory committee may, however, stipulate certain graduate-level courses in another language for the student's program that are consistent with the objectives of the student's program.

The required first-year curriculum is as follows:

**Fall Semester**

- CJT 751
- CJT 667
- A 500-level or above statistics course

**Spring Semester**

- CJT 631
- CJT 665
- CJT 645

All students are also required to complete at least 3 credit hours of CJT 790 by the last semester of course work.

The Associate Dean for Graduate Studies, in consultation with the Graduate Review committee, can waive any of the above requirements for a student who has previously taken the same or equivalent course at UK or another university for graduate credit.

Each student works with a major professor and an advisory committee to plan course work and complete the dissertation. The committee also administers the qualifying examination and the final oral examination. The qualifying examination consists of a written and oral examination over general communication, the core area of specialization, research methods/statistics and the cognate area.

Standards for admission to the doctoral program are similar to those of the Graduate School, including satisfactory scores on the verbal, quantitative and analytical portions of the Graduate Record Examination (GRE). For additional information about program requirements and opportunities for financial assistance, write to the Associate Dean for Graduate Studies, College of Communications and Information Studies.

GRADUATE DEGREE PROGRAMS

Communication Disorders

The Division of Communication Disorders at the University of Kentucky offers a two-year master’s degree program in speech-language pathology. The Program is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association. Students who complete the program will typically meet the academic and clinical training requirements for the American Speech-Language-Hearing Association’s (ASHA) Certificate of Clinical Competence in Speech-Language Pathology and for licensure in Kentucky and in most states with licensure requirements. Students seeking to fulfill ASHA certification requirements and those desiring certification for school employment should consult the Director of Graduate Studies.

The length of a student’s program depends upon the certification options selected, the student’s educational background, and the number of credits completed each semester. Students with an undergraduate major in communication disorders will typically complete the program in two years of full-time study. Students entering without an undergraduate major in communication disorders will need to apply to the undergraduate program to complete approximately one year of prerequisite undergraduate-content courses before applying for admission to the graduate program. Additional information regarding these prerequisites is available from the Director of Graduate Studies.

During the first full year of the graduate program, students typically complete course work and clinical practicum at the UK Communications Disorders Clinic. During the second year, students may be assigned to clinical externship rotations in a variety of clinical settings, including the Lexington Veterans’ Affairs Medical Center, agencies providing services to children (e.g., public schools, preschools, clinics), and agencies in one of Kentucky’s Area Health Education Centers (AHECs). Successful completion of a comprehensive examination or thesis is required for all degree candidates.

Admission Requirements

Students who are admitted to the Program typically have at least a 3.0 undergraduate GPA. To be considered for admission, students must submit Graduate Record Examination scores (verbal, quantitative and analytical). Students are only considered for admission into the master’s program in Communication Disorders for the summer term. Admissions are competitive, so interested students must apply by February 1 for summer admission.

Certification Requirements

If a student wishes to receive the M.S. degree and also wishes to fulfill the American-Speech-Language-Hearing Association certification requirements, the student will be required to complete:

- 33 semester hours of didactic coursework in Communication Disorders
- 3 semester hours of clinical orientation (CD 654)
- 2 semester hours of clinical practicum supervised by UK CD Faculty (CD 657)
- 3 semester hours of Graduate level electives
- 21-30 semester hours of clinical rotations (CD 659)
- A thesis option or pass comprehensive examinations

Computer Science

The Department of Computer Science offers programs of study leading to the Master of Science and Doctor of Philosophy degrees. Admission to these programs is highly competitive and based upon academic record, GRE scores, and letters of recommendation. It is strongly suggested that applicants present evidence of mathematical maturity as well as competence in computer science. Full details of the requirements for degree programs are available from the department upon request.

Since very few specific courses are required for the graduate degree programs, all candidates in the M.S. program are expected to demonstrate proficiency in the fundamental areas of computer science by taking four core courses in specific areas. Participation in departmental seminars is also required.

Both thesis (Plan A) and non-thesis (Plan B) options are available in the program leading to the Master of Science degree. A project is required of non-thesis candidates. No language requirement (other than proficiency in English) is mandated.

The doctoral program in Computer Science is a research degree granted primarily on the demonstration of substantial research achievement. To be admitted to candidacy for this degree, candidates must satisfy the requirements of the Graduate School and pass the qualifying examination. This examination consists of written and oral sections covering breadth in computer science as well as depth in a specific area.

Areas of research actively pursued by faculty and students within the department include: artificial intelligence, numerical methods, operating systems, distributed computing and networking, theory of computation, database technology, design and analysis of algorithms, cryptography, graphics and vision, parallel processing, and software engineering. Courses in these and other areas are available to permit students to complete studies of sufficient breadth and depth prior to engaging in independent research.

Admission Requirements

The admission decision is made by the High Degree Committee based on the overall application file consisting of GRE scores, TOEFL scores (for international students), GPA, grades in CS and Math courses, background in computer science, letters of recommendation, and statement of purpose.

Students admitted to the doctoral program in Computer Science who have already been awarded a master’s degree in Computer Science from another institution are not eligible to receive a master’s degree in Computer Science from the University of Kentucky. Exceptions to this policy must be approved by the Dean of the Graduate School upon petition by the Director of Graduate Studies.

Crop Science

The interdepartmental graduate program in Crop Science offers graduate work leading to the Master of Science and Doctor of Philosophy degrees with areas in plant breeding and genetics, crop physiology and management, turf science, cellular and molecular genetics, seed science and technology, and weed science. Faculty are from the Departments of Agronomy, Forestry, and Horticulture in the College of Agriculture.

Admission Requirements

All students with strong training in science, including but not limited to baccalaureate degrees in biology, chemistry, agronomy and horticulture are encouraged to apply. An undergraduate grade point average of at least 3.0 is generally required, and all applicants must take the Graduate Record Examination. Foreign students should submit scores from the Test of English as a Foreign Language. Official copies of transcripts, GRE scores, and TOEFL scores should be sent directly to the Graduate School. To be considered for departmental research assistantships, which are awarded on a competitive basis, three letters of recommendation should be sent to the Director of Graduate Studies.

In order that all entering Ph.D. students are at an academic level to successfully complete course requirements, the following courses or their equivalent should have been completed prior to admission:

- MA 113 – first semester course in calculus
- PHY 201 – first semester course in physics
- CHE 230 – first semester course in organic chemistry

Students are expected to make up any deficiencies in these courses within one year of enrollment.

Degree Requirements

For the M.S. degree, 24 hours of course work plus an acceptable thesis are required (Plan A). Work leading to advanced degrees must conform to the general rules and regulations of the Graduate School. Crop Science faculty also participate in the interdepartmental Plant and Soil Science graduate program which offers programs of study leading to the Master of Science degree.

Individual programs are developed to include a strong course work component and a meaningful research experience. A strong undergraduate background in the agricultural and biological sciences is required for all degree candidates.

Curriculum and Instruction

The Department of Curriculum and Instruction offers a wide range of graduate programs leading to the Master of Arts in Education, Master of Science in Education (Plan A or Plan B available), and Doctor of Education degrees. These programs are designed to prepare specialists for a variety of roles in curriculum and instruction including teaching, supervising, and coordinating subject matter areas at the elementary, middle school, senior high, and junior college levels. The doctoral programs prepare leaders for public schools, universities, and other educational agencies. Specialization is available in several graduate areas.

**Doctor of Education**

In cooperation with the Department of Administration and Supervision, the department offers a program leading to the Doctor of Education (Ed.D.) degree in Instruction and Administration. Course work for the Ed.D. in Instruction and Administration, Curriculum and Instruction option, will consist of a minimum of 42 graduate credits beyond the master's degree planned by the major professor and advisory committee based on the student's background, needs and goals. All course work plans will include work in the following:

- a. Curriculum and Instruction,
- b. Support work in education,
- c. Research tool courses (minimum of 9 semester hours required), and
- d. Support work outside of education.

Admission Requirements

In addition to the admission requirements set by the Graduate School, departmental requirements include a statement of professional goals, an autobiographical sketch, professional writing samples, and four letters of professional reference. Interviews are frequently requested.

For more information about the program, consult the Director of Graduate Studies.

**Master of Arts in Education**

(Secondary Education Option)

For a Master of Arts in Education, a minimum of 30 credit hours is required including 18 credit hours of professional education and 12 credit hours outside the College of Education related to the student's teaching certificate content area. Consult the Director of Graduate Studies for specific recommendations within this broad framework. The program qualifies teachers for a Rank II Certificate.
Admission Requirements

In addition to the admission requirements set by the Graduate School, departmental requirements for admission include initial teacher certification in elementary education and three letters of professional reference.

Master of Arts in Education and
Master of Science in Education
(Middle Grades Education)

The Master of Arts in Education/Master of Science in Education degree in Middle School Education is a 30-hour program leading to Rank II certification in Middle School. Students complete a minimum of 12 hours in the department, 6 hours in other areas of education, and 12 hours outside the college in an area appropriate to the teaching specialization. Students completing this subject-area course work in mathematics or science are eligible for the Master of Science in Education degree. Consult the Director of Graduate Studies for more detailed information regarding this program.

Admission Requirements

In addition to the admission requirements set by the Graduate School, departmental requirements for admission include initial teacher certification in middle grades education and three letters of professional reference.

Master of Arts in Education
(Advanced Certification in Secondary Education Option)

For a Master of Arts in Education, a minimum of 30 credit hours are required including 18 credit hours of professional education and 12 credit hours outside the College of Education related to the student's content teaching certificate area. Consult the Director of Graduate Studies for specific recommendations within this broad framework. The program qualifies teachers for a Rank II teaching certificate. Students completing subject area course work in mathematics or science are eligible for the Master of Science in Education degree. Consult the Director of Graduate Studies for more detailed information regarding this program.

Admission Requirements

In addition to the admission requirements set by the Graduate School, departmental requirements for admission include initial teacher certification in secondary education and three letters of professional reference.

Master of Arts in Education
(Initial Certification Option - Secondary Education)

This program is designed for students with a completed bachelor's degree in a content field. If it is a University of Kentucky degree, the degree must be in one of the following areas: business (or related field with a business minor), English, a foreign language, history, mathematics, a science, a social science, or in secondary education. Students having a bachelor's degree listed above from another institution are also eligible. Students not having a degree in one of the above areas may be required to complete additional course work. A departmental requirement is recommendation to a Teacher Education Program. That process involves compliance with admission requirements of the Kentucky Education Professional Standards Board.

Students meet state initial certification requirements while completing degree requirements. A minimum of 6 semester hours of graduate work must be completed outside the College of Education in the teaching specialty area. Depending upon the student's background, one may need to complete undergraduate deficiencies to meet degree and certification requirements.

Consult the Director of Graduate Studies for specific information regarding degree requirements.

Master of Science in Education
/Instructional Systems Design Option

The Instructional Systems Design area offers a 36-hour program designed for individuals who wish to develop their knowledge and skills in planning and designing instruction. Persons choosing this area are frequently preparing for instructional systems design responsibilities in business and industry, government, education, and various training organizations.

This program does not require or lead to initial teacher certification. However, previously certified teachers can use the program to advance the rank of their teaching certificates.

Both a thesis option (Plan A, requiring 30 hours of course work and 6 hours of thesis credit) and a non-thesis option (Plan B, requiring 36 hours of course work) are offered. All students are required to complete an 18-hour common core including nine semester hours in the Department of Curriculum and Instruction. At least 6 hours must be taken outside the College of Education. An additional 12 credit hours of electives are required for the non-thesis option. The thesis option includes 6 credit hours of electives and 6 credit hours of thesis credit. Specific programs are planned with a faculty advisor subject to the approval of the Director of Graduate Studies.

Admission Requirements

For applicants who are not seeking advanced rank teaching certifications, in addition to the admission requirements set by the Graduate School, there is a departmental requirement of three references. For applicants who will pursue advanced teaching certificates, departmental requirements include initial teacher certification and three letters of professional reference.

Master of Arts in Education
(Reading)

Candidates for a Master of Arts in Education with Reading as an area of concentration must meet the specifications for a Master of Arts in Education, Plan B. The curriculum includes a minimum of 33 credit hours according to the following distribution:

a. A minimum of 18 credit hours in graduate level reading courses to include EDC 619, EDC 620, EDC 642, or EDC 641. An additional 6 credit hours are selected with the approval of an advisor.
b. Six to nine credit hours in the College of Education, selected to extend the humanistic, behavioral, multi-cultural and research components of the program, based on the student's educational background, with advisor approval.
c. Six to nine semester hours credit selected from appropriate support areas outside the College of Education, with advisor approval.

Completion of the Master of Arts in Education with Reading as an area of concentration will fulfill the academic requirements for certification as a reading specialist.
Admission Requirements

In addition to the admission requirements set by the Graduate School, departmental requirements for admission include initial teacher certification, a minimum of three years of successful classroom teaching, and three letters of professional reference. A minimum of three years of successful classroom teaching is an additional requirement for this certification.

Dentistry

The goal of the Master of Science degree program is to produce graduates who are clinically adept, well-grounded in research and the biological basis of their specialties, and prepared to function at a high level of accomplishment in specialty practice and academic dentistry.

The program is interdisciplinary. Faculty are drawn from the College of Dentistry clinical and graduate faculty, and from departments throughout the Medical Center and the Lexington Campus.

Only dental graduates of high academic standing will be accepted into this program, which requires three years of didactic, clinical, and research training. All of these elements are integrated throughout the program. All students receive teaching experience in anticipation of full- or part-time academic involvement after graduation.

Admission Requirements

Students pursuing specialty training in orthodontics, periodontics, and orofacial pain are eligible for the Master of Science degree. Successful completion of the degree is prerequisite to the awarding of a specialty certificate.

Applicants must have a D.M.D./D.D.S. degree from an accredited United States or Canadian dental school or equivalent. Admission to the Master of Science Program is very competitive and is based on academic performance in dental school, professional recommendations, performance on the National Board Dental Examination Parts I and II, Graduate Record Examination (GRE), and a personal interview. Applicants who are not native English speakers must score at least 560 (paper) or 220 (computer) on the Test of English as a Foreign Language (TOEFL).

Degree Requirements

Requirements for the Master of Science degree in Dentistry are:
1) satisfactory completion of program requirements; 2) 24 hours graduate credit, at least half of which must be from a “core” curriculum; 3) submission of an acceptable thesis based on an individual research project (Plan A); and 4) passage of a comprehensive oral examination and thesis defense. Foreign language credit is not required.

Diplomacy and International Commerce

The Patterson School of Diplomacy and International Commerce offers an interdisciplinary master's degree and serves in an advisory capacity with respect to the Ph.D. programs in international studies within the several departments historically associated with the Patterson School. These include most of the social science departments in the College of Arts and Sciences (especially History and Political Science), and most of the departments in the College of Business and Economics (especially Economics, Finance, Management, and Marketing), plus a few others elsewhere on campus such as Agricultural (Development) Economics, and Communications.

The M.A. degree program can be tailored with considerable flexibility to meet the career needs of any particular student. Plan A (thesis) and Plan B (non-thesis) options are available. This program is especially useful for the student desiring a career in any of the non-academic fields in foreign affairs, such as international banking, international commerce, international journalism (foreign correspondent), or service with governmental agencies (such as the U.S. Department of State) or international organizations (such as the United Nations) in foreign affairs.

At least half of the 30-hour minimum for the M.A. degree must ordinarily be in one of the departments historically associated with the Patterson School. Each student is expected to take a methodology course in accounting or statistics at the graduate level. Most students will need three semesters to complete the 30 minimum hours for the M.A. degree. However, some students elect to remain for four semesters, going well beyond the 30-hour minimum, in order to obtain more breadth and/or depth in their desired fields of professional preparation. Students are strongly encouraged to secure a career-related internship supported by the Patterson School's assistance. This internship will typically be scheduled in the summer between the first and second academic years in residence, but there is enough flexibility for it to occur at other times and in some cases to extend beyond the normal ten-week limit.

To assure the interdisciplinary character of the degree, the M.A. candidate is expected to take 12 to 15 hours distributed in at least two departments outside the major departmental concentration. Courses acceptable to the program include those dealing with interstate and cultural relations, foreign policy, national and regional development processes, and others related to the student's career goals as approved by the School. Course work may be concentrated in a specific geographical area such as Latin America, Asia, or Europe, or more broadly focused in certain topical or functional aspects of international affairs.

The student must pass a written and an oral examination covering work in three subfields of study, with these subfields to be defined for the student in consultation with the Patterson School's Director of Graduate Studies.

The M.A. degree offered by the Patterson School matches up well with other graduate and professional programs such as law, for those students who might desire extended postgraduate career preparation. However, the Patterson School M.A. degree does not match up well with a doctoral degree. Students who contemplate obtaining a Ph.D. are advised to proceed directly toward that goal.

A number of non-service Patterson School fellowships are available from the bequest of James K. Patterson, the first President of the University.

Admission Requirements

Application forms for admission and for fellowship assistance are available electronically at <www.uky.edu/rgs/patterson/> or may be requested by calling the Patterson School. GRE scores and official transcripts from each college or university attended are required by the Graduate School as part of the application procedure. In addition, each applicant is required to submit a brief statement (two or three pages, at most) explaining their special interest in the Patterson School program in terms of career goals, along with two academic letters of reference and two letters of character or employment reference to be mailed directly to the Director of the Patterson School. In addition, the Patterson School M.A. candidate must meet the Graduate School requirement for a reading knowledge of a modern foreign language in order to graduate.

Economics

Admission Requirements

Any student who is a graduate of a fully accredited institution of higher learning is eligible to apply for admission to the graduate program in economics. The final decision on matters of admission is made by the Graduate Studies Committee of the Department of Economics and is based on the student's academic

GRADUATE DEGREE PROGRAMS / 71
profile and prospects for successful completion of the curriculum.

Minimum admission requirements are an undergraduate grade point average of 2.75, a graduate grade point average of 3.0, if applicable, and a minimum combined score of 1000 on the verbal and quantitative sections of the GRE general test. However, meeting the minimum requirements does not guarantee admission.

After completing the application requirements for the Graduate School, prospective graduate students should also submit the following materials directly to the Director of Graduate Studies of the Economics Department:

1. A resume
2. A one-to-two page personal essay about why you want to attend graduate school in economics
3. Two or three confidential letters of recommendation

Along with the other application materials, the information in these items will be considered by the Economics Department in its admission and financial aid decisions.

Master of Science

Objectives

The M.S. in Economics is primarily for students who wish to have flexibility in a program of advanced study in economics. This degree program provides preparation for employment as an undergraduate teacher of economics in community colleges and as a researcher for government, business, and other organizations. The program can be structured to prepare a student for further graduate work in economics and related fields, but it is also suitable for students with strong interdisciplinary interests.

Degree Requirements

The recommended minimum prerequisite undergraduate preparation includes 6 hours of intermediate theory, 6 hours of statistics, and 6 hours of calculus. These can be taken in the program as additional work.

Requirements for the M.S. in economics are:

1. A minimum of 30 hours of graduate credit courses.
   a. The student must satisfactorily complete the following courses:
      ECO 590 Introduction to Quantitative Economics I
      ECO 601 Advanced Microeconomic Theory
      ECO 602 Macroeconomic Theory
      ECO 603 Research Methods and Procedures
      ECO 703 Introduction to Econometrics I
   The student must also satisfactorily complete either:
      ECO 701 Neoclassical Microeconomic Theory
      or
      ECO 702 Advanced Macroeconomic Theory
   and one course in an elective area of the Ph.D. program.
   b. courses taken outside of the Department of Economics must be approved by the Director of Graduate Studies to count toward the 30 hour requirement.
   2. Successful completion of a final examination.

3. Minimum average of grade B (a GPA of 3.0) in all courses attempted for graduate credit after being admitted to Graduate School. Students obtaining six quality points below a B average will be dropped by the department.

Doctor of Philosophy

Objectives

The Ph.D. program is structured to enable the graduate to contribute to the advancement of economics. The program is also aimed at producing graduates who are qualified to teach, as well as engage in private sector and governmental research and consulting.

To attain these objectives, the program is designed to provide the student with the appropriate knowledge, understanding, skills and abilities, including:

1. An understanding of economic theory.
2. Skill in the use of quantitative techniques, specifically mathematics and statistics.
3. Specialization in a limited number of areas.
4. A knowledge of the broad social and political background of the economic environment.
5. Experience in the development of research projects throughout their entire program.
6. Research and writing skills that would lead to the publication of original research.
7. Competence in communicating economic knowledge to broad and diverse audiences.

Degree Requirements

The recommended minimum undergraduate preparation includes 6 hours of intermediate economic theory, 6 hours of statistics, and 6 hours of calculus.

Work for the degree of Doctor of Philosophy in Economics must conform to the general requirements of the Graduate School. The requirements for the degree are:

1. Economic Theory. The student must demonstrate competence in economic theory as demonstrated by passing a departmental written examination in economic theory. This examination will be given twice a year, at the beginning of the spring semester and the eight-week summer session. Students failing the examination will be given a second attempt; those failing on the second attempt will be dropped from the program.
   Minimum preparation for the written examination in economic theory can be achieved by taking the following core courses:
   ECO 601 Advanced Microeconomic Theory
   ECO 602 Macroeconomic Theory
   ECO 701 Neoclassical Microeconomic Theory
   ECO 702 Advanced Macroeconomic Theory
   In addition the student must satisfactorily complete ECO 704.

2. Statistics/Econometrics. The student must demonstrate competence in the area of statistics and econometrics. This competence may be demonstrated by satisfactory performance in the following courses:
   STA 424G Probability and Distribution Theory
   or
   ECO 603 Research Methods and Procedures
3. Elective Areas. All Ph.D. students must choose two fields of study approved by the student’s Advisory Committee. The two fields may be chosen from the following:

- Environmental/Health Economics
- International Economics
- Labor Economics
- Monetary Economics
- Public Economics

Minimum course preparation for each field shall consist of at least two courses as determined by the student’s Advisory Committee. In addition to the two chosen fields, the student is encouraged to take elective courses in other areas of economics, such as econometrics or economic theory, or in other disciplines such as Agricultural Economics, Finance, Marketing, Management, Mathematics, or Public Administration.

4. Supporting Work. At least nine hours of supporting course work must be selected. These courses must be approved by the student’s Advisory Committee. This supporting work will allow the student to pursue more intensive study of one or both of the two chosen fields, or to pursue courses in other fields of economics. The supporting work cannot consist of 400 or 500 level courses, ECO 610 or ECO 611, ECO 652, or any of the core courses in economic theory (ECO 601, ECO 602, ECO 701, ECO 702, ECO 704, ECO 705) or econometrics (ECO 603, ECO 703, ECO 706).

5. Grades. Minimum average of grade B in all courses attempted for graduate credit after being admitted to the Graduate School. Students obtaining six quality points below a B average will automatically be dropped by the department.

6. Qualifying Examinations.
   a. Written Examination: The written examination must be taken in the student’s two elective fields as part of the requirements for candidacy for the Ph.D. degree. This examination is given twice a year, at the beginning of the spring semester and at the beginning of the eight-week summer session. The written examination is prepared and graded by specialists in the respective fields. In the event that the student fails one or both parts of the examination, the student’s Advisory Committee determines the conditions which must be met before another examination is given. The minimum time between examinations is four months. Two failures to pass the written examination constitute failure of the qualifying examination.
   b. Oral Examination: After passing the written qualifying examination, the Director of Graduate Studies will, on the advice of the Advisory Committee, schedule through the Graduate School an oral examination which will be administered by the Advisory Committee. The examination will ordinarily consist of the presentation and defense of a dissertation proposal.

7. The Ph.D. Dissertation. The dissertation will be based on original research on a significant topic. The dissertation will be defended in an oral examination.

Educational and Counseling Psychology

The Department of Educational and Counseling Psychology offers programs leading to the following degrees: Master of Science in Education (Plans A and B available), the Specialist in Education (Ed.S.), and the Doctor of Philosophy (Ph.D.). Applications to the Master of Arts in Education and the Doctor of Education (Ed.D.) degrees are no longer accepted. Students must apply for admission to both the Graduate School and to the Department. Doctoral applications must be completed by January 15 for summer/fall admission. All other degree applications are considered shortly after March 1.

Within the degree programs offered, there are three specializations possible: counseling psychology, educational psychology, and school psychology. Specializations are designed to provide students with both a background in behavioral and humanistic components of human learning and behavior, and the competencies to practice the skills designated for these programs. Admission to candidacy in any of these programs
includes not only demonstrated skills in the academic area, but a judgment by the faculty of the program that the candidate demonstrates the personal and social characteristics as well as the professional commitment and ethical standards requisite for providing the services and demonstrating the skills associated with the program and the advanced degree.

For further information on specific program guidelines, contact the Director of Graduate Studies in the Department of Educational and Counseling Psychology.

**Master of Science in Education**

The Master of Science in Education degree is offered by the Department for individuals who will not meet state certification requirements in counseling or school psychology immediately upon completion. Individuals who are interested in specializing in educational psychology, human development, measurement, or research in education may obtain this degree. The educational psychology program, planned in consultation with an adviser, is flexible and tailored to individual needs. It consists of 36 hours of course work (including a 3-hour paper) or 30 hours of course work plus a 6-hour thesis. The work completed for this degree with an emphasis in either counseling or school psychology is applicable toward certification in either counseling or school psychology, respectively, but does not fulfill state certification requirements. The counseling program prerequisites include psychological testing and abnormal psychology.

**Admission Requirements**

Applicants to the M.S. Ed. Degree program leading to certification in school psychology must possess an undergraduate degree in psychology, education, or a closely allied field (e.g., rehabilitation counseling or pediatric nursing). Students are selected for this program based on their undergraduate grade point average, Graduate Record Examination scores, letters of recommendation, a personal statement describing their selection of a career in school psychology, a writing sample, and a personal interview. These data provide information regarding student diversity, interests, and prior academic accomplishments in relation to program goals. The program faculty use the Graduate School minimum requirements for undergraduate grade point average and Graduate Record Examination scores for admissions eligibility.

**Specialist in Education**

The Educational Specialist degree is offered in the areas of educational psychology, counseling psychology, and school psychology. Programs follow the general guidelines of the College of Education as specified earlier (see Advanced Degrees section of this Bulletin). The program includes the Master of Science in Education degree program plus a full-time one-semester internship and additional course work. This program leads to permission to sit for the State Board of Psychology Certification Examination in Counseling Psychology. The requirements for the State Board of Education certification in School Psychology include the work for the Master of Science in Education degree plus the additional Educational Specialist degree requirements.

**Admission Requirements**

Applicants to the Ed. S. degree program leading to certification in school psychology must possess a masters degree in psychology, education or a closely allied field (e.g., rehabilitation counseling or pediatric nursing). Students who did not complete the M.S. Ed. program in school psychology will likely need to complete additional requirements to replace required course work from the M.S. Ed. program. Students are selected for the Ed.S. program based on their undergraduate and prior graduate grade point average, Graduate Record Examination scores, letters of recommendation, a personal statement describing their selection of a career in school psychology, a writing sample, and a personal interview. These data provide information regarding student diversity, interests, and prior academic accomplishments in relation to program goals. The program faculty use the Graduate School minimum requirements for undergraduate and graduate grade point average, and Graduate Record Examination scores for admissions eligibility.

**Doctor of Philosophy**

The Ph.D. program is offered in the specialty areas of counseling psychology, educational psychology and school psychology under one departmental program. The Doctor of Philosophy programs in Counseling Psychology and in School Psychology are accredited by the American Psychological Association through its Office of Program Consultation and Accreditation (750 First Street, NE, Washington, DC 20002-4242, phone: 202-336-5500). A full-time, supervised one-year internship is required for both areas.

Various concentrations are possible within the Ph.D. program. Representative of these are: 1) learning, cognition, and curriculum design; 2) human development and social processes; 3) counseling psychology; 4) measurement, evaluation and research design; and 5) school psychology.

**Admission Requirements**

Applicants to the Ph.D. Degree program in school psychology must possess an undergraduate degree in psychology, education or a closely allied field (e.g., rehabilitation counseling or pediatric nursing). Students with prior graduate work at the masters or specialist degree will also be considered for admission to advanced graduate status. Students are selected for this program based on their undergraduate and prior graduate grade point average, Graduate Record Examination scores, letters of recommendation, a personal statement describing their selection of a career in school psychology, a writing sample, and a personal interview. These data provide information regarding student diversity, interests, and prior academic accomplishments in relation to program goals. The program faculty use the Graduate School minimum requirements for undergraduate grade point average, and Graduate Record Examination scores for admissions eligibility.

- EDP 606 PROFESSIONAL ISSUES IN COUNSELING PSYCHOLOGY ...... (3)
- EDP 610 THEORIES OF LEARNING IN EDUCATION .......................... (3)
The Department’s faculty represents a wide spectrum of intellectual orientations, professional commitments, and experience. No less importantly, an uncommon degree of respect for both the difficulties and the necessities of interdisciplinary conversation prevails. These factors, together with flexibility in program planning at the course work stage (which includes opportunities for independent study, affiliations with faculty from other departments in the College and the University, as well as extramural internships), help to create an environment congenial to students with a variety of backgrounds and future goals. Some of the Department’s graduates pursue traditional academic careers as faculty members or administrators. Others serve as policy analysts or evaluation specialists in school systems, state departments of education, or in other arenas outside the university.

**Degree Programs**

**Master of Science in Education**

**M.S. in Education**

The master’s degree is available for those who wish to explore topics in educational policy and evaluation for the first time, or to enhance what understanding they may already possess through direct experience a a teachers or as members of an administrative staff. For some it serves as a terminal degree; others use it to lay the foundation for doctoral study.

**Admission Requirements**

Admission requires a minimum grade point average of 2.75 in all undergraduate course work, a 3.0 GPA for any previous graduate work, as well as satisfactory completion of the Graduate Record Examination (GRE). A minimum total of 31 credit hours including the Proseminar (EPE 601) are required to complete the degree. No less than 19 hours of the total required must be taken within Educational Policy Studies. Planning in conjunction with an advisory committee, students choose a suitable array of courses from among the department’s four areas of concentration, and then round out their programs with some appropriate support work from other departments within the College or the University.

**Doctor of Education (Ed.D.)**

The Ed.D. program in Educational Policy Studies and Evaluation provides advanced study for those who seek careers in the administration or evaluation of educational programs in schools, colleges, or other institutional settings. The program is also ideally suited for those who wish to develop the scholarly competence needed to serve as faculty members in colleges of education.

**Admission Requirements**

Admission to the program requires a master’s degree (or thirty graduate credits applicable to an appropriate master’s degree) and satisfactory completion of the Graduate Record Examination (GRE). Course work is planned by the student’s advisory committee based on their assessment of his or her background and goals. All programs include the Proseminar (EPE 601) and course work chosen from the department’s four general areas of concentration as well as support work in related fields within or outside the College of Education. Although some students’

---

**Educational Policy Studies and Evaluation**

The Department of Educational Policy Studies and Evaluation provides a unique opportunity for students who wish to develop the knowledge, judgment, and research skill required to address educational issues with flexibility and imagination. Although methodological finesse is prized within the department, degree programs do not emphasize ‘methods’ per se. The premium is placed on understanding questions of policy within the broader, often overlapping contexts in which they arise. Every effort is made to face the issues in ways which credit rather than ignore those contexts and their subtlety.

There are four broad areas of concentration, Higher Education focuses upon research concerning higher education policies, programs, and services. History and Philosophy of Education treats educational issues, problems, ideas, and institutions, using the tools of historical inquiry and philosophical analysis. The Socio-Cultural Study of Education provides sociological, anthropological, and comparative international perspectives. Evaluation focuses upon the relationships among ethics and education, policy analysis, and the development of evaluation systems for educational policies and programs.

---

**GRADUATE DEGREE PROGRAMS / 75**
programs may require competency in a foreign language, there is no general foreign language requirement.

Doctor of Philosophy (Ph.D.)
Studies in Higher Education

The degree of Doctor of Philosophy represents the same level of attainment as the Doctor of Education. Graduate students are held to a uniformly high standard of intellectual accomplishment at both the course work and dissertation stages, no matter what degree option they may pursue. Unlike the Ed.D. program, however, where students are free to choose the topic of research, the department's Ph.D. requires intensive research on some aspect of higher education. After taking the Proseminar, the student selects an area of concentration in either the history and philosophy of higher education, the socio-cultural study of higher education, or research and evaluation in higher education. Admission Requirements

The requirements for admission are a minimum of 24 hours of graduate work (a master's degree in a discipline outside of Education is preferred) and satisfactory scores on the Graduate Record Examination (GRE).

Cooperative Doctoral Program

The department participates in the Cooperative Ed.D. program with regional universities. These programs permit qualified applicants to complete one year of graduate study beyond the master's degree at the regional institution. The remainder of the academic program must be completed at the University of Kentucky. The work of each student is directed by a committee composed of faculty from the two institutions.

Electrical Engineering

The Department of Electrical and Computer Engineering offers advanced studies leading to either a Master of Science in Electrical Engineering or a Doctor of Philosophy in Electrical Engineering.

Admission Requirements

A minimum grade point average of 3.0/4.0 on all undergraduate work is required for admission to the graduate program. A minimum GRE general test score of 1100 (combination of verbal and quantitative sections) must be obtained. Meeting the minimum requirements does not guarantee admission will be granted. Acceptance is based upon a competitive evaluation and on a space-available basis. An undergraduate degree in electrical engineering is preferred. Those applicants without a B.S.E.E. degree from an ABET accredited EE program should develop competence and demonstrate ability in the fundamentals of electrical engineering. Such students, before being admitted to full graduate standing within the department, must take (or have taken an equivalent of) a set of prescribed electrical engineering remedial courses. A minimum grade of C must be made in these courses.

Degree Requirements

For the M.S.E.E. degree, both the thesis and non-thesis options are available. The thesis option requires 24 hours of acceptable graduate level work plus the satisfying of the usual requirements for the thesis. The non-thesis option, Plan B, requires 30 hours of acceptable graduate work plus an additional three hours of EE 784, the special problems project. All students in their first semester of regular graduate work must select an academic advisor who will assist the student in formulating a graduate plan of study leading to their particular degree. This plan, which must receive the approval of the Director of Graduate Studies, must contain specific courses and a proposed thesis area or specialized project topic.

In order to assure a minimum breadth and level of understanding at the graduate level, all EE graduate students must take three of five specified courses from the major areas of electrical engineering. These courses are: EE 611 Deterministic Systems, EE 621 Electromagnetic Systems, EE 640 Sto-
The Department of Electrical and Computer Engineering has active research programs in the following areas: electric machines and drives, power electronics, computer engineering, power systems, control systems, electromagnetic compatibility, electromagnetic field theory, signal processing, communication systems, circuit theory, and solid state electronics. Departmental laboratories are well-equipped for students’ research. In addition, the Center for Robotics and Manufacturing Systems at the University of Kentucky provides additional research opportunities in the area of robotics and manufacturing systems.

---

**Engineering**

The College of Engineering offers a multidisciplinary Master of Engineering degree. This graduate program is intended to serve the educational needs of engineers from accredited baccalaureate programs employed by Kentucky industries, consulting firms, and government agencies. The degree is offered in its entirety through off-campus modes of delivery, predominantly via Interactive Television (ITV), to sites at cooperating comprehensive universities, community colleges, independent colleges, and other institutions throughout the Commonwealth. The program is not offered outside Kentucky and is not suitable for on-campus, degree-seeking students.

The courses are also available to students in post-baccalaureate status who wish to enhance their knowledge and skills in a specific area, but who are not pursuing an advanced degree. The five program areas of concentration are: 1) environmental engineering, 2) manufacturing systems design, 3) advanced processing systems, 4) electronics and process control, and 5) mining engineering.

**Admission Requirements**

Before enrolling in an extended-campus engineering course, applicants must gain admission (regular, provisional, or post-baccalaureate) to the University of Kentucky Graduate School. United States citizens or U.S. permanent residents must complete the following admission requirements:

- Submit a completed application for admission to the UK Graduate School. Distance Learning Programs will coordinate the process for Distance Learning students.
- Obtain a bachelor’s degree in an engineering discipline from an ABET-accredited institution.
- Present a minimum undergraduate grade point average on
all undergraduate course work of 2.75 based on a 4.0 scale.

• Send two official transcripts from each college or university previously attended.
• Submit a minimum score of 1000 on the combined verbal and quantitative sections of the Graduate Record Examination (must be satisfied before completing 9 credit hours of graduate work).
• Pay the required Graduate School application fee for domestic applicants.

Degree Requirements

The Master of Engineering degree requires 30 credit hours of course work. Students who enroll in the program will develop an individualized program which has an 18 credit hour area of concentration. The area of concentration will be multidisciplinary and will correspond to the student’s career objectives. The remaining 12 credit hours will be in supporting electives, drawn from Engineering, Business and Economics, Mathematics, or other areas. At least one-half of the courses must be at the 600 level or above. Each student will have a major professor who, with two or more additional faculty, will constitute the student’s advisory committee. This Committee will review and approve the student’s proposed individualized plan of study and will administer the student’s final exam (on campus).

Students may utilize any graduate course offered by UK or by other recognized graduate degree-granting institutions, providing these graduate courses meet the program requirements, are approved by the student’s committee, and are taken in graduate status. Transfer of credit for courses taken from other institutions or for courses taken in another degree program or as a post-baccalaureate student is limited to 9 credit hours.

For copies of sample individualized curricula in the program’s five areas of concentration or for current information on course offerings and sequencing, contact:

G R A D U A T E  C O U R S E S

English

The Department of English offers programs leading to the M.A. and to the Ph.D. degrees. The master’s degree may be obtained either by Plan A or Plan B, as defined in this Bulletin. Special areas of concentration for Plan A are Linguistics, Film, and Teaching English as a Second Language (TESL), but require half their programs to be in literature. M.A. courses are to be chosen from both British and American literature. A reading knowledge of one foreign language is required, as is a final oral examination based on a reading list.

The Ph.D. course requirements include a minimum of 24 hours, four seminars taken at the University of Kentucky, and coverage of the periods of British and American literature. The qualifying examination is both written and oral. The written examinations are based on reading lists drawn up by the student in consultation with the Advisory Committee; one will address a broadly defined historical period, the other, a genre, mode, or topic explored through a range of cultural and historical settings. The oral examination focuses on the dissertation prospectus, topic, and context. Ph.D. candidates are required to have a reading knowledge of at least one foreign language. Specific language(s) required and degree of proficiency expected, if beyond Graduate School requirements, will be established by the student’s Advisory Committee. There is no specific requirement in a minor area, but such work may be required by a student’s Advisory Committee if it appears essential to the major research or concentration interest.

Admission Requirements

Admission to both programs is based on course grades, GRE scores, three letters of recommendation, a brief (1-2 pages) statement of purpose and an analytical writing sample, preferably a critical essay. While each applicant is judged on his or her merits, normal expectations are an undergraduate GPA of 3.0 or above, a graduate GPA of 3.5 or above, and scores of at least 70-80% on two of the three sections of the GRE Aptitude test. (We do not require the subject test.) Students who receive their master’s degree from the University of Kentucky will be evaluated by their examining committee, so they need not submit letters of recommendation or a writing sample. Applicants for the master’s program who do not have the equivalent of a University of Kentucky major in English may be asked to complete some advanced undergraduate work in English in addition to the courses normally required for the M.A. Applicants to the doctoral program who do not have an M.A. in English may be asked to complete additional courses beyond the minimum of 24 hours for the PhD. Applicants with teaching experience must submit a teaching portfolio. The deadline for applications for assistantships and fellowships is January 15th.

All applicants must also fulfill the admission requirements of the Graduate School.

A detailed and current statement of requirements for both the M.A. and Ph.D. is available on request from the Director of Graduate Studies in English.

Entomology

The Department of Entomology offers graduate work leading to the Master of Science and the Doctor of Philosophy degrees. Individual graduate programs are planned by students in consultation with their advisor and the Director of Graduate Studies. Study and research are available in various areas of entomology including applied entomology, behavior, biological control, host plant resistance, insect biology, ecology, genetics, molecular biology, immature insects, medical and veterinary entomology, biochemistry, physiology, taxonomy, araneology, and acarology. Plans A and B are offered for the master’s degree.

Admission Requirements

Admission to the Graduate program in Entomology is based on the recommendation of the Entomology Graduate Program Committee. Minimum admission requirements include an overall undergraduate grade point average of 3.0 and an overall graduate grade point average of 3.25. Applicants whose native language is English must score at least 1050 on the combined verbal and quantitative portions of the Graduate Record Examination (GRE) general test. Those whose native language is not English must have a Test of English as a Foreign Language (TOEFL) with a minimum paper score of 550 or a computer score of 213 (the computer score will be converted to a paper score). They must also have a combined score of 550 on the analytical portion of the GRE. The Program requires three letters of recommendation. Meeting the minimum requirements does not guarantee admission. These minimal requirements may be waived in exceptional cases if sufficient additional evidence is presented regarding the ability of the students to do graduate work. Admission to the Graduate Program in Entomology does NOT automatically guarantee financial assistance to the student.

Degree Requirements

During their first year of graduate studies, M.S. (Plan A) and Ph.D. students are required to prepare a formal written research proposal encompassing a thorough literature review, clear statement of objectives, and materials and methods of the project. A research proposal seminar will be presented to the Department upon completion of the written research proposal. An exit seminar, usually presented during the last semester of the student’s tenure, is required for M.S. and Ph.D. students. August graduates will present their seminar in the spring. M.S. students using the Plan B option will be required to provide a detailed outline of their practicum to their Advisory Committee. The practicum must be a minimum of 3 credit hours (maximum of 6 credit hours) and may consist of library research, special problems, internships, etc., as agreed upon by the student and major professor, and approved by the Advisory Committee.

M.S. and Ph.D. students will be required to post a formal notification of scheduled examinations on the notice board in
the main departmental office two weeks prior to the examination date.

All M.S. and Ph.D. students must satisfy the following core course requirements:

1. An undergraduate course in general entomology. Students who have not had such a course must take ENT 300.
2. ENT 564 Insect Taxonomy
3. STA 570 Basic Statistical Analysis

M.S. candidates using the Plan A option must take a minimum of one course from two of the following categories. M.S. candidates using the Plan B option and Ph.D. candidates must take a minimum of one course from all three groups.

1. ENT 568 Insect Behavior
   or ENT 625 Insect-Plant Relationships
   or ENT 665 Insect Ecology
2. ENT 567 Applications of Genetics
   or ENT 635 Insect Physiology and Internal Morphology
3. ENT 530 Integrated Pest Management
   or ENT 574 Advanced Applied Entomology
   or ENT 880 Biological Control of Insects

In all cases, an equivalent graduate level course from another institution is acceptable upon approval of the Advisory Committee. Such approval will not decrease the minimum number of credits required, but simply will permit the student to take other courses. In addition, each M.S. candidate must take two semesters of ENT 770, Entomological Seminar, (or approved equivalent seminars) and Ph.D. candidates must take four semesters of approved seminars.

**Family Studies**

**Master of Science in Family Studies**

Students may complete a prescribed program of study in Marriage and Family Therapy including a one-year practicum experience or they may pursue the Family Science option.

Students pursuing the Family Science option take a group of core courses totaling 12 hours: FAM 652, FAM 654, FAM 668 and FAM 690. The Family Science option requires 36 credit hours. At least two-thirds of the minimum requirements must be in regular courses, and at least three-quarters of the minimum requirements must be in courses numbered at the 600 or 700 level. Plan A (thesis) requires 36 hours, 6 of which are thesis credit hours, 12 core course hours, and 18 hours of major electives. Plan B (non-thesis) requires 36 credit hours, 12 of which are core courses and 24 of which are major electives. Students are admitted to the Family Science option for both the fall and spring semesters. The deadline date for application for the fall semester is January 15 and the deadline for applying for spring admission is August 15.

Students pursuing Marriage and Family Therapy complete a 51-hour program of prescribed courses that is accredited by the American Association for Marriage and Family Therapy Commission on Accreditation. This Plan B non-thesis program includes course work in the following areas: a) Theoretical Foundations of Marital and Family Therapy; b) Assessment and Treatment in Marital and Family Therapy; c) Human Development and Family Studies; d) Research; e) Ethics and Professional Issues; and f) Supervised Clinical Practice. Students are admitted to the Marriage and Family Therapy program for the fall term only. The deadline for applying for admission is January 15.

**Admission Requirements**

Applicants must submit a Family Studies Departmental online application including a statement of their academic goals for the M.S. degree. Three letters of recommendation should be sent directly from the writer (not the applicant) to the Director of Graduate Studies.

**Doctor of Philosophy**

The Department of Family Studies offers the Ph.D. in Family Studies. The doctoral program is a research-based curriculum designed for those desiring a research career in family science. Individuals completing the Ph.D. in Family Studies will be qualified for positions at colleges and universities; program evaluation positions in public and private settings focusing on the family; and administrative positions in public and private social service prevention and intervention settings. Financial assistance is available for doctoral students, including teaching and research assistantships.

**Admission Requirements**

Students who have earned a Master’s degree may apply to the Ph.D. program. Applicants must submit a Family Studies Departmental online application including a statement of clearly developed academic and research goals for the Ph.D. degree <www.uky.edu/HES/family/e-app-form.htm>. Three letters of recommendation should be sent directly from the writer (not the applicant) to the Director of Graduate Studies.

For additional information, contact the Director of Graduate
Forestry

The program offers graduate work leading to the Master of Science in Forestry. Degrees are awarded under Plan A, which requires a minimum of 24 semester hours of graduate course work plus an acceptable thesis, and under Plan B, which requires a minimum of 30 semester hours of graduate course work. The prospective student must have an undergraduate degree in forestry or take a core of undergraduate forestry courses as part of the master's program.

The study and research program may be directed to any one of the following areas: wood science, forest soils, forest hydrology and water quality, forest ecology, tree physiology, forest genetics, forest wildlife, forest biometrics, forest economics, silviculture, conservation biology and forest restoration ecology.

Students interested in pursuing further graduate studies (Ph.D.) in the forestry area may enter one of several interdepartmental programs such as animal science, plant physiology, crop science, soil science and agricultural economics.

Admission Requirements

Applicants must hold an awarded four-year baccalaureate degree from an accredited institution of higher learning, preferably in Forestry or a Natural Resource discipline. Applicants are expected to have an overall undergraduate grade point average of 3.0 and a combined verbal and quantitative score on the Graduate Record Examination of 1000. A résumé, three letters of recommendation, and a statement of purpose must be sent directly to the Forestry Director of Graduate Studies. Each applicant must identify a graduate faculty member who agrees to serve as his/her major advisor. To be considered for an award of departmental financial aid, all application materials must be received prior to February 1.

Additional information concerning the graduate program in forestry may be obtained at <forestry2.ca.uky.edu/gradstud.htm>, or by contacting the Director of Graduate Studies at dwagner@uky.edu.

Admission Requirements

Applicants for admission must first be approved by the Graduate School. They are then reviewed by the Director of Graduate Studies in Modern and Classical Languages, Literatures and Cultures, who consults with the French graduate faculty before returning recommendations to the Graduate School.

An applicant may be provisionally admitted without meeting all of the minimum standards if other factors, including letters of recommendation, the writing sample, and the tape-recorded reading, indicate an ability to perform satisfactorily in graduate-level work. Presentation of a minimum Graduate Record Examination score (GRE) or a minimum Grade Point Average (GPA) does not, however, automatically guarantee admission to the program, as the final decision depends on an evaluation of all materials submitted and the faculty's assessment of the applicant's potential for successful graduate study.

In addition to assuring that the applicant has met the admission requirements of the Graduate School, the Department carefully evaluates the following materials:

1. Evidence of completion of the equivalent of the University of Kentucky's undergraduate major in French. Applicants who fail to meet this standard may be admitted provisionally to the Master's program, but may be required to take additional undergraduate work in French. Graduate credit will not be awarded for undergraduate courses, but graduate courses taken simultaneously count in the degree program.
2. A minimum 3.25 undergraduate GPA in French on a four-point scale.
3. A combined score of 1700-1800 or better on the three sections of the GRE. In special cases, a student without the GRE may be accepted provisionally for the first semester, during which the examination must be taken.
4. Three letters of recommendation addressing the applicant's qualifications for graduate work in French.
5. A writing sample in French by the applicant (analytical prose, typically a graded term paper; not a creative work).
6. Non-native speakers of French must submit a cassette recording (3-4 minutes) of themselves reading a contemporary prose passage in French (a newspaper or magazine article, not a literary work).
7. Non-native speakers of English must submit a cassette recording of themselves reading a similar passage in English. In addition, they must fulfill the Graduate School's Test of English as a Foreign Language (TOEFL) requirement.
8. A statement of purpose in seeking the M.A. in French.
9. Students in post-baccalaureate programs in French or other areas at the University of Kentucky who wish to transfer to the French Master's program will be evaluated also on their post-bacc course work and on recommendations from their instructors, even though admission may be delayed until the end of the semester in which they are enrolled. A maximum of six hours of post-bacc course work may be transferred to the Master's program.

Letters of recommendation, writing samples, cassette recordings, and statements of purpose should be sent to the Director of Graduate Studies, Department of Modern and Classical Languages, Literatures and Cultures, 1055 Patterson Office Tower, University of Kentucky, Lexington KY 40506-0027. For admission in the fall semester with a Teaching Assistantship award, all materials should be received by the Department no later than March 15.

Degree Requirements

Students select a program from a variety of courses listed below in French literature, language, civilization, and literature and the arts. They are then examined over their program. The master's examination for each candidate is prepared and evaluated by a committee of three members of the French graduate faculty which will consider the candidate's course program in preparing the examination.

Candidates must also demonstrate a reading knowledge of another foreign language. The M.A. examination is administered in November, April and July. Applications for the examination should be made to the Director of Graduate Studies no later than four months prior to the date of examination.

For further information concerning the M.A. program in French, consult the Director of Graduate Studies.

All courses listed below are offered on a rotating basis and not less frequently than every eighth semester.

Geography

The Department of Geography offers both M.A. (Plan A and Plan B) and Ph.D. programs. Emphasis is placed on theoretical and conceptual training in the student's chosen field of interest. A variety of philosophical and methodological approaches are encouraged. The strength of the program lies in its focus upon close faculty-student interaction, flexibility in designing an appropriate plan of study, and research training in small seminar environments.

The primary objective of the graduate program is to prepare students for research-oriented careers in government, industry, and universities. Emphasis in graduate seminars is on developing the background and skills necessary for original contributions to geographic knowledge.

Faculty have regional expertise in South and South-East Asia, Japan, the Himalayas, southern Africa, the Caribbean, Central and Eastern Europe, the states of the former Soviet Union, Western Europe, and North America (particularly Appalachia). Research clusters of the faculty include:
Cultural Studies: Interpretation and analysis of the built environment; space and representation; the political economy of landscape production; regional imagery; media studies; popular culture; the social construction of community; historic preservation; recreation, tourism and society.

Development Studies: Policies and practices of development; political economy perspectives on development; postcolonial theory; economic restructuring and transition economies; household survival strategies; the relations between migration, transportation, tourism, and economic development; environmental management and sustainable development.

Earth Surface Systems: Landscape evolution; biogeomorphology; fluvial systems; climate, landform, hydrosphere, biosphere interactions; urban environments; arctic and alpine environments; nonlinear dynamical systems theory in geosciences.

Political Geography: Electoral systems; state theory; post-Cold War democratization; the geography of revolutionary change; critical geopolitics; political economy of environmental movements; political economy of globalization discourses and practices.

Social Geography: Health care, disease, and society; the geography of AIDS; the geography of aging and the life course; poverty and social policy; race and gender; human behavior in space and time; population and migration studies; spatial structure of social networks; transportation of disadvantaged groups.

Social Theory: Theories of human spatiality; Marxist, neo-Marxist, and post-Marxist theory; regulation theory; postmodernism and post-structuralism; feminist theory; space, landscape, and identity; geographic thought and society; technology and social change.

Urban and Economic: The local state urban change; urban social conflict; neighborhood change; economic impacts of transportation systems; urban historical geography; regional economic restructuring; global financial systems; urban morphology; space-time convergence; information and communications; geography of multinational corporations; impacts of foreign direct investment and trade.

Weathering and Regolith Evolution: Rock weathering; stone durability and decay; landscape geochemistry; solutes; soil geomorphology and pedology; weathering and landscape evolution.

In addition, students have access to faculty with expertise in a variety of methodological areas, including: quantitative, especially multivariate statistics and modeling; mathematical demography; automated and production cartography; GIS; remote sensing applied to human geography; air photo interpretation; qualitative research methodologies, including experiential methods and realism; field techniques.

Admission Requirements

In addition to the basic graduate school requirements, the following materials should be sent to the Department of Geography:

- Three letters of reference from persons who can evaluate your potential for success in our graduate program
- Statement of your goals and objectives in which you discuss your areas of scholarly interest, any research directions you may wish to pursue, and how your interests and goals fit with the University of Kentucky’s graduate program in Geography (about two pages, double-spaced)
- Letter requesting consideration for assistantships and fellowships (if desired)
- Curriculum vitae (if available)

It is requested that copies of the materials (if available) sent to the Graduate School also be sent to the DGS. Once all these materials have arrived in the Department of Geography, the application is reviewed by the faculty members on the Department’s Graduate Committee. The committee’s evaluation does not place emphasis on any one element of the application, rather the combination of elements must convince the Graduate Committee members that the applicant has great potential for success in our program.

The Department welcomes students with undergraduate concentrations in related fields. In some cases students without an academic background in Geography may be required to complete additional course work so as to gain appropriate foundational knowledge.

There is no official deadline for applications. However, applicants are encouraged to submit all application material before February 1st to ensure consideration for admission for the following fall semester. Admission decisions are made on a rolling basis, but decisions about financial aid usually take place in March and April.

Degree Requirements

Applicants for the Ph.D. in geography must conform to the general requirements of the Graduate School as set forth in the first part of this Bulletin. Requirements in the Ph.D. program consist of 1) core courses (GEO 700 or other advanced methods course, 702, 707) in the theory and methodology of geography; 2) seminars, independent study and directed research in one of the research foci noted above or in cognate disciplines; 3) successful examination in one modern foreign language; 4) a written and oral qualifying examination in theory, methodology, and the student’s selected topical focus; and 5) a dissertation based on original research. A program designed to meet the professional academic goals of each doctoral candidate is outlined in consultation with the Director of Graduate Studies and the candidate’s Advisory Committee.

Applicants for the M.A. degree in geography follow a broadly based program which consists of: 1) required courses (GEO 600, 702, and 710); 2) elective courses in geography and cognate disciplines according to the student’s academic goals and career objectives; and 3) the completion of a master’s thesis (Plan A). The non-thesis Ph.D.-preparatory program (Plan B) consists of: 1) required courses (GEO 600, 700 or other advanced methods course, 702, 707, 710); 2) elective courses in geography and cognate disciplines according to the student’s academic goals and career objectives; 3) a written examination; 4) a publication-quality research paper; and 5) an oral examination. The Plan A option requires 24 credit hours, the Plan B, 30 credit hours.

### Geography

The Department of Geological Sciences offers graduate work leading to the M.S. degree (thesis option) and to the Ph.D. degree in disciplines represented by Departmental faculty. The focus of the program is to prepare students for careers in industry, government and academia.

#### Admission Requirements

The credentials of each applicant are considered individually and applicants, from other scientific disciplines are encouraged to apply. Applicants should, have a minimum grade point average of 2.75 at the undergraduate level and, knowledge in the basic sciences. Deficiencies in geosciences, allied sciences and mathematics must be removed by such course work as the departmental committee on graduate studies may specify.

#### Degree Requirements

Candidates for the M.S. degree must complete 24 credit hours and submit a thesis that demonstrates ability to conduct sound research. Candidates for the Ph.D. must pass a written and oral Qualifying Examination, submit and defend a dissertation based on original and significant research, and satisfy the Graduate School requirements. Students are encouraged to tailor their course curriculum to their academic interests and career goals both within, and in allied fields outside the Department.

The principal areas of study include shallow seismic geophysics, hydrogeology, coal geology, stratigraphy, structural geology, and petrology. Resources for the conduct of graduate research include: the Pirtle geology library, a state-of-the-art microcomputer laboratory, petrographic microscopes, field vehicles and a staffed thin section laboratory. Analytical facilities include electron microprobe, X-ray diffraction, fluid inclusion analysis and organic petrography. Geophysical facilities include the Kentucky Digital Seismic network, a 48-channel digital seismic reflection/refraction unit with energy source, a resistivity unit, and magnetometers.

### German

The general goal of graduate work in German is to provide students with a critical understanding of German culture, its language and literature and its relationship to western civilization as a whole. Specific courses are designed to acquaint students with the aims and methods of research in the fields of language pedagogy, literary and cultural history, literary theory, and historical linguistics. Students working as teaching assistants under faculty supervision have ample opportunity to develop effective teaching skills in a controlled setting.

The Department of Modern and Classical Languages, Literatures and Cultures offers a graduate program leading to the M.A. (Plan A or B) degree in German. Competence in another foreign language, normally French, in addition to German is required for graduate degrees.

#### Admission Requirements
Admission requirements include an acceptable undergraduate major in German, a satisfactory score on the Graduate Record Examination (GRE), and three letters of recommendation. Applicants lacking more comprehensive knowledge of German language and literature may be admitted with the understanding that their program must include some advanced undergraduate work in addition to those courses normally required for the M.A.

Individual programs of study are planned with consideration of the student’s competencies and interests. The Department endeavors to be flexible and to accommodate career goals in teaching, government service, or research.

Areas of specialization of the graduate faculty of the department afford flexible coverage in breadth and depth, with particular strength in early modern studies, the Age of Goethe, Wilhelmine and Weimarian culture, contemporary literature and culture, literary theory, intellectual history, gender studies, and foreign language pedagogy. The Department serves as the editorial center for the international journal, *Colloquia Germanica*. The University Library has substantial holdings in all areas of German language, linguistics and literature and in supporting fields.

**Gerontology**

The Ph.D. program in Gerontology is a multidisciplinary and interdisciplinary research-oriented degree specifically focused on aging and health. The program, based in the Sanders-Brown Center on Aging, is organized in a way that combines expertise, methodologies and facilities from more than 20 departments ranging from the biomedical sciences, through the social and behavioral sciences, to the humanities.

**Admission Requirements**

The Ph.D. Program in Gerontology encourages applications from individuals having expressed interests in advanced theoretical and research-based studies of aging processes or aged individuals and populations. Complete applications that will be considered for admission to the Gerontology Program must include:

- Required Elements Sent to the Graduate School
  - Application Form and fee payment,
  - Official transcripts of all colleges and universities attended,
  - Official report of the Graduate Record Examination (GRE).
  - (International Students) Official TOEFL report

- Additional Elements Sent to the Gerontology Program
  - At least three (3) letters of reference,
  - Personal statement of interests, doctoral study plans, and career goals.

Students are encouraged to submit samples of scholarly writing, and are strongly encouraged to visit the program before admission decisions are made.

All complete applications will be evaluated not only for evidence of strong academic accomplishment and high professional standards, but for evidence of a strong potential for success in advanced graduate studies and careers in gerontology-related fields.

**Degree Requirements**

The goal of the Ph.D. program is to provide advanced multidisciplinary and interdisciplinary research training in gerontology with an emphasis on aging and health. Students will develop an understanding of the full spectrum of topics that concern both the process of aging and the health and well-being of the elderly population. In addition, students will develop in-depth knowledge in related disciplines or areas of specialization. The course of study is flexible, stressing a multidisciplinary approach to the selection of course work and research activities. Emphasis is placed on tailoring each student’s program to meet the specific needs of the individual’s background and career goals.

To fulfill these objectives, the program integrates formal coursework in gerontology, specialized training in a related domain, opportunities for research, experiential learning modules and a problem focused research seminar. Graduates of the program will be able to conduct aging-related research, teach gerontology at the university level, direct gerontology educational programs, work in the aging services field, and consult with other professionals on various issues pertaining to aging and health.

Approximately 40 faculty from departments throughout the University are involved in the program’s instruction and research activities. Departments represented include: Anatomy and Neurobiology, Anthropology, Behavioral Science, Civil Engineering, Dentistry, Family Studies, Geography, Internal Medicine and Geriatrics, Management, Neurology, Nursing, Nutrition and Food Science, Philosophy, Physiology and Biophysics, Preventive Medicine, Psychology, Social Work, and Sociology. The diversity of the faculty facilitates the comprehensive study of aging and the aged. At the same time it allows for concentration in several areas of particular expertise and program specialization, including: rural aging, long-term care, cognitive and sensory change, public policy, ethical issues, and the etiology and treatment of Alzheimer’s disease, strokes, and other diseases prevalent among the elderly.

The Sanders-Brown Center on Aging, a Commonwealth Center of Excellence, offers a broad base of programmatic support for the program as well as serving as the home of a Geriatric Education Center, an Alzheimer’s Disease Research Center, and a Stroke Center. Numerous sites for clinical/experiential training are available at various clinics, agencies and organizations, including but not limited to: The Kentucky...
Division of Aging Services, the University of Kentucky Hospital, Christian Health Center (a University-affiliated nursing home), Helping Hand Alzheimer’s Day Care Program, University of Kentucky Geriatric Support Services, University of Kentucky Memory Disorders Clinic, University of Kentucky Center for Rural Health, the Center for Creative Living, Cardinal Hill Hospital, St. Claire Medical Center, Northeast Area Health Education Center and the Veterans Affairs Medical Center.

Further information may be obtained by writing to:

Graham D. Rowles, Ph.D., Director of Graduate Studies
Ph.D. Program in Gerontology
101 Sanders-Brown Center on Aging
University of Kentucky
Lexington, KY 40536-0230

Ph.D. Requirements

Students are required to complete the core curriculum in gerontology and 18 hours in an area of specialization. Elective courses to be taken will be recommended by each student's Advisory Committee.

Core Curriculum

GRN 600 A Study of the Older Person (3)
GRN 620 Human Aging and Adjustment (6)
GRN 650 Research Methods in Gerontology (3)
GRN 780 Applied Research Practicum I (1)
GRN 781 Applied Research Practicum II (1)
GRN 782 Women's Health and Aging (3)
GRN 785 Independent Research in Gerontology (3)
GRN 790 Integrative Research Seminar I (3)
GRN 791 Integrative Research Seminar II (3)

Six hours to be selected from:

GRN 612 Biology of Aging (3)
GRN 710 Aging of the Nervous System (3)
BSC 770 Psychosocial Issues in Health and Aging (3)
GRN 610 Aging and Biomedical Ethics (3)
ANT 539 Aging in Cross-Cultural Perspective (3)
GRN 585 Aging and Environment (3)
GRN 715 Health Policy and Aging (3)

It is assumed that students entering with M.S. or M.A. degrees will have taken some of the required courses or their equivalent. The student's Advisory Committee, in conjunction with the Program Steering Committee, will determine the amount of prior course work to be credited toward specific requirements.

Possible elective courses that may be selected by the student or required by the student's Advisory Committee include but are not limited to those listed below:

Gerontology Electives

GRN 513 Geriatric Pharmacy (3)
BSC 779 Behavioral Factors in Death and Dying (3)
NFS 680 Nutrition and Aging (2)
AHE 510 Older Women and their Health (3)
HA 510 Organization of the Long-term Care Sector (3)
SOC 735 Special Topics in Work, Gender and Inequality: Gender and Aging (3)
SW 604 Social Work Practice with the Aging (2)
SW 613 Urban Ecology and Aging (2-3)
SW 642 Psychological Aspects of Human Aging (3)

Health Administration

The Master of Health Administration is offered in the Martin School of Public Policy and Administration, a research, academic and service unit of the Graduate School. The MHA is a 44-credit-hour program for those seeking careers in the management of a variety of health institutions, organizations and agencies.

The interdisciplinary faculty have appointments in the Martin School, in academic units within the Medical Center, and in the Colleges of Business and Economics, and Arts and Sciences.

Admission Requirements

Master of Health Administration Students must meet the admission standards of both the Graduate School and the Martin School. Applicants must submit the following items to be considered for admission to the Master of Health Administration program.

Three letters of recommendation.
A one to three page statement explaining why you wish to pursue an MHA degree.
The Applicant Information Form.

The final selection of students for admission will be subject to the discretion of the admissions committee of the MHA program.

Deadlines for the program are the same as the Graduate School admission deadlines. Students are admitted only in the fall semester. Applications completed by February 1 will have priority for financial aid.

Students are admitted from various academic disciplines. If not previously exposed to business disciplines, students should develop an understanding of the concepts of financial accounting and microeconomics.

The MHA curriculum has an administrative core, a health service core, an internship, and a final capstone project. Degree requirements include the successful completion of all course work with a 3.0 or better GPA and passing of the final master's comprehensive examinations.

The MHA program is accredited by the Accrediting Commission on Education for Health Services Administration (ACEHSA). For more information about the program, write:
MHA Director of Graduate Studies
University of Kentucky
415 Patterson Office Tower
Lexington, KY 40506-0027

Course Requirements
Completion of 44 credit hours of course work is required (see below).

MHA Curriculum

Administrative Core (12 hours)
HA 621 Quantitative Methods of Research (3)
HA 623 Decision Analysis and Support Systems (3)
HA 624 Information Systems in Health Care (3)
HA 642 Public Organization Theory and Behavior (3)

Health Services Core (26 hours)
HA 601 Overview of the Health Care Delivery System (3)
HA 602 Organizational Change and Strategic Planning (3)
HA 603 Legal Aspects of Health Administration (2)
HA 604 Managerial Ethics (1)
HA 635 Management Accounting for Health Care Organizations (3)
HA 636 Health Economics (3)
HA 637 Health Finance (3)
HA 656 Managerial Epidemiology (3)
HA 660 Decision Making in Health Care Organizations (3)
HA 673 Health Policy Development (2)
Human Resource Management (3 hours) Select one of the following:
PA 628 Personnel Management in the Public Sector (3)
COM 525 Organizational Communication (3)
CJT 671 Proseminar in Interpersonal Communication (3)
CJT 671 Proseminar in Health Communication (3)
MGT 620 Personnel and Industrial Relations (3)
Administrative Practicum (3 hours)
HA 711 Internship in Health Administration

Hispanic Studies

The Department of Hispanic Studies offers the Master of Arts and the Doctor of Philosophy degrees. Graduate Record Examination scores are required for admission. Foreign students must pass the TOEFL with the minimum required score. Supervised teaching experience within the department is a requirement for both the master's and doctoral degrees.

Master of Arts

Admission Requirements
A B.A. in Hispanic Studies or another area of literature, culture or philosophy, plus demonstrated fluency in Spanish. Excellent letters of reference and a research undergraduate essay.

Degree Requirements
Standard Graduate School requirements; reading knowledge of a second foreign language; successful completion of SPI 553 (Pedagogy and the Teaching of Spanish), SPI 600 (History of the Spanish Language) and SPI 606 (Introduction to Critical Theory). Successful completion of an additional 30 hours of credits of which 6 might be taken at the 500 level (24 credits must be taken at the 600 level or above). The M.A. is granted to a student who: A) has successfully passed a written and oral examination after completing the required coursework. The exam is designed to test the candidate’s knowledge of the the M.A. reading list and the candidate’s composite course work. A student who plans to complete only the MA degree (or is not admitted into the PhD program) has three years to complete their work towards the MA (including the exam).

NOTE: Students who are admitted into the PhD program during the fourth semester of coursework do not need to take an MA exam after their second year . The MA degree will be conferred upon completion of Part A of the doctoral Qualifying exam.

Students who enter the program with an MA from another institution will be reviewed by the graduate committee at the end of the second semester. If the committee deems the student’s work acceptable, the student may then go on to complete the PhD requirement. If the work is deemed unacceptable, the student will be asked to take the MA exam (and pass it) before proceeding on to the PhD.

Doctor of Philosophy

Admission Requirements
In addition to the Graduate School requirements for admission listed elsewhere in this Bulletin, presentation of an acceptable writing sample, excellent letters of reference and a statement of purpose (with an indication of student’s interest in particular dissertation topics.

Degree Requirements
Standard Graduate School requirements. 54 credit hours (18 courses) of which three are required: successful completion of SPI 553 (Pedagogy and the Teaching of Spanish), SPI 600 (History of the Spanish Language) and SPI 606 (Introduction to Critical Theory). Of the remaining 15 courses , 5 must be in the major field of concentration (and at least two must be at the 700 level). 4 courses must be in the minor fields, and 2 in an allied
field (outside the department). Additionally, the student must demonstrate reading knowledge of two languages other than Spanish and English. The successful candidate will defend a dissertation prospectus, successfully complete Parts A and B of the Qualifying exam, and defend an acceptable dissertation.

Candidates are expected to devise a program of studies and research around the major area of specialization. Two minor areas (in Hispanic literature and culture) and one allied field (related to the dissertation work) must be selected as support divisions for the major area. Students coming in with an MA in Hispanic Literature may transfer up to nine credits of coursework, with the approval of the Graduate committee and the DGS. Minimum graduate credit expectations are 24 credit hours in the combined Major and Minor areas and 15 credit hours in the Allied Fields; 6 graduate credits in Hispanic Linguistics and in each of the two remaining areas not chosen as Major, Minor, or Allied Fields. Two seminars (one in the major field) are required.

Specialization by area: 1) Medieval Spanish Literature; 2) Renaissance and Golden Age Spanish Literature; 3) Eighteenth and Nineteenth Century Spanish Literature; 4) Twentieth Century Spanish Literature; 5) Colonial and Nineteenth Century Spanish American Literature; 6) Twentieth Century Spanish American Literature. The area of dissertation may combine Hispanic literature and film, Hispanic literature and Fine Arts, Hispanic literature with a second language, literature and popular culture, or literature and theory. Students are encouraged to explore topics in Transatlantic Studies, and to make use of the excellent programs in Social Theory, Women’s Studies, Latin American Studies, Environmental Studies and Appalachian Studies in considering transdisciplinary possibilities for their doctoral thesis.

The qualifying examination consists of two parts. Part A is a twelve hour written exam and a two hour oral exam based largely on the reading list and the prospectus the student has submitted to his dissertation committee. The written exam is subdivided as follows: a three-hour exam in the area of the dissertation, and an additional nine hours to test the student’s knowledge in his/her area of general specialization, and the additional three areas (two allied fields and one minor field) on which the student has chosen to concentrate. In order to take this exam, the student needs to have submitted a written prospectus and a reading list to the dissertation committee at least two months before scheduling the exam.

Part B of the qualifying examination will take place during the semester following Part A. The student will present either a fully written introduction or a sample dissertation chapter to his/her dissertation committee.

Acceptable Progress towards the Dissertation: The ABD will then need to establish an acceptable timeline for completing the dissertation. The Department suggests that the student complete at least one dissertation chapter per semester until the dissertation is completed. It is hoped that the student will finish his or her dissertation within two years after the qualifying exams.

### Historic Preservation

Preservation is a field involved with the interpretation and conservation of historic sites, as well as with their renovation and adaptive use. An interdisciplinary approach to the investigation of buildings and landscapes, which addresses the complexity of material culture, has been adopted by the faculty of this program.

The College of Design offers a Master of Historic Preservation degree that provides opportunities for students to explore a variety of interests. Applications are invited not only from those with degrees in design—architects, interior designers, and landscape architects—but also from those who hold degrees in other disciplines and wish to pursue studies in historic preservation.
Admission Requirements

Requirements for admission include 1) a baccalaureate degree from an accredited college or university, 2) demonstration of ability in drawing, drafting, and photography, 3) three letters of recommendation and a personal essay, 4) a minimum score of 1000 on the verbal and quantitative sections and an acceptable score on the analytical section of the Graduate Record Examination (GRE), 5) an interview with the faculty in the program, if possible, and 6) a B average GPA at the undergraduate level.

Requirements for the degree include the completion of core courses, advanced electives, an internship, and a final project—a total of 48 hours of credit. For additional information on admission and requirements, contact the Director, Graduate Program in Historic Preservation, College of Design, University of Kentucky, Lexington, KY 40506-0041.

History

The Master’s and Ph.D. Programs

The Department of History offers both the M. A. and the Ph.D. degrees. The master’s degree may be obtained either by Plan A or Plan B. A reading knowledge of one foreign language is required.

The Ph.D. program is built around graduate readings and research seminars that are designed to prepare students for the qualifying exams and to write the doctoral dissertation. Specific requirements vary depending on a students’ concentration (e.g. U.S. , modern Europe , pre-modern Europe ). Reading knowledge of one foreign language is required and proficiency must be satisfied before a student may sit for qualifying exams. A student’s advisory committee may require proficiency in one or more additional languages or skills such as oral history. The precise nature of the qualifying exam fields will be determined by the major advisor and the advisory committee. The advisory committee chair directs the doctoral dissertation.

More information on specific requirements may be found at the department’s website http://www.uky.edu/AS/History/ or in the department’s Graduate Handbook, which is available at http://www.uky.edu/AS/History/grads/index.html.

Admission Procedures and Requirements

Students applying for the MA program should submit evidence of strong undergraduate preparation in history, preferably an undergraduate major with a minimum grade-point average of 3.0 on a 4.0 scale. Applicants must also submit Graduate Record Examination scores, three letters of recommendation, a writing sample, and a one- or two-page statement of purpose. Ideally, the writing sample should be a research paper or a major term paper. The letters of recommendation should be collected by the applicant and forwarded in a single envelope.

Applicants applying for admission to the Ph.D. program should follow the same procedures. Whenever possible, the department prefers to see an applicants’ MA thesis when making admission decisions.

Applicants who wish to be considered for financial assistance and fellowships must apply no later than February 1.

Each applicant is judged on his or her merits and against the larger pool of applicants. Admission is competitive, and the department usually cannot accept all qualified applicants.
Hospitality and Dietetic Administration

HOSPITALITY ADMINISTRATION

Courses are designed to:

- Build on a background of industry and academic knowledge of hospitality and tourism
- Give technological expertise for functioning in a diverse and changing workplace
- Develop leadership skills
- Enhance interpersonal attributes
- Analyze strategic issues and trends in tourism and hospitality and lodging industry.

Direct involvement in hospitality and health care industries is accomplished through research projects and cooperative activities.

Dietetic Administration

Courses are designed to:

- Examine leadership and administrative concepts
- Provide instruction on theories and concepts in institutional organization
- Administer a current events approach to the financial decision making and reimbursement process in dietetics
- Build expertise in practice issues in dietetics

Degree Requirements

Core Courses

NFS 610 Hospitality & Dietetics Administration & Assessment .......................... 3
NFS 648 Institution Administration ................................................................. 3
NFS 770 Seminar in Hospitality & Dietetics Administration ............................ 1
NFS 772 Current Topics in Hospitality & Dietetics Administration .................. 2
STA 570 Basic Statistical Analysis .................................................................. 4
STA 675 Survey Sampling ............................................................................ 2

Hospitality Administration

NFS 694 Strategic Planning in Hospitality, Lodging and Tourism .................. 3
NFS 646 Institution Organization & Management ............................................ 3
NFS 781 Advanced Trends Analysis in Hospitality and Tourism .................... 3
Plan B requires 12 additional hours of electives

Dietetic Administration

NFS 603 Advanced Community Program Development .................................. 3
NFS 784 Special Problems in Institution Management ..................................... 3
NFS 690 Advanced Work in Dietetics ............................................................. 3
Plan B requires 12 additional hours of electives

Each administration specialty has fifteen credits from the core, a base of nine credits of prescribed courses, three or more credits from electives. Plan A requires 24 credit hours of course work plus a thesis. Plan B requires 36 credit hours of course work without a thesis.

Six additional credit hours are allowed for Thesis Research if Option A is chosen.

Admission Requirements

In addition to general admission requirements as stipulated by the Graduate School, the applicant must meet the following criteria:

- A B.S. Degree in Hospitality Management or Dietetics/Nutrition from an accredited institution. Registered Dietitian (R.D.) eligibility preferred for Dietetic Administration option.
- A minimum grade point average of 3.0 on a 4.0 scale, or a total of 1,000 or more on the verbal and quantitative portions of the Graduate Record Examination (GRE).
- Have a Test of English as a Foreign Language (TOEFL) score of 550 or better if an international student.

Official transcripts and GRE/TOEFL scores must be sent directly to the Graduate School (351 Patterson Office Tower, University of Kentucky, Lexington, KY 40506-0027), along with a completed application. Application forms can be found at: <www.rgs.uky.edu/gs/).

In addition, the applicant must submit a statement of purpose letter and have three letters of recommendation sent to the
Director of Graduate Studies for Hospitality and Dietetic Administration.

**Application Deadlines**

Applications are accepted all year but applicants requesting a graduate assistantship should apply by February 15th for the following fall semester and September 1st for the following spring semester.

Foreign applications should reach the Graduate School at least six months prior to the beginning of the semester the applicant intends to begin graduate study or February 1st for the fall semester and June 15th for the spring semester.

**Integrated Biomedical Sciences**

Graduate students pursuing doctoral degrees in the biomedical sciences at the University of Kentucky College of Medicine are admitted through the Integrated Biomedical Sciences (IBS) Curriculum. This first-year core curriculum provides broad-based exposure to fundamental concepts in the biomedical sciences, development of interdisciplinary approaches essential to innovative research, and flexibility in choosing a research emphasis among 125 faculty in five departments.

On completion of the IBS Curriculum, students select their doctoral degree program based on research interests and mentoring relationships in one of five departments: Anatomy and Neurobiology; Microbiology, Immunology and Molecular Genetics; Molecular and Biomedical Pharmacology; Molecular and Cellular Biochemistry; and Physiology. Please refer to these departments for information about their Ph.D. programs.

**Admission Requirements**

Successful students in the Integrated Biomedical Sciences Curriculum have typically completed an undergraduate degree in chemistry, biology, biochemistry, engineering, mathematics, neurosciences, physics, pharmacy or psychology. Undergraduate course work in organic chemistry, physical chemistry, calculus, physics, and the biological sciences is highly recommended.

Admission to IBS is based upon academic background, GPA, professional recommendations, performance on the Graduate Record Examination (GRE), and prior experience. Personal interviews are strongly encouraged. Students must meet the admissions requirements set by the Graduate School, including a bachelor’s degree from a fully accredited institution of higher learning.

Inquiries regarding admission should be directed to:
Dr. Jane Serumgard Harrison, Director
Integrated Biomedical Sciences Curriculum
University of Kentucky College of Medicine
800 Rose Street, Room MN150
Lexington, KY 40536-0298
1-866-239-0004 (toll free)
E-mail: ibs@lsv.uky.edu
www.mc.uky.edu/ibs

*Integrated Biomedical Sciences is not a degree program.*

**Interior Design, Merchandising and Textiles**

The graduate program in the Department of Interior Design, Merchandising and Textiles is philosophically committed to the well-being of individuals in their immediate environment. Each area of focus is designed to meet individual interests and career objectives.

**Interior Design**

A concentration in interior design leads to a post-professional Master of Arts or Master of Science in Interior Design, Merchandising and Textiles. A combination of course work, independent study, and research experience is available to provide students with a program of study designed for career goals. Graduate emphasis is individualized to meet each student’s career interests.

The student works with an advising committee in the selection of a thesis or non-thesis option and the appropriate courses at the 500, 600, and 700 levels. It is essential that the applicant have an undergraduate degree in interior design or a related subject matter. Supplementary course work may be required of applicants without professional undergraduate interior design degrees.

GRADUATE DEGREE PROGRAMS / 91
 Merchandising, Apparel and Textiles

A concentration in merchandising, apparel and textiles leads to a Master of Science or Master of Arts in Interior Design, Merchandising, and Textiles. A combination of course work, independent study and research experience is available to provide students with a program of study designed for career goals. Graduate emphasis is individualized to meet each student's career interests.

The student works with an advisory committee in the selection of a thesis or non-thesis option and the appropriate courses at the 500, 600, and 700 levels. It is expected that the applicant have an undergraduate degree in the major area of interest or a closely related field.

Degree Requirements

The Master of Science in Interior Design, Merchandising, and Textiles and the Master of Arts in Interior Design, Merchandising, and Textiles is available under Plan A and Plan B. The thesis option (Plan A) requires 24 hours of course work, six hours of master's residence credit, and a thesis; Plan B requires completion of 30 credit hours, which is to include six hours of DMT 700. A common core of twelve hours, comprised of DMT 650, DMT 600, DMT 772, and either STA 570 or DMT 655, is required of all students. (The M.S. degree requires STA 570, while the M.A. requires DMT 655.) Students are to complete twelve credits of additional course work in the area of concentration. Successful completion of a final examination is required.

Admission Requirements

Potential graduate students must:

1. apply and be accepted to the Graduate School and to the Department of Interior Design, Merchandising, and Textiles.
2. have been granted a baccalaureate degree by an accredited institution with a minimum 3.0 GPA on a 4.0 scale (2.75-3.0 GPAs will be considered in relation to other credentials).
3. have taken the Graduate Record Examination (GRE). For a non-English speaking student, a TOEFL score of 550 or above is required (or a score of 213 on the computer version of TOEFL).
4. be reviewed by the department.

To be reviewed by the department, a letter to the Director of Graduate Studies stating the general nature of your desired program and career goals; rationale for selecting this program; and your background in this area of study.

Additionally, three letters of recommendation regarding academic ability must be sent to the Director of Graduate Studies. A portfolio, which is reviewed and evaluated by a faculty committee, is required of all interior design applicants.

Kinesiology and Health Promotion

The Department of Kinesiology and Health Promotion offers graduate work leading to the Master of Science and Doctor of Education degrees with areas of concentration in kinesiology and health promotion. Within these areas students may specialize in athletic training, biomechanics, exercise physiology, health promotion, physical education teaching/coaching, or sport management. The Department also offers a Ph.D. degree in Exercise Science in which the student can specialize in biomechanics or exercise physiology.

Doctor of Philosophy

The program offers areas of concentration in Biomechanics, or Exercise Physiology. The goal of the program is to provide education to qualified students so that they will have a broad understanding of exercise science, as well as an in-depth knowledge of one specific area or discipline. Graduates of this program will be able to conduct exercise science research, teach at the university level, direct discipline specific educational programs, and collaborate with other professionals on various issues related to exercise science.

The Exercise Science Core includes 20 hours and provides the student with a broad understanding of the various disciplines involved in this field. Each student is also required to take a minimum of 7 hours in research/statistic course work and 6 hours of computer programming or demonstrate proficiency in programming. Beyond this minimum, an advisor and committee in consultation with each student set the structure and content of the doctoral program. The number of formal courses within each area of specialization may vary. It is expected that the depth of knowledge in each area of study comes from independent study and research experiences, in addition to the dissertation, which are all under the direction of the faculty. Each student will demonstrate their depth of knowledge by qualifying exams. Typically, it will take from 3-5 years for the student to complete the degree requirements including the dissertation.

92 / GRADUATE DEGREE PROGRAMS
Complete one of the following:

Regardless of whether the student concentrates in the kinesiology or health promotion areas, all candidates are required to:

The program needed to accomplish this objective involves a combination of departmental course offerings, supporting electives, and a required core of statistics and research methods. Inasmuch as the fields of health promotion and kinesiology draw their principles from a variety of disciplines, it is appropriate that certain electives be chosen from the supportive areas of the biological and physical sciences and the behavioral and social sciences. Master’s candidates with the approval of the department may select either a thesis (Plan A) or a non-thesis option (Plan B).

**Admission Requirements**

Applicants must meet the requirements set forth in the first part of this Bulletin. Students are expected to have satisfactorily completed the Graduate Record Examination (GRE). In addition, applicants are expected to have a minimum of 21 undergraduate hours in their respective fields. Specific prerequisites for graduate study at the master’s level are determined by a committee of the departmental graduate faculty based upon their assessment of the student’s background and goals. All programs include course work within and outside the department. Additional information about the Ed.D. can be obtained from the Director of Graduate Studies.

**Degree Requirements**

Regardless of whether the student concentrates in the kinesiology or health promotion areas, all candidates are required to complete one of the following:

**Core Courses (Required 20 credits)**

- KHP 610 Muscles in Motor Control 3
- KHP 615 Biomechanics of Fundamental Movements 3
- KHP 620 Advanced Exercise Physiology 3
- KHP 640 Laboratory Methods in Exercise Science 3
- KHP 782 Independent Research 3
- PGY 615 Teaching Credits or equivalent 1
- Seminar (1 credit/sem for 4 sem) 4

**Doctor of Education**

The Ed.D. program in Kinesiology and Health Promotion provides advanced study for those who seek careers in educational, industrial or other appropriate settings. Admission to the program requires a master’s degree and satisfactory completion of the Graduate Record Examination. Course work is planned by the student’s advisory committee based on their assessment of the student’s background and goals. All programs include course work within and outside the department. Additional information about the Ed.D. can be obtained from the Director of Graduate Studies.

**Master of Science**

The master’s program is designed to provide a high-quality graduate program for the following two types of students: 1) active, motivated individuals who desire advanced study to enhance their professional adequacy, and 2) discipline-oriented students completing a master’s as an intermediate step toward doctoral work. The objective of the program is to prepare the student to:

1. Effectively locate, analyze, and use significant elements of the professional literature and research materials,
2. Permit an in-depth study of a specialized content area within the field, and
3. Acquire a knowledge of sound research procedures.

The program needed to accomplish this objective involves a combination of departmental course offerings, supporting electives, and a required core of statistics and research methods. Inasmuch as the fields of health promotion and kinesiology draw their principles from a variety of disciplines, it is appropriate that certain electives be chosen from the supportive areas of the biological and physical sciences and the behavioral and social sciences. Master’s candidates with the approval of the department may select either a thesis (Plan A) or a non-thesis option (Plan B).

**Graduate Courses**

**Plan A** (Thesis Option)

- EDP 557 Educational Statistics 3
- STA 570 Basic Statistical Analysis 4
- KHP 644 Research Techniques Applied to Health, Physical Education and Recreation 3
- Supporting Electives 6
- KHP Area of Concentration 12
- KHP 768 Residence Credit for the Master's Degree 6

**Plan B** (Non-Thesis Option)

- EDP 557 Educational Statistics 3
- STA 570 Basic Statistical Analysis 4
- KHP 644 Research Techniques Applied to Health, Physical Education and Recreation 3
- Supporting Electives 6
- KHP Area of Concentration 18

For additional information, write to the Director of Graduate Studies, Department of Kinesiology and Health Promotion.

**Graduate Program Requirements**

**Graduate Degree Programs / 93**
Library Science

Master’s Program

The School of Library and Information Science (“School”) conforms to the University of Kentucky Graduate School in offering three forms of the master’s degree: the Master of Science in Library Science (M.S.L.S.) and the Master of Arts (M.A.), plans A and B. Most students elect the M.S.L.S. degree, which requires satisfactory completion of 36 credit hours and of the final written examination. The 36 credit hours are distributed in this way: 12 hours of core courses, a qualifying technology course, 21 hours of additional electives. The required core courses are LIS 600 Information in Society, LIS 601 Information Sources and Services, LIS 602 Information Storage and Retrieval, and LIS 603 Management in Library and Information Science. Qualifying technology courses are LIS 636 Microcomputers in Libraries and Information Centers, LIS 637 Information Technology, LIS 638 Internet Technologies and Information Services, and LIS 668 Information Systems Design. With the faculty advisor’s prior approval, as many as 6 elective hours may be taken in a cognate area of study. Transfer credit is limited to 9 credit hours and includes any of the School’s courses taken while in post-baccalaureate status.

The M.A. degree, plan A, requires essentially the above plus (i) satisfactory demonstration of a language competency and (ii) a thesis, which substitutes for 6 elective hours. Six hours must be in a cognate area. The M.A., plan B, is the same as plan A except 6 hours of advanced bibliography or technical services course work substitute for the thesis.

Degree requirements allow a student considerable freedom to design her/his program to suit individual needs and interests. The curriculum is sufficiently varied to permit opportunities to build both breadth and depth into the course of study. The student is assisted in this endeavor by a faculty advisor who provides guidance and counsel. Advisor assignment is based, when possible, on student interests and preferences. Ultimately, however, it is the student’s responsibility to see that all School and Graduate School requirements are met prior to taking the final written examination.

Admission Requirements

The School’s budget and number of faculty limit enrollment in the master’s program, and meeting the GPA and GRE criteria (see below) does not guarantee admission. Admission decisions are competitive, based on (i) analysis of a variety of relevant factors regarding the applicant and (ii) enrollment in the master’s program, which determines the number of applicants who can be admitted. The goal of the admission criteria is to enable the School to estimate the applicant’s potential as a graduate student and information professional.

Three primary factors are considered in deciding whether to admit an applicant to the School: (1) a bachelor’s degree from an accredited institution; (2) an undergraduate grade point average of 2.75 or higher, and a grade point average of 3.0 or higher on any prior graduate work, in both cases on a scale with A = 4.0; (3) Graduate Record Examination scores, (a) on the General Test taken before October 1, 2002, of 450 or higher on the verbal section and of 400 or higher on the quantitative section or on the analytical writing section. Other factors, which are also considered in the admission decision, include personal references, personal interviews, work experience, academic background, other graduate work, progressive academic improvement, and the cultural and geographic origin of the applicant. Applicants for whom English is not the native language must achieve a minimum TOEFL score of 550 (paper based test) or 213 (computer based test).

A grade point average of 3.00 (B) must be maintained. Failure to do so results in academic probation, and will result in dismissal, if, in the prescribed time, the grade point average is not raised to 3.00 or higher. A student who earns a third C (or lower) grade is dismissed from the program, even though the student may have earned the required minimum 3.00 grade point average and exercised the repeat option to remove one of the C (or lower) grades.

Manufacturing Systems Engineering

The College of Engineering offers a master’s degree program in Manufacturing Systems Engineering. Because of its highly multi-disciplinary nature, the Master of Science in Manufacturing Systems Engineering is housed in the College of Engineering rather than in one of the existing departments. The resources and facilities of the UK Center for Manufacturing are a key component in this degree program.

Graduate degree programs in the field of manufacturing systems engineering are important for enhancing manufacturing productivity and quality in the U.S. The Master of Science in Manufacturing Systems Engineering is designed to equip the student for opportunities in modern manufacturing processes.
and systems. Some of the possible areas of concentration for research and study are: Manufacturing Processes and Equipment, Design for Manufacturing, Plastic and Polymer Processing, Electronics Design and Manufacturing, Computer-aided Design and Manufacturing, Manufacturing Systems Planning and Control, Automated Assembly, and Lean Manufacturing.

The UK Center for Manufacturing, a part of the College of Engineering, conducts graduate-level academic research of the highest quality and transmits that knowledge to industry and government. Housing a 68,000-square-foot building, completed in the fall of 1989, the Center contains: R & D laboratories and offices including machining research lab, metrology lab, rapid prototyping lab, electronics assembly lab, welding lab, automation equipment lab, CAD/CAM/CAE lab, instructional TV classrooms, and TV satellite uplink and downlink equipment.

Admission Requirements

Applicants normally have a bachelor's degree in engineering from an ABET accredited institution (or equivalent). For students with an undergraduate degree other than engineering, completion of a set of identified courses (or their equivalent) in an Engineering discipline will be required prior to admission to the program with full graduate standing.

A minimum grade point average of 2.8 on undergraduate work is expected, along with minimum GRE scores of 700 quantitative and 500 Analytical. If a student does not meet these criteria, an evaluation of the student's overall education and experience may allow admission, subject to evaluation by the Director of Graduate Studies.

Curriculum and Degree Requirements

The Plan A (thesis option) master's degree requires 24 credit hours of course work, a thesis (12 credits), and the satisfactory completion of a final examination. One-half or more of the course work must be at the 600 level or above. All students are required to complete four specified core courses: Modeling of Manufacturing Processes and Machines; Systems for Factory Information and Control; Seminar and Project in Manufacturing Systems Engineering; and Organizational Behavior. The electives for each student will be developed in conjunction with an advisor to ensure that the program provides breadth and depth of content for the student, and meets his or her specific needs and interests. Appropriate electives are drawn from areas of Engineering, Computer Science, Business and Economics, or Mathematics. Two electives are designated as Manufacturing Specialization electives.

The Plan B (non-thesis option) is reserved for students who have significant engineering research or development experience in a manufacturing environment, for which completion of a thesis would be less beneficial than the additional course work involved in Plan B. The program requires 33 credit hours of course work and the satisfactory completion of a final examination. Students must complete the four core courses specified above, as well as MFS 784 Research Project in Manufacturing Systems Engineering, 9 credit hours of Manufacturing Specialization electives, and 9 credit hours of other appropriate electives. Approval of the student’s advisor and of the Director of Graduate Studies is necessary for a student to pursue Plan B.

Materials Science and Engineering

The department offers programs of study leading to the Master of Science in Materials Science and Engineering, and to the Doctor of Philosophy.

Admission Requirements

Persons with backgrounds in any physical science or engineering discipline are encouraged to apply, and each applicant's qualifications are reviewed individually. Students applying need to have performed competently at the undergraduate level and need a good grounding in the physical sciences or engineering. Deficiencies in mathematics or in specific areas of science or engineering must be corrected by such remedial course work as prescribed by the departmental committee on graduate education.

In addition to the minimum Graduate School admission criteria, an applicant is expected to have a cumulative score of 1100 or more on the Quantitative and Verbal sections of the Graduate Record Examination and letters of recommendation providing convincing evidence that the applicant has ability and potential. However, all aspects of the applicant's record are taken into account, including evidence that academic performance has been improving during previous academic activities.

Degree Requirements

The master's degree is offered under Plan A (thesis option) and Plan B (non-thesis option). Candidates for the degree under Plan A must complete 24 credit hours of course work and submit and defend a thesis that demonstrates ability to conduct sound research. Candidates for the Plan B degree must complete 30
credit hours in the broad area of materials science and engineering. Master’s candidates must take at least half of the minimum course requirements at the 600 level or above, and must take two-thirds of their course work within the department.

The Ph.D. program offers broad training in materials science and engineering while providing options to suit the student's particular interest. With the approval of the Advisory Committee, doctoral students complete a program of course work selected to correct deficiencies and to enhance the area of interest. Students must demonstrate, by course work, proficiency in a minor area selected from the fields of mathematics, physical sciences, or engineering. Doctoral students must pass a qualifying examination consisting of both written and oral components. This examination is usually based on a selected area of the scientific literature and is to verify that the student has an understanding of the field of interest sufficient to become a candidate for the degree. Also, as part of the qualifying examination, doctoral students must submit and defend a proposal of dissertation research. After qualifying as a doctoral candidate, the student must conduct original and significant research and must submit and defend a dissertation based on that research. Additional registration requirements pertaining to doctoral students before and after successful completion of qualifying examinations are described under the general requirements for all doctoral degrees earlier in this Bulletin.

Resources for the conduct of advanced studies include polymer synthesis and composites fabrication laboratories, metallurgical processing laboratories, test and analysis facilities for microscopic and macroscopic characterization of polymers, ceramics, and metals.

**Mathematics**

The Department of Mathematics grants the M.A., M.S., and Ph.D. degrees. There are no specific course prerequisites for admission; however, two semesters of advanced calculus, and at least one semester each of algebra and topology are suggested. Both the M.A. and M.S. degrees are 30-credit-hour programs, offered under either Plan A or Plan B. The department also offers an M.S. in Applied Mathematics which requires 36 hours.

The Master of Arts degree, featuring a core program that emphasizes mathematical structures, is designed for prospective community college teachers and for students contemplating studies at the Ph.D. level.

The Master of Science degree, through an emphasis on the applications of mathematics and the acquisition of computational skills, focuses on careers in business, industry, and government.

The Master of Science in Applied Mathematics is a more intensive program intended to develop the skills needed to apply mathematics to real world problems. The degree requires 18 hours in mathematics, 12 hours in computer science and/or statistics, and a 6-hour minor, for a total of 36 hours.

The doctorate is a research degree granted on the basis of broad mathematical knowledge and exhibited creative ability. Course work leading to the doctorate is available in the areas of algebra, analysis (classical and modern), applied mathematics, optimization, numerical analysis, differential equations, and topology. A comprehensive examination is required of each student.

**Admission Requirements**

The graduate programs in mathematics do not have formal admission requirements other than those of the Graduate School. Admission, however, is competitive. The admission committee reviews transcripts and letters of recommendation seeking evidence of mastery in proof-based mathematics (such as analysis, topology, and modern algebra), the ability to craft mathematical proofs, and general mathematical maturity.

**Degree Requirements**

In order to be admitted to candidacy for the Ph.D. degree, a student must pass a proficiency examination in one foreign language chosen from French, German or Russian, complete studies in a minor field (either inside or outside the department) and successfully complete the comprehensive examinations. Subsequent work becomes highly specialized through semi-
nars, independent study, and finally, work on a dissertation which penetrates in depth some field of particular interest. Areas in which members of the faculty have active research projects include algebraic topology, group theory, ring theory, algebraic geometry, number theory, complex variables, rational approximation, operator theory, partial differential equations, continuum mechanics, numerical analysis, algebraic combinatorics and optimization.

The ability to communicate mathematics is an increasingly important professional qualification. The department requires all students to complete a teaching or research assignment during each semester of their enrollment in a graduate mathematics program. Students will be assigned to teach courses at the early undergraduate level. Entering students will normally be assigned three semester hours, and continuing ones will normally teach 6 semester hours. With the approval of the Director of Graduate Studies, a student may substitute an equivalent research effort for the teaching activity.

### Mechanical Engineering

The Department of Mechanical Engineering at the University of Kentucky provides an intellectually challenging environment in which to pursue advanced studies and engage in research. The department offers programs of study leading to the M.S. degree in mechanical engineering as well as the Ph.D. degree. Financial assistance is available to qualified applicants in the form of graduate teaching assistantships, research assistantships or fellowships. Stipends vary depending on the student’s program level and type of support.

Graduate students work closely with faculty recognized as renowned authorities in their discipline. Many of these research projects are at the forefront of technology. Graduate work may be focused in any of the following areas:

- **Manufacturing**: analytical and numerical modeling, optimization of machining processes and systems, lean manufacturing, sustainable manufacturing, precision manufacturing, and robotics and machine vision.
- **Mechanics**: dynamic analysis of solids, contact mechanics, system identification of structures, thermal stress and boundary element methods.
- **Systems and Design**: application of nontraditional materials, finite elements, acoustics, vibration and noise prediction, mechatronic systems, rotating machinery dynamics, engineered surfaces, magnetic bearing technology, and boundary element methods in acoustics.

**Thermal Fluid Sciences**: combustion and fire research, painting technology, nano-technology, computational and experimental fluid dynamics, conduction and convection heat transfer, energy utilization, phase change heat transfer, radiation heat transfer, and optics.

### Admission Requirements

Applicants seeking admission to a graduate program in the Department of Mechanical Engineering (ME) as regular students must have been awarded a baccalaureate degree. Admission to the ME graduate programs normally requires a
bachelor’s degree in engineering (not necessarily in mechanical engineering), a grade point average (GPA) of 3.0/4.0 or 70% on all graduate and undergraduate works, and Graduate Record Examination (GRE) scores of at least 1200 for the combined Quantitative and Verbal sections and 3.5 for the Analytical section. An undergraduate degree in mathematics, chemistry or physics combined with a strong interest in engineering topics may be suitable preparation when certain required undergraduate courses are taken (see graduate student handbook for further details). Exceptions to these requirements may be made if other persuasive evidence indicating the student’s potential of success is available.

In addition, all international students (except those with a degree from a U.S. institution) must have a minimum score of 550 (paper) or 213 (computer) on the Test of English as a Foreign Language (TOEFL).

It is possible to directly admit a student with a bachelor’s degree to the Ph.D. program if the student’s qualifications are exceptional. Under some circumstances, such arrangement can be made with a recommendation of a faculty member. Students are encouraged to contact the departmental faculty if they are interested in going into the Ph.D. program without a Master’s degree.

Regular admission to the Master’s program constitutes admission to candidacy for that degree. Admission to candidacy for the Ph.D. degree is automatically granted when the student passes the Qualifying Examination.

The Master of Science Degree (M.S.)

There are two options (Plan B containing two programs) for fulfilling the requirements for the M.S. degree:

**Plan A (Thesis Plan)**

A minimum of 24 semester hours of coursework and a thesis are required. The thesis must be actively supervised by a full or associate member of the Graduate Faculty. In no case will independent work, taken as ME 699, ME 780-783 or ME 790, be counted as part of the 24 hours of coursework when the course material is related to the student’s thesis. No more than two (one is typical, two is very rare) special courses such as ME 699, ME 780-783 or ME 790 or independent courses/projects may be counted towards fulfilling requirements for the Master’s degree.

In case of an independent course project, the instructor must provide the DGS with a course syllabus in order to obtain approval for the course;

**Plan B (Regular Program)**

All M.S. students are admitted to the option B program by default. A minimum of 30 semester hours of coursework is required for this program. Upon entering the option B program, students are encouraged to transfer to the Ph.D. program if a research-oriented career is desired;

**Plan B (Paducah Program)** This Plan B program is designed for students at the Paducah campus. The admission requirements are the same as the regular Plan B program. However, the course requirements are modified to make it more flexible for students to take ITV classes from Lexington to the Paducah campus.

The Doctor of Philosophy Degree (Ph.D.)

Successful completion of the M.S. program does not guarantee automatic admission to the Ph.D. program. Students who wish to continue for the Ph.D. degree must make application by letter to the Director of Graduate Studies and to the Graduate School by no later than the fourth week of the semester in which the M.S. degree is awarded.

To obtain a Ph.D. degree from the Department of Mechanical Engineering, a student must:

(a) Earn 48 graduate credit-hours taken at the University of Kentucky while in graduate standing after receiving a bachelor’s degree. Alternatively, those with a M.S. may satisfy this requirement by earning 24 graduate credit-hours taken at UK. Students with a M.S. from another institute are required to obtain a letter from the DGS recommending the transfer of credit.

(b) Satisfy the Ph.D. mathematics requirement

(c) Pass the Pre-Qualifying Examination after the first semester of the Ph.D. program.

(d) Pass the Ph.D. Written Qualifying Exam. The Preliminary Exam is a written exam and constitutes the written portion of the Qualifying Exam allowed by the Graduate School. This exam tests the student’s knowledge in the field of mechanical engineering. This is a uniform exam that is required in three subject areas as described in the graduate student handbook. These area exams are given by the corresponding departmental-wide Technical Area Committees. The Ph.D. Preliminary Exam must be taken during or before the student’s third Fall Semester (fourth if admitted without a M.S. from the time of admission to the Ph.D. program. For part time students, this time requirement may be modified with the approval of the student’s advisor and the DGS). Failure to attempt the Preliminary Exam within the specified time limit will result in the student’s termination from the ME doctoral program.

(e) Pass the Ph.D. Oral Qualifying Exam. This exam inspects the soundness of the student’s proposed doctoral dissertation research. A prospectus prepared by the student and submitted to the student’s Advisory Committee is required two (2) weeks in advance of the exam. Only those who have passed the Preliminary Exam and have satisfied the Ph.D. mathematics requirement may sit for this exam. As this is an exam mandated by the Graduate School, all Graduate School regulations regarding this exam must be met.

(f) Pass the Final Examination. This exam is mandated by the Graduate School, and therefore all Graduate School regulations regarding this exam must be met.

(g) Meet all applicable Graduate School regulations.

For a more detailed description of these requirements, contact the Director of Graduate Studies.

The Department, in collaboration with the College of Engineering’s Center for Manufacturing, has several research laboratories: Acoustics Lab, Advanced Structures Lab, CAD/CAM/CAE Lab, Combustion and Fire Research Lab, Computational Fluid Dynamics Systems (CFD) Lab, Engineering Metrology Lab, Fluid Mechanics Lab, Machine Vision Lab, Machining Dynamics Systems Lab, Machining Research Lab, Manufacturing Simulation and Tribology Research Lab, Nonlinear Dynamics Research Lab, Metal Forming Research Lab, Non-traditional Manufacturing Processes Lab, Phase Change and Microgravity Heat Transfer Lab, Radiative Transfer and Optics Lab, Rapid Prototyping Lab, Robotics Lab, Thermal Sensing Lab, and Welding Research Lab.
Medical Sciences

Admission Requirements

The M.S. program in Medical Sciences is designed to prepare candidates for research careers in academia, industry and government laboratories. This program may also be used to prepare students for further graduate and professional education. Admission to the graduate program is competitive and is based upon academic background, professional recommendations, performance on the Graduate Record Examination (GRE), experience, and when possible, personal interviews. Students should have completed an undergraduate degree in chemistry, biology, biochemistry, engineering, mathematics, neurosciences, physics, pharmacy or psychology. Although there are no formal course requirements, it is recommended that students have completed undergraduate courses in organic chemistry, physical chemistry, calculus, physics, and the biological sciences.

Degree Requirements

The Medical Sciences program encompasses the disciplines of anatomy and neurobiology; microbiology, immunology and molecular genetics; molecular and biomedical pharmacology; molecular and cellular biochemistry; and physiology. Students are required to select one of the five disciplinary areas. The student, in cooperation with the major professor/thesis advisor and the student’s Advisory Committee, will determine the elective course work in the area of specialization and in related basic sciences. Each student, regardless of disciplinary specialization, will take the required 10-11 hour core curriculum and will choose from the list of recommended courses and departmental course work to develop a disciplinary specialization.

The degree requirements will vary with the thesis (Plan A) and the non-thesis (Plan B) option selected by the student. The thesis option requires 24 hours, half of which must be at the 600+ level, as well as an approved thesis based on the candidate’s research. The non-thesis option requires a minimum of 30 graduate credit hours, half of which must be at the 600+ level. In addition, the program requires a core curriculum of 10-11 hours in biochemistry and cell and molecular biology. The program does not mandate a language requirement.

Financial support is not provided for students in the M.S. in Medical Sciences program. Inquiries regarding the program should be directed to the Director of Graduate Studies, M.S. in Medical Sciences Program or to the Director, Integrated Biomedical Sciences.

Core Curriculum

The core curriculum is designed to provide a broad overview of medical sciences at the molecular level, to emphasize the importance of scientific integrity, and to spark an interest in current scientific developments that will establish a pattern of lifelong learning in the student.

- IBS 601/BCH 607 Biomolecules and Metabolism (3 credits)
- IBS 602/BCH 608 Biomolecules and Molecular Biology (3 credits)
- IBS 603 Cell Biology (3 credits)
- TOX 600 Ethics in Scientific Research (1 credit)

Seminar Course - IBS 607 (0 credits) or seminar in department of specialization (ANA 600, BCH 618 or BCH 619, MI 772, PGY 774, PHA 770; 1 credit)

Recommended Courses:
- IBS 604 Cell Signaling (3 credits)
- IBS 605/MI 604 Experimental Genetics (2 credits)
- IBS 606 Integrated Biomedical Sciences (4 credits)

Course Work: The minimum requirements are as follows -
1. Plan A: Twenty-four hours of graduate level courses (50% must be 600+ level; 2/3 in organized courses). Research required for the master’s thesis cannot be included in the required 24 credit hours of course work.
   Plan B: Thirty hours of graduate courses (50% must be 600+ level; 2/3 in organized courses).
2. Ten-eleven hours of core curriculum (see above).
3. The Advisory Committee will determine the remainder of hours from the recommended courses and/or the area of the student’s specialization.

**Microbiology**

The Ph.D. program in Microbiology is designed to prepare candidates for research careers in academia, industry, and government laboratories. The program has at its heart a close student-mentor relationship that allows for the maximum flexibility in the development of independent and creative scientists.

**Admission Requirements**

Admission to the graduate program is competitive and is based upon academic background, professional recommendations, performance on the Graduate Record Examination (GRE), experience, and when possible, personal interviews. Students should have completed an undergraduate degree in chemistry, biology, biochemistry, engineering, mathematics, neurosciences, physics, pharmacy or psychology. It is recommended that students have completed undergraduate courses in organic chemistry, physical chemistry, calculus, physics, and the biological sciences.

Students will have the opportunity to join faculty research programs across a spectrum of topics including: pathogenic microbiology, virology, cancer cell and molecular biology and cellular and molecular immunology. Specific research areas include microbial physiology, bacterial pathogenicity, cellular and molecular immunology, tumor immunology, lymphocyte differentiation, membrane biology, molecular virology, molecular genetics and gene regulation. Students will utilize the techniques of molecular biology, genetic engineering, genomics, array technology, transgenic technology, hybridoma technology and fluorescence-activated cell sorting. The program of study is tailored to the individual background and career goals of the student and stresses an interdepartmental approach both in the selection of courses and in the pursuit of research. The most important aspect of the doctoral program is an independent research thesis under the direction of the student’s mentor. Students are expected to participate in graduate seminars, journal clubs, research seminars; to interact with visiting scholars; and to present the results of their research at local and national meetings. Financial aid is available for qualified students.

All students pursuing degrees in the biomedical sciences at the University of Kentucky College of Medicine are admitted through the Integrated Biomedical Sciences Curriculum (IBS). This first-year core curriculum provides broad-based exposure to biochemistry, cell biology, molecular biology, genetics, cell signaling and integrated physiology and flexibility in selecting a research emphasis among 125 faculty in the Biomedical Sciences. Students select their doctoral degree program at the completion of the first year core curriculum from among the departments of Anatomy and Neurobiology; Microbiology, Immunology and Molecular Genetics; Molecular and Biomedical Pharmacology; Molecular and Cellular Biochemistry; and Physiology. Inquiries regarding admission should be directed to the Director, Integrated Biomedical Sciences Curriculum, University of Kentucky College of Medicine, Lexington, KY 40536-0298. Information regarding the Microbiology program may be obtained from the Director of Graduate Studies, Department of Microbiology, Immunology and Molecular Genetics, University of Kentucky College of Medicine, Lexington, KY 40536-0298, (800-462-5257) or the Microbiology and Immunology Web site: <http://www.mc.uky.edu/microbiology/>.

**Mining Engineering**

The programs leading to the degrees of Master of Science in Mining Engineering, Master of Mining Engineering, and Doctor of Philosophy are offered through the Department of Mining Engineering. The objectives of these programs are to provide an advanced level of applied science for use in the mining industry and to offer specified topics for research specialization.

The Master of Mining Engineering is a professionally-oriented degree intended for the student who wishes to add topics to a basic baccalaureate degree for use in a working career. It is also appropriate for the returning adult student who needs more subject matter for career betterment. The Master of Science in Mining Engineering is a research-oriented degree appropriate for a career in problem solving, research, or technology development. The Doctor of Philosophy is the terminal degree in the subject and is normally required for a career in teaching and research.

The Master of Mining Engineering requires 30 credits of course work capped by a professional paper that reports on a current topic of scientific or technical interest, quite possibly connected to the student’s career interests. For the Master of Science in Mining Engineering, 24 credit hours of course work plus an acceptable thesis (Plan A) or 30 credits of course work and a report on one or more research topics (Plan B) are required to fulfill program requirements. Plan B Master of Science degrees will be reserved normally for students who have already demonstrated their ability to conduct and report on independent research.

**Admission Requirements**

Enrollment in either master’s degree program is open to qualified applicants with an undergraduate degree in mining engineering or other engineering and science fields. A grade point average of 2.8/4.0 is normally required on all undergraduate work. Persons with undergraduate degrees in fields other
than mining engineering are required to make up deficiencies in undergraduate mining engineering courses.

Applicants for admission must have a combined score on the verbal and quantitative portions of the Graduate Record Examination (GRE) in excess of 1,000. Scores on the analytical portion are also considered. Foreign applicants whose native language is other than English must take the Test of English as a Foreign Language (TOEFL) and score at least 550 before they can be admitted.

In addition to satisfying general Graduate School and College of Engineering admissions requirements, applicants for admission to the M.Min.E., M.S. in Min.E., and Ph.D. degree programs in mining engineering must have been awarded the Bachelor of Science degree prior to admission to the graduate degree status. Normally, it is expected that applicants will have graduated from an engineering program accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET). For applicants from non-U.S. universities, from related but non-engineering disciplines, and from institutions that do not have accredited engineering programs, an assessment will be made of the comparability of educational background to that prescribed and appropriate remedial coursework work established as a provision for admission.

The Ph.D. degree has no formal course requirement. Generally, students take a number of courses to prepare for the qualifying examinations and usually need to spend two years to complete a suitable dissertation. Most students find it necessary to take course work beyond the master’s degree as necessary preparation for the qualifying examination. There is a language requirement for the Ph.D.

Current research areas include the following: rock mechanics and ground control, operations research, mine ventilation, underground construction, surface mining and reclamation, mine environmental engineering, mine power systems, coal preparation, and mineral economics. In addition to the graduate courses in mining engineering, graduate courses in civil engineering and other disciplines may be used to satisfy degree requirements providing they are appropriate to the student’s program of study.

Additional information about the graduate program in mining engineering can be obtained by writing the Director of Graduate Studies, Department of Mining Engineering.

GRADUATE DEGREE PROGRAMS / 101
Molecular and Cellular Biochemistry

Graduate study in biochemistry is designed to prepare candidates for research careers in academics, industry, and government laboratories. Admission to the graduate program is competitive and based upon academic background, professional recommendations, performance on the Graduate Record Examination (GRE), experience and, when possible, personal interviews. Students should have completed an undergraduate degree in chemistry, biology, biochemistry, engineering, mathematics, physics, or pharmacy. It is recommended that students have completed undergraduate courses in organic chemistry, physical chemistry, calculus, physics, and biological sciences.

Students will have the opportunity to join faculty research programs studying a spectrum of topics including: signal transduction, protein structure and function, transcriptional regulation, the cytoskeleton, secretion and vesicular fusion, disease mechanisms (atherosclerosis, cancer, infectious disease, diabetes, Alzheimer’s), drug design, computational biology, development, nucleic acid dynamics, and membrane biogenesis & function. The program of study stresses an interdisciplinary approach both in the selection of courses and in the pursuit of research. Students are expected to participate in graduate seminars, journal clubs, and research seminars; to interact with visiting scholars; and to present the results of their research at local and national meetings. Financial aid is available to all students in the program.

Admission Requirements

Admission to the Ph.D. program in Molecular and Cellular Biochemistry is through the Integrated Biomedical Sciences (IBS) Curriculum.

Inquiries regarding admission should be directed to the Director of Graduate Studies, Department of Biochemistry, University of Kentucky College of Medicine. Information regarding the Ph.D. program in Biochemistry may also be obtained at www.mc.uky.edu/biochemistry/.

Music

The School of Music offers the Master of Arts (M.A.) in musicology or theory; Master of Music (M.M.) in performance, composition, sacred music, or music education; Doctor of Musical Arts (D.M.A.) in performance, conducting (choral or instrumental), or composition; and the Doctor of Philosophy (Ph.D.) in musicology, music education or theory. The applicant for the master’s degree is expected to have earned an appropriate undergraduate degree and the applicant for the doctoral degree is expected to have earned an appropriate master’s degree at the University of Kentucky or an equivalent degree from a comparable institution. Graduate work is also provided for persons seeking Rank I and Rank II state certification in music education. Requirements for Rank II coincide with those for the M.M. in Music Education; requirements for Rank I may be completed by a planned and approved 30 semester hour program in addition to Rank II requirements or 60 semester hours of planned and approved graduate credit, including the master’s degree.

Admission Requirements

Placement examinations in theory, music history and literature, and the proposed field of specialization are required of all applicants before admission to graduate programs in music. Graduates of, or students currently enrolled at, the University of Kentucky are not exempt from this requirement. Those seeking a degree in performance must audition as well, and should contact the appropriate applied faculty member to schedule an audition. Entrance examinations and auditions are held four times each year for those wishing to enroll: the second Saturday in November, the last Saturday in January, the first Saturday in March and the second Saturday in July. For those wishing to begin studies in the summer session, examinations and auditions must be taken no later than the first Saturday in March. The Director of Graduate Studies must be notified at least four weeks in advance of the date chosen for examinations (and audition if applicable) by the applicant. In special circumstances and with the consent of the Director of Graduate Studies, entrance examinations may be taken at times other than those stated. Acceptance of audition tapes is at the discretion of the appropri-
GRADUATE DEGREE PROGRAMS / 103

ate applied faculty member, but D.M.A. candidates and those applying for assistantships must audition in person.

Note: Persons not applying for financial assistance may choose any of the above dates. Persons applying for Non-Service Fellowships must take the examinations (and the audition if applicable) no later than the last Saturday in January. Those applying for teaching assistantships may choose to take the examinations in November, January, or March for application for the subsequent fall semester. Those wishing to begin studies during a summer session must take the examinations no later than the first Saturday of March.

GENERAL REQUIREMENTS FOR MASTER'S DEGREE

Foreign Language Requirements. The Master of Arts degree requires a reading knowledge of one foreign language, preferably French or German. Voice majors are expected to have taken at least one year each of undergraduate level German, French, and Italian (or the equivalent by petition to the Director of Graduate Studies in the School of Music) as a prerequisite for degree study. If deficient, a student must enroll in language courses each semester of study until the deficiency is removed.

Thesis Requirements. The Master of Arts degree requires a thesis (Plan A: see general requirements). For the Master of Music degree in Performance, a public recital acceptable to the faculty is required in lieu of a thesis. For the Master of Music degree in Composition, a composition of major proportions, acceptable to the composition-theory faculty and publicly performed, must be submitted in lieu of a thesis. A thesis is optional (Plan A or Plan B) for the Master of Music in Music Education. A final comprehensive examination is required for each program.

MASTER OF ARTS

Prerequisites: A suitable background in music literature and music theory, and a reading knowledge of one foreign language, normally French or German.

MASTER OF ARTS
(Musicology Emphasis)

Music History and Literature 9-12
Theory (including MUS 670, 671, or 672) 6-9
Research Methods (MUS 618) 3
Directed Electives 0-6
Thesis 6
Total 30

MASTER OF ARTS
(Theory Emphasis)

Theory 9-12
Music History and Literature 6-9
Research Methods (MUS 618) 3
Directed Electives 0-6
Thesis 6
Total 30

MASTER OF MUSIC

Prerequisites: Submission of three original compositions.

Advanced Composition (MUS 673) 4
Orchestration (MUS 570 and 571) 4
Music History and Literature 6
Theory (including a minimum of one course from: MUS 671, or 672) 9
Directed Electives 1
Thesis Composition 6
Total 30

The thesis composition must be publicly performed. The student is responsible for the preparation of legible score and parts.

MASTER OF MUSIC
(Performance)

Prerequisites: Acceptance by the appropriate faculty of applied music.

Music Performance (including recital) 9
Music History and Literature 6
Theory (including MUS 670, 671 or 672) 6
Directed Electives 9
Recital 0
Total 30

This degree program is offered in the following areas: piano, voice (see below), organ, violin, viola, cello, flute, oboe, clarinet, saxophone, bassoon, trumpet, horn, trombone, euphonium, tuba, percussion and conducting (choral or instrumental). Wind, string and conducting majors must participate in at least one University-sponsored performing organization for two semesters.

MASTER OF MUSIC
(Voice Performance)

Voice Performance (including recital) 9
Music History and Literature (must include MUS 623) 6
Theory (including MUS 578, 670, 671, or 672) 6
Physiology and Functioning of the Singing Voice(MUS 665) 3
Materials, Techniques, and Literature of Voice Teaching (MUS 667) 3
Advanced German Vocal Repertory (MUS 620) 3
Total 30

A minimum of three full semesters, excluding summer sessions, is necessary for an M.M. in Performance.

MASTER OF MUSIC
(Sacred Music)

UK Requirements: 27
MUS 660 Choral Methods 3
Music History and Literature 3
Music Theory 3
Ensemble 2
Music Education 3
Choose from MUS 560, MUS 561, MUS 650 or other graduate music education course, in consultation with advisor.
Internship 3
Specialized area of study 10
Course work at an accredited seminary or other institution 6-9
Choose from topics such as Music in Worship, Designing Worship, Congregation, Worship and Spirituality, Worship and Music in the Liturgical Year, or other courses. Total 33

Specialized areas of study:
VOICE or KEYBOARD (organ or piano)
MUP 558 Choral Conducting 4
Music Performance (Voice or Keyboard) 6 +*
CHORAL CONDUCTING
MUP 658 Choral Conducting 8
Keyboard, MUP 501 or 503 2
+ An audition in the performing area (voice, organ, or piano) is required.
* A 15-minute jury before either the voice faculty (for vocal emphasis) or the keyboard faculty (for piano or organ emphasis) is required at the end of the applied study.

MASTER OF MUSIC
(Music Education - Plan A)

Core Requirements: 12
MUS 600 Research I 3
MUS 601 Foundations of Music Education 3
Music History and Literature 3
Music Theory (including MUS 578, MUS 670, MUS 671, or MUS 672) 3
Thesis 6
Music Education Electives 6
The student can select any Music Education courses 500 level or above.
Music Electives 6
The student can select any Music course 500 level or above in Performance, Music History, Music Theory, or Composition.

Total 30

Students planning to earn a doctorate in Music Education should elect Plan A.

MASTER OF MUSIC
(Music Education - Plan B)

Core Requirements: 12
MUS 600 Research I 3
MUS 601 Foundations of Music Education 3
Music History and Literature 3
Music Theory (including MUS 578, MUS 670, MUS 671, or MUS 672) 3

Specialized Area of Study 12
(The student will select 12 hours from one of these five areas: Instrumental Teaching, Choral Teaching, General Music, Orff Methods, Choral or Instrumental Conducting)

The student and advisor will determine the general area of emphasis and plan a set of courses which best fulfills the needs of the student).

Music or Education Electives 6
(The student can select any music or education courses 500 level or above.)

Total 30

Specialized areas of study for Plan B

INSTRUMENTAL TEACHING EMPHASIS - Band or Orchestra
(Student and Advisor choose twelve hours from courses below which would best fulfill the student’s needs.)
MUP Applied Performance (maximum of 4 hours) 1-4
MUP Secondary Applied 1-2
MUS 680 Band History and Literature 3
MUS 622 Symphonic Literature 3
MUS 660 Adv. Methods: Elementary General Music 3
MUP 558 Conducting or
MUP 658 Conducting 1-4
MUS 684 Advanced String Methods and Materials 3
MUS 570 Orchestration 2
MUS 706 Music Learning and Behavior 3
CHORAL TEACHING EMPHASIS (Student and Advisor choose twelve hours from courses below which would best fulfill the student’s needs.)
MUP Applied Performance (Maximum of 4 hours) 1-4
MUS 660 Adv. Methods: Elementary General Music 3
MUS 650 Music Education Workshop 1-3
MUS 660 Adv. Methods: Choral Techniques 3
MUP 558 Conducting or
MUP 658 Conducting 1-4
MUS 706 Music Learning and Behavior 3
GENERAL MUSIC TEACHING EMPHASIS - Elementary Music, Jr. High, Middle School General Music (Student and Advisor choose twelve hours from courses below which would best fulfill the student’s needs.)
MUP Applied Performance (maximum of 4 hours) 1-4
MUS 660 Adv. Methods: Elementary General Music 3
MUS 560 Orff Schulwerk Workshop 1-3
MUS 561 Orff Schulwerk Certification 2-6
MUS 680 Band History and Literature 3-1
MUS 766 Seminar in Music Education 3
MUS 664 Music and Special Learners 3
MUS 706 Music Learning and Behavior 3

CONDUCTING EMPHASIS - Instrumental or Choral (Student and advisor choose twelve hours from courses below which would best fulfill the student’s needs.)
MUP Applied Performance (maximum of 4 hours) 1-4
MUP Secondary Applied Performance 1-2
MUS 680 Band History and Literature 3
MUS 622 Symphonic Literature 3
MUS 681 Advanced Rehearsal Techniques - Band 3
MUP 558 Conducting or
MUP 658 Conducting (4 hours required) 1-4
MUS 660 Adv. Methods: Choral Techniques 3
MUS 570 Orchestration or
MUS 571 Orchestration 2
MUS 684 Adv. String Methods & Materials 3
MUS 706 Music Learning and Behavior 3

DOCTOR OF MUSICAL ARTS

The Doctor of Musical Arts program offers opportunity for fullest development as a performer, composer, or teacher of music performance or composition. Technical excellence is a prerequisite for admission into the program; doctoral study emphasizes work in adjunct areas of music, related fields, and research as they enhance and support the major area.

One foreign language, normally French or German, is required for all D.M.A. students. As a prerequisite for doctoral study, voice majors must have satisfied the foreign language requirement specified above for the Master of Music (Voice Performance) degree. If deficient, a student must enroll in language courses each semester of study until the deficiency is removed.

One lecture-recital and three formal recitals are required for performance majors and choral conducting majors. One lecture-recital and two formal recitals are required for instrumental conducting majors. The program content of the recitals will be established in cooperation with the student’s Advisory Committee. With its approval, a program of chamber music, a concerto performance with orchestra, or a major role in an opera or oratorio may fulfill the requirement for one of the recitals. In lieu of a dissertation, a doctoral project will be required as an indication of the student’s ability for scholarly study and research.

The Project for the D.M.A. in Performance will consist of two parts. Part 1 is a monograph that represents the culmination of a significant research project on a topic related to that of the lecture-recital. The monograph must be a well-reasoned, original contribution to the field of study, and should provide evidence
of scholarly achievement. A D.M.A. monograph differs from a Ph.D. dissertation principally in that it may be of more restricted scope, and that it may take a more interpretive, synthetic, or practical approach than is usual for a dissertation. Part 2 consists of thoroughly researched and documented written discussions of the remaining repertoire used in fulfilling the performance requirements. The monograph and discussions of repertoire are to be approved by the Advisory Committee in the same manner as a Ph.D. dissertation. If the Major Professor of a student in a performance program is not a Full Member of the Graduate Faculty, another member of the Advisory Committee, who is a Full Member of the Graduate Faculty, shall serve as co-chair. If the major professor of a student in a performance program is not a member of the Graduate Faculty, a Full Member of the Graduate Faculty shall serve as chair and major academic professor; the performance teacher shall serve as an additional, non-voting member of the committee.

The Project for the D.M.A. in Composition will consist of two parts. Part 1 is a large-scale original composition. The candidate is responsible for arranging a public performance of the work. Part 2 is an in-depth analysis and discussion of the composition. The composition and in-depth written analysis and discussion are to be approved by the Advisory Committee in the same manner as a Ph.D. dissertation.

The minimum course requirements beyond the master’s degree are as follows:

MUS 618 Research Methods* 3
Music History and Literature 9
Advanced Music Theory** 6
Performance Major 12
Minor (optional)*** 9
Total 30-39

DOCTOR OF MUSICAL ARTS

(voice performance)

Research Methods (MUS 618)* 3
Music History and Literature (must include MUS 623*) 6
Advanced Music Theory** 6
Voice Performance 12
Performance Related Study: must include MUS 665*, 667*, and 620* and 6 credits of Directed Research in Vocal Literature (MUS 780) 6-15
Minor (optional)*** 9
Total 33-51

DOCTOR OF MUSICAL ARTS

(choral conducting)

Research Methods (MUS 618)* 3
Music History and Literature (must include MUS 625) 9
Advanced Music Theory** 6
Advanced Choral Methods (MUS 660) 3
Performance Major**** 12
Minor (optional)*** 9
Total 33-42

DOCTOR OF MUSICAL ARTS

(instrumental conducting)

Research Methods (MUS 618)* 3
Music History and Literature (must include MUS 622 or MUS 680) 9
Advanced Music Theory** 6
Advanced Rehearsal Techniques (MUS 681) 3
Performance Major (6 hours of MUP 658 and 6 hours of MUP 758) 12

Minor (optional)*** Total 33-42

*If not completed at the master’s level.
**MUS 578 cannot be used to fulfill this requirement.
****The minor may be taken within or outside the School of Music, and is subject to the approval of the Advisory Committee and the chairman of the department concerned.
*****Must include a minimum of 4 credits of MUP 758

DOCTOR OF PHILOSOPHY IN MUSIC

The School of Music offers courses and research opportunities leading to the Ph.D. in music. Applicants must meet the entrance requirements of The Graduate School as well as those of the School of Music, and must show evidence of competence in musical performance. Applicants must submit a master’s thesis or a research paper of sufficient scope and quality to demonstrate competence in research and clarity of expression. The basic core requirements beyond the master’s degree are as follows:

Research Methods: MUS 618 (if not taken at the master’s level) 3
Music History and Literature beyond the master’s 9
Advanced Music Theory beyond the master’s* 6
Three seminars (minimum) beyond the master’s Total 27
(24 hours if competency in Research Methods is accepted by the Musicology faculty.)

There is no specific requirement in a minor area, but such work may be required by a student’s Advisory Committee if it is essential to the major research or field of concentration.

Satisfaction of language requirements will conform to The Graduate School policy; however, specific languages required will vary with individual options. *MUS 578 cannot be used to fulfill this requirement.

The Ph.D. in music may be pursued in one of three areas: music education, music theory, or musicology. The program outline for each area beyond the core requirements is given below; the student’s Advisory Committee advises on and plans the actual program of study.

MUSIC EDUCATION

Music in Higher Education (MUS 762)
Psychology of Music (MUS 770)
At least one graduate level course in statistics
A knowledge of acoustics (PHY 140 or equivalent), A knowledge of specialized research in music education (MUS 600 or equivalent). These requirements must be met by the end of the first year of doctoral study.
Additional courses in music education or adjunct subjects as recommended by the Advisory Committee.

MUSIC THEORY

Pedagogy of Theory (MUS 674)
Advanced Analytical Techniques (MUS 676)
History of Music Theory (MUS 678)
Additional courses in music theory or adjunct subjects as recommended by the Advisory Committee
A reading knowledge of French, German, or a language appropriate to the research interest

MUSICOLGY

Medieval and Renaissance Notation (MUS 700)
Proseminar in Musicological Methods (MUS 703)
Additional courses in musicology or adjunct subjects as recommended by the Advisory Committee
A reading knowledge of at least two foreign languages, normally German and either French or Italian

In all cases, the foreign language requirement(s) must be met by the end of the first full year of study in the Ph.D. program. The student’s Advisory Committee must be formed and appointed by the Dean of the Graduate School prior to advance registration for the student’s third semester. The dissertation topic and prospectus must be approved by the Advisory Committee; the dissertation itself must be the result of original research which adds to or modifies what has previously been
known on the subject. Qualifying examinations must be taken no later than one semester after the completion of course work. A student is admitted to candidacy for the Ph.D. degree only after meeting the language requirement(s) and passing the qualifying examinations.

COOPERATIVE PH.D. IN MUSICOLOGY
University of Kentucky
and
University of Louisville

A cooperative Ph.D. in Musicology is available from the University of Kentucky and the University of Louisville. The faculties and facilities of both universities are available to students on either campus. If the student is enrolled full-time at either university, courses from the other are available without charge.

Students interested in this program should contact the Associate Dean of the Graduate School, University of Louisville, or the Director of Graduate Studies at the University of Kentucky, School of Music, for further information. The general regulations for doctoral students at the University of Kentucky will apply.

Admission. Every applicant must be admitted to the graduate schools of BOTH universities. Official transcripts and GRE scores for students admitted to the University of Louisville will be sent to the Director of Graduate Studies, School of Music, University of Kentucky by the Graduate School, University of Louisville. Applicants may be admitted provisionally on the recommendation of the Director of Graduate Studies in Music at the University of Kentucky pending receipt of GRE scores and/or completion of the placement examination at the University of Louisville.

Language Requirements. The University of Louisville will notify the Director of Graduate Studies, University of Kentucky, that a student has completed the language requirements.

Residence Requirements. At least three regular courses must be taken at the University of Kentucky. Residence requirements may be satisfied at the University of Louisville, University of Kentucky, or a combination of both. A student must be in residence as a full-time student or the equivalent for a minimum of four semesters beyond the master’s degree. At least two of these semesters must be consecutive and precede the qualifying examination.

The University of Louisville will notify the Director of Graduate Studies, University of Kentucky, (if residency is being fulfilled at the University of Louisville) of the intent to schedule the qualifying examination and confirm that the student meets pre-qualifying requirements. Each candidate for the doctorate fulfilling residency at the University of Kentucky must complete two semesters of full-time dissertation study immediately after the qualifying examination by registering for a total of 18 credit hours in MUS 769. The candidate must maintain candidacy by registering for MUS 769 or Music History 769 (zero credit) each semester thereafter until the dissertation is successfully defended.

Advisory Committee. The Advisory Committee will be composed of six graduate faculty members, three from each institution.

Further information may be obtained from the University of Louisville Graduate School Bulletin.

CERTIFICATE IN MUSIC THEORY PEDAGOGY

The School of Music offers course work leading to the Certificate in Music Theory Pedagogy. The Certificate requires a total of 15 hours consisting of the following courses:

- MUS 674 Theory Pedagogy (3)
- MUS 675 Internship (3)
- MUS 676 Advanced Analytic Techniques (3)
- and
- two elective theory courses selected from the following:
  - MUS 572 Counterpoint (3)
  - MUS 573 Counterpoint (3)
  - MUS 670 Musical Style I (3)
  - MUS 671 Musical Style II (3)
  - MUS 672 Musical Style III (3)
  - MUS 677 Contemporary Music Idioms (3)
  - MUS 678 History of Theory (3)
  - MUS 772 Seminar in Theory (3)
  - MUS 799 Independent Work in Music Theory (1-3)

The Certificate will be awarded upon completion of the requirements. Students working on the Certificate are expected to earn a grade of B or higher in each certificate requirement.

MUSIC COURSES

All music performance courses (MUP) may be repeated three times for credit. Music ensemble courses (MUC) may be repeated indefinitely.

All music performance courses carry from one to four credits during the fall and spring semesters. (Applied music offerings during the summer are limited.)

Nursing

The College of Nursing offers graduate programs leading to the Master of Science in Nursing and to the Doctor of Philosophy. The College also offers a professional clinical doctorate, the Doctor of Nursing Practice.

**Master of Science**

The Master of Science in Nursing program builds on a student’s undergraduate degree, and prepares the individual for advanced practice nursing in a chosen specialty. Research utilization, evidence-based practice, and leadership are emphasized throughout the program. There are six specialty tracks:

1. **Acute Care Nurse Practitioners** focus on diagnosing and managing acute health problems, provide tertiary preventive care and work with interdisciplinary teams.
2. **Adult Nursing** focuses upon the care of adults across the life span in critical illness, adult, oncology, rehabilitation, ER-trauma, gerontological nursing, and nurse care manager.
3. **Parent-Child Nursing** focuses upon children, adolescents, and families, perinatal nursing, and neonatal.
4. **Primary Care Nurse Practitioners** focus on providing primary health care. They diagnose and treat common health problems, promote wellness and prevent illness and help clients learn effective self-care. The Women’s Health Nurse Practitioner specialization is available through collaboration with the University of Louisville.
5. **Psychiatric/Mental Health Nursing** focuses upon the specialized care of individuals and families with psychiatric and addictive problems in hospital and community settings.
6. **Public Health Nursing** focuses on preparing nurses to assume positions in public health agencies delivering health and nursing services to specific populations, as nurse managers, community health clinical nurse specialists, and nurse care managers.

**Admission Requirements**

Applicants to the master’s degree program must meet the minimum requirements of the Graduate School, as well as the following requirements of the nursing program: satisfactory
scores on the Graduate Record Examination (GRE), a minimum undergraduate grade point average of 2.75 on a 4.0 grading scale, a baccalaureate degree in nursing from a school accredited by a nationally recognized organization, a goal statement, three references, an interview, and a graduate-level statistics course (completed prior to admission). Nurse licensure in the state where clinicals take place, and clinical experience prior to the first clinical course, are also required. Final admission recommendations are made on a competitive basis.

The Master of Science in Nursing degree requires a minimum of 40 credit hours of course work and clinicals. Some specialties may require more. All students are required to take theories, assessment, clinical reasoning, research, leadership, evidence-based nursing practice, and an elective. In addition, each student must maintain a minimum 3.0 cumulative GPA on all graduate nursing courses and pass a final examination. Students may pursue part-time study through flexible scheduling and selected evening/weekend courses. The College has an outreach site in Morehead, KY. The deadline for receipt of all application materials is March 1 for Fall admission and November 1 for Spring admission. Some MSN specialty areas admit Fall semester only. Late applicants will be considered on a space-available basis.

Nurses with diplomas or associate degrees have the choice of combining their programs of study for the BSN and MSN degrees. The RN/MSN option provides qualified registered nurses with an accelerated approach to career advancement from the associate or hospital diploma in nursing to the master’s degree. Applicants to the RN/MSN track must meet the criteria listed for the BSN program and for the MSN program and that of the Graduate School. Admission requirements are: an earned associate degree in nursing from a college accredited by one of the six academic accrediting associations, successful completion of ACT-PEP test for diploma program graduates only, nursing experience, completion of all University Studies Program requirements, a GPA of 3.0 on a 4.0 scale, satisfactory GRE scores, a written goal statement, three letters of reference, and a personal interview. The MSN degree will not be awarded without concurrent or prior completion of the BSN requirements. The deadline for receipt of all application materials is May 1. Late applicants will be considered on a space-available basis.

The College of Nursing has an articulated RN to MSN degree option with Morehead State University. Individuals interested in this option may contact the College of Nursing Office of Graduate Student Affairs for more information.

Doctor of Philosophy

The Doctor of Philosophy in Nursing program prepares nurse scholars to contribute to the development of nursing science through clinical research and the application of knowledge to nursing practice. Graduates assume roles in research, education, and administration.

Admission Requirements

Applicants to the Ph.D. program must meet the minimum requirements of the Graduate School, as well as the following requirements of the nursing program. An applicant must possess a master’s degree in nursing from a nationally accredited school and a 3.3 or higher grade point average on a 4.0 scale for all master's level work. Satisfactory scores on the GRE are expected. Personal interviews, a goal statement, and three references are required. Final admission recommendations are made on a competitive basis.

A student enrolled in the master's degree program, who has completed 17 credit hours of MSN course work, can apply for admission to the Ph.D. program. To apply for Ph.D. study, an MSN student must submit a letter to the Assistant Dean for Research and Ph.D. Students expressing a desire to enroll in the doctoral program submit a revised goal statement reflecting interest in doctoral education and research, attach a sample of scholarly work, request the academic advisor to send the Assistant Dean an admission recommendation, and complete an interview with the Assistant Dean and one additional faculty member.

The Doctor of Philosophy degree in nursing requires a minimum of 45 credit hours of course work beyond the master’s degree, participation in at least one research project prior to qualifying examinations, plus 18 hours of residence credit for dissertation research. Written and oral examinations are required to qualify as a degree candidate. Pre- and post-qualifying residency requirements can be fulfilled using any of the three models approved by the Graduate School. There is a final examination for defense of the dissertation research.

Doctor of Nursing Practice

The College of Nursing also offers a professional clinical doctorate, the Doctor of Nursing Practice. Information about this program may be found on the College of Nursing Web page.

**Nutritional Sciences**

The multidisciplinary Graduate Program in Nutritional Sciences provides opportunity for advanced study leading to the M.S. in Nutritional Sciences and Ph.D. degrees. The aim of the program is to develop nutritional scientists who are able to function in a variety of sophisticated academic, industrial and professional settings. Educational opportunities exist in agricultural, biological, clinical, medical, social and basic nutritional sciences. The program is organized on an interdepartmental and intercollege basis. More than 38 faculty members from various academic units of the university including Agronomy, Animal Sciences, Anthropology, Behavioral Science, Biochemistry, Clinical Sciences, Endocrinology, Horticulture and Landscape Architecture, Internal Medicine, Neurology, Nutrition and Food Science, Oral Health Science, Psychiatry, Surgery and Toxicology are involved in the teaching and research activities of the program. The program is diversified and systematic, yet highly flexible. Individualized professional training and extensive research opportunities are available to students.

Program faculty have modern research laboratory facilities for conducting human, animal, and cell culture studies using state-of-the-art molecular biology, trace mineral, vitamin, lipid, amino acid, enzyme, hormone, stable and radioactive isotope, microcirculatory, and energy assessment analysis. Clinical facilities for training and research include the University of Kentucky Hospital, Veterans Administration Hospital, Sanders-Brown Center on Aging, University of Kentucky Medical Center Outpatient Clinics, and the Markey Cancer Center. Clinical research units are present at both the University of Kentucky Medical Center and the Veterans Administration Medical Center, and ongoing nutritional studies are performed at both units. All facilities are within walking distance of each other. Nutritional support teams are established at both the University and Veterans Administration Hospitals. Opportunities for community-based research exist locally, throughout the state, and in international settings. Further information may be obtained by writing to the Director of Graduate Studies, Multidisciplinary Ph.D. Program in Nutritional Sciences, 203A Health Sciences Building, University of Kentucky, Lexington, KY 40506-0003.

**Admission Requirements**

Admission to the Ph.D. degree program requires:

1. An M.S. Degree with a GPA of 3.2 or above on a 4.0 scale.
2. A B.S. Degree with a GPA of 3.0 or above on a 4.0 scale.
3. An average GRE score, on all three sections, greater than the 50th percentile; Writing section greater than 3.0.
4. For international applicants a TOEFL score of 550 or better is required; all applicants must demonstrate proficiency in verbal and written English communication.
5. Submission of a brief essay (not in excess of 3 pages) describing the long-term career goals of the applicant and how she/he feels the Program in Nutritional Sciences would advance these goals.

Admission to the M.S. degree program requires:

1. A baccalaureate degree from a fully accredited institution of higher learning.
2. A minimum undergraduate grade point average of 2.9 and 3.0 on all graduate work.
3. An average GRE score on the Verbal, Quantitative, and Analytical sections greater than the 30th percentile.
4. For international applicants a TOEFL score of 550 or better is required; all applicants must demonstrate proficiency in verbal and written English communication.
5. Submission of a brief essay (not in excess of 3 pages) describing the long-term career goals of the applicant and how she/he feels the Program in Nutritional Sciences would advance these goals.

**Degree Requirements**

Students are required to complete the core curriculum. Elective
courses to be taken will be recommended by the advisory committee.

Pharmaceutical Sciences

Admission Requirements

For admission to graduate study in pharmaceutical sciences a student should have a sound background in biology, chemical engineering, chemistry or pharmacy, with a mastery of mathematics through calculus.

Entry into the program will require an undergraduate or professional program GPA of at least 3.0 for the Ph.D. degree.
We also require three letters of recommendation from current or former college professors addressing the scientific research skills and motivation of the applicant.

The Pharmaceutical Sciences Graduate Program was established in 1967 to prepare motivated individuals for academic and industrial careers in pharmaceutical and biomedical research. It has trained more than 220 Ph.D. graduates. The program offers two training options: a traditional option in which most of the students have been enrolled, and another track focused on clinical research.

**Traditional Pharmaceutical Science Track**

The goal is to develop scientists who possess a blend of contemporary basic science skills and an understanding of their role in the development of new drugs. This is achieved through intense laboratory experiences in a biomedical science of interest, such as pharmacology, medicinal chemistry or pharmaceutics that lead to a laboratory-based dissertation research project.

**Clinical Pharmaceutical Science Track**

The goal is to develop scientists who possess a blend of contemporary clinical and basic science skills. This is achieved through research in the clinically oriented pharmaceutical sciences that includes intense clinical experience in a medical specialty of interest, such as cardiology, neuroscience, critical care, neonatal/pediatric medicine or oncology and an integrated laboratory-based and clinical dissertation research project. A Pharm.D., M.D., D.D.S., D.V.M. or other professional health degree is required for admission into this training track.

Both Tracks include state-of-the-art course work.

Research projects are focused in one of four areas of Graduate Study.

**Drug Discovery and Design**

Research in this area focuses on chemical, biochemical, biophysical and molecular approaches toward the design and development of new therapeutic entities. Specific areas of focus include the development of anticancer agents, anti-inflammatory drugs, anti-thrombotic drugs, novel opiate analogies, anticonvulsants, anti-Alzheimer and anti-Parkinson drugs, agents for the treatment of psychostimulant abuse, neuroprotective agents, and drugs that interact with nicotinic receptors. Research is also being carried out on cell signaling pathways, facilitating the development of strategies designed to correct such signaling defects.

**Pharmaceutics Drug Delivery and Analysis**

Research in this area focuses on discovery and evaluation of novel drug delivery systems as they relate to the physical, chemical, and biochemical properties of a therapeutic entity. It includes the development of intravenous and extravascular dosage formulations for synthetic organic molecules, bioengineered proteins, and antisense oligonucleotides to optimize their therapeutic value.

**Pharmacology**

Research in this area utilizes multidisciplinary approaches to study drug response mechanisms in healthy and pathophysiological states. It includes substrate/receptor interactions, and their ability to trigger physiological, pharmacological and toxicological responses in various models ranging from cell culture, to whole animal studies.

**Research in this area focuses on characterization and assessment of the relationship between drug concentration and response. It is supported by studies on the fundamental mechanisms by which drugs and other bioactive substances are absorbed, transported, metabolized, and excreted from the body. It utilizes state-of-the-art techniques to understand the cellular and molecular basis for the effect that disease, genetic variation and drug-drug interactions may have on these processes.**

**Course Work**

The following courses will be taken by all students enrolled in the program, although courses may be waived or other courses substituted given the background of the individual student.

Philosophy

Admission Requirements

It is expected that candidates admitted to the graduate program in philosophy will: (1) provide proof of completion of a B.A., B.S., or M.A.; (2) have given evidence of superior skills on the GRE; (3) have achieved an overall grade-point average of at least 3.2 (4.0 scale) in all undergraduate course work; and (4) have achieved an overall grade-point average of at least 3.5 in all graduate course work.

Degree Requirements

The Department of Philosophy offers programs of study leading to the Doctor of Philosophy and the Master of Arts degrees. Ordinarily, applicants for graduate study in philosophy at the University of Kentucky will enter the Ph.D. program. The purpose of the Ph.D. program is to develop the student's ability to do serious, advanced research in philosophy. The program is designed to accommodate the needs of individual students at an advanced level to pursue a traditional degree in philosophy, engage in interdisciplinary research to prepare for professions outside of philosophy itself, or prepare for the profession of teaching philosophy. The Ph.D. program requires the completion of 66 hours of course work, or 36 hours of course work beyond course work done for an M.A. in philosophy at the University of Kentucky or elsewhere. Normally, 18 of the 36 required post-M.A. hours will be taken for writing the dissertation, leaving 18 of the required hours for non-dissertation course work. Students will need to demonstrate reading competence in at least one foreign language, as well as competence in logic. They will also complete a three course requirement in 20th century philosophy. In addition, all Ph.D. students will need to pass comprehensive examinations in metaphysics and epistemology and in value theory. A Qualifying Examination in each student's area of specialization precedes the writing of the dissertation. Students entering the Ph.D. program without an M.A. in philosophy from the University of Kentucky are expected to complete their degree work within five years. Every effort will be made to see that all students entering the Ph.D. program without an M.A. in philosophy from the University of Kentucky are offered five years of financial support (teaching assistantships and/or fellowships), with ongoing funding for those years contingent on the availability of funds and the student's continuing to make satisfactory progress through the program. Ph.D. students who have completed all requirements for the M.A. in philosophy at the University of Kentucky will be eligible to receive the M.A. in philosophy en passant.
for graduate physical therapists are available through the Department of Rehabilitation Sciences - Ph.D. Program.

Admission Requirements

M.S. in Physical Therapy

In addition to meeting all the general criteria for admission to the Graduate School at the University of Kentucky, students entering the Physical Therapy Master’s Program (Plan A and Plan B) must:

1. have completed an entry level program in physical therapy (certificate, bachelor’s, or master’s);
2. be licensed or eligible for licensure as a physical therapist in Kentucky or provide evidence of current licensure as a physical therapist in another of the United States;
3. furnish three personal/professional references;
4. obtain a minimum combined score of 1000 on the verbal and quantitative areas of the GRE.

Bachelor of Health Science and M.S. in Physical Therapy Dual Degree

The following descriptors deal with the graduate phase of this program of study. In addition to meeting all the general criteria for admission to the Graduate School at the University of Kentucky, students entering this dual degree program must:

1. have completed a minimum of 90 semester hours including specific University/Professional prerequisites and the initial two semesters of the Professional Physical Therapy curriculum.
2. complete the overall application process including references, GRE and appropriate Graduate School requirements.

The final selection of students for Plan A, Plan B, and the dual degree sequence will be on a competitive admissions basis. Specific information and details are available from the Division of Physical Therapy. Students pursuing the dual degree must follow the application procedures as outlined through the division of Physical Therapy for both the undergraduate and graduate sequence.

Degree Requirements

Plan A (Thesis)

The Plan A degree candidate must complete 24 semester credit hours of graduate course work with a grade point average of 3.0 (B) or higher standing and must write and defend a thesis (6 credit hours). At least 15 hours will be completed at the 600 or 700 course level. The student, in consultation with an advisor, will design a program of study which both incorporates the core requirements and is suitable for his or her particular needs in the proposed area of concentration.

Plan B (Non-thesis)

The Plan B degree candidate must complete 30 semester credit hours of graduate course work with a grade point average of 3.0 (B) or higher standing and must complete a joint clinical research project to be presented in both a written and oral format. At least 15 hours will be completed at the 600 or 700 course level. In addition to core requirements, the student, in consultation with an advisor, will design a program of study suitable for his or her particular needs and proposed area of clinical concentration.

B.H.S./M.S.P.T. Dual Degree Program

The dual degree program of study results in the awarding of a Bachelor of Health Science and a Master of Science in Physical Therapy. (This program of study is accredited by the Commission on Accreditation for Physical Therapy Education.) Specifics on course requirements for the B.H.S. component of this program are available from the Division of Physical Therapy. The graduate phase of the program builds upon the strong Basic Science Professional prerequisites as well as the first year of the program which includes 16 hours of advanced Basic Science course work. Participants must apply and be admitted to the Graduate School for the fall semester following the first year of the professional curriculum. Students must satisfy all Plan B requirements, including a written comprehensive examination and the completion and presentation of a joint research project, in both oral and written format, during the final portion of their graduate sequence of study.

Physician Assistant Studies

The University of Kentucky Division of Physician Assistant Studies offers a Plan B, non-thesis, physician assistant master's degree program that is accredited by the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA). The Master of Science in Physician Assistant Studies (M.S.P.A.S.) program is designed for 1 student who wishes to become PAs and hold a baccalaureate or will have earned a baccalaureate degree by the time they enter the program and for 2 PAs who already hold a baccalaureate degree in Physician Assistant Studies from an accredited Physician Assistant program. The M.S.P.A.S. program is offered at the Lexington campus and at the campus of Morehead State University.

The goal of the M.S.P.A.S. program is to develop well-educated and highly skilled primary care physician assistants who will extend the physician’s effectiveness and improve access to health care. The physician assistant functions under the supervision and responsibility of a licensed physician and is competent to elicit a comprehensive health history, perform a physical
examination, interpret and evaluate diagnostic data, establish basic treatment plans, counsel and educate, and respond appropriately to commonly encountered emergency care situations.

The M.S.P.A.S. program prepares highly qualified graduates with enhanced clinical competencies in evidenced-based medicine, geriatrics, health services management, clinical nutrition, pharmacology and applied research to meet the emerging health care needs of the 21st century, especially the increasing aging population and medically underserved communities. Physician assistants may serve in a variety of health care settings, such as primary care practices, geriatric long-term care facilities, hospitals, correctional institutions and community-based clinics. The M.S.P.A.S. program also prepares graduates to be competitive for positions in clinical research, health care administration and higher education. Graduates of the program are eligible to take the Physician Assistant National Certifying Examination. After successful completion of the exam, they are eligible for state certification/licensure to practice as certified physician assistants.

Admission to the M.S.P.A.S. program is annual with a new class beginning each January. Qualified applicants simultaneously must apply to both the University of Kentucky Graduate School and to the M.S.P.A.S. program. Applicants interested in attending the Morehead campus apply to the University of Kentucky Graduate School and the M.S.P.A.S. program by the same process as Lexington campus applicants.

Admission Requirements

In addition to satisfying the general requirements for admission to the Graduate School, applicants to the M.S.P.A.S. program must have achieved a combined score of 800 on the verbal and quantitative portions of the Graduate Record Examination taken within the last five years of application to the program. Applicants must hold a baccalaureate degree from an accredited college or university (or will have earned a baccalaureate degree by the time of entry into the program) with a minimum undergraduate GPA of 3.0, and a C grade or better earned in the following prerequisite courses:

In addition, three (3) letters of recommendation from people acquainted with the applicant for at least one year and familiar with his/her professional goals must be submitted to CASPA along with an admission essay of graduate quality that reflects the applicant’s commitment to primary care. The applicant must be certified in Basic Life Support by the American Heart Association, and be in compliance with the Technical Standards established by the College of Health Sciences. Competitive applicants will be granted an interview.

Application is made to the M.S.P.A.S. program through the University of Kentucky Graduate School and through the Central Application Service for Physician Assistants (CASPA) at <www.caspaonline.org>. Applicants must instruct the appropriate testing agencies to send copies of relevant score reports to the University of Kentucky Graduate School. Prior health care experience is not required but is deemed beneficial to students entering the M.S.P.A.S. program. For more information, contact CASPA:

Central Application Service for Physician Assistants
(CASPA)
Association of Physician Assistant Programs
950 N. Washington St.
Alexandria, VA 22314-1552
(703) 548-5538

DEADLINE FOR APPLICATION IS JUNE 1

Admission to the M.S.P.A.S. program is selective. Competitive applicants will be granted an interview. In the interview, the applicant must demonstrate an understanding of and commitment to the role and responsibilities of a PA. The applicant also must comply with Technical Standards of the Physician Assistant Studies Program as established by the College of Health Sciences. Proof of current certification in Basic Life Support from the American Heart Association must be provided at the time of the interview and certification must be maintained throughout the program.

M.S.P.A.S. PROGRAM CURRICULUM REQUIREMENTS

</table>
PAS 680 Seminar In PA Studies II (2)
PAS 646 Master’s Project II (2-6)

After successfully completing the course work and clerkship requirements, students who receive a passing score on a written final examination will be awarded a Master of Science in Physician Assistant Studies (M.S.P.A.S.) degree. Graduates of the program are eligible to take the Physician Assistant National Certifying Examination. After successful completion of the exam, they are eligible for state certification/licensure to practice as certified physician assistants.

**M.S.P.A.S. for Graduates of Programs in Physician Assistant Studies**

PAs applying to the M.S.P.A.S. program, who already hold a baccalaureate degree in Physician Assistant Studies from an accredited Physician Assistant program, must have maintained a 3.0 GPA in their undergraduate work and achieved a combined score of 800 on the verbal and quantitative portions of the GRE taken within the last five years of application to the program. To satisfy the M.S.P.A.S. curriculum, these students are required to complete a 24 credit hour core of M.S.P.A.S. courses and a minimum of 9 credit hours in an academic concentration of their choosing for a total of 33 credit hours.

**M.S.P.A.S. PROGRAM CORE COURSES**

- STA 570 Basic Statistical Analysis (4)
- PAS 610 Research Methods and Epidemiology (3)
- HSM 601 Overview of the Health Care Delivery System (3)
- PAS 673 Pharmacology II (3)
- PAS 640 Survey Of Geriatric Medicine (3)
- PAS 680 Seminar in PA Studies II (2)
- PAS 646 Master’s Project II (2-6)
- PAS 690 Physician Assistant Clerkship (3-6)

A minimum of nine credit hours of elective courses will be completed with a concentration in gerontology, health care administration, or clinical nutrition.

**ELECTIVE COURSES IN AREAS OF CONCENTRATION**

**Gerontology Concentration**

- GRN 643 Biomedical Aspects of Aging (3)
- BIO/GRN 612 Biology of Aging (3)
- BSC 770 Psychosocial Issues of Aging and Health (3)
- BSC 772 Women, Health and Aging (3)
- NUR 510 Older Women and Their Health (3)
- BSC 779 Behavioral Factors in Death and Dying (3)
- HSM 510 Organization of Long Term Care Sector (3)
- NFS680 Nutrition and Aging (3)
- GRN 513 Geriatric Pharmacy (3)

**Health Care Administration Concentration**

- HSM 602 Strategic Planning and Management of Health Care Organizations (3)
- HA 636 Health Economics (3)
- HA 637 Health Finance (3)
- HSM 603 Legal Aspects of Health Administration (3)
- HSM 642 Management of Public Health Organizations (3)

**Clinical Nutrition Concentration**

- CNU 601 Clinical Nutrition (4)
- CNU701 Advanced Clinical Nutrition (4)

---

**Physics and Astronomy**

The Department of Physics and Astronomy offers courses and research opportunities leading to the M.S. and Ph.D. degrees in the special areas of astronomy and astrophysics, atomic and molecular physics, low and medium energy nuclear physics, condensed matter physics, and theoretical particle physics. More detailed descriptions of each of these options will be sent on request. Both experimental and theoretical work are being pursued in all the above mentioned areas except particle physics, where only theoretical research is carried out. Excellent laboratory facilities and library materials are available. A major experimental facility is the six-million volt Van de Graaff accelerator.

**Admission Requirements**

In addition to the admissions requirements of the Graduate School, the Department of Physics & Astronomy requires graduate applicants to have a sound foundation in undergraduate physics. This foundation will normally include advanced courses in classical mechanics, electromagnetism and quantum mechanics. International applicants may be asked to take the Test of Spoken English (TSE). Applicants are encouraged to take the GRE physics subject exam.

Applicants wishing to apply for financial aid in the form of a teaching assistantship, research assistantship or fellowship must supply letters of recommendation from three individuals familiar with their academic capabilities. Such applicants must also submit a written statement of their interests and background in physics.

Admissions requirements are the same for the M.S. and the Ph.D. programs except that applicants for the Ph.D. must...
Degree Requirements

An M.S. student must accumulate at least ten points on the Cumulative Exam within a continuous two-year period before taking the M.S. oral exam. Plan A or Plan B may be used to satisfy the requirements for the M.S. degree. The M.S. program can include an emphasis on applied physics, and students are encouraged to take courses in related programs such as engineering and biology where such courses satisfy academic objectives. The M.S. candidate must pass a departmental oral exam covering the core course work and the thesis, if one was done under Plan A.

The Ph.D. degree is a research degree granted on the basis of broad knowledge of physics and in-depth study in a specific area leading to a dissertation reflecting original work by the doctoral candidate which is eligible for publication in a refereed journal. The Qualifying Examination for the Ph.D. consists of a written part and an oral part. The periodic Cumulative Exams shall constitute the written portion of the Qualifying Examination. A Ph.D. candidate must accumulate a minimum of 20 points on the exams within a continuous two-year period, with at least ten points being earned at the advanced level, in order to pass the written part of the exam and be eligible to take the oral part of the exam.

Candidates for doctoral degrees may perform their dissertation research work at the Lexington Campus of the University of Kentucky or arrangements may be made to do this work at other institutions or laboratories such as the Oak Ridge National Laboratory, the National Astronomical Radio Observatory or other places by special arrangement.

Physiology

Graduate study in physiology is designed to prepare candidates for research careers as independent scientists in academia, industry, and government laboratories. Admission to the graduate program is competitive and is based upon academic background, professional recommendations, performance on the Graduate Record Examination (GRE), experience, and when possible, personal interviews. Students should have completed an undergraduate degree in chemistry, biology, biochemistry, chemical engineering, mathematics, physics, pharmacy or psychology. It is recommended that students have completed undergraduate courses in organic chemistry, physical chemistry, calculus, physics, and the biological sciences.

Students will have the opportunity to join faculty research programs across a spectrum of topics such as neural, endocrine, cardiovascular, renal, respiratory, sensory, cellular, molecular, and signal transduction physiology. The program of study is tailored to the individual background and career goals of the student and stresses an interdepartmental approach both in the selection of courses and in the pursuit of research. Students are expected to participate in graduate seminars, journal clubs, research seminars; to interact with visiting scholars; and to present the results of their research at local and national meetings. Financial aid is available for highly qualified students.

Admission Requirements

Admission to the Ph.D. program in Physiology is through the Integrated Biomedical Sciences (IBS) Curriculum. Inquiries regarding admission should be directed to Director, Integrated Biomedical Sciences Curriculum, University of Kentucky College of Medicine. For information about the Ph.D. program in
Physiology, please contact the Director of Graduate Studies, Department of Physiology. Information may also be obtained from the department Web site: <www.mc.uky.edu/physiology>.

---

**Plant Physiology**

This University-wide, interdepartmental graduate program offers a plan of study leading to the Doctor of Philosophy degree. The aim of this program is to aid students in developing a high degree of excellence in plant physiology/biochemistry/molecular biology.

Faculty members of the program are from the Thomas Hunt Morgan School of Biological Sciences in the College of Arts and Sciences and the Departments of Agronomy, Forestry, Horticulture, and Plant Pathology in the College of Agriculture. Areas of research pursued by the faculty members include stress physiology and biochemistry, metabolism and roles of secondary products in disease resistance, biochemical and molecular basis of disease resistance, and biochemistry of photosynthesis and photorespiration, physiology of crop yield, senescence, regulation of gene expression, physiology of stress and population genetics in forest species, mineral nutrition and ion transport, allopacy, plant morphogenesis in tissue culture, and genetic transformation of plants.

Plant Physiology utilizes courses in the Departments of Biochemistry, Chemistry, Mathematics, and Statistics as supporting courses to suit the needs and interests of the individual student.

**Admission Requirements**

Admission to the Plant Physiology Program is competitive and based on the applicant’s undergraduate and graduate records, performance on standardized exams, and the evaluations and recommendations of professionals. It is expected that applicants to the Plant Physiology Program will meet the minimum standards established by the University of Kentucky Graduate School. An adequate preparation for graduate study in Plant Physiology includes courses in general biology, general chemistry, organic chemistry, and calculus. In addition, courses in biochemistry and physical chemistry are highly recommended.

---

**GRADUATE DEGREE PROGRAMS / 117**
As part of the application process, applicants to the Plant Physiology Program should arrange to have at least three letters of recommendation forwarded to the Director of Graduate Studies.

In addition to satisfying Graduate School residency requirements, candidates for the Ph.D. must complete CHE 550, CHE 552, BCH 607, BCH 608, PLS 601, PLS 622, PLS 623, PLS 773, and an acceptable dissertation. A plant physiology minor requires PLS 622, PLS 623, and nine additional credit hours of prescribed course work. For additional information, contact: the Director of Graduate Studies, N212A Agricultural Science Center - North.

Political Science

Admission Requirements

Candidates for admission to the graduate program in political science must provide the information required by the Graduate School, and must also submit the following directly to the Department of Political Science: 1. the Political Science Department Application form, available on the department’s Web site at <www.as.uky.edu/polisci/polisci_grad_admissions.htm>;
2. a one- to three-page Statement of Purpose explaining why you wish to pursue an MA or Ph.D. degree; and 3. three letters of recommendation from persons familiar with the applicant's academic performance. Applicants are also encouraged to submit to the department a sample of their writing on a topic relevant to political science.

Applicants will be evaluated on the basis of the Department's judgment of the likelihood of their success in the program, as compared with other applicants and considering the limited number of applicants accepted to the program. In evaluating candidates, the Department will consider the totality of their records, including grades, test scores, letters of recommendation, relevant work experience, and other relevant information. Applicants to the MA and Ph.D. programs will be evaluated according to the different demands and expectations for the two degrees. Students who do not have political science undergraduate majors are welcome in this program.

Degree Requirements

The Political Science Department offers both the M.A. and Ph.D. degrees. The M.A. degree may be earned under either of two plans: Plan A requires at least 24 hours of course work and a thesis; Plan B requires at least 30 hours of course work and examination in three fields of political science, or in two fields of political science and one outside field. Under either plan, the student must take at least two-thirds of the required semester hours in political science, and at least half of the political science work must be in courses open only to graduate students. A candidate for the Plan B master's degree must pass a foreign language requirement or an analytical skills requirement.

The Ph.D. program is divided into a general phase and a specialized phase. Entering students spend their first year in the general phase, which includes seminars in methodology and in at least four major fields of political science. (Students who have previously taken graduate work may be exempt from some of these seminars.) At the end of the first year of graduate work, the student is evaluated by a departmental committee which determines whether the general phase has been satisfactorily completed.

During the specialized phase of the graduate program, the student's work is based on a program prepared with the Advisory Committee. The student takes advanced work in at least two substantive fields in political science. The qualifying examination in political science consists of a written and oral examination in each of the two substantive fields specified in the student's program. The examination is given by the Advisory Committee. Following this examination the student writes a prospectus for the dissertation and is examined orally on this by the Advisory Committee. The student then writes a dissertation and defends it in a final oral examination.

Candidates for the Ph.D. in political science must demonstrate proficiency in a research skill. The required research skill will consist of additional quantitative skills or proficiency in a foreign language that is directly pertinent to the student's research interests. Additional details concerning departmental requirements may be secured from the Department of Political Science.

Psychology

The department offers one Ph.D. degree in psychology in two programs: clinical psychology and experimental psychology, the latter subdivided into cognitive/developmental studies, behavioral neuroscience/psychopharmacology, and social psychology. The major goal of the doctoral programs in psychology is to prepare the student for a career in research in both academic and non-academic settings and in teaching.

The area of specialization in clinical psychology provides academic courses, practica, and internships which permit
students to combine their teaching and research activities with a clinical career in the mental health field. Special areas of expertise among clinical faculty include psychological assessment, child clinical psychology, health psychology, neuropsychology, personality, psychopathology and diagnosis, psychotherapy, research methodologies, and substance abuse. Clinical training is facilitated by early placement of students at a variety of settings including various medical settings, a federal corrections facility, community mental health centers, state and private psychiatric hospitals, and the department’s own psychological clinic. The clinical program is fully accredited by the American Psychological Association.

The concentration in behavioral neuroscience and psychopharmacology is designed to train students broadly, through integrated course work and individualized training, in the general theoretical principles and technical approaches used to investigate the biological and behavioral mechanisms of alcohol and drug abuse. Psychopharmacological approaches to understanding basic principles of learning are also emphasized. Numerous collaborative efforts exist between faculty including those in other departments and these are strongly encouraged. Students receive a concentrated laboratory experience ranging from cell culture models, animal models (birds, mice or rats) or human subjects.

The cognitive/developmental studies area provides integrated course work and individualized training designed to prepare students for a career in research and teaching. Emphasis is placed on theoretical analysis and empirical studies involving adult cognition, cognitive development, the application of cognitive theories to everyday cognition, typical and atypical development in human infancy and childhood, and animal cognition. Scholarship in basic theory is the primary focus of training, but students interested in applying their training to nonacademic settings (e.g., business, law) may do so.

The area in social psychology is designed to provide intensive experience in research with members of the social psychology faculty, with the aim of developing in the student a strong theoretical and research competence with complex social phenomena. Traditions of both experimental laboratory research and naturalistic study are utilized; emphases include theoretical and applied significance of research. Each student’s course of study is individually designed to fit that student’s particular needs and interests. Research experience in related behavioral sciences (for example, communication, marketing, behavioral sciences) is encouraged.

During the first year of the doctoral program, students in all areas gain experience in the major content areas of psychology and in psychological statistics. Thereafter, the student and the advisor construct a program of study consistent with the academic interests and professional goals of the student.

The M.A. and M.S. degrees are awarded under Plan A only, as one component of doctoral training.

Admission Requirements

The minimum departmental standards for admission to graduate work in psychology include an undergraduate overall average of B or better, a satisfactory score on the verbal and quantitative portions of the Graduate Record Examination (GRE) and three letters of recommendation. All admissions are on a competitive basis. For additional information concerning the program in psychology and such matters as financial support, contact the Director of Graduate Studies, Department of Psychology or go to <www.uky.edu/ArtsSciences/Psychology>.

---

**Public Administration**

The Martin School of Public Policy and Administration, a research, academic and service unit of the Graduate School, offers the Ph.D., the M.P.A., the M.P.P. and the M.H.A. degrees. The Ph.D. in Public Administration is designed to prepare students to function at a high level of analytic sophistication in academic and administrative positions. The M.P.A. is a 45-credit-hour program designed for those seeking careers in the public, non-profit, and private sectors. The M.P.P. is a 40-hour

program designed to prepare individuals for careers as professional policy analysts in government and non-profit organizations. The MHA is a two-year, 44-hour degree that prepares individuals for managerial and administrative careers in health policy and health services.

The interdisciplinary faculty have primary or joint appointments in the Martin School and in one of the academic departments of the College of Business and Economics, the College of Agriculture, the College of Arts and Sciences, or the Medical Center.

Doctor of Philosophy

The curriculum of the Ph.D. program provides knowledge of the principles of organizational behavior, an understanding of the public policy process and policy issues, and an ability to analyze policy and administrative problems through research and analytical methods.

Admission Requirements

In addition to the Graduate School Admission Requirements, applicants must submit the following items to be considered for admission to the Doctoral program in Public Administration. A writing sample, while optional, is encouraged.

1. Three letters of recommendation.
2. A one to three page statement explaining why you wish to pursue a Ph.D. degree.
3. The Applicant Information Form.

Entering students are expected to have at least a 3.0 grade point average in undergraduate work (on a 4.0 scale), a 3.5 in all graduate level work, a cumulative score of 1200 or more on the quantitative and verbal sections of the GRE, or a minimum of 600 on the GMAT, and 3 letters of recommendation that provide convincing evidence about the applicant's ability and potential. However, the Martin School considers all aspects of the student's record, including evidence of improving performance during the student's academic career.

Pre-requisites and Exemptions

Many incoming students will hold a master's degree in public administration from a NASPAA-accredited program. Other students with master's degrees in such areas as political science, economics, agricultural economics or business administration will be evaluated with respect to their background in public administration. All students are expected to have taken four University of Kentucky courses: PA 652 (Public Policy Economics), PA 631 (Public Financial Management), PA 642 (Public Organizational Theory and Behavior), and PA 651 (The Policy Process), or their equivalents from a NASPAA accredited program. All students are also expected to have a strong background in research methodology.

All Ph.D. students must demonstrate proficiency in basic computer skills. These basic computer skills will be supplemented by computer-based assignments throughout the curriculum.

Degree Requirements

Students are required to take 42 hours of graduate course work beyond the master's degree or its equivalent. The program of study includes 12 credit hours of core courses, 15 credit hours in the area of concentration, 6 credit hours of theory related to and supporting the student's area of concentration, and 9 credit hours of research methodology courses.

In addition to course work, students complete two examinations and a dissertation. The dissertation involves research on a public management or public policy issue. An internship is necessary for students without significant public experience.

Financial support is available to qualified students through fellowships, assistantship, and research grants.

Inquiries should be made through the Director of Graduate Studies, 415 Patterson Tower.

Core Courses

Public Policy and Management (12 hours)
- PA 731 Fiscal and Budgetary Policy 3
- PA 742 Theory of Public Organizations 3
- PA 751 Public Policy Formulation 3
- PA 752 The Economics of Policy Analysis 3

Theory (6 hours)
- Six hours of theory courses are selected with the approval of the Advisory Committee.

Master of Public Administration

The M.P.A. program offers a professional degree that prepares students for careers of leadership in the public service as analysts and managers in the public, not-for-profit, and private sectors. Students enter the program with diverse academic backgrounds.

Admission Requirements

Applicants must meet the admission standards of both the Graduate School and the Martin School. Applicants must submit the following items to be considered for admission to the Master of Public Administration program.

1. Three letters of recommendation.
2. A one to three page statement explaining why you wish to pursue this master's degree.
3. The Applicant Information Form which can be found on the Web at <www.martin.uky.edu/~web/admissions/applications.html>.

The final selection of students for admission will be subject to the discretion of the admissions committee of the M.P.A. program.

Competitive admission is based on a consideration of the documents listed above. Provisional admission may be offered to students who do not meet the above criteria but who show the potential to succeed in the program.

Students are admitted from various academic disciplines. If not previously exposed to business disciplines, students should develop an understanding of the concepts of microeconomics.

Deadlines

Deadlines for the program are the same as the Graduate School admission deadlines. Applications completed by February 1 will have priority for financial aid.

Generally, courses are offered in the late afternoon and evening to accommodate working students.

The Martin School M.P.A. program is accredited by the National Association of Schools of Public Administration (NASPAA). For additional information contact:

Student Affairs Office
The Martin School
Two dual degree programs are offered: a dual J.D./M.P.A. program and a dual Pharm.D./M.P.A. degree. For more information about those programs, see the Dual Degree Programs section of this Bulletin.

The M.P.A. program incorporates:

1. an Administrative Core of 30 semester hours covering the areas of public policy formulation and analysis, public policy economics, organization and management, budgeting, finance, and analytical methods;
2. an area of concentration of 6 semester hours in one of six areas of specialization (public financial management, policy analysis, environmental management, health policy, gerontology, or transportation systems management) or in an individually designed concentration;
3. a 3-hour Capstone Course and Capstone Project;
4. an administrative internship for 3 semester hours of credit.

Students with a significant professional experience may substitute an independent study policy paper or an additional graduate course.

Course Requirements

Completion of a minimum of 42 semester hours of graduate work is required.

A. Administrative Core (30 semester hours)
- PA 602 Organization Change and Strategic Planning 3
- PA 621 Quantitative Methods of Research 3
- PA 622 Public Program Evaluation 3
- PA 623 Decision Analysis 3
- PA 624 Information Systems in Government 3
- PA 631 Public Financial Management 3
- PA 632 Public Funds Management 3
- PA 642 Public Organization Theory and Behavior 3
- PA 651 The Policy Process 3
- PA 652 Public Policy Economics 3
- PA 691 Ethics in Public Policy 3

B. Area of Concentration (6 semester hours)

Students completing this specialization will be prepared for an entry-level professional position in public and not-for-profit organizations.

Select 6 hours from:
- PA 633 Municipal Securities 3
- FIN 585 Bank Management 3
- FIN 680 Money, Interest and Capital 3
- ECO 611 Business Conditions Analysis 3

Policy Analysis

This concentration provides students the ability to analyze and interpret qualitative and quantitative data, conduct and present results of quantitative and qualitative analyses, and communicate complex ideas in a concise, straightforward manner.

Select 6 hours from:
- PA 680 Benefit-Cost Analysis 3
- PA 690 Public Analysis Overview 3
- A course in quantitative or qualitative methods 3
- A course in a substantive policy area, PA 775, PA 796, or PA 722 3

Environmental Management

Martin School graduates with a concentration in environmental management will be ready to contribute to the design and implementation of environmental policy.

Complete 2 the following courses:
- PA 727 Environmental Economics, Regulation and Policy 3
- ES 610 Engineering and Physical Sciences in Environmental Systems 3
- ES 620 Natural, Biological, Medical Sciences in Environmental Systems 3

Health Policy

The health policy concentration prepares students for careers as managers and analysts of health policy in federal, state, and local agencies, not-for-profit organizations, and the private sector.

Select 6 hours from:
- PA 636 Health Economics 3
- PA 673 Health Policy Development 3
- PA 785 Independent Study in Health Administration 3
- or PA 680 Benefit-Cost Analysis 3

Gerontology

This concentration prepares students for professional careers in policy analysis and management of programs for the elderly. Students must complete 6 hours of courses from the Gerontology Graduate Certificate selected in consultation with a faculty advisor.

Transportation Systems Management

This area of specialization consists of 6 semester hours of classes offered through the Interdisciplinary Certificate in Transportation. It prepares students for careers as policy analysts and managers working in diverse transportation settings, including consulting firms, not-for-profit organizations, and government agencies at the federal, state, and local level.

C. Capstone Course and Capstone Project (3 semester hours)

All students must take the 3-hour capstone class and successfully complete and defend a capstone project developed in that class. The purpose of the course and the project is to integrate the learning experience of the MPA program and apply knowledge and skills acquired in the program to a policy issue or management problem.

- PA 681 Capstone in Public Administration 3

D. Internship (3 semester hours)

PA 711 Internship in Public Administration 3

Master of Public Policy

The M.P.P. program offers a professional degree that prepares students for careers as professional policy analysts in government and non-profit organizations in government and the not-for-profit. Students enter the program with diverse academic backgrounds.

Admission Requirements

Applicants must meet the admission standards of both the
The M.P.P. program incorporates:
1. an Administrative Core of 31 semester hours covering the areas of statistics, public policy formulation and analysis, public policy economics, organization and management, budgeting, finance, and analytical methods;
2. 3 semester hours in a functional area such as Health, Transportation, Education, Environmental Financial, Social Welfare, Gerontology Policy or another approved area.
3. a 3-hour Capstone Course and Capstone Project;
4. an administrative internship for 3 semester hours of credit. Students with a significant professional experience may substitute an independent study policy paper or an additional graduate course.

Course Requirements
Completion of a minimum of 40 semester hours of graduate work is required.
A. Administrative Core (31 semester hours)
STA 671 REGRESSION AND CORRELATION
STA 672 DESIGN & ANALYSIS OF EXPERIMENTS
PA 622 PUBLIC PROGRAM EVALUATION
PA 631 PUBLIC FINANCIAL MANAGEMENT
PA 642/H62 642 PUBLIC ORGANIZATION, THEORY & BEHAVIOR
PA 650 ECONOMICS FOR PUBLIC POLICY *

*Currently offered as PA 795 Special Topics in Public Administration: Economics for Public Policy

PA 651 THE POLICY PROCESS
PA 652 HA/ECO 652 PUBLIC POLICY ECONOMICS

PA 680 BENEFIT/COST ANALYSIS
PA 681 CAPSTONE IN PUBLIC ADMINISTRATION
PA 690 PUBLIC POLICY ANALYSIS OVERVIEW
PA 692 RES. METHODS FOR PUBLIC POLICY & ADMINISTRATION

PA 711 INTERNSHIP IN PUBLIC ADMINISTRATION

B. Area of Specialization (3 semester hours)
C. Capstone Course and Capstone Project (3 semester hours)

All students must take the 3-hour capstone class and successfully complete and defend a capstone project developed in that class. The purpose of the course and the project is to integrate the learning experience of the MPP program and apply knowledge and skills acquired in the program to a policy issue. The presentation of the Capstone project serves as the final Master’s exam. PA 681 Capstone in Public Administration

D. Internship (3 semester hours)
PA 711 Internship in Public Administration

Graduate School and the Martin School. Applicants must submit the following items to be considered for admission to the Master of Public Administration program.
1. Three letters of recommendation.
2. A one-to three-page statement explaining why you wish to pursue this master’s degree.
3. The Applicant Information Form which can be found on the Web at <www.martin.uky.edu/~web/admissions/applications.html>.

The final selection of students for admission will be subject to the discretion of the admissions committee of the M.P.A. program.

Competitive admission is based on a consideration of the documents listed above. Provisional admission may be offered to students who do not meet the above criteria but who show the potential to succeed in the program.

Students are admitted from various academic disciplines. If not previously exposed to business disciplines, students should develop an understanding of the concepts of macroeconomics.

Deadlines

Deadlines for the program are the same as the Graduate School admission deadlines. Applications completed by February 1 will have priority for financial aid.

University of Kentucky
Lexington, KY 40506-0027

Public Health (Preventive Medicine)
A defining characteristic of the area of public health is its focus on population groups rather than individuals. Public health professionals are concerned with the health of communities, relying heavily on collaboration with local, state, and national entities to improve the health status of their targeted populations. With the current interest in health care reform, bioterrorism
and preparedness, concerns over managed care, and other factors impacting the nation's health care system, the need for highly trained public health professionals is increasing. The College of Public Health offers the Master of Public Health (M.P.H.) degree. The M.P.H. is an applied professional/graduate degree designed for highly motivated students who either have either a previously earned professional degree or a baccalaureate degree and substantial interest in public health. Unique sequencing of courses, community-based program activities, and field/laboratory research provide students with opportunities to define their course of study in Biostatistics, Epidemiology, Environmnetal and Preventive Medicine, Health Behavior, or Health Services Management. The M.P.H. degree is designed to prepare graduates for entry and advancement in public health careers in public, non-profit and proprietary health care organizations. The schedule of courses is developed to meet the needs of non-traditional and part-time students as well as full-time students. Most courses are offered in the late afternoon or evening, meeting one day per week. A limited number of Internet and interactive video courses are currently available for distance education.

Professionals with the M.P.H. hold important roles in a variety of public and private settings, e.g., local, state, and national health departments, health care facilities, social service agencies, private industry, universities, and community-centered health education facilities. In these positions, they can be involved directly with the development, implementation and assessment of efforts to improve the health of the public and prevention of disease. The curriculum is designed to provide skills and knowledge upon which to build or enhance a career in public health. Unique sequencing of courses, community-based program activities, and field/laboratory research provide students with opportunities to define their public health specialty and provide a broad overview of the disciplines of public health. The degree requirements include a core curriculum in epidemiology, environmental/occupational health, health behavior, health services management, and biostatistics along with a separate M.P.H. course concentration in each of these five areas, elective course work, a field practicum in the community, a public health agency, a government agency, or related setting, and an integrative capstone project.

The Master of Public Health degree requires a minimum of 34 to 37 credit hours of study for completion. All students must complete a minimum of 15 semester hours of required course work and 12 to 16 hours of specialty work in one of the five areas of concentration. In addition, three to six semester hours of field practicum experience are required, depending on previous professional experience in public health or related areas. A dual degree M.D./M.P.H. is currently available and additional dual degrees are under development.

Admission Requirements

Admission into the M.P.H. program is competitive, and consideration is given to undergraduate grade point average (GPA), experience/service activities, and career plans. Applicants must also have achieved an acceptable score on the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT).

Applicants must complete and submit the separate M.P.H. Supplemental Application form (<www.mc.uky.edu/publichealth/>, a one- to two-page personal statement regarding their interest in the field of public health, background and experience, career plans, and how they relate to the degree. Three letters of recommendation must also be submitted.

As an interdisciplinary degree, the M.P.H. curriculum utilizes an array of courses offered by other university departments including Environmental Science, Statistics, Behavioral Science, and Communications.

For additional information concerning the University of Kentucky College of Public Health and its degrees, call (859) 257-5678, send e-mail to kysph@uky.edu, or go to <www.mc.uky.edu/KYSPH>

---

**Radiation Science**

The Division of Radiation Sciences, Department of Clinical Sciences, offers the program in Radiation Science with options leading to the degree of Master of Science in Radiological Medical Physics or Master of Science in Health Physics. The former is one of a very small number of academic medical physics offerings in North America accredited by CAMPEP, the
Commission on Accreditation of Medical Physics Educational Programs.

Admission Requirements

Graduates of accredited colleges with an appropriate baccalaureate degree (preferably a physics major or strong minor) may become candidates for one of these degrees. Applicants must meet the minimum requirements of the Graduate School. Course work prerequisites include physics through modern physics (with atomic and nuclear laboratory), one year of general chemistry, mathematics through (ordinary) differential equations, and individual courses in computer science, scientific statistics, human physiology, and human anatomy. Students lacking certain course prerequisites may be admitted while completing them, if so approved by the Director of Graduate Studies. Applicants are strongly urged to supply three letters of recommendation and are encouraged to visit campus and interview in person (telephone interviews may be arranged if necessary). GRE General test scores must be submitted. An overall undergraduate grade point average of at least 3.0 (on a 4.0 scale) is recommended.

Degree Requirements

Both degree options are interdisciplinary. Plan B (non-thesis) is utilized for the graduate work, incorporating specific courses in several departments. There is no language requirement. A core of courses is common to both options. Additional special course work is prescribed for each option. Additional special course work is prescribed for each option.

Rehabilitation Counseling

The Graduate Program in Rehabilitation Counseling is an interdisciplinary program in the Department of Special Education and Rehabilitation Counseling. The curriculum, in accordance with the guidelines of accreditation and certification organizations in rehabilitation counseling, provides for flexible programming in response to individual student needs and interests. The program is accredited by the Council on Rehabilitation Education and fulfills national certification requirements in rehabilitation counseling. Program graduates are eligible to sit for the Rehabilitation Counseling Certification Examination and other national and state certification.

The program trains students to understand the physical,
psychological, social, cultural and economic factors of persons with disabilities and barriers to employment in terms of vocational adjustment, independent living, and employment. Rehabilitation counseling is a challenging and expanding profession. The rehabilitation counselor provides and coordinates services to persons with emotional, physical, learning, and developmental disabilities which interfere with productive functioning and independent living. The counselor must demonstrate competencies in establishing and conducting counseling relationships, assessment procedures, vocational placement, program planning and coordination; have an awareness of professional and community resources that can be utilized in the rehabilitation process; have knowledge of persons from culturally diverse backgrounds, and, understand how rehabilitation engineering and technology can be utilized to help clients achieve their goals. Emphasis is placed on severe disability and its consequences, independent living, job development and placement, technology, business and industry, and consumer issues and rights. Graduates of the program are employed in a wide range of public and private rehabilitation settings.

Students who express an interest in employment in public rehabilitation are eligible, when available, for a federal personnel preparation scholarship. This scholarship pays tuition and provides a monthly stipend. Scholarship recipients are required to become employed in a public rehabilitation agency or a program which procures services from a public rehabilitation agency. The program also has a scholarship program to train students for practice in rural rehabilitation environments. In addition, an Endorsement Curriculum in conjunction with Kentucky State University facilitates the enrollment of persons from culturally diverse backgrounds.

Admission Requirements

The rehabilitation counseling program has the following admission requirements. Students are required to submit results from the Graduate Record Examination, have a minimum undergraduate grade point average of 2.75, submit three letters of reference, complete a statement of professional goals and objectives, complete a program application, and participate in an interview with faculty. Under certain circumstances the program may petition the Graduate School to request a waiver of the undergraduate grade point average. The program faculty considers all of this information in making admissions decisions.

Students are admitted from a wide range of backgrounds and academic disciplines. It is anticipated, however, that most students entering the program will have a background in psychology, education, sociology, rehabilitation, or other social-behavioral sciences. Students who have other educational backgrounds are also considered.

Program Requirements

Course and field work total a minimum of 45 credit hours if the student has a bachelor’s degree in rehabilitation or related course work. The typical program for other students is 57 hours, up to a maximum of 60 hours. At least 75% of the credit hours must be taken at the University of Kentucky. Courses are offered in the late afternoon and early evening to accommodate full- and part-time students. Students who attend the program on a full-time basis can complete the program in 16 months. The program is also offered on a state-wide distance education basis using satellite, compressed video, and internet technologies.

The curriculum is composed of three levels of courses: basic core, advanced core, and support areas.

Basic Core

The Basic Core courses or their equivalent are required for students without a background in the field of rehabilitation or who have not otherwise had these courses:
RC 510 Orientation to Rehabilitation Resources
RC 515 Medical and Psychosocial Aspects of Disabilities I
RC 516 Medical and Psychosocial Aspects of Disabilities II
RC 520 Principles of Rehabilitation Counseling
RC 530 Cultural Diversity in Rehabilitation
RC 540 Chemical Dependency in Rehabilitation Counseling
RC 640 Rehabilitation in Business and Industry
RC 650 Rehabilitation Counseling Theory and Techniques I
RC 660 Rehabilitation Counseling Theory and Techniques II

Advanced Core

Advanced Core courses or their equivalent are required for all students enrolled in the degree program:
RC 610 Case Management in Rehabilitation Counseling
RC 620 Vocational Evaluation/Work Adjustment of the Severely Disabled
RC 630 Placement Services and Techniques in Rehabilitation Counseling
RC 710 Practicum
RC 720 Internship
RC 740 Administration, Supervision, and Program Evaluation in Rehabilitation Counseling
RC 750 Rehabilitation Research
RC 760 Contemporary Practices in Rehabilitation

Students who have taken any of the above courses or their equivalent may consult with faculty to request waiver of the required course and to substitute an approved elective.

Other Rehabilitation Courses

RC 558 Special Topics in Rehabilitation Counseling
RC 782 Directed Independent Study

Support Areas

A support area will be chosen by the student in conjunction with a faculty advisor. Students are encouraged to use their electives to develop ‘support areas.’ A support area is defined as a group of two to three courses, focusing on one theme, to enhance specific skills or knowledge related to rehabilitation.

Courses comprising a support area may be offered by one or more departments. Support areas available through interdisciplinary planning include: learning disabilities, mental retardation, developmental disabilities, gerontology, mental health, administration and management, family studies, research and evaluation, group counseling, policy and planning, criminal justice, hearing impairment, visual impairment, recreation, drugs and alcoholism, business and industry, technology, and advocacy. Cooperating disciplines include Educational and Counseling Psychology, Social Work, Special Education, Sociology, Public Administration, Family Studies, Psychology, Therapeutic Recreation, and Health Sciences.

Admission to Field Work

Admission to field work will be considered after the student has completed two semesters (full-time) of graduate study or when
the student has completed 24 hours of graduate study. The decision to advance to field work includes successful completion of the admission to field work examination, demonstrated skill in academic areas, and a judgment by the faculty that the student possesses the personal and social characteristics necessary for providing professional rehabilitation counseling services.

Field Work

The first field work component is a three credit practicum, which consists of 200 clock hours of supervised experience in a rehabilitation or rehabilitation-related setting, a weekly seminar, and individual supervision. Students who receive training support from the Rehabilitation Services Administration must have involvement with business and industry as part of the practicum. Such students are required to be employed with a public rehabilitation program upon graduation. The practicum is generally taken during the eight-week summer session. However, this course is offered every semester to accommodate part-time students. A student must be admitted to field work prior to enrolling in the practicum.

In accordance with national accreditation and certification requirements, students then complete 600 clock hours of supervised internship in a rehabilitation or rehabilitation-related setting. Every intern student also participates in a weekly seminar and individual supervision. Internship is three credits per 200 clock hours, and may be taken in the summer, fall, or spring semesters following practicum. The internship is taken in one semester; or, due to extenuating circumstances, it may be divided into two semesters. It is recommended, however, that the internship be completed in one semester.

Students must successfully complete their internship, and demonstrate competence in working with individuals with disabilities in the context of a professional rehabilitation counseling relationship in order to graduate.

A final written examination is given at the completion of all course work. Graduation is contingent upon the successful completion of this examination.

Rehabilitation Sciences

The Divisions of Communication Disorders and Physical Therapy at UK, in cooperation with Occupational Therapy and Communication Disorders programs at Eastern Kentucky University, and Communication Disorders programs at Murray State University and Western Kentucky University, offer a doctor of philosophy degree in rehabilitation sciences. This program has a unique interdisciplinary, inter-institutional emphasis for rehabilitation professionals in the disciplines of athletic training, communication disorders, occupational therapy, and physical therapy.

The focus of the program is to prepare academic leaders in Rehabilitation Sciences through interdisciplinary academic, clinical, and research experiences. The program is designed to prepare graduates to conduct rehabilitation-related research, teach at the university level, direct discipline-specific educational programs, work in the rehabilitation services field, and collaborate with other professions to provide leadership on various issues related to rehabilitation and health.

Admission Requirements

Individuals applying for admission must be eligible for state licensure or national certification in Communication Disorders, Occupational Therapy, or Physical Therapy. They must also have a master’s degree and submit GRE scores, transcripts for all universities attended, a comprehensive resume, and three letters of recommendation. Students must apply to both the University of Kentucky Graduate School and the Rehabilitation Sciences Doctoral Program. An interview is strongly encouraged. Program application materials can be obtained from <www.mc.uky.edu/rehabsciences>.

Degree Requirements

Each candidate for the Ph.D. must pass a written and oral Qualifying Examination, submit and defend a dissertation based on original and significant research and satisfy the Graduate School requirements.

The courses expected of all students in the doctoral degree curriculum include the following:

Core Courses

RHB 701 Rehabilitation Theories and Application Through the Life Span 3
RHB 702 Rehabilitation Services in Health Care Systems and Delivery 3
RHB 770 Professional Seminar in Rehabilitation Sciences 6

(Must be taken for six semesters during the student's academic program.)

Research Methodologies

STA 671 Regression and Correlation 2
STA 672 Design and Analysis of Experiments 2
Electives 6

Area of Specialization

Three specialization tracks, Pediatrics, Aging and Adult Neurological Disorders, and Movement Dysfunction, are available for concentrated study. Discipline Specific Course Work in each of the three tracks will be offered through the Divisions of Communication Disorders at each of the partnering universities, Physical Therapy at the University of Kentucky, and the Department of

GRADUATE DEGREE PROGRAMS / 127
Occupational Therapy at Eastern Kentucky University. In each track, students must complete the following requirements:

Rehabilitation Sciences Course Work 6
Professional Discipline Specific Course Work 9
Related Areas 9
RHB 787 Teaching Apprenticeship In Rehabilitation Sciences 2 (minimum)

Research Apprenticeship
A research apprenticeship is required for students. Minimum of 9 credits - individually designed based on student’s past research experience.
RHB 789 Research Apprenticeship In Rehabilitation Sciences 1-4
RHB 769 Residence Credit for the Doctoral Degree 18

Social Work

Master of Social Work

The College of Social Work offers a graduate curriculum of full-time and part-time study, leading to the Master of Social Work degree in accordance with Plan B. This program is accredited by the Council on Social Work Education. The MSW degree is designed to prepare students for advanced practice in the field of social work.

Admission Requirements

Students must meet the general requirements of the Graduate School, as listed elsewhere in this Bulletin, as well as other specific requirements of the College of Social Work for the Master of Social Work degree as indicated below.

1. Applicants who do not qualify for advanced standing must earn 60 hours of credit with a grade-point average of B or above. Fifty-four of these credits must be in the required social work courses for the Family/Community Concentration and students complete six hours of electives. Fifty-seven credits in required social work courses are needed for the Mental Health Concentration and students complete three hours of electives.

Minimum academic requirements for admission to the 60-hour program are: baccalaureate degree from an accredited institution of higher learning with a grade point average of 3.0, a grade point average of 3.0 on all graduate work attempted, and submission of official scores on the Graduate Record Examination (GRE). Applicants with less than a 3.0 UGPA will be placed in a "Waiting List" pool where the minimum GPA requirement for admission is the Graduate School's 2.75 GPA. Only a limited number of applicants will be admitted from this pool.

All applicants must complete the College's application form and the Graduate School's application form, submit transcripts from all colleges or universities attended, three letters of recommendation, as well as autobiographical and values statements.

2. Advanced standing of 22 credit hours may be granted in the Master of Social Work program to graduates of social work programs accredited by the Council on Social Work Education who earned:

a) an overall 3.0 GPA
b) a 3.5 GPA in their social work major
c) a minimum GRE score of 800 (Verbal plus Quantitative).

Additionally, some work experience is preferred.

Degree Requirements

All MSW students must complete the final comprehensive examination. This examination consists of an intensive written review of the student's educational program to determine the breadth and depth of knowledge acquired for professional practice.

Doctor of Philosophy

The College offers a program leading to a Ph.D. degree through the Joint UK-UofL Ph.D. in Social Work Program which draws upon the academic resources of the University of Kentucky and the University of Louisville and is offered at both locations. This program is nationally unique and innovative in the incorporation
of technology for fostering joint administrative and instructional activities.

A joint committee approves selection of students for the program; qualifying exams and dissertation committees are made up of professors from both universities.

The program consists of a minimum of 44 credits of post-master's course work plus 18 hours of dissertation research. Students are required to complete a core curriculum of 26 hours and to pass the Preliminary Exam. Students work on an individualized plan of study of 15 credit hours that includes scholarly study of an area of social work practice or research (9 credit hours) and pertinent research and teaching practica (6 credit hours). These courses assist the student in developing a dissertation research plan. Students are also required to complete a course on teaching (3 credit hours). After meeting these requirements, students take the Qualifying Examination which consists of a defense of the dissertation proposal. After successfully passing the Qualifying Exam, 18 hours of dissertation research and a dissertation must be completed.

The major aim of the program is to produce scholars with skills to expand the base of tested knowledge that can guide the profession of social work in addressing major social problems as well as to meet the challenges facing the doctoral level researcher, educator, and practitioner. The program emphasizes theory development and research.

**Core Curriculum (29 credit hours)**
- Theory Development in the Social Work Profession (3)
- Advanced Analysis of Social Welfare Problems (3)
- Human Behavior & Change Theories (3)
- Ethics, Social Work & Society (3)
- Social Work Research I (3)
- Social Work Research II (3)
- Statistics (e.g., STA 570) (3-4)
- Professional Seminar I (1)
- Professional Seminar II (1)
- Teaching in Social Work (3)

**Preliminary Examination**
- Individualized Plan of Study (15 credit hours)
  - Course work in an area of scholarly study (9)
  - Research/Teaching Practica (3 hrs. must be in research) (6)
  - Course in Teaching/Adult Education (3)
  - Qualifying Exam (3)

**Dissertation Research**
- (18)

**Admission Requirements**

Applicants must have career objectives consistent with the social work profession and demonstrate strong potential to complete a vigorous academic program as evidenced in the following:

- a master's degree in social work from a program accredited by or judged to be equivalent by CSWE (applicants with other master's degrees can also be considered);
- at least two years' post-master's full-time, paid experience in social work preferred;
- an undergraduate grade point average (GPA) of 3.0 on a 4.0 scale and a graduate GPA of 3.5;
- official transcripts from each college/university attended;
- Graduate Record Examination (GRE) test scores of 1,000 when verbal and quantitative sections are summed;
- three letters of reference (two academic and one from employer);
- a writing sample or publication
- an autobiography that describes career and research interests and the rationale for pursuing a doctoral degree.

Sociology

The Sociology graduate program offers graduate work leading to the Master of Arts, Master of Science in Agriculture, and Doctor of Philosophy. Both Plan A and Plan B are offered for the Master’s degrees.

Graduate students pursuing the Ph.D. degree choose two areas of specialization, one of which must be within the discipline of sociology. The other specialization may be within sociology or a related substantive area. Current areas of faculty expertise include Criminology and Deviance; Families, Aging, and Health; Rural Sociology; Social Inequalities; Social Movements and Political Sociology; and Work, Organizations, and the Economy. In addition to the two specialization areas, doctoral students must demonstrate competence in theory and methods on the qualifying examination.

To aid in financing graduate education, a number of assistantships are available to qualified students. Outstanding students may compete for fellowships.

Sociologists at the University of Kentucky in the Departments of Sociology, Community and Leadership Development (in the College of Agriculture), and Behavioral Science (in the College of Medicine) carry on a substantial variety of research projects, consultative activities, extension education programs, and community services. Specialized experience and training are available to graduate students in rural sociology at the Agricultural Experiment Station and opportunities for applied sociology experience are available in the Cooperative Extension Service. Assistantships and traineeships in health-related areas are available to graduate students in Behavioral Science in the College of Medicine.

Opportunities for multidisciplinary work exist in conjunction with Centers and Programs at the University of Kentucky including the African-American Research and Studies Program, Appalachian Center, Center on Aging, Center for Prevention Research, Center on Drug and Alcohol Abuse, Environmental Studies, Poverty Research Center, Social Theory, and Women’s Studies. Assistantships and traineeships in health-related areas are available to qualified sociology graduate students through these Centers and Programs.

Admission Requirements

A minimum combined score of 1500 on the three components of the Graduate Record Examination (GRE) is expected (calculated by multiplying the score of the new analytical portion of the exam by 100).

The following additional materials are required to apply for admission to the graduate program in Sociology, and should be sent directly to the Director of Graduate Studies, Department of Sociology, 1515 Patterson Office Tower, University of Kentucky, Lexington, KY 40506-0027:

- A statement of goals and reasons for pursuing an advanced degree in sociology. It is helpful if applicants also address the field(s) of interest within sociology they may wish to pursue in their graduate studies.
- A sample of writing, preferably in the form of a term paper, an extensive essay, or a draft of a senior thesis. If the applicant has completed a master’s degree, she or he may submit one or two chapters from the master’s thesis. Please do not submit a copy of the entire master’s thesis.
- Three letters of recommendation. The recommendation form is available on the Sociology Department’s Web site.
- Application form for fellowships and assistantships, if the applicant wishes to be considered for a teaching assistantship, research assistantship, traineeship, or fellowship. This application form is available on the Sociology Department’s Web site: <www.uky.edu/AS/Sociology/welcome.html>.

Special Education

Students may enroll for either degree or certification graduate programs in special education. Programs not leading to a degree are designed primarily for those who are seeking Kentucky Provisional, Rank II or Rank I Teacher Certification at the graduate level in the following certification areas:

1. Learning and Behavior Disorders
2. Moderate/Severe Disabilities
3. Director of Special Education
4. Interdisciplinary Early Childhood Special Education

Advanced programs of study are available in the following areas:

1. Early Childhood Special Education
2. Learning and Behavior Disorders
3. Emotional and Behavioral Disorders
4. Moderate/Severe Disabilities

The degree programs that are offered lead to the Master of Science in Education, Specialist in Education and Doctor of Education degrees. Within the framework of College and University requirements, all advanced graduate degree programs are individually planned. This flexibility makes it possible to structure an appropriate program for each student, based upon previous background and career aspirations. Following are brief descriptions of the various graduate degree programs. Minimum hours for the Master of Science in Education degree are distributed as follows:

Department of Special Education and support areas in College
Course work outside program area of emphasis 6
Total 36

It should be noted that these are minimum requirements. Program deficiencies may result in programs of study that exceed the minimum. The Director of Graduate Studies should be contacted to obtain the specific number of courses required for each program of study.

At least half of the required semester hours must be earned in courses at the 600-700 level (excluding practica, independent study, and theses hours). All students also are required to take the following courses: Survey of Special Education, Applied Behavioral Analysis, Methods for Teaching Students with Disabilities, Single Subject Research Design, an advanced curriculum course, an advanced practicum, and 15 hours in their respective program areas. In addition, a thesis is required of all Master of Science in Education students in the Department of Special Education.

Students entering without a teaching certificate and who plan to receive an M.S. degree and teach in a Special Education certificate area must meet certificate program deficiencies, including certification requirements, as outlined by their advisor, in addition to completing the degree requirements listed above. Depending on their program of studies, students may obtain Rank II or Rank I certification concurrently with their master’s degrees.

General requirements for the Specialist in Education (Ed.S.) degree have been described in a previous section of this Bulletin. Ed.S. programs are individually planned for in-depth study in an area of special education and require a research project and written product for completion.

The Doctor of Education (Ed.D.) program is designed to prepare leadership personnel for the field of special education.
Primary emphasis is placed upon training persons for positions in higher education personnel preparation, technology applications in special education programs, and research in special education. Within the context of personnel preparation in special education, various program areas of emphasis can be planned. The requirements for this program are described in the Doctor of Education section of the Bulletin.

Admission Requirements

Department standards for admission to graduate work in special education are similar to those of the Graduate School. However, there are some additional requirements. All potential graduate students within the department must complete a departmental application. This application requires each student to submit (a) transcripts from each previously attended institution of higher education to the department, (b) letters of recommendation, and (c) an outline of professional goals and objectives. In addition to the above, students applying for admission to the department's doctoral program must (a) submit a sample of professional writing, (b) submit an autobiographical statement, and (c) interview with the departmental faculty. These interviews generally occur on campus but can be arranged through phone or electronic means if necessary. It should be noted that applicants who are pursuing a degree with a teaching certificate must be admitted to the College of Education's Teacher Education Program. Requirements for admission to this program vary by discipline. Potential students should contact the department's Director of Graduate Studies for additional information.

Financial assistance is available, on a competitive basis, to graduate students in special education. Students may apply for graduate assistantships at all levels of graduate study. Scholarships and assistantships are awarded from funds granted to the Department by the Office of Special Education and Rehabilitation Services, U.S. Department of Education.

Statistics

The Department of Statistics offers programs of study leading to the degrees of Master of Science (Plan A or B available), and Doctor of Philosophy. The M.S. degree is professionally oriented for the student who plans a career in government, business or industry. The Ph.D. program offers a broad training in both statistical theory and methods while affording options to suit the student’s interests. The statistics Ph.D. is well-suited for academic, business, government and industrial positions. In addition to formal course work and research training, the advanced student has opportunities to gain valuable practical experience by participating in consulting activities under faculty supervision.

Course work is available in areas associated with statistics such as biological modeling, computer science, control theory, econometrics, mathematics and operations research.

A student intending to pursue a master’s degree in statistics should have one course each in advanced calculus (equivalent of MA 432 or 471) and matrix algebra (equivalent of MA 462) for the first year’s graduate courses. A graduate level course in real analysis (equivalent of MA 571) is a prerequisite for the Ph.D. core curriculum. If possible, mathematical deficiencies should be corrected during the summer prior to entering the Graduate School.
The University of Kentucky is represented on the Committee on Statistics of the Southern Regional Education Board.

**Admission Requirements**

The minimum GRE and GPA admissions requirements for the M.S. and Ph.D. programs in Statistics are the same as for the Graduate School. However, the number of admissions is limited and admissions decisions are made on a competitive basis. All M.S. applicants must have successfully completed a three- or four-semester sequence in calculus and a course in linear algebra and have good communication skills. Highly competitive students usually have additional course work in mathematics including a working knowledge of limits, continuity, sequences, and series. Prior course work in probability and/or statistics is desirable, but not required. For timely entrance into the Ph.D. program, applicants should have had MA 471G or an introductory real analysis course and an M.S. or equivalent in Statistics. See degree requirements for the M.S.

Students wishing to apply for teaching assistantships and/or fellowships must have three letters of recommendation sent to: Admissions, Department of Statistics, University of Kentucky, 817 Patterson Office Tower, Lexington, KY 40506-0027. Admissions may be contacted by e-mail at stat-admit@ms.uky.edu.

**Master's Program**

The Department offers the degree of Master of Science with (Plan A) or without (Plan B) a thesis. The core curriculum expected of all master’s degree students consists of the following courses:

- STA 503 Introduction to Statistical Methods 4
- STA 531 Theory of Probability 3
- STA 532 Theory of Statistical Inference I 3
- STA 601 Theory of Statistical Inference II 3
- STA 603 Introduction to Linear Models and Experimental Design 4
- STA 624 Applied Stochastic Processes 3

Programs of study for Plan B require a total of at least 35 semester hours, which should include the equivalent of the six courses in the core curriculum and at least 15 additional credit hours. Of these 15 credit hours, at least 6 should be from the following list of statistics courses:

- STA 612 Sequential Analysis 3
- STA 616 Design And Analysis of Sample Surveys 3
- STA 621 Nonparametric Inference 3
- STA 643 Advanced Experimental Design 3
- STA 644 Advanced Linear and Nonlinear Models 3
- STA 661 Multivariate Analysis I 3
- STA 665 Analysis of Categorical Data 3

Programs of study for Plan A (with thesis) require a total of at least 29 semester hours, which should include the core curriculum and at least two courses from the previous list. Candidates should also satisfy the requirements that at least 18 hours for Plan B and 15 hours of non-thesis courses for Plan A must be at the 600 level or higher. The free electives courses can be selected from a variety of courses both within and outside the Department of Statistics. Before the end of the second semester, the M.S. candidate must present a proposed plan of study for approval by the Director of Graduate Studies. There are no formal minor requirements.

All master’s candidates are required to take a departmental written examination on the core curriculum. These exams are normally administered in August.

**Doctoral Program**

The doctorate is a research degree that demonstrates independent and comprehensive scholarship and is granted on the basis of broad statistical competence and the exhibition of creative ability. There are thus two components to the doctoral program: 1) a comprehensive program of probability, statistics and related courses, and 2) in-depth research in a particular area and the preparation, under faculty supervision, of a dissertation.

Students in the doctoral program in Statistics will choose one of two possible tracts:

**Mathematical Statistics**
- STA 701 – Advanced Statistical Inference I
- STA 703 – Advanced Probability
- STA 705 – Advanced Computational Inference
- STA 707 – Advanced Data Analysis
- STA 702 – Advanced Statistical Inference II

**Probability Biostatistics**
- STA 701 – Advanced Statistical Inference I
- STA 703 – Advanced Probability
- STA 705 – Advanced Computational Inference
- STA 707 – Advanced Data Analysis
- STA 709 – Advanced Survival Analysis

All students must take an additional six courses chosen by the student and approved by the DGS. Three of these will complement and supplement the student’s specialization area and research interests. STA 715 (Reading courses) may not be used to satisfy this requirement.

The new course schedule can be summarized as follows:

- Fall, Year One
  - STA 503 STA 531 STA 532
- Spring, Year One
  - STA 601 STA 603 STA 624
- Fall, Year Two
  - STA 643 STA 700 Elective
- Spring, Year Two
  - STA 701 STA 703 Elective
- Fall, Year Three
  - STA 707 STA 705 Elective
- Spring, Year Three
  - STA 702/709 Elective Elective
- Fall, Year Four
  - Elective Residency Residency
- Spring, Year Four
  - Elective Residency Residency

Students must successfully complete a common written exam over STA 701 and STA 703 plus respective prerequisites. This exam will normally be offered in June and students will usually sit for the written examination at the end of the second year of the program.

After completion of course requirements and successful completion of the written exam, Students must also successfully complete an oral qualifying exam administered by their committee. A significant part of this exam is to be a dissertation proposal.

Areas of current research interest are:

a) mathematical statistics including statistical inference, categorical data analysis, nonparametric models, asymptotic theory, sequential analysis, decision theory;

b) statistical analysis and design including the design of experiments, variance components models, linear and non-linear models;

c) stochastic processes including applications of probability in biology, queueing and storage systems, reliability.

All students, master’s and doctoral, will be required to take part in an internship program. This will usually consist of teaching (three or six semester hours) or an equivalent amount of work in the Statistics Consulting Laboratory or the Biostatistics Consulting Unit.

**Graduate School**

The minimum GRE and GPA admissions requirements for the M.S. and Ph.D. programs in Statistics are the same as for the Graduate School. However, the number of admissions is limited and admissions decisions are made on a competitive basis. All M.S. applicants must have successfully completed a three- or four-semester sequence in calculus and a course in linear algebra and have good communication skills. Highly competitive students usually have additional course work in mathematics including a working knowledge of limits, continuity, sequences, and series. Prior course work in probability and/or statistics is desirable, but not required. For timely entrance into the Ph.D. program, applicants should have had MA 471G or an introductory real analysis course and an M.S. or equivalent in Statistics. See degree requirements for the M.S.

Students wishing to apply for teaching assistantships and/or fellowships must have three letters of recommendation sent to: Admissions, Department of Statistics, University of Kentucky, 817 Patterson Office Tower, Lexington, KY 40506-0027. Admissions may be contacted by e-mail at stat-admit@ms.uky.edu.

**Master’s Program**

The Department offers the degree of Master of Science with (Plan A) or without (Plan B) a thesis. The core curriculum expected of all master’s degree students consists of the following courses:

- STA 503 Introduction to Statistical Methods 4
- STA 531 Theory of Probability 3
- STA 532 Theory of Statistical Inference I 3
- STA 601 Theory of Statistical Inference II 3
- STA 603 Introduction to Linear Models and Experimental Design 4
- STA 624 Applied Stochastic Processes 3

Programs of study for Plan B require a total of at least 35 semester hours, which should include the equivalent of the six courses in the core curriculum and at least 15 additional credit hours. Of these 15 credit hours, at least 6 should be from the following list of statistics courses:

- STA 612 Sequential Analysis 3
- STA 616 Design And Analysis of Sample Surveys 3
- STA 621 Nonparametric Inference 3
- STA 643 Advanced Experimental Design 3
- STA 644 Advanced Linear and Nonlinear Models 3
- STA 661 Multivariate Analysis I 3
- STA 665 Analysis of Categorical Data 3

Programs of study for Plan A (with thesis) require a total of at least 29 semester hours, which should include the core curriculum and at least two courses from the previous list. Candidates should also satisfy the requirements that at least 18 hours for Plan B and 15 hours of non-thesis courses for Plan A must be at the 600 level or higher. The free electives courses can be selected from a variety of courses both within and outside the Department of Statistics. - Spring, Year Four
  - Elective Residency Residency

Students must successfully complete a common written exam over STA 701 and STA 703 plus respective prerequisites. This exam will normally be offered in June and students will usually sit for the written examination at the end of the second year of the program.

After completion of course requirements and successful completion of the written exam, Students must also successfully complete an oral qualifying exam administered by their committee. A significant part of this exam is to be a dissertation proposal.

Areas of current research interest are:

a) mathematical statistics including statistical inference, categorical data analysis, nonparametric models, asymptotic theory, sequential analysis, decision theory;

b) statistical analysis and design including the design of experiments, variance components models, linear and non-linear models;

c) stochastic processes including applications of probability in biology, queueing and storage systems, reliability.

All students, master’s and doctoral, will be required to take part in an internship program. This will usually consist of teaching (three or six semester hours) or an equivalent amount of work in the Statistics Consulting Laboratory or the Biostatistics Consulting Unit.
Theatre

Theatre lives at the moment of contact between actor and audience. This department expects its graduate students to approach that moment from several points: historical, critical, practical, theoretical and experimental. Within this framework, each candidate for a master of arts degree must complete a minimum of 30 semester hours. A maximum of six of these may be taken in allied subjects. Graduate students are encouraged to concentrate in one of the following areas: performance or design/technology.

Toxicology

Toxicology is the science of poisons and their interactions with living systems. The University of Kentucky Graduate Center for Toxicology trains individuals to use the biological, physical, and mathematical sciences in the study of the causes, mechanisms, and evaluation of toxic agents as well as the sources, identification and quantitation of toxicants. The center has six core and approximately 45 jointly-appointed faculty, who are drawn from departments and colleges across the campus, including Agriculture, Biochemistry, Biological Sciences, Chemistry, Medicine, Nutritional Sciences, Pathology, Pharmacy, Pharmacology, Radiation Medicine, and Veterinary Medicine. The program offers both Ph.D. and M.S. degrees in Toxicology. The Center’s primary toxicologic emphases are in the areas of Environmental Toxicology, Immunotoxicology, Molecular Mechanisms of Toxicology, and Neurotoxicology with areas of special study available to students in arthropod toxins, behavioral toxicology, clinical and forensic toxicology, environmental medicine and chemistry, equine toxicology, genetic and biochemical toxicology, mechanisms of carcinogenesis, nutritional toxicology, pesticide toxicology, radiation toxicology, and reproductive toxicology.

The University of Kentucky Graduate Center for Toxicology (G.C.T.) has been in existence for more than twenty years and
Veterinary Science

The Department of Veterinary Science offers a program of study and research leading to the Master of Science (Plan A only) and Doctor of Philosophy degrees. Possible areas of concentration are comparative pathology, immunogenetics, immunology, musculoskeletal diseases, parasitology, reproductive physiology, pharmacology and toxicology, microbiology and virology. Individuals electing pathology as their area of concentration must be graduate veterinarians. Individual programs of study must conform with the general rules and regulations of the Graduate School.

Students pursuing both M.S. and Ph.D. degrees in Veterinary Science are required to take CHE 550 and CHE 552 (graduate-level biochemistry), or alternately two semesters of CHE 580, and STA 570 (graduate-level, general statistics) or demonstrate that they have previously taken equivalent courses.

A limited number of research assistantships and fellowships are available.

Admission Requirements

1) This Department’s deadline for applications for Fall semester enrollment is May 16 (but see #3 below). This includes receipt of supporting material (transcripts, GRE and TOEFL scores).
2) We request that three letters of recommendation, and a personal essay from the applicant describing his/her career goals and particular research interests, be sent directly to this Department’s Director of Graduate Studies.
3) Review of applications begins in January and most acceptances are extended during February/March.
4) This Department does not conduct separate recruiting for Spring enrollment, and only in exceptional cases will an applicant be accepted for Spring enrollment. Applicants for Spring enrollment are advised to first contact this Department’s Director of Graduate Studies during the normal application review period.

More information is available on the Web at <www.uky.edu/Agriculture/VetScience/Gluck1.htm>.

Vocational Education

The College of Agriculture offers the Master of Science in Vocational Education, emphasizing Agricultural Education and Home Economics Education. This advanced degree program is designed to prepare candidates for leadership positions in vocational education in such areas as: administration, curriculum, teacher education, research, and vocational guidance.

In addition, programs are offered for: 1) the professional certification for supervision and coordination of vocational education, and certification for vocational school principal, 2) Rank II classification for Kentucky teachers through the Planned Fifth-Year Program, and 3) Rank I classification for Kentucky teachers, and 4) initial teacher certification.
Admission Requirements

Students seeking admission to the Vocational Education Masters Program must hold a baccalaureate degree from a fully accredited institution of higher learning. An overall undergraduate grade point average of 2.75 and 3.0 on all graduate work is required.

All applicants for admission to degree programs in the Graduate School must submit official scores on the verbal, quantitative and analytical portions of the Graduate Record Examination (GRE).

**Master’s in Vocational Education**

The focus of the master’s degree program in vocational education is the further development of competencies needed as a teacher. However, provisions are made to accommodate a wide variety of individuals from diverse settings such as administration, curriculum, corporate or military training, or cooperative extension.

The master’s degree in vocational education requires 24 graduate course hours for a Plan A thesis option and 30 hours for the Plan B non-thesis option. Half of the total hours must be taken in AED courses, of which at least 3/4 must be at the 600-700 level. A minimum of half of the total hours must be at the 600-700 level.

Teachers seeking a Standard Certificate must meet the above criteria and the university’s approved certification program requirements which specify work in professional education and course work related to the individual’s teaching specialty. (Certification requirements are available from the Director of Graduate Studies.)

**Doctor of Education in Vocational Education**

The Doctor of Education (Ed.D.) degree in Vocational Education is not presently accepting new applicants.

**Certification**

For information concerning certification, please contact the Director of Graduate Studies.

A Graduate Certificate is an integrated group of courses that is designed to have a very clear and focused academic topic or competency as its subject area. Often, a Graduate Certificate may meet a clearly defined educational need of a constituency group, such as continuing education or accreditation for a particular profession; respond to a specific state mandate; or provide a basic competency in an emerging, usually interdisciplinary, area. A Certificate is not a graduate degree program (it is typically between 9 and 15 credits), but it does provide the student a formal credential of the mastery of a clearly defined academic topic.

Graduate Certificates are becoming an increasingly important component of the total range of graduate educational opportunities offered by a modern, comprehensive research university. Often, Certificates are pursued by students who are also pursuing a graduate degree in a traditional discipline, or who may already have earned one or more graduate degrees. Programs or groups of faculty who wish to establish a new Graduate Certificate at the University of Kentucky should consult the Guidelines for Graduate Certificate Curricula via the Graduate School home page at <www.rgs.uky.edu/gs/>.

The University of Kentucky currently offers Graduate Certificates in the following areas:

- Clinical Research Skills
- Cognitive Science
- College Teaching and Learning
- Developmental Disabilities
- Environmental Systems
- German Studies
- Gerontology
- Health Communication
- Human-Technology Interaction
- Informatics
- Latin Studies
- Medical Behavioral Science
- Middle and Secondary School Reading
- Music Theory Pedagogy
- Orff Schulwerk
- Reproductive Laboratory Science
- School Social Work
- Sensing Technologies
- Social Theory
- Women's Studies

Although formal admission to a specific Graduate Certificate is handled by the Director of the Certificate, a student seeking to pursue a Graduate Certificate must also apply to and be enrolled as a graduate student at the University of Kentucky. For most Certificates, the student may be enrolled either as a degree-seeking student in an academic program or in post-baccalaureate (non-degree) status. More information on admission requirements and specific plans of study for a particular Graduate Certificate can be obtained via the contacts below.

Note that admission to or completion of a Graduate Certificate does not guarantee subsequent admission to a graduate degree program; that is a separate process, and different criteria prevail.

Clinical Research Skills

The Certificate curriculum is intended to offer participants the necessary course work, informational sessions, and mentored research opportunities necessary to provide them with a strong background in the knowledge and skills necessary to succeed in clinical research. The knowledge and skills obtained should improve participants' ability to attract research funding and to publish the results of that work in appropriate peer-reviewed journals. The Kentucky School of Public Health will be the organizational unit responsible for the Certificate. The hours earned by students toward the Certificate may be used by students who wish to continue their study and earn an additional degree, such as the Master's degree in Public Health (MPH).

Fax: (859) 257-8860

Cognitive Science

The Cognitive Science Certificate provides students with the opportunity to study the information-processing aspects of the mind. Participating faculty come from various departments in the College of Arts and Sciences (Anthropology, Biology, Linguistics, Philosophy, Psychology, and Statistics), as well as from the College of Engineering (Computer Science) and the College of Medicine (Anatomy, Behavioral Science, and Neurology). The Graduate Certificate is open to all graduate students at the University of Kentucky.

College Teaching and Learning

The Graduate Certificate in College Teaching and Learning provides a coherent, integrated approach to helping graduate students, postdoctoral scholars, current faculty, and others develop and document the skills needed as part of conscientious preparation for the full range of faculty responsibilities at a range of institutions of higher education.
Developmental Disabilities

The Graduate Certificate in Developmental Disabilities prepares professionals from a broad range of disciplines to play a leadership role in providing services and supports for people with developmental disabilities and their families. An emphasis is placed on developing skills in the field of disability research. The course work emphasizes a life span and interdisciplinary perspective with an emphasis on promoting self-determination, community integration and inclusion. In addition to a broad, interdisciplinary perspective, students acquire a basic foundation in a number of specific, topical areas such as specialized health care services and financing, inclusive education, behavioral supports, employment and community living options, advocacy, legislation, assistive technology, organizational development and theory, group facilitation, and research proposal development.

All courses are taught by an interdisciplinary faculty. Students have the opportunity to participate in a practicum and work directly with individuals with developmental disabilities and their families. Students also complete a research project under faculty supervision. Three didactic courses (HDI 600, 602 and 604) and one practicum course (HDI 603) are required for the certificate. In addition to the required courses, two or three hours of elective course work is also required; either HDI 601, HDI 605 or one elective from outside HDI courses and those courses required in the student’s degree program.

Environmental Systems

The Environmental Systems Certificate is administered by a committee of faculty consisting of representatives from the Colleges of Agriculture, Arts and Sciences, Engineering, Law, Medicine; the Gatton College of Business and Economics; the Graduate School; the Kentucky Environmental Protection Cabinet; and the private sector. Each Environmental Systems course is coordinated by a faculty member, and course instructors are representatives of their respective disciplines.

The Environmental Systems Certificate consists of a core of three survey courses and a seminar course. Students are expected to take two Environmental Systems courses and the seminar twice. The content of the courses and seminars is the responsibility of the coordinator.

Individuals desiring a certificate must submit an application for admission to the Environmental Systems Committee along with an outline of their graduate degree program or their experience.

German Studies

The German Studies Graduate Certificate is designed to enable substantial exposure to the historical and contemporary study of German culture, society, and politics in an interdisciplinary setting. Students may earn the certificate while making normal progress towards attainment of an M.A. or a Ph.D. degree or while enrolled in post-baccalaureate status.

Gerontology

The Graduate Certificate in Gerontology is an interdisciplinary curriculum offered by the Sanders-Brown Center on Aging. The Certificate is a part of Sanders-Brown’s complete range of research and educational activities that prepare both graduate students and practicing professionals from many disciplines to assume key roles in improving the quality of life for older adults and furthering our understanding of the aging process. Its interdisciplinary focus makes it possible for students to tailor their course work to support their own fields of interest.

Health Communication

The Graduate Program in Communication offers a Certificate in Health Communication that is available to (a) students in the Ph.D. and M.A. Programs in Communication, (b) students in other doctoral programs at the university and (c) post baccalaureate students. The Certificate Program is aimed primarily at individuals interested in developing specialized knowledge and research expertise in health communication that could be
applied within both academic and nonacademic settings. Students are expected to have a background in social or behavioral science prior to entering the program. To earn the certificate, students must complete CJT 671 and 771 and either CJT 780 (section focusing on a health communication topic) or a graduate course in medical informatics, for a total of 12 credit hours.

Human-Technology Interaction

The certificate in human-technology interaction brings together students in the social, behavioral, and health sciences with students in the design professions. It is intended specifically for:

1) those in the social, behavioral, and health sciences who would like to learn how their disciplinary knowledge can be used to enhance the safety, productivity, and satisfaction of people interacting with both “high-tech” and “low-tech” systems.

2) those in the design professions who would like to apply principles derived from the study of human abilities, limitations, and preferences to the design of new or modified technology. Students from engineering, instructional systems design, architecture, graphic design, computer science, and other design fields are welcome to apply.

3) those interested in exploring career options in ergonomics, human factors psychology, or usability engineering.

The certificate requires 15 hours of graduate work, including two foundation courses, two elective courses, and one practicum or research experience.

Informatics

The objective of the Graduate Certificate in Informatics is to educate a cadre of researchers and professionals with multidisciplinary backgrounds and with substantial understanding of the principles and applications of computational technology.

This curriculum will train graduate and professional-degree students in the uses of computational and information processing technology in their own fields. The students will be able to use this enrichment to become more productive professionals, to further research in their own areas, and to engage in multidisciplinary research relying on computer and information-processing techniques.

Latin Studies

The Latin Studies certificate curriculum, consisting of a sequence of four courses in Latin language and literature, aims at two groups of students in particular.

First, it is aimed at graduate students who need strong Latin skills for any academic discipline in which Latin is important, including not only classics, but also history, philosophy, theology, etc., and who are already engaged in, or hope to undertake advanced study in one or more of these fields. The certificate curriculum will offer to such students an interdisciplinary opportunity to gain a superior command of Latin in a highly concentrated format, but in a relatively brief period of time.

Second, it is aimed at the training of new Latin teachers for the high school level and even pre-high school instruction. The Latin Studies certificate curriculum will be highly useful for those interested in teaching Latin, because it will provide a much deeper immersion in Latin language and literature than what has so far been usual for students seeking careers as Latin teachers, and will ensure that all who complete it acquire not merely reading skills, but also considerable active command of the language.

Medical Behavioral Science

The Department of Behavioral Science proposes to offer a Graduate Certificate in Medical Behavioral Science designed for students who are enrolled in a doctoral program in a basic academic field. This program typically will admit doctoral students from programs in Anthropology, Communications, Educational and Counseling Psychology, Geography, Gerontology, Health and Physical Education, Nursing, Nutritional Science, Psychology, and Sociology. These students often come to the University of Kentucky to work with our faculty and to obtain training in Medical Anthropology, Medical Sociology, Health Psychology, and Health Communications which are subspecialty fields within each of these disciplines.

Graduate School.

Students desiring admission into this certificate curriculum will be interviewed by a committee consisting of members of the theory faculty and a music faculty member outside of theory. The interview will include an appraisal of the student's keyboard proficiency, sight-singing and aural skills, and understanding of theoretical concepts. The student's scores on graduate entrance exams in music theory will also be assessed. It is assumed that any student granted admission into the certificate will have completed at least twelve credit hours of graduate work in music theory. The student's scores on graduate entrance exams in music theory will also be assessed. It is assumed that any student granted admission into the certificate will have completed at least twelve credit hours of graduate work in music theory.

Music Theory Pedagogy

The Graduate Certificate in Music Theory Pedagogy is intended primarily for D.M.A. (Doctor of Musical Arts degree) students who wish to gain experience and expertise in theory pedagogy in order to strengthen their background for increased marketability in higher education.

Most students desiring admission into this certificate curriculum will be interviewed by a committee consisting of members of the theory faculty and a music faculty member outside of theory. The interview will include an appraisal of the student's keyboard proficiency, sight-singing and aural skills, and understanding of theoretical concepts. The student's scores on graduate entrance exams in music theory will also be assessed. It is assumed that any student granted admission into the certificate curriculum would have been accepted as a student in the Graduate School.

Reproductive Laboratory Science

The Graduate Certificate in Reproductive Laboratory Science (RLS) prepares graduates for entry-level technologist positions in assisted reproductive technology (ART) laboratories and related fields in research, industry and marketing. The curriculum consists of 12-14 credit hours in RLS courses, including 2 credit hours of clinical practicum in clinical andrology and embryology laboratories. In addition to the five RLS core faculty, lecturers throughout the United States contribute to the curriculum by instructing in their areas of expertise. These professionals are ART and clinical laboratory technologists, laboratory managers,
researchers, ethicists, attorneys and policy analysts. Directors and supervisors in andrology laboratories and ART laboratories, appointed as clinical faculty by the University, supervise RLS students in the clinical practica. Entrance into the program requires a Bachelor's degree in Clinical Laboratory Science (Medical Technology) or a Bachelor's degree in science with acceptable laboratory experience.

School Social Work

The Graduate School Social Work Certificate is designed to prepare social workers for school social work as a specialized field of practice. It will also meet the State of Kentucky mandated requirements for school social work certification. The certificate is available to: (1) UK degree seeking graduate students in the Master of Social Work Program, and (2) post-baccalaureate (non-degree) students who already have an MSW degree from an accredited social work program. The minimum credits required are 17 for the MSW program students and 9 for post-baccalaureate students. Applications for admission are evaluated, and students' progress is monitored and approved by a committee made up professors from the Colleges of Social work and Education.

Social Theory

This Certificate offers students systematic multidisciplinary training in social theory. It augments, and is pursued concurrently with, the regular M.A and Ph.D. degree programs of participating departments. In total, the Certificate requires ten hours of course work, can be pursued in tandem with regular degree programs, and is open to all graduate students at the University of Kentucky.

Women's Studies

The Graduate Certificate in Women's Studies is intended to complement students' disciplinary programs. Its aim is to provide students with a coherent, interdisciplinary grounding in current women's studies scholarship and to create an intellectual community among faculty and graduate students who share a scholarly interest in women's studies.

DETERMINATION OF RESIDENCY STATUS FOR ADMISSION AND TUITION ASSESSMENT PURPOSES.

RELATES TO: KRS CHAPTER 13B, 164.020, 164.030, 164A.330(9)

STATUTORY AUTHORITY: KRS 164.020(8)

NECESSITY, FUNCTION, AND CONFORMITY: KRS 164.020(8) requires the Council on Postsecondary Education to determine tuition and approve the minimum qualifications for admission to a state-supported postsecondary education institution and authorizes the Council to set different tuition amounts for residents of Kentucky and for nonresidents. This administrative regulation establishes the procedure and guidelines for determining the residency status of a student who is seeking admission to, or who is enrolled at, a state-supported postsecondary education institution.

Section 1. Definitions.

(1) “Academic term” means a division of the school year during which a course of studies is offered, and includes a semester, quarter, or single consolidated summer term as defined by the institution.

(2) “Continuous enrollment” means enrollment in a state-supported postsecondary education institution at the same degree level for consecutive terms, excluding summer term, since the beginning of the period for which continuous enrollment is claimed unless a sequence of continuous enrollment is broken due to extenuating circumstances beyond the student’s control, including serious personal illness or injury, or illness or death of a parent.

(3) “Degree level” means enrollment in a course or program which could result in the award of a:
   (a) Certificate, diploma or other program award at an institution;
   (b) Baccalaureate degree or lower including enrollment in a course by a nondegree-seeking postbaccalaureate student;
   (c) Graduate degree or graduate certification other than a first-professional degree in law, medicine, dentistry or “Pharm. D.”; or
   (d) Professional degree in law, medicine, dentistry, or “Pharm. D.”.

(4) “Demonstration of Kentucky domicile and residency” means the presentation of documented information and evidence sufficient to prove by a preponderance of the evidence that a person is domiciled in Kentucky and is a resident of Kentucky.

(5) “Dependent person” means a person who cannot demonstrate financial independence from parents or persons other than a spouse and who does not meet the criteria established in Section 5 of this administrative regulation.

(6) “Determination of residency status” means the decision of a postsecondary education institution that may include a formal hearing that results in the classification of a person as a Kentucky resident or as a nonresident for admission and tuition assessment purposes.

(7) “Domicile” means a person’s true, fixed, and permanent home and is the place where the person intends to remain, and to which the person expects to return if absent without intending to establish a new domicile elsewhere.

(8) “Full-time employment” means continuous employment for at least forty-eight (48) weeks at an average of at least thirty (30) hours per week.

(9) “Independent person” means a person who demonstrates financial independence from parents or persons other than a spouse and who can meet the criteria established in Section 5 of this administrative regulation.

(10) “Institution” means an entity defined in KRS 164.001(10) if the type of institution is not expressly stated and includes the Kentucky Commonwealth Virtual University.

(11) “Kentucky residency” or “Kentucky resident” means the result of a determination by an institution that a person is a resident of Kentucky as determined by this administrative regulation.

(12) “Nonresident” means a person who is domiciled outside of Kentucky or who currently maintains legal residence outside Kentucky or who has not met the criteria for Kentucky residency established in this administrative regulation.

(13) “Preponderance of the evidence” means the greater weight of evidence, or evidence which is more credible and convincing to the mind.

(14) “Parent” means one (1) of the following:
   (a) A person’s father or mother; or
   (b) A court-appointed legal guardian if:
      1. The guardianship is recognized by an appropriate court within the United States;
      2. There was a relinquishment of the rights of the parents; and
      3. The guardianship was not established primarily to confer Kentucky residency on the person.

(15) “Residence” or “residency” means the place of abode of a person and the place where the person is physically present most of the time for a noneducational purpose in accordance with Section 3 of this administrative regulation.

(16) “Student financial aid” means all forms of payments to a student if one (1) condition of receiving the payment is the enrollment of the student at the institution.

(17) “Sustenance” means living expenses including room, board, maintenance, transportation, and also includes educational expenses including tuition, fees, books, and supplies.

Section 2. Scope.

(1) State-supported postsecondary education institutions were established and are maintained by the Commonwealth of Kentucky primarily for the benefit of qualified residents of Kentucky. The substantial commitment of public resources to postsecondary education is predicated on the proposition that the state benefits significantly from the existence of an educated citizenry. As a matter of policy, access to postsecondary education shall be provided so far as feasible at reasonable cost to an individual who is domiciled in Kentucky and who is a resident of Kentucky.

(2) The Council on Postsecondary Education requires a student who is neither domiciled in nor a resident of Kentucky to meet higher admission standards and to pay a higher level of tuition than resident students.

(3) This administrative regulation applies to all student residency determinations regardless of circumstances, including the Southern Regional Education Board contract spaces; reciprocity agreements, where appropriate; the Kentucky Commonwealth Virtual University and academic common market programs.

Section 3. Determination of Residency Status; General Rules.

(1) A determination of residency shall include:
   (a) An initial determination of residency status by an institution during the admission process or upon enrollment in an institution for a specific academic term or for admission into a specific academic program;
   (b) A reconsideration of a determination of residency status by an institution based upon a changed circumstance; and
   (c) A formal hearing conducted by an institution upon request of a student after other administrative procedures have been completed.

(2) An initial determination of residency status shall be based upon:
   (a) The facts in existence when the credentials established by an institution for admission for a specific academic term have been received and during the period of review by the institution;
   (b) Information derived from admissions materials;
   (c) Other materials required by an institution and which are consistent with this administrative regulation; or
   (d) Other information available to the institution from any source.

(3) An individual seeking a determination of Kentucky residency status shall demonstrate that status by a preponderance of the evidence.

(4) A determination of residency status shall be based upon verifiable circumstances or actions.

(5) Evidence and information cited as the basis for Kentucky domicile and residency shall accompany the application for a determination of residency status.

(6) A student classified as a nonresident shall retain that status until the student is officially reclassified by an institution.

(7) A student may apply for a review of a determination of residency status once for each academic term.

(8) If an institution has information that a student’s residency status may be incorrect, the institution shall review and determine the student’s correct residency status.

(9) If the Council on Postsecondary Education has information that an institution’s determination of residency status for a student may be incorrect, it may require the institution to review the circumstances and report the results of that review.

(10) An institution shall impose a penalty or sanction against a student who gives incorrect or misleading information to an institutional official, including payment of nonresident tuition for each academic term for which resident tuition was assessed based on an improper determination of residency status. The penalty
may also include:
(a) Student discipline by the institution through a policy written and disseminated to students; or
(b) Criminal prosecution.

Section 4. Presumptions Regarding Residency Status.

(1) In determining a determination of residency status, it shall be presumed that a person is a nonresident if:
(a) A parent is, or seeks to be, an undergraduate student and admissions records show the student to be a graduate of an out-of-state high school;
(b) A person’s admissions records indicate the student’s residence to be outside of Kentucky at the time of application for admission;
(c) A person moves to Kentucky primarily for the purpose of enrollment in an institution;
(d) A person moves to Kentucky and within twelve (12) months enrolls at an institution more than half time; or
(e) A person has a continuous absence of one (1) year from Kentucky.

(2) A presumption arising from subsection (1) of this section shall be overcome by a demonstration of Kentucky domicile and residency.

Section 5. Determination of Whether a Student is Dependent or Independent.

(1) In a determination of residency status, an institution shall first determine whether a student is dependent or independent. This provision is predicated on the assumption that a dependent person lacks the financial ability to live independently of the person upon whom the student is dependent and therefore lacks the ability to form the requisite intent to establish domicile.

(2) In determining the dependent or independent status of a person, the following information shall be considered as well as other relevant information available at the time the determination is made:
(a) 1. That the person has not been claimed as a dependent on the federal or state tax returns of a parent or other person for the year preceding the date of application for a determination of residency status; or
2. That the person is no longer claimed by a parent or other person as a dependent or as an exemption for federal and state tax purposes; and
(b) That the person has financial earnings and resources independent of a person other than an independent spouse necessary to provide for the person’s own sustenance.

(3) An individual who enrolls at an institution immediately following graduation from high school and remains enrolled shall be presumed to be a dependent person unless the contrary is evident from the information submitted.

(4) Domicile may be inferred from the student’s permanent address, parent’s mailing address, or location of high school graduation.

(5) Marriage to an independent person domiciled in and who is a resident of Kentucky shall be a factor considered by an institution in determining whether a student is dependent or independent.

(6) Financial assistance from or a loan made by a parent or family member other than an independent spouse, if used for sustenance of the student:
(a) Shall not be considered in establishing a student as independent; and
(b) Shall be a factor in establishing that a student is dependent.

Section 6. Effect of a Determination of Dependent or Independent Status on a Determination of Residency Status.

(1) The effect of a determination that a person is dependent shall be as follows:
(a) The domicile and residency of a dependent person shall be the same as either parent. The domicile and residency of the parent shall be determined in the same manner as the domicile and residency of an independent person.
(b) The domicile and residency of a dependent person whose parents are divorced, separated, or otherwise living apart shall be Kentucky if either parent is domiciled in and is a resident of Kentucky regardless of which parent has legal custody or is entitled to claim that person as a dependent pursuant to Kentucky income tax provisions.
(c) 1. If the parent or parents of a dependent person are Kentucky residents and are domiciled in Kentucky but subsequently move from the state, the dependent person shall be considered a resident of Kentucky while in continuous enrollment at the degree level in which currently enrolled.
2. If continuous enrollment is broken or the current degree level is completed, the dependent person’s residency status shall be reassessed when the circumstances detailed in subparagraph 1 of this paragraph are present.

(2) If the sole parent or both parents of a dependent person moves out of state, Kentucky domicile and residency, having been previously established, shall be retained until steps are taken to establish domicile and residency elsewhere.

Section 7. Member of Armed Forces of the United States, Spouse and Dependents; Effect on a Determination of Residency Status.

(1) A member, spouse, or dependent of a member whose domicile and residency was Kentucky at the time of induction into the Armed Forces of the United States, and who maintains Kentucky as home of record and permanent address, shall be entitled to Kentucky residency status:
(a) During the time of active service; or
(b) If the member, spouse, or dependent returns to this state within six (6) months of the date of the member’s discharge from active duty.

(2) A member, spouse or dependent of a member of the Armed Forces of the United States stationed in Kentucky on active military orders shall be considered a Kentucky resident while the member is on duty in this state pursuant to those orders if the member is not:
1. Stationed in Kentucky for the purpose of enrollment at an institution; or
2. On temporary assignment of less than one (1) year.

(b) A member, spouse or dependent of a member, shall not lose Kentucky residency status if the member is thereafter transferred on military orders while the member, spouse or dependent requesting the status is in continuous enrollment at the degree level in which currently enrolled.

(3) Membership in the National Guard or civilian employment at a military base alone shall not qualify a person for Kentucky residency status under the provisions of subsections (1) and (2) of this section.

(4) A person’s residency status established pursuant to this section shall be reassessed if the qualifying condition is terminated.

Section 8. Status of Nonresident Aliens; Visas and Immigration.

(1) A person holding a permanent residency visa or classified as a political refugee shall establish domicile and residency in the same manner as another person.

(b) Time spent in Kentucky and progress made in fulfilling the conditions of domicile and residency prior to obtaining permanent residency status shall be considered in establishing Kentucky domicile and residency.

(2) A person holding a nonimmigrant visa with designation A, E, G, H, L, I, N, O, P, R, S, TD or TN shall establish domicile and residency the same as another person.

(b) A dependent person holding a visa as described in paragraph (a) of this subsection, but who is a dependent of a parent holding a visa as described in subsection (2) of this section, shall be considered as holding the visa of the parent.

(c) A dependent person holding a visa described in subsection (2) of this section or paragraph (a) of this subsection, if a parent is a citizen of the United States and is a resident of and domiciled in Kentucky, shall be a resident of Kentucky for the purposes of this administrative regulation.

Section 9. Beneficiaries of a Kentucky Educational Savings Plan Trust. A beneficiary of a Kentucky Educational Savings Plan Trust shall be granted residency status if the beneficiary meets the requirements of KRS 164A.330(9).

Section 10. Criteria Used in a Determination of Residency Status.

(1) A determination of Kentucky domicile and residency shall be based upon verifiable circumstances or actions. A single fact shall not be paramount, and each situation shall be evaluated to identify those facts essential to the determination of domicile and residency.

(2) The following facts, although not conclusive, shall have probative value in their entirety and shall be individually weighted, appropriate to the facts and circumstances in each determination of residency:
(a) Acceptance of an offer of full-time employment or transfer to an employer in Kentucky or contiguous area while maintaining residence and domicile in Kentucky;
(b) Continuous physical presence in Kentucky while in a nonstudent status for the twelve (12) months immediately preceding the start of the academic term for which a classification of Kentucky residency is sought;
(c) 1. Filing of Kentucky resident income tax return for the calendar year preceding the date of application for a change in residency status; or
2. Payment of Kentucky withholding taxes while employed during the calendar year for which a change in classification is sought;
(d) Full-time employment of at least one (1) year while living in Kentucky;
(e) Attendance as a full-time, nonresident student at an out-of-state institution based on a determination by that school that the person is a resident of Kentucky;
(f) Abandonment of a former domicile or residence and establishing
(1) A student shall register under the proper residency classification which includes ...

Section 11. Effect of a Change in Circumstances on Residency Status.
(1) If a person becomes independent or if the residency status of a parent or parents of a dependent person changes, an institution shall reassess residency either upon a request by the student or a review initiated by an institution.
(2) Upon transfer to a Kentucky institution, a student’s residency status shall be reassessed by the receiving institution.
(3) A reconsideration of a determination of residency status for a dependent reassessed by the receiving institution.

Section 12. Student Responsibilities.
(1) A student shall register under the proper residency classification which includes the following actions:
   (a) Raising a question in a timely manner concerning residency classification;
   (b) Making application for change of residency classification in a timely manner with the designated office or person at the institution; and
   (c) Notifying the designated officer or person at the institution immediately upon a change in residency.
(2) If a student fails to notify an institutional official of a change in residency, an institutional official may investigate and evaluate the student’s current residency status.
(3) (a) If a student fails to provide, by the date specified by the institution, information required by an institution in a determination of residency status, the student shall be notified by the institution that the review has been canceled and that a determination has been made.
   (b) Notification shall be made by registered mail, return receipt requested.
   (c) Notification shall be made within ten (10) calendar days after the deadline for receipt of materials has passed.
(4) A student shall not be entitled to appeal a determination of residency status if the determination made by an institution is because a student has failed to meet published deadlines for the submission of information as set forth in subsection (3) of this section. A student may request a review of a determination of residency status in a subsequent academic term.

Section 13. Institutional Responsibilities.
Each institution shall:
(1) Provide for an administrative appeals process that includes a residency appeals officer to consider student appeals of an initial residency determination and which shall include a provision of fourteen (14) days for the student to appeal the residency appeals officer’s determination.
(2) Establish a residency review committee to consider appeals of residency determinations by the residency appeals officer. The residency review committee shall make a determination of student residency status and notify the student in writing within forty-five (45) days after receipt of the student appeal.
(3) Establish a formal hearing process as described in Section 14 of this administrative regulation.
(4) Establish written policies and procedures for administering the responsibilities established in subsections (1), (2), and (3) of this section and that are:
   (a) Approved by the institution’s governing board;
   (b) Made available to all students; and
   (c) Filed with the council.

(1) A student who appeals a determination of residency by a residency review committee shall be granted a formal hearing by an institution if the request is made by a student in writing within fourteen (14) calendar days after notification of a determination by a residency review committee.
(2) If a request for a formal hearing is received, an institution shall appoint a hearing officer to conduct a formal hearing. The hearing officer:
   (a) Shall be a person not involved in determinations of residency at an institution except for formal hearings; and
   (b) Shall not be an employee in the same organizational unit as the residency appeals officer.
(3) An institution shall have written procedures for the conduct of a formal hearing that have been adopted by the board of trustees or regents, as appropriate, and that provide for:
   (a) A hearing officer to make a recommendation on a residency appeal;
   (b) Guarantees of due process to a student that include:
      1. The right of a student to be represented by legal counsel; and
      2. The right of a student to present information and to present testimony and information in support of a claim of Kentucky residency;
   (c) A recommendation to be issued by the hearing officer.
(4) An institution’s formal hearing procedures shall be filed with the Council on Postsecondary Education and shall be available to a student requesting a formal hearing.

Section 15. Cost of Formal Hearings.
(1) An institution shall pay the cost for all residency determinations including the cost of a formal hearing.
(2) A student shall pay the cost of all legal representation in support of the student’s claim of residency. (17 Ky.R. 2557; eff. 4-5-91; Am. 22 Ky.R. 1665; 1988; eff. 5-16-96; 23 Ky.R. 3380; 8797; 4099; eff. 6-16-97; 24 Ky.R. 2136; 2705; 25 Ky.R. 51; eff. 7-13-98; 25 Ky.R. 2177; 2577; 2627; eff. 6-7-99.)

Revised Effective June 7, 1999

For further information about residency, please contact the Registrar’s Office, Funkhouse Bldg., University of Kentucky, Lexington, KY 40506-0054.
